Whether you want to build data science/machine learning models, deploy your work to production, or securely manage a team of engineers, Anaconda provides the tools necessary to succeed. This documentation is designed to aid in building your understanding of Anaconda software and assist with any operations you may need to perform to manage your organization's users and resources.

CHAPTER

TWO

CAPABILITIES

The following table lists the capabilities available for each tier of Anaconda. Depending on your set of problems, one bundle of capabilities may be better suited to your needs.

Note: Use of Anaconda's offerings at an organization of 200 or more employees or contractors requires a Business or Enterprise license. Further, a Business or Enterprise license is always required for any individual or entity that is embedding, mirroring, or providing third parties access to our products. For more information, see our Terms of Service.

Capabilities	Free	Starter	Pro*	Business	Enterprise
Distribution & Packages	Yes	Yes	Yes	Yes	Yes
Navigator	Yes	Yes	Yes	Yes	Yes
Anaconda AI Navigator	Yes	Yes	Yes	Yes	Yes
Anaconda Toolbox in Excel	Yes	Yes	Yes	Yes	Yes
Anaconda Code (beta)	Yes	Yes	Yes	Yes	Yes
Anaconda Community	Yes	Yes	Yes	Yes	Yes
Cloud Notebooks	5GB	10GB	20GB	20GB	Unlimited
Anaconda Assistant	30 daily chats	60	120	120	Unlimited
Anaconda Learning	Limited	Yes	Yes	Yes	Yes
Curated Repository	—	—	Yes	Yes	Yes
Signature Verification	—	—	Yes	Yes	Yes
CVE Visibility	—	—	—	Yes	Yes
Policy Filters	—	—	—	Yes	Yes
Virtual Channels	—	—	—	Yes	Yes
Site License	—	—	—	Yes	Custom
On-prem/Air-gap	—	—	—	Add-on	Add-on
Collaboration	—	—	—	—	Yes
Deployment	—	—	—	—	Yes

Note: * Pro is a legacy tier no longer available for purchase.

2.1 Distribution & Packages

The *Anaconda Distribution* installer provides users with conda–the environment and package manager–and the Anaconda Distribution, a Python data science distribution of over 300 popular data science and machine learning packages.

The *Miniconda* installer is a lightweight version of the Anaconda Distribution installer that only provides conda, its dependencies, and a few other select packages.

Anaconda's public package repository, repo.anaconda.com, provides 8,000+ open-source data science and machine learning packages. Users can install and update these packages on all major operating systems and architectures using conda.

2.2 Navigator

Anaconda Navigator is a desktop graphical user interface (GUI) included in Anaconda Distribution that allows you to launch applications and manage conda packages, environments, and channels without using command line interface (CLI) commands. Navigator can search for packages on Anaconda.org or in a local Anaconda Repository. It is available for Windows, macOS, and Linux.

2.3 Anaconda AI Navigator

Anaconda AI Navigator is a desktop application from Anaconda that enables you to browse, download, and run Generative AI Models directly on your device. It features a user-friendly interface to guide you through our catalog of LLMs with various parameter counts, sizes, and capabilities so you can find the right model for your specific device—all in a secure and private desktop environment. This tool allows you to experiment with and leverage these models to meet your specific use cases and organizational requirements.

2.4 Anaconda Toolbox in Excel

Anaconda Toolbox is an Excel add-in that makes Python accessible from your spreadsheets, even if you're not an expert. Quickly generate, save, and share code across Excel and Notebooks, create visualizations, and get help from our Anaconda Assistant, learning Python as you go.

2.5 Anaconda Code

Anaconda Code empowers you to write Python code and run it locally, directly within Excel. This gives you flexibility and control over the Python environment in your workbook, allowing you to add and remove packages as needed, all while keeping code and data securely within your workbook.

2.6 Anaconda Community

Engage with others in the Anaconda Community Forum and learn the basics and beyond with instructor-guided walk-throughs and lessons from Anaconda Learning.

2.7 Cloud Notebooks

Anaconda Notebooks allows anyone, anywhere to begin their data science journey. Spin up awesome data science projects directly from your browser with all the packages and computing power you need.

2.8 Anaconda Assistant

Write and debug code, analyze data, and visualize results with Anaconda Assistant, available in *cloud notebooks* and *local notebooks*.

2.9 Anaconda Learning

Master the foundations of data science through a full library of structured, on-demand courses. Code along with your course instructors, develop projects, and save your progress directly inside Anaconda Learning.

2.10 Curated Repository

Access Anaconda's curated premium repository, designed to support your business or enterprise with tokenized access and a guaranteed uptime Service Level Agreement (SLA).

2.11 Signature Verification

Signature verification certifies the integrity and authenticity of packages downloaded from the Anaconda Repository.

2.12 CVE Visibility

View CVE (Common Vulnerabilities and Exposures) data associated with your channels' packages. Anaconda regularly pulls its CVE databases from the National Vulnerability Database (NVD) and the US National Institute of Standards and Technology (NIST) to minimize the risk of vulnerable software in our applications and web pages. Anaconda has an extensive and well-established process for curating CVEs, assessing whether or not packages that Anaconda built are affected by any CVEs, determining which versions in our repository are affected, and mitigating the vulnerability.

- *CVE documentation for Package Security Manager (Cloud)*
- CVE documentation for Package Security Manager (On-prem) and Workbench

2.13 Policy Filters

Apply policy filters to a channel to restrict the available packages that channel can source. You can filter packages by license, Common Vulnerabilities and Exposures (CVE) score, CVE status, package age, and by using the conda spec.

- *Policy filter documentation for Package Security Manager (Cloud)*
- Mirroring filter documentation for Package Security Manager (On-prem) and Workbench

2.14 Virtual Channels

Customize virtual copies of Anaconda-curated and -maintained repositories for your organization with policy filters, allowing for multiple variances of a repository's package set.

- *Channel documentation for Package Security Manager (Cloud)*
- Channel documentation for Package Security Manager (On-prem)
- Channel documentation for Workbench

2.15 Site License

Large organizations with thousands of members can purchase a site license to provide access to all users in the organization with a single license. For more information, see site license.

2.16 On-prem/Air-gap

Enable governance and security compliance for your users in a dedicated, on-premise artifact repository that can be installed on your infrastructure, in your private cloud, or made available through a managed service implementation.

- Air-gapped environment preparation for Package Security Manager (On-prem).
- Preparing a BYOK8s environment for Workbench

2.17 Collaboration

Share your projects with authorized users for increased collaboration on enterprise-level efforts. Connect to an external version control repository and fine-tune user access on the individual project and repository level.

2.18 Deployment

Publish your interactive data visualizations, live notebooks, and machine learning models in a self-contained deployment with all the necessary dependencies. View activity and system logs to gain insights into your user services and troubleshoot issues.

2.18.1 Getting started with Anaconda

Welcome to Anaconda! This topic can help you decide which Anaconda installer to download and whether to use conda (CLI) or Anaconda Navigator (GUI) for managing environments and packages. You'll also find several resources to build your understanding of Anaconda's most popular offerings.

Should I use Anaconda Distribution or Miniconda?

Both the Anaconda Distribution and Miniconda installers include the conda package and environment manager, but how you plan to use the software will determine which installer you want to choose.

Install Anaconda Distribution

Install Miniconda

	Anaconda Distribution	Miniconda
Created and published by Anaconda	Yes	Yes
Has conda	Yes	Yes
Has *Anaconda Navigator*	Yes	No
# of packages	300+	< 70
Install space required	~4.4 GB	~480 MB

What's your experience level?

I'm just starting out and don't know what packages I should use.
Install Anaconda Distribution! It includes over *300 standard data science and machine learning packages*, which will give you a kickstart in your development journey.

I don't have much experience with the command line.
Install Anaconda Distribution! The install includes Anaconda Navigator, a desktop application that is built on top of conda. You can use Navigator's graphical user interface (GUI) to create environments, install packages, and launch development applications like Jupyter Notebooks and Spyder. For more information on Navigator, see *Getting started with Navigator*.

I know exactly what packages I want to use and I don't want a large download.
Install Miniconda! Miniconda is a minimal installer that only includes a very small installation of Anaconda's distribution—conda, Python, and a few other packages. For more information, see the *Miniconda documentation*.

I only use the command line.
Install Miniconda *or* Anaconda Distribution! Both installations include conda, the command line package and environment manager. For more information on conda, see the conda Getting Started page or download the conda cheatsheet.

Should I use Anaconda Navigator or conda?

Anaconda Navigator is a desktop application that is included with every installation of Anaconda Distribution. It is built on top of conda, the open-source package and environment manager, and allows you to manage your packages and environments from a graphical user interface (GUI). This is especially helpful when you're not comfortable with the command line.

Note: Anaconda Navigator is not included with Miniconda. Use the command `conda install anaconda-navigator` to manually install Navigator onto your computer.

A command line interface (or CLI) is a program on your computer that processes text commands to do various tasks. Conda is a CLI program, which means it can only be used via the command line. On Windows computers, Anaconda recommends that you use the Anaconda Prompt CLI to work with conda. On macOS and Linux, users can use their built-in command line applications.

Navigator resources

- *Getting started with Navigator (10 minutes)*
- *Navigator user guide*

Conda resources

- Getting started with conda (20 minutes)

2.18.2 Anaconda Distribution

The Most Trusted Distribution for Data Science

Anaconda® Distribution is a Python/R data science distribution that contains:

- conda - a package and environment manager for your command line interface
- *Anaconda Navigator* - a desktop application built on conda, with options to launch other development applications from your managed environments
- *Over 300 automatically-installed packages* that work well together out of the box
- Access to the Anaconda Public Repository, with 8000 open-source data science and machine learning packages

Is Anaconda Distribution free for me?

> For details on Anaconda Distribution and Anaconda's Terms of Service, see our Terms of Service FAQ and our official Terms of Service.

Troubleshooting Follow along with step-by-step videos to download and install Anaconda, learn the basics, and gain hands-on experience from the Anaconda Learning team here:

Anaconda Learning

System requirements

As of 2024-10-21

- License: Free for individuals and small organizations (<200 employees). A paid license is required for larger organizations and anyone embedding or mirroring Anaconda. See the TOS for details.
- Operating system: Windows 10 or later, 64-bit macOS 10.15+ (for Intel) or 64-bit macOS 11.1+ (for Apple Silicon), or Linux, including Ubuntu, RedHat, CentOS 7+, and others.
- If your operating system is older than what is currently supported, you can find older versions of the Anaconda installers in our archive that might work for you. See *Using Anaconda on older operating systems* for version recommendations.
- System architecture: Windows - 64-bit x86; macOS - 64-bit x86 or Apple Silicon (ARM64); Linux - 64-bit x86, 64-bit aarch64 (AWS Graviton2), or s390x (Linux on IBM Z & LinuxONE).
- The `linux-aarch64` Miniconda installer requires `glibc >=2.26` and thus will **not** work with CentOS 7, Ubuntu 16.04, or Debian 9 ("stretch").
- The `linux-aarch64` package builds might not be compatible with certain Raspberry Pi setups, as Anaconda uses compiler options that target the server-class Neoverse N1/N2 microarchitecture.
- Minimum 5 GB disk space to download and install.

Note: It is best practice to install Anaconda Distribution for the local user, which does not require administrator permissions and is the most robust type of installation. However, if you have administrator permissions, you can install Anaconda Distribution system-wide.

Installing Anaconda Distribution

Using Anaconda in a commercial setting?

You might need to purchase a license to stay compliant with our Terms of Service.

This page provides instructions for installing Anaconda Distribution on Windows, macOS, and Linux.

Note: If you prefer an installation without the extensive collection of packages included in Anaconda Distribution, *install Miniconda* instead.

Miniconda is a free, miniature installation of Anaconda Distribution that includes only conda, Python, the packages they both depend on, and a small number of other useful packages.

Basic install instructions

Note: If you've installed multiple versions of Anaconda Distribution, the system defaults to using the most current version, as long as you haven't altered the default install path.

Windows installation

Tip: More of a visual learner? and watch the Installing Anaconda (Windows) video in our Get Started with Anaconda course. This video guides you through installation in a quick two minutes.

1. Download the installer from the Anaconda website or by using your preferred command line interface:

Anaconda website

Command Prompt

Open a Command Prompt window and run the following command:

```
curl https://repo.anaconda.com/archive/Anaconda3-2024.10-1-Windows-x86_64.
↪exe --output .\Downloads\Anaconda3-2024.10-1-Windows-x86_64.exe
```

To download a different version

View a full list of Anaconda Distribution installers in the official archive.

To download a different version of Anaconda Distribution, copy the **Filename** of an installer from the archive, then download it using a `curl` command:

```
# Replace <FILENAME> with the installer Filename you copied from␣
↪the archive
curl https://repo.anaconda.com/archive/<FILENAME> --output
↪<FILENAME>
```

Caution: Ensure that you are downloading an installer that is compatible with your operating system!

PowerShell

Open a PowerShell window and run the following command:

```
wget "https://repo.anaconda.com/archive/Anaconda3-2024.10-1-Windows-x86_64.
↪exe" -outfile ".\Downloads\Anaconda3-2024.10-1-Windows-x86_64.exe"
```

To download a different version

View a full list of Anaconda Distribution installers in the official archive.

To download a different version of Anaconda Distribution, copy the **Filename** of an installer from the archive, then download it using a `wget` command:

```
# Replace <FILENAME> with the installer Filename you copied from␣
↪the archive
wget "https://repo.anaconda.com/archive/<FILENAME>"" -outfile ".\
↪Downloads\<FILENAME>"
```

> **Caution:** Ensure that you are downloading an installer that is compatible with your operating system!

2. (Recommended) Verify the integrity of your installer to ensure that it was not corrupted or tampered with during download.

How do I verify my installer's integrity?

To ensure that your downloaded installer has not been tampered with or corrupted, generate its SHA-256 hash value and compare it to the official hash provided in the archive.

1. Open PowerShell and run the following command:

   ```
   # Replace <INSTALLER_FILE> with the name of the downloaded␣
   ↪installer file
   Get-FileHash .\Downloads\<INSTALLER_FILE> -Algorithm SHA256
   ```

   For example:

   ```
   Get-FileHash .\Downloads\Anaconda3-2024.10-1-Windows-x86_64.exe␣
   ↪-Algorithm SHA256
   ```

2. Note the generated SHA-256 hash value from the output.
3. Visit repo.anaconda.com/archive to find the official SHA-256 hash for your installer.
4. Compare the hash values. If they match, the installer is safe to use.

Tip: For more information, see cryptographic hash verification in the official conda documentation.

---

3. Go to your Downloads folder (or Home folder if downloaded via CLI) and double-click the installer to launch.

> **Caution:** To prevent permission errors, do not launch the installer from the *Favorites folder*.

Note: If you encounter issues during installation, temporarily disable your anti-virus software during install, then re-enable it after the installation concludes. If you installed for **All Users**, *uninstall* Anaconda and re-install it for **Just Me** only.

---

4. Click **Next** and then agree to Anaconda's Terms of Service (TOS).
5. Select an installation option:
   - Just Me (Recommended) - Install Anaconda Distribution for the current user account.
   - All Users - Install Anaconda Distribution for all user accounts on the computer (requires Windows Administrator privileges).
6. Click **Next**.
7. Select a destination folder to install Anaconda, then click **Next**.

> **Caution:**
>
> - The installation directory path cannot contain spaces or Unicode characters. For more information, see the *FAQ*.
> - Do not install as Administrator unless admin privileges are required.

8. Customize your installation options:
   - Create shortcuts - Selected by default. Creates Start Menu shortcuts for the Anaconda Navigator, Spyder, Jupyter Notebook, and Anaconda Prompt packages. Deselecting this option skips creating these shortcuts.
   - Add Anaconda3 to my PATH environment variable - Adds the path that contains the conda binaries to your PATH environment variable.

     Anaconda **does not** recommend selecting this option. The conda binaries path contains other package binaries, which are permanently added to your PATH environment variable, even if no conda environment is currently active. This makes it possible for other software to use these package files, which might lead to errors.

     Note: Unless you plan on installing and running multiple versions of Anaconda Distribution or Python, open Anaconda Navigator or the Anaconda Prompt from the Start Menu to begin your environment management work.

     > **Caution:** As of `Anaconda Distribution 2022.05`, the option to add Anaconda to the PATH environment variable during an **All Users** installation has been disabled. This was done to address a security exploit. You can still add Anaconda to the PATH environment variable during a **Just Me** installation.

   - Register Anaconda3 as my default Python 3.12 - Selected by default. Registers the Python package in this install as the default Python for programs like VSCode, PyCharm, etc.

- Clear the package cache upon completion - Runs `conda clean --all --force-pkgs-dirs` after the install finishes. For more information on these commands, see the conda command documentation.

9. Click **Install**. The installation might take a few minutes to complete. Click **Show details** to view the packages being installed.
10. Click **Next** twice, then click **Finish** to close the installer.

Tip: If you are behind a company proxy, you might need to do some additional setup. For more information, see *Using Anaconda behind a company proxy*.

---

macOS/Linux installation

macOS Graphical installer

Tip: More of a visual learner? and watch the Installing Anaconda (Mac) video in our Get Started with Anaconda course. This video guides you through using the graphical installer in a quick two minutes.

Caution: The graphical installer for macOS installs Anaconda into `/opt/anaconda3` in your file system. If you want to install Anaconda into your Home directory or if you have multiple users on a system and want to manage your installation more carefully, Anaconda recommends following the instructions in the macOS Command Line installer tab.

1.
2. (Recommended) Verify the integrity of your installer to ensure that it was not corrupted or tampered with during download.

How do I verify my installer's integrity?

To ensure that your downloaded installer has not been tampered with or corrupted, generate its SHA-256 hash value and compare it to the official hash provided in the archive.

1. Open Terminal and run the following command:

```
# Replace <INSTALLER-FILE> with the name of the downloaded␣
↪installer file
shasum -a 256 ~/Downloads/<INSTALLER-FILE>
```

   For example:

   ```
   shasum -a 256 ~/Downloads/Anaconda3-2024.10-1-MacOSX-x86_64.pkg
   ```

2. Note the generated SHA-256 hash value from the output.
3. Visit repo.anaconda.com/archive to find the official SHA-256 hash for your installer.
4. Compare the hash values. If they match, the installer is safe to use.

Tip: For more information, see cryptographic hash verification in the official conda documentation.

3. Double-click the downloaded file and click **Continue** to start the installation.
4. View the Read Me instructions and click **Continue**.
5. Read through Anaconda's Terms of Service (TOS) and click **Continue**, then click **Agree** to agree to the terms.

Caution: For installer versions 2023.09 or older, the installer might skip the Destination Select page during installation, which will cause the installation to fail. If the installer skips this page, click **Change Install Location…** on the Installation Type page to get to this step.

6. Choose an install location:
   - Install for all users of this computer (Recommended) - Installs Anaconda Distribution into `/opt/anaconda3` for all users of the computer.
   - Install on a specific disk - Enables you to choose a different location to install Anaconda Distribution.

Caution: If you get the error message "You cannot install Anaconda in this location," reselect **Install for all users of this computer** and try again.

7. Click **Install**. The installation may take a few minutes to complete.

Note: If you get the error message "This package is incompatible with this version of macOS," please see *here* for troubleshooting help.

8. Click **Continue**.
9. Click **Close** to exit the installer.

macOS Command Line installer

1. Download the installer by opening a terminal and running one of the following commands (depending on your macOS architecture):

Apple Silicon

```
curl -O https://repo.anaconda.com/archive/Anaconda3-2024.10-1-MacOSX-arm64.
↪sh
```

Intel

```
curl -O https://repo.anaconda.com/archive/Anaconda3-2024.10-1-MacOSX-x86_64.
↪sh
```

To download a different version

View a full list of Anaconda Distribution installers in the official archive.

To download a different version of Anaconda Distribution, copy the **Filename** of an installer from the archive, then download it using a `curl` command:

```
# Replace <FILENAME> with the installer Filename you copied from␣
↪the archive
curl https://repo.anaconda.com/archive/<FILENAME> --output
↪<FILENAME>
```

> **Caution:** Ensure that you are downloading an installer that is compatible with your operating system!

2. (Recommended) Verify the integrity of your installer to ensure that it was not corrupted or tampered with during download.

How do I verify my installer's integrity?

To ensure that your downloaded installer has not been tampered with or corrupted, generate its SHA-256 hash value and compare it to the official hash provided in the archive.

1. Open Terminal and run the following command:

   ```
   # Replace <INSTALLER-FILENAME> with the name of the␣
   ↪downloaded installer file
   shasum -a 256 ~/<INSTALLER-FILENAME>
   ```

   For example:

   ```
   shasum -a 256 ~/Anaconda3-2024.10-1-MacOSX-arm64.sh
   ```

2. Note the generated SHA-256 hash value from the output.
3. Visit repo.anaconda.com/archive to find the official SHA-256 hash for your installer.
4. Compare the hash values. If they match, the installer is safe to use.

Tip: For more information, see cryptographic hash verification in the official conda documentation.

---

3. Install by running the following (depending on your macOS architecture):

Apple Silicon

```
bash ~/Anaconda3-2024.10-1-MacOSX-arm64.sh
```

Intel

```
bash ~/Anaconda3-2024.10-1-MacOSX-x86_64.sh
```

4. Press Return to review Anaconda's Terms of Service (TOS). Then press and hold Return to scroll.
5. Enter `yes` to agree to the TOS.
6. Press Return to accept the default install location (`PREFIX=/Users/<USER>/anaconda3`), or enter another file path to specify an alternate installation directory. The installation might take a few minutes to complete.
7. Choose an initialization options:
   - Yes - `conda` modifies your shell configuration to initialize conda whenever you open a new shell and to recognize conda commands automatically.
   - No - `conda` will not modify your shell scripts. After installation, if you want to initialize, you must do so manually. For more information, see *Manual shell initialization*.
8. The installer finishes and displays, "Thank you for installing Anaconda3!"
9. Close and re-open your terminal window for the installation to fully take effect, or use the following command to refresh the terminal:

```
source ~/.zshrc
```

Manual shell initialization

Once installation has successfully completed, initialize your shell by running the following command:

```
# Replace <PATH_TO_CONDA> with the path to your conda install
source <PATH_TO_CONDA>/bin/activate
conda init --all
```

If you want to specify the shell to initialize, see conda init in the official conda documentation for a list of supported shells.

Note: macOS 10.15 and later use `zsh` as the default shell. Once installation process has completed, initialize conda in a `zsh` shell by running the following commands:

```
source <PATH_TO_CONDA>/bin/activate
conda init zsh
```

Note: You can also control whether or not your shell has the base environment activated each time it opens. The following commands only work if conda has been initialized first:

Activated by default

```
conda config --set auto_activate_base True
```

Not activated by default

```
conda config --set auto_activate_base False
```

Linux installer

1. Download the latest version of Anaconda Distribution by opening a terminal and running one of the following commands (depending on your Linux architecture):

Linux x86

```
wget https://repo.anaconda.com/archive/Anaconda3-2024.10-1-Linux-x86_64.sh
```

AWS Graviton2/ARM64

```
wget https://repo.anaconda.com/archive/Anaconda3-2024.10-1-Linux-aarch64.sh
```

- The `linux-aarch64` package builds might not be compatible with certain Raspberry Pi setups, as Anaconda uses compiler options that target the server-class Neoverse N1/N2 microarchitecture.

IBMZ/LinuxOne/s390x

```
wget https://repo.anaconda.com/archive/Anaconda3-2024.10-1-Linux-s390x.sh
```

To download a different version

View a full list of Anaconda Distribution installers in the official archive.

To download a different version of Anaconda Distribution, copy the **Filename** of an installer from the archive, then download it using a `wget` command:

```
# Replace <FILENAME> with the installer Filename you copied from␣
↪the archive
wget https://repo.anaconda.com/archive/<FILENAME>
```

> **Caution:** Ensure that you are downloading an installer that is compatible with your operating system!

2. (Recommended) Verify the integrity of your installer to ensure that it was not corrupted or tampered with during download.

How do I verify my installer's integrity?

To ensure that your downloaded installer has not been tampered with or corrupted, generate its SHA-256 hash value and compare it to the official hash provided in the archive.

1. Open Terminal and run the following command:

   ```
   # Replace <INSTALLER-FILENAME> with the name of the␣
   ↪downloaded installer file
   shasum -a 256 ~/<INSTALLER-FILENAME>
   ```

   For example:

   ```
   shasum -a 256 ~/Anaconda3-2024.10-1-Linux-x86_64.sh
   ```

2. Note the generated SHA-256 hash value from the output.
3. Visit repo.anaconda.com/archive to find the official SHA-256 hash for your installer.
4. Compare the hash values. If they match, the installer is safe to use.

Tip: For more information, see cryptographic hash verification in the official conda documentation.

---

3. Install Anaconda Distribution by running one of the following commands (depending on your Linux architecture):

Linux x86

```
bash ~/Anaconda3-2024.10-1-Linux-x86_64.sh
```

AWS Graviton2/ARM64

```
bash ~/Anaconda3-2024.10-1-Linux-aarch64.sh
```

IBMZ/LinuxOne/s390x

```
bash ~/Anaconda3-2024.10-1-Linux-s390x.sh
```

4. Press Return to review Anaconda's Terms of Service (TOS). Then press and hold Return to scroll.
5. Enter `yes` to agree to the TOS.
6. Press Return to accept the default install location (`PREFIX=/Users/<USER>/anaconda3`), or enter another file path to specify an alternate installation directory. The installation might take a few minutes to complete.
7. Choose an initialization options:
   - Yes - `conda` modifies your shell configuration to initialize conda whenever you open a new shell and to recognize conda commands automatically.
   - No - `conda` will not modify your shell scripts. After installation, if you want to initialize, you must do so manually. For more information, see *Manual shell initialization*.
8. The installer finishes and displays, "Thank you for installing Anaconda3!"

9. Close and re-open your terminal window for the installation to fully take effect, or use the following command to refresh the terminal, depending on your shell:

Bash

```
source ~/.bashrc
```

Zsh

```
source ~/.zshrc
```

Fish

```
exec fish
```

Manual shell initialization

Once installation has successfully completed, initialize your shell by running the following command:

```
# Replace <PATH_TO_CONDA> with the path to your conda install
source <PATH_TO_CONDA>/bin/activate
conda init --all
```

If you want to specify the shell to initialize, see conda init in the official conda documentation for a list of supported shells.

Navigator dependencies

Anaconda Navigator is included with Anaconda Distribution by default. However, the following extended dependencies might be required for certain versions of Anaconda Distribution in order to use Anaconda Navigator (and other GUI packages) with Linux:

Debian

```
apt-get install libgl1-mesa-glx libegl1-mesa libxrandr2 libxrandr2 libxss1␣
↪libxcursor1 libxcomposite1 libasound2 libxi6 libxtst6
```

RedHat

```
yum install libXcomposite libXcursor libXi libXtst libXrandr alsa-lib mesa-
↪libEGL libXdamage mesa-libGL libXScrnSaver
```

ArchLinux

```
pacman -Sy libxau libxi libxss libxtst libxcursor libxcomposite libxdamage␣
↪libxfixes libxrandr libxrender mesa-libgl alsa-lib libglvnd
```

OpenSuse/SLES

```
zypper install libXcomposite1 libXi6 libXext6 libXau6 libX11-6 libXrandr2␣
↪libXrender1 libXss1 libXtst6 libXdamage1 libXcursor1 libxcb1 libasound2␣
↪libX11-xcb1 Mesa-libGL1 Mesa-libEGL1
```

Gentoo

```
emerge x11-libs/libXau x11-libs/libxcb x11-libs/libX11 x11-libs/libXext x11-
↪libs/libXfixes x11-libs/libXrender x11-libs/libXi x11-libs/libXcomposite x11-
↪libs/libXrandr x11-libs/libXcursor x11-libs/libXdamage x11-libs/
↪libXScrnSaver x11-libs/libXtst media-libs/alsa-lib media-libs/mesa
```

Note: You can also control whether or not your shell has the base environment activated each time it opens. The following commands only work if conda has been initialized first:

Activated by default

```
conda config --set auto_activate_base True
```

Not activated by default

```
conda config --set auto_activate_base False
```

Verify your install

Anaconda Navigator, the Graphical User Interface (GUI) for conda, should automatically open after successful installation of Anaconda Distribution.

If it does not, verify your installation by opening the application manually, or by using the CLI:

Opening Navigator manually

Windows

1. Search for "Anaconda Navigator" in the taskbar search.
2. Select **Anaconda Navigator**.

macOS

1. Click **Launchpad**.
2. Select **Anaconda Navigator**.

You can also use Cmd+Spacebar to open Spotlight Search and search for Navigator.

Linux

1. In most Linux distributions, use Ctrl+Alt+T to open a terminal application.
2. Open Navigator by running the following command:

```
anaconda-navigator
```

If Navigator does not open, review our *help resources*.

Using conda to verify manually

1. Access the CLI for your operating system:

Windows

1. Search for "Anaconda Prompt" in the taskbar search.
2. Select **Anaconda Prompt**.

macOS

1. Use Cmd+Spacebar to open Spotlight Search.
2. Type "Terminal" and press Return to open.

Linux

In most Linux distributions, use Ctrl+Alt+T to open a terminal application.

You should see `(base)` in the command line prompt. This tells you that you're in your base conda environment. To learn more about environments, see *Environments*.

2. Run any conda command. For example:
   - `conda list` - Displays a list of packages installed in your active environment and their versions.
   - `anaconda-navigator` - Opens Anaconda Navigator.

Advanced install options

For more advanced installation instructions, such as installing with silent mode, installing on older operating systems, or multi-user installs, see *Advanced installation*.

Other ways to get Anaconda or Miniconda

For instructions on using Anaconda Docker images or the Anaconda Cloudera Distributed Hadoop cluster, see *Applications/Integrations*.

Problems?

Visit Anaconda Cloud to start programming for FREE in a notebook. Learn how from Anaconda Learning, too!

Advanced installation

See the following topics for advanced installation options. For basic installation instructions, see *Installing Anaconda Distribution*.

Installing with silent mode

When installing in silent mode, you can supply additional arguments to the install command through your command line interface (CLI) or via script. Silent mode installation can be useful when deploying Anaconda Distribution to many clients, as the installation can be completed automatically without the user needing to manually select options in an installer wizard GUI or within the CLI itself.

> **Caution:** Installing silently automatically accepts Anaconda's Terms of Service (TOS). Make sure you review Anaconda's TOS before installing silently.

Windows

Download Anaconda Distribution manually from one of the links above or use `curl -O` to download via your CLI.

```
curl -O https://repo.anaconda.com/archive/Anaconda3-2024.10-1-Windows-x86_64.exe
```

To run the Windows installer for Anaconda in silent mode, use the `/S` argument. The following optional arguments are supported:

- `/InstallationType=[JustMe|AllUsers]`—Default is `JustMe`.
- `/AddToPath=[0|1]`—Default is `0`.

- /RegisterPython=[0|1]—Make this the system's default Python. Default is 0.
- /S—Install in silent mode.
- /D=<installation path>—Destination installation path. Must be the last argument. Do not wrap in quotation marks. Required if installing in silent mode.

All arguments are case-sensitive.

For example, the following batch file command installs Anaconda Distribution for the current user without registering Python as the system's default:

```
start /wait "" Anaconda3-2024.10-1-Windows-x86_64.exe /InstallationType=JustMe /
↪RegisterPython=0 /S /D=%UserProfile%Anaconda3
```

Note: As of Anaconda Distribution 2022.05, the option to add Anaconda to the PATH environment variable during an **All Users** installation has been disabled. This was done to address a security exploit. You can still add Anaconda to the PATH environment variable during a **Just Me** installation.

---

macOS/Linux

Download Anaconda Distribution manually from one of the links above or use curl -o to download via your CLI.

To run the silent installation of Miniconda for macOS or Linux, specify the -b and -p arguments of the bash installer. The following arguments are supported:

- -b—Batch mode with no PATH modifications to ~/.bashrc. Assumes that you agree to the license agreement. Does not edit the .bashrc or .bash_profile files.
- -p—Installation prefix/path.
- -f—Force installation even if the installation prefix/path already exists.

For example, the following batch file command installs Anaconda Distribution for the current user without registering Python as the system's default:

```
bash ~/Anaconda3-2024.10-1-MacOSX-x86_64.sh -b -p $HOME/anaconda3
```

The installer will not prompt you for anything, including setup of your shell to activate conda. To add this activation in your current shell session:

```
source ~/anaconda3/bin/activate
```

With this activated shell, install conda's shell functions for easier access in the future:

```
conda init --all
```

If you'd prefer that conda's base environment not be activated on startup, set the auto_activate_base parameter to false:

```
conda config --set auto_activate_base false
```

Using older versions of Anaconda Distribution

Anaconda recommends upgrading your operating system to the latest available or to one that is commonly used and supported. Upgrading your OS allows you to get the latest packages, performance improvements, bug fixes, and more.

Anaconda Distribution is currently available for:

Architecture	File name ending
Windows 64-bit	x86_64.exe
macOS Intel	x86_64.pkg, x86_64.sh
macOS Apple Silicon	arm64.pkg, arm64.sh
Linux x86_64	x86_64.sh
Linux AWS Graviton 2/ARM 64	aarch64.sh
Linux IBM Z	s390x.sh

Installing older versions of Anaconda Distribution

Note: Older versions of Anaconda Distribution are still subject to Anaconda's Terms of Service.

Older versions of Anaconda Distribution are still available for:

Architecture	File name ending
Windows 32-bit	x86.exe
Linux 32-bit Intel or AMD	x86.sh
Linux IBM Power CPU	ppc64le.sh

These versions can be downloaded from our archive. **However, these installations are no longer supported by Anaconda and most are no longer receiving security updates.**

Caution: You might not be able to use conda to update or install packages beyond what is included in the Anaconda Distribution version you've installed. This is because Anaconda Distribution provides a static bundle of packages from the time of release, but the repository continues to be updated over time. Older package versions may be removed or replaced, and the versions present in the repository might not be compatible with your operating system. For package lists for each version of Anaconda Distribution, see the *Anaconda Distribution release notes*.

Installing the `anaconda` metapackage

The `anaconda` metapackage is a version-locked collection of packages that were included in an Anaconda Distribution installer. Version-locked packages (also called pinned packages) are tied to a specific version of their software. Conda does not update pinned packages when resolving dependencies if other packages in the environment are added or modified. Because each package in the metapackage is pinned, *any attempt to update the environment will almost certainly result in build conflicts*.

However, it is still possible to install the `anaconda` metapackage and update the environment that contains it. For more information, see *Updating a metapackage environment*.

Note: The `anaconda` metapackage was removed from Anaconda Distribution installers in February of 2023 and no longer appears in your `base` environment by default.

Installing the metapackage

If you plan to install the `anaconda` metapackage, Anaconda recommends that you create an environment specifically for that metapackage first:

1. Open Anaconda Prompt (Terminal on macOS/Linux).
2. Create a new environment by running the following command:

```
# Replace <ENV> with the name of your environment
conda create --name <ENV>
```

3. (Optional) Search for metapackage versions available for install by running the following command:

```
conda search anaconda
```

4. Install the `anaconda` metapackage or specify a metapackage version by running one of the following commands:

Latest version

```
conda install anaconda
```

Specific version

```
# Replace <VERSION> with the specific version you want to install
conda install anaconda=<VERSION>
```

Updating a metapackage environment

If you have an environment containing the `anaconda` metapackage and need to update packages in that environment, you must first unpin the package versions in your environment. This is accomplished by installing the `anaconda=custom` version of the metapackage:

1. Open Anaconda Prompt (Terminal on macOS/Linux).
2. Open the environment containing the metapackage you want to update:

```
# Replace <ENV> with the name of your metapackage environment
conda activate <ENV>
```

3. Install the custom version of the `anaconda` package using the following command:

```
conda install anaconda=custom
```

4. Install or update packages as desired.

For more information on managing packages, see Managing packages in the conda documentation.

Installing for multiple users

The default Anaconda installation option is "Just Me," which creates an independent installation of Anaconda that will not be shared with other users on the same system. The other option is to install for all users.

If you have administrator access, you can choose to install for "All Users." This is a good option for a multi-user system where you want to allow users to import Python libraries and run Python applications.

This option does not give write permissions by default, so the users will not be able to install packages in the base environment. It allows an administrator to protect what is in the base environment. If packages are needed in the base environment, elevate the privileges to administrator from the Command Prompt and run install commands.

Windows

1.
2. Double-click the installer to launch.
3. Click **Next** to continue.
4. Read Anaconda's Terms of Service (TOS) and click **I Agree**.
5. Select an install for **All Users** (this requires administrator privileges on the computer) and click **Next**.
6. Click **Yes** to allow the installer to make changes to your computer.
7. Select a destination folder that is accessible to the users. The default is `C:\ProgramData\Anaconda`.
8. After your install is complete, open **Computer Management**, navigate to **Local Users and Groups**. Create a new group for your Anaconda users. Add users to this new group, Anaconda-Users.
9. Navigate to your Anaconda folder and then right-click and select **Properties**. Uncheck the box for **Attributes: Read-only** and save changes. Go to **Security** and click **Edit**. From there, add Anaconda-Users and set permissions. Your group will need read and write privileges.

Linux

Note: sudo access is required.

1. Install Anaconda.
2. After installation is complete, do the following:

```
#Create a new group
sudo groupadd mygroup
# Change the group ownership to "mygroup" on the entire directory where Anaconda is␣
↪installed.
# Replace /PATH/TO/ANACONDA/INSTALL with the actual path to your installed Anaconda␣
↪file.
sudo chgrp -R mygroup /PATH/TO/ANACONDA/INSTALL
# Set read and write permission for the owner, root, and the mygroup only.
# Replace /PATH/TO/ANACONDA/INSTALL with the actual path to your installed Anaconda␣
↪file.
sudo chmod 770 -R /PATH/TO/ANACONDA/INSTALL
# Add users to a group. Replace <USERNAME> with the username of the user you are␣
```

(continues on next page)

(continued from previous page)

```
↪adding.
sudo adduser <USERNAME> mygroup
```

Users added to the "mygroup" group now have the ability to access Anaconda, install packages, and create environments.

Installing Anaconda on an air-gap machine

1. Obtain a local copy of the appropriate Anaconda installer for the non-networked machine. You can copy the Anaconda installer to the target machine using many different methods, including a portable hard drive, USB drive, or CD.
2. After copying the installer to the non-networked machine, follow the detailed installation instructions for your operating system.

Tip: Install offline copies of docs.anaconda.com, business-docs.anaconda.com, and enterprise-docs.anaconda.com by installing the conda package anaconda-docs: `conda install anaconda-docs`

After installing `anaconda-docs`, you can find the downloaded documentation in your environment's `share/doc` folder.

For example, if the environment where you installed `anaconda-docs` is called `doc-environment`, you can find the downloaded documentation in `anaconda3/envs/doc-environment/share/doc`.

Anaconda Distribution release notes

The release notes below contain changes for each Anaconda Distribution version, as well as which packages are available in each installer, organized by operating system.

An RSS feed is updated each time a new package is added to the Anaconda package repository.

Note: To request a package not listed on this page, please create an issue on the Anaconda issues GitHub page.

Anaconda 2024.10-1 (Oct 23, 2024)

Python version: 3.12.7

User-facing Changes

- Conda has been updated to v24.9.2.
- A .condarc file is written into the installation directory to set the channel to Anaconda's defaults channels.
- Windows Start Menu entries are now inside separate Anaconda directories for each Miniconda installation.
- For single-user installations, Anaconda Prompt and Anaconda PowerShell Prompt have been added to the Windows Terminal profile list and can be launched directly from the tab dropdown menu (Windows 11). Windows Terminal is available in the Microsoft Store.

Anaconda 2024.06-1 (Jun 26, 2024)

Python version: 3.12.4

User-facing Changes

For macOS pkg installers, the Anaconda Navigator auto-launcher has been has been disabled for this release due to a known bug.

The `anaconda` metapackage, which the installer provides as its base environment, was reviewed and refreshed. Here are some notable changes:

Updates to major packages:

- python 3.12.4
- conda 24.5.0
- astropy 6.1.0
- dask 2024.5.0
- networkx 3.2.1
- numpy 1.26.4
- pandas 2.2.2
- scikit-image 0.23.2
- scikit-learn 1.4.2
- scipy 1.13.1
- sphinx 7.3.7
- spyder 5.5.1

Removed:

- pytables on linux-s390x

Enhancements

- `sh` installers: progress bars are no longer rendered during batch installations.
- `sh` installers: available disk space is checked before installing Anaconda.

Included packages

Anaconda 2024.02-1 (Feb 26, 2024)

Python version: 3.11.7

User-facing Changes

The anaconda meta package, which the installer provides as its base environment, was reviewed and refreshed. Here are some notable changes:

Updates to major packages:

- conda 24.1.2
- numpy 1.26.3
- pandas 2.1.4
- notebook 7.0.8
- jupyterlab 4.0.11

Added:

- jupyterlab-variableinspector
- mypy
- pycodestyle
- streamlit

Removed:

- python-kaliedo
- dal and daal4py
- scikit-learn-intelex and intel-openmp
- tbb4py
- transformers
- unixodbc

Bug Fixes

- macOS `.pkg` installers install into `/opt` now to circumvent this issue. The user will be prompted for authorization when using the new default path. The macOS `.sh` installers remain unchanged.

Included packages

Anaconda 2023.09-0 (Sep 29, 2023)

Python version: 3.11.5

User-facing Changes

This version of the Anaconda Distribution has many major updates:

- OpenSSL 3.0
- Numpy 1.25.2
- matplotlib 2.7.2
- pandas 2.0.3
- huggingface_hub 0.15.1
- conda 23.7.4
- Anaconda Navigator 2.5.0

A couple of important additions:

- Kaliedo (v0.2.1), a static data viz generator for web-based visualization libraries
- anaconda-anon-usage, a package designed to augment the anonymous telemetry being sent by conda

Included packages

Anaconda 2023.07-2 (Aug 04, 2023)

Python version: 3.11.4

User-facing Changes

- Conda has been updated to v23.7.2
- Jupyter_client and pyzmq have been downgraded to v7.4.9 and v23.2.0, respectively (see jupyter pull request 6749).

Anaconda 2023.07-1 (Jul 13, 2023)

Python version: 3.11.3

User-facing Changes

- Conda has been updated to v23.5.2 (conda issues 12873 and 12836).

Included packages

Packages

All Platforms

Anaconda 2023.07-0 (Jul 11, 2023)

Python version: 3.11.3

User-facing Changes

- Conda has been updated to v23.5.0.
- Anaconda Navigator launches after installation with exe and pkg installers.

Bug Fixes

- Address a bug that can cause accidental file deletion with Windows uninstallers (see our blog post). A security patch is available for older versions.
- Fix a conda update bug that removes packages installed via the Anaconda Distribution installer.

Known Issues

- The .pkg installers may skip the "Destination Select" page after accepting the license agreement. See our Anaconda installation instructions for details.

Included packages

Anaconda 2023.03-1 (Apr 24, 2023)

User-facing changes

- Conda has been updated to v23.3.1.

Bug fixes

- Drop the "py310" string from the installer filename (caused problems for downstream package managers e.g. WinGet). (Issue 13161)
- For Windows, enable allowance of spaces in the installation path. (Issue 13163)

Anaconda 2023.03-0 (Mar 20, 2023)

User-facing changes

- Conda has been updated to v23.1.0.
- This installer uses python-3.10.9.
- Anaconda Navigator has been updated to v2.4.0.
- Version numbers for Anaconda Distribution will now include a build number to track any changes to the distribution that occur before the next official release.

Major package updates:

- daal4py 2021.6.0 -> 2023.0.2
- datashader 0.14.1 -> 0.14.4
- holoviews 1.15.0 -> 1.15.4
- ipython 7.31.1 -> 8.10.0
- jupyter_console 6.4.3 -> 6.6.2
- jupyter_core 4.11.1 -> 5.2.0
- jupyter_server 1.18.1 -> 1.23.4
- jupyterlab 3.4.4 -> 3.5.3
- jupyterlab_server 2.10.3 -> 2.19.0
- matplotlib 3.5.2 -> 3.7.0
- numba 0.55.1 -> 0.56.4
- numpy 1.21.5 -> 1.23.5
- pandas 1.4.4 -> 1.5.3
- pillow 9.2.0 -> 9.4.0
- python 3.10.4 -> 3.10.9
- scikit-image 0.19.2 -> 0.19.3
- scikit-learn 1.0.2 -> 1.2.1
- scipy 1.9.1 -> 1.10.0
- seaborn 0.11.2 -> 0.12.2
- spyder 5.3.3 -> 5.4.1
- spyder-kernels 2.3.3 -> 2.4.1
- statsmodels 0.13.2 -> 0.13.5
- sympy 1.10.1 -> 1.11.1

Removed:

- anaconda-client
- anaconda-project
- conda-content-trust
- conda-token

Packages

Anaconda 2023.03-0 for 64-bit Windows with Python 3.10

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-navigator	2.4.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.3	Better dates & times for Python / Apache-2.0
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Cla
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing cl
automat	20.2.0	self-service finite-state machines for the programmer on the go / M
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PE
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browse
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossl
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and activ
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSI
conda	23.1.0	OS-agnostic, system-level binary package and environment manage
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clau
constantly	15.1.0	Symbolic constants in Python / MIT

Name	Version	Summary / License
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. /
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (pr
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional util
daal4py	2023.0.2	A convenient Python API to Intel (R) oneAPI Data Analytics Libra
dal	2023.0.1	Intel® oneDAL runtime libraries / Intel Simplified Software Licens
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
datashader	0.14.4	Data visualization toolchain based on aggregating into a grid / BSD
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MI
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docstring-to-markdown	0.11	On the fly conversion of Python docstrings to markdown / LGPL-2
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Do
entrypoints	0.4	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT A
executing	0.8.3	Get the currently executing AST node of a frame, and other informa
filelock	3.9.0	A platform independent file lock. / Unlicense
flake8	6.0.0	Your Tool For Style Guide Enforcement / MIT
flask	2.2.2	A simple framework for building complex web applications. / BSD
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / M
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
gensim	4.3.0	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applicati
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.18.5	GStreamer Base Plug-ins / GPL2
gstreamer	1.18.5	Library for constructing graphs of media-handling components / LG
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and mana
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
holoviews	1.15.4	Stop plotting your data - annotate your data and let it visualize itsel
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other r
hvplot	0.8.2	A high-level plotting API for the PyData ecosystem built on HoloV
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2022.1.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	3.4	Internationalized Domain Names in Applications (IDNA). / BSD-3
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / B
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Claus

Name	Version	Summary / License
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. /
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.7	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BS
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors.
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. /
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. /
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clau
jupyter_console	6.6.2	Jupyter terminal console / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.5.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.19.0	A set of server components for JupyterLab and JupyterLab like app
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted s
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solve
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	12.0.0	Development headers and libraries for Clang / Apache-2.0 WITH L
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compr

Name	Version	Summary / License
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot co
libogg	1.3.5	OGG media container / BSD-3-Clause
libpng	1.6.39	PNG reference library / Zlib
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuv	1.44.2	Cross-platform asynchronous I/O / MIT
libvorbis	1.3.7	Vorbis audio format / BSD-3-Clause
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but
llvmlite	0.39.1	A lightweight LLVM python binding for writing JIT compilers. / B
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Claus
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-libwinpthread-git	5.0.0.4634.697f757	MinGW-w64 winpthreads library / MIT, BSD
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clau
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
menuinst	1.4.19	cross platform install of menu items / BSD-3-Clause
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the M
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with th
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's Exe
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks /
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0

Name	Version	Summary / License
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
numba	0.56.4	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-
numpydoc	1.5.0	Sphinx extension to support docstrings in Numpy format / BSD-3-C
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis too
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.14.3	A high-level app and dashboarding solution for Python / BSD-3-Cl
param	1.12.3	Param: Make your Python code clearer and more reliable by declar
paramiko	2.8.1	SSH2 protocol library / LGPL-2.1-or-later
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
pathspec	0.10.3	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / B
pcre	8.45	Regular expression pattern matching using the same syntax and sem
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-speci
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / M
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.36	Library for building powerful interactive command lines in Python
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventio
psutil	5.9.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.10.0	Python style guide checker / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BS
pydocstyle	6.3.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause

Name	Version	Summary / License
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code ho
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pylint-venv	2.3.0	pylint-venv provides a Pylint init-hook to use the same Pylint instal
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pynacl	1.5.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Claus
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protoc
python-lsp-server	1.7.1	An implementation of the Language Server Protocol for Python / M
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.1	Python library for the snappy compression library from Google / B
pytoolconfig	1.2.5	Python tool configuration / LGPL-3.0-or-later
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPU
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pywin32	305	Python extensions for Windows / HPND AND BSD-3-Clause AND
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	2.0.10	Pseudoterminals for Windows in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-lat
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qstylizer	0.2.2	Qt stylesheet generation utility for PyQt/PySide / MIT
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-o
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-o
qtawesome	1.2.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.4.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built w
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	1.7.0	A python refactoring library / LGPL-3.0-or-later
rtree	1.0.1	R-Tree spatial index for Python GIS / MIT
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause

Name	Version	Summary / License
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BS
scikit-learn-intelex	2023.0.2	Intel(R) Extension for Scikit-learn is a seamless way to speed up yo
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
scrapy	2.8.0	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages /
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautifu
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
spyder	5.4.1	The Scientific Python Development Environment / MIT
spyder-kernels	2.4.1	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database eng
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informati
statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MI
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line ut
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works /
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdo
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Produc
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori

Name	Version	Summary / License
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlo
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
twisted-iocpsupport	1.0.2	An extension for use in the twisted I/O Completion Ports reactor. /
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bind
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and m
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character code
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch f
wheel	0.38.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Cl
xarray	2022.11.0	N-D labeled arrays and datasets in Python. / Apache-2.0
xlwings	0.29.1	Interact with Excel from Python and vice versa / BSD-3-Clause
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-
zfp	0.5.5	Library for compressed numerical arrays that support high throughp
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.11.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Z
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause

Anaconda 2023.03-0 for macOS on Apple M1 with Python 3.10

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-navigator	2.4.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop imp
appdirs	1.4.4	A small Python module for determining appropriate platform-specific d
applaunchservices	0.3.0	Simple package for registering an app with apple Launch Services to ha
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.3	Better dates & times for Python / Apache-2.0
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-o
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) wi
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing classe
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-3-C
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Claus
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or tex
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be faste
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. /
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSD-3-
conda	23.1.0	OS-agnostic, system-level binary package and environment manager. /
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause

Name	Version	Summary / License
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. / BSD
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (projec
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers / (B
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional utilities
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
datashader	0.14.4	Data visualization toolchain based on aggregating into a grid / BSD-3-C
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages th
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docstring-to-markdown	0.11	On the fly conversion of Python docstrings to markdown / LGPL-2.1-or
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domai
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND
executing	0.8.3	Get the currently executing AST node of a frame, and other information
filelock	3.9.0	A platform independent file lock. / Unlicense
flake8	6.0.0	Your Tool For Style Guide Enforcement / MIT
flask	2.2.2	A simple framework for building complex web applications. / BSD-3-C
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and Lice
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
gensim	4.3.0	Topic Modelling for Humans / LGPL-2.1-only
gettext	0.21.0	Internationalization package / GPL-2.0
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.12.1	HDF5 is a data model, library, and file format for storing and managing
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.4	Stop plotting your data - annotate your data and let it visualize itself. / B
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other repos
hvplot	0.8.2	A high-level plotting API for the PyData ecosystem built on HoloViews
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.4	Internationalized Domain Names in Applications (IDNA). / BSD-3-Cla

Name	Version	Summary / License
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling / MI
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.7	Data load and catalog system / BSD-2-Clause
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / M
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSI
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.5.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS v
jupyterlab_server	2.19.0	A set of server components for JupyterLab and JupyterLab like applicat
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sourc
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solver / B
krb5	1.19.4	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	12.0.0	Development headers and libraries for Clang / Apache-2.0 WITH LLVM
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libcxx	14.0.6	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compressi
libedit	3.1.20221030	Editline Library (libedit) / BSD-2-Clause

Name	Version	Summary / License
libev	4.33	A full-featured and high-performance event loop that is loosely modele
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libgfortran	5.0.0	Fortran compiler and libraries from the GNU Compiler Collection / GP
libgfortran5	11.3.0	Fortran compiler and libraries from the GNU Compiler Collection / GP
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLV
libllvm12	12.0.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLV
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / M
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.39	PNG reference library / Zlib
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / Postg
libprotobuf	3.20.3	Protocol Buffers - Google's data interchange format. C++ Libraries and
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuv	1.44.2	Cross-platform asynchronous I/O / MIT
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow
llvm-openmp	14.0.6	The OpenMP API supports multi-platform shared-memory parallel pro
llvmlite	0.39.1	A lightweight LLVM python binding for writing JIT compilers. / BSD-
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Claus
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C.
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-C
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point co
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkr
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the my
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's Execute
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.4	Library for text-based user interfaces / MIT AND X11
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause

Name	Version	Summary / License
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-
nss	3.74	A set of libraries designed to support cross-platform development of se
numba	0.56.4	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-C
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-C
numpydoc	1.5.0	Sphinx extension to support docstrings in Numpy format / BSD-3-Clau
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS protoc
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis tools. /
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.14.3	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.3	Param: Make your Python code clearer and more reliable by declaring
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS sele
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
pathspec	0.10.3	Utility library for gitignore style pattern matching of file paths. / MPL-
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / BSD
pcre	8.45	Regular expression pattern matching using the same syntax and semant
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. /
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / License
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific d
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python / BS
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions /
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.10.0	Python style guide checker / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause

Name	Version	Summary / License
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch data
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD-3
pydocstyle	6.3.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hostin
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pylint-venv	2.3.0	pylint-venv provides a Pylint init-hook to use the same Pylint installatio
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyobjc-core	9.0	Python<->ObjC Interoperability Module / MIT
pyobjc-framework-cocoa	9.0	Wrappers for the Cocoa frameworks on Mac OS X / MIT
pyobjc-framework-coreservices	9.0	Wrappers for the “CoreServices” framework on macOS. / MIT
pyobjc-framework-fsevents	9.0	Wrappers for the framework FSEvents on macOS / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySo
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amou
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause an
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. /
python-lsp-server	1.7.1	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.1	Python library for the snappy compression library from Google / BSD-
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop
pytoolconfig	1.2.5	Python tool configuration / LGPL-3.0-or-later
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPUs an
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5,
qstylizer	0.2.2	Qt stylesheet generation utility for PyQt/PySide / MIT
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.2.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.4.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute Java
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD

Name	Version	Summary / License
readline	8.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with .
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	1.7.0	A python refactoring library / LGPL-3.0-or-later
rtree	1.0.1	R-Tree spatial index for Python GIS / MIT
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BSD-3
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
scrapy	2.8.0	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all plat
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
sleef	3.5.1	SIMD library for evaluating elementary functions / BSL-1.0
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AN
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful doc
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp doc
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScrip
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docun
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “seri
spyder	5.4.1	The Scientific Python Development Environment / MIT
spyder-kernels	2.4.1	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database engine
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative di
statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Ap
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or m
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Cl
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and

Name	Version	Summary / License
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomain
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Production
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, origina
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlow /
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and more.
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. /
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files
wheel	0.38.4	A built-package format for Python. / MIT
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	2022.11.0	N-D labeled arrays and datasets in Python. / Apache-2.0
xlwings	0.29.1	Interact with Excel from Python and vice versa / BSD-3-Clause
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.1-or-
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-la
zfp	0.5.5	Library for compressed numerical arrays that support high throughput r
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.11.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND

Anaconda 2023.03-0 for macOS on Intel 64-bit with Python 3.10

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-navigator	2.4.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop imp
appdirs	1.4.4	A small Python module for determining appropriate platform-specific d
applaunchservices	0.3.0	Simple package for registering an app with apple Launch Services to ha
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.3	Better dates & times for Python / Apache-2.0
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-o
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) wi
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing classe
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-3-C
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Claus
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or tex
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be faste
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers.
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSD-3-
conda	23.1.0	OS-agnostic, system-level binary package and environment manager. /
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause

Name	Version	Summary / License
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. / BSD
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (projec
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers / (
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional utilities
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
datashader	0.14.4	Data visualization toolchain based on aggregating into a grid / BSD-3-C
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages th
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docstring-to-markdown	0.11	On the fly conversion of Python docstrings to markdown / LGPL-2.1-or
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domai
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND
executing	0.8.3	Get the currently executing AST node of a frame, and other information
filelock	3.9.0	A platform independent file lock. / Unlicense
flake8	6.0.0	Your Tool For Style Guide Enforcement / MIT
flask	2.2.2	A simple framework for building complex web applications. / BSD-3-C
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and Lice
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
gensim	4.3.0	Topic Modelling for Humans / LGPL-2.1-only
gettext	0.21.0	Internationalization package / GPL-2.0
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.4	Stop plotting your data - annotate your data and let it visualize itself. /
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other repos
hvplot	0.8.2	A high-level plotting API for the PyData ecosystem built on HoloViews
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.4	Internationalized Domain Names in Applications (IDNA). / BSD-3-Cla

Name	Version	Summary / License
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling / MI
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.7	Data load and catalog system / BSD-2-Clause
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / M
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSI
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BS
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clause
jupyter_console	6.6.2	Jupyter terminal console / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.5.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS v
jupyterlab_server	2.19.0	A set of server components for JupyterLab and JupyterLab like applicat
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sourc
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solver / B
krb5	1.19.4	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	12.0.0	Development headers and libraries for Clang / Apache-2.0 WITH LLVM

Name	Version	Summary / License
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libcxx	14.0.6	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compressi
libedit	3.1.20221030	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modele
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libgfortran	5.0.0	Fortran compiler and libraries from the GNU Compiler Collection / GP
libgfortran5	11.3.0	Fortran compiler and libraries from the GNU Compiler Collection / GP
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLV
libllvm12	12.0.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLV
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / M
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.39	PNG reference library / Zlib
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / Postg
libprotobuf	3.20.3	Protocol Buffers - Google's data interchange format. C++ Libraries and
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuv	1.44.2	Cross-platform asynchronous I/O / MIT
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow
llvm-openmp	14.0.6	The OpenMP API supports multi-platform shared-memory parallel pro
llvmlite	0.39.1	A lightweight LLVM python binding for writing JIT compilers. / BSD-
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Claus
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C.
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-C
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point co
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkr
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the my
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's Execute

Name	Version	Summary / License
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.4	Library for text-based user interfaces / MIT AND X11
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-
nss	3.74	A set of libraries designed to support cross-platform development of se
numba	0.56.4	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-C
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-C
numpydoc	1.5.0	Sphinx extension to support docstrings in Numpy format / BSD-3-Clau
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS protoc
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis tools. /
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.14.3	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.3	Param: Make your Python code clearer and more reliable by declaring
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS sele
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
pathspec	0.10.3	Utility library for gitignore style pattern matching of file paths. / MPL-
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / BSD
pcre	8.45	Regular expression pattern matching using the same syntax and semant
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. /
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / License
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific d
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python / BS
prompt_toolkit	3.0.36	Library for building powerful interactive command lines in Python / BS
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions /
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT

Name	Version	Summary / License
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.10.0	Python style guide checker / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch data
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD-3
pydocstyle	6.3.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hostin
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pylint-venv	2.3.0	pylint-venv provides a Pylint init-hook to use the same Pylint installatio
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyobjc-core	9.0	Python<->ObjC Interoperability Module / MIT
pyobjc-framework-cocoa	9.0	Wrappers for the Cocoa frameworks on Mac OS X / MIT
pyobjc-framework-coreservices	9.0	Wrappers for the “CoreServices” framework on macOS. / MIT
pyobjc-framework-fsevents	9.0	Wrappers for the framework FSEvents on macOS / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySo
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amou
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause an
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. /
python-lsp-server	1.7.1	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.1	Python library for the snappy compression library from Google / BSD-3
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop
pytoolconfig	1.2.5	Python tool configuration / LGPL-3.0-or-later
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPUs an
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5,
qstylizer	0.2.2	Qt stylesheet generation utility for PyQt/PySide / MIT
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only

Name	Version	Summary / License
qtawesome	1.2.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.4.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute Java
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with .
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	1.7.0	A python refactoring library / LGPL-3.0-or-later
rtree	1.0.1	R-Tree spatial index for Python GIS / MIT
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BSD-3
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
scrapy	2.8.0	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all plat
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AN
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful doc
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp doc
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScrip
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docun
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “seri
spyder	5.4.1	The Scientific Python Development Environment / MIT
spyder-kernels	2.4.1	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database engine
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative di
statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Ap
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or m
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Cl

Name	Version	Summary / License
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomain
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Production
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, origina
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlow /
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and more.
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. /
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files
wheel	0.38.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	2022.11.0	N-D labeled arrays and datasets in Python. / Apache-2.0
xlwings	0.29.1	Interact with Excel from Python and vice versa / BSD-3-Clause
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.1-or-
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-la
zfp	0.5.5	Library for compressed numerical arrays that support high throughput r
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.11.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND

Anaconda 2023.03-0 for 64-bit Linux on IBM Z CPUs with Python 3.10

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementa
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MI
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the po
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing classes by reli
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-3-Clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be faster than *m*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintain
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSD-3-Clause
conda	23.1.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-C
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. / BSD-3-Claus
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-C
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional utilities / BSD-3
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause

Table 32 – continued from previou

Name	Version	Summary / License
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
filelock	3.9.0	A platform independent file lock. / Unlicense
flask	2.2.2	A simple framework for building complex web applications. / BSD-3-Clause
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-F
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data / H
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-C
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other repos on the h
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Clause
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Claus
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD-3-Cla
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clause
jupyter_console	6.6.2	Jupyter terminal console / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / B
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSI
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-C

Table 32 – continued from previou

Name	Version	Summary / License
krb5	1.19.4	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-s390x	2.38	A set of programming tools for creating and managing binary programs, object
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and d
libedit	3.1.20221030	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after li
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-or
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3.1
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.39	PNG reference library / Zlib
libprotobuf	3.20.3	Protocol Buffers - Google's data interchange format. C++ Libraries and protoc,
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.41.5	Portable uuid C library 2.32.1 as pk-version 1.41.5. / BSD-3-Clause
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GP
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precisio
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computati
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algor

Table 32 – continued from previou

Name	Version	Summary / License
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreproce
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.4	Library for text-based user interfaces / MIT AND X11
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Claus
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS protocols / Op
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.12.6	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.3	Param: Make your Python code clearer and more reliable by declaring Paramete
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / BSD-2-Claus
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g.
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD-3-Cla
prompt_toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD-3-Cla
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Claus
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch data, ...) / B
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forum
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pyodbc	4.0.34	DB API Module for ODBC / MIT-0

Table 32 – continued from previou

Name	Version	Summary / License
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for m
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amounts of da
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apach
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-snappy	0.6.1	Python library for the snappy compression library from Google / BSD-3-Clause
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPUs and CPUs.
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
readline	8.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apach
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BSD-3-Clause
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. /
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT A
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database engine / blessing
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays /
statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / Tc
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Production / Apach
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause

Table 32 – continued from previou

Name	Version	Summary / License
tornado	6.1	A Python web framework and asynchronous networking library, originally devel
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlow / Apache-
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-C
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and more. / MIT
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.38.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.1-or-later and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Zlib
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2

Anaconda 2023.03-0 for 64-bit Linux on IBM Power CPUs with Python 3.10

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementa
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MI
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the po
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing classes by reli
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-3-Clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be faster than *m*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause

Name	Version	Summary / License
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and near
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintain
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSD-3-Clause
conda	23.1.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-C
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. / BSD-3-Claus
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-C
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional utilities / BSD-3
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
datashader	0.14.4	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
filelock	3.9.0	A platform independent file lock. / Unlicense
flask	2.2.2	A simple framework for building complex web applications. / BSD-3-Clause
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-F
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
gensim	4.3.0	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later

Name	Version	Summary / License
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data / H
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.4	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-C
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other repos on the h
hvplot	0.8.2	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.4	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Clause
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling / MIT
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.7	Data load and catalog system / BSD-2-Clause
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Claus
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD-3-Cla
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clause
jupyter_console	6.6.2	Jupyter terminal console / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.5.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables
jupyterlab_server	2.19.0	A set of server components for JupyterLab and JupyterLab like applications. / B
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSI
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-C
krb5	1.19.4	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.38	A set of programming tools for creating and managing binary programs, object
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause

Name	Version	Summary / License
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and d
libedit	3.1.20221030	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after li
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-or
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3.1
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-excep
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.39	PNG reference library / Zlib
libprotobuf	3.20.3	Protocol Buffers - Google's data interchange format. C++ Libraries and protoc,
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.41.5	Portable uuid C library 2.32.1 as pk-version 1.41.5. / BSD-3-Clause
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate
llvmlite	0.39.1	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clause
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GP
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precisio
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computati
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algor
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreproce
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause

Name	Version	Summary / License
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.4	Library for text-based user interfaces / MIT AND X11
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Claus
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
numba	0.56.4	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS protocols / Op
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.14.3	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.3	Param: Make your Python code clearer and more reliable by declaring Paramete
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors / B
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / BSD-2-Claus
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g.
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD-3-Cla
prompt_toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD-3-Cla
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3-C
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Claus
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch data, ...) / B
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD-3-Clause
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause

Name	Version	Summary / License
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forum
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for m
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amounts of da
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apach
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-snappy	0.6.1	Python library for the snappy compression library from Google / BSD-3-Clause
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPUs and CPUs.
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apach
requests-file	1.5.1	file transport adapter for Requests / Apache
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BSD-3-Clause
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
scrapy	2.8.0	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. /
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT A
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database engine / blessin
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays /
statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause

Name	Version	Summary / License
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / Tc
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a U
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Production / Apach
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally deve
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlow / Apache-
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-C
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.38.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	2022.11.0	N-D labeled arrays and datasets in Python. / Apache-2.0
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.1-or-later and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read and
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2

Anaconda 2023.03-0 for 64-bit Linux on ARMv8 CPUs with Python 3.10

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-navigator	2.4.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop impl
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.3	Better dates & times for Python / Apache-2.0
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing classes
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-3-Cla
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text.
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. /
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless ar
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively m
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSD-3-C
conda	23.1.0	OS-agnostic, system-level binary package and environment manager. / B
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause

Name	Version	Summary / License
constantly	15.1.0	Symbolic constants in Python / MIT
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. / BSD-3
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project t
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers / (BS
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional utilities /
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
datashader	0.14.4	Data visualization toolchain based on aggregating into a grid / BSD-3-Cl
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages tha
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docstring-to-markdown	0.11	On the fly conversion of Python docstrings to markdown / LGPL-2.1-or-l
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
executing	0.8.3	Get the currently executing AST node of a frame, and other information /
expat	2.4.9	Expat XML parser library in C / MIT
filelock	3.9.0	A platform independent file lock. / Unlicense
flake8	6.0.0	Your Tool For Style Guide Enforcement / MIT
flask	2.2.2	A simple framework for building complex web applications. / BSD-3-Cla
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fontconfig	2.14.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and Licens
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
gensim	4.3.0	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications w
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.4	Stop plotting your data - annotate your data and let it visualize itself. / BS
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other repos c
hvplot	0.8.2	A high-level plotting API for the PyData ecosystem built on HoloViews /
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	68.1	International Components for Unicode. / MIT

Name	Version	Summary / License
idna	3.4	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.7	Data load and catalog system / BSD-2-Clause
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.7.1	Pure Python DBus interface / MIT
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSD-
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clause
jupyter_console	6.6.2	Jupyter terminal console / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.5.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.19.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.4	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-aarch64	2.38	A set of programming tools for creating and managing binary programs,
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT

Name	Version	Summary / License
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	10.0.1	Development headers and libraries for Clang / Apache-2.0 WITH LLVM
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compressio
libedit	3.1.20221030	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled
libevent	2.1.12	An event notification library. / BSD-3-Clause
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MI
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.39	PNG reference library / Zlib
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / Postgre
libprotobuf	3.20.3	Protocol Buffers - Google's data interchange format. C++ Libraries and p
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.41.5	Portable uuid C library 2.32.1 as pk-version 1.41.5. / BSD-3-Clause
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxcb	1.15	This is the C-language Binding (XCB) package to the X Window System
libxkbcommon	1.0.1	keymap handling library for toolkits and window systems / MIT/X11 Der
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvmlite	0.39.1	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Cla
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point con
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C

Name	Version	Summary / License
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkre
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the myp
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.4	Library for text-based user interfaces / MIT AND X11
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-2
nss	3.74	A set of libraries designed to support cross-platform development of secu
numba	0.56.4	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Cla
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Cla
numpydoc	1.5.0	Sphinx extension to support docstrings in Numpy format / BSD-3-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.14.3	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.3	Param: Make your Python code clearer and more reliable by declaring Pa
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selec
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
pathspec	0.10.3	Utility library for gitignore style pattern matching of file paths. / MPL-2.
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.45	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dir
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0

Name	Version	Summary / License
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / B
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.10.0	Python style guide checker / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch data,
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD-3-C
pydocstyle	6.3.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pylint-venv	2.3.0	pylint-venv provides a Pylint init-hook to use the same Pylint installation
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-o
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0-o
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-o
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / M
python-lsp-server	1.7.1	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.1	Python library for the snappy compression library from Google / BSD-3-
pytoolconfig	1.2.5	Python tool configuration / LGPL-3.0-or-later
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPUs and
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qstylizer	0.2.2	Qt stylesheet generation utility for PyQt/PySide / MIT

Name	Version	Summary / License
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.2.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.4.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute JavaS
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . /
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	1.7.0	A python refactoring library / LGPL-3.0-or-later
rtree	1.0.1	R-Tree spatial index for Python GIS / MIT
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
scrapy	2.8.0	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help h
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serial
spyder	5.4.1	The Scientific Python Development Environment / MIT
spyder-kernels	2.4.1	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database engine / b
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative disp
statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. /
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apac
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause

Name	Version	Summary / License
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and T
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Production /
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlow / A
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR B
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings /
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and more. /
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files /
wheel	0.38.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	2022.11.0	N-D labeled arrays and datasets in Python. / Apache-2.0
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.1-or-la
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.11.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND

Anaconda 2023.03-0 for 64-bit Linux with Python 3.10

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-navigator	2.4.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop impl
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.3	Better dates & times for Python / Apache-2.0
astroid	2.14.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	22.1.0	attrs is the Python package that will bring back the joy of writing classes
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.11.0	Utilities to internationalize and localize Python applications / BSD-3-Cla
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text.
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. /
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2023.01.10	Certificates for use with other packages. / MPL-2.0
certifi	2022.12.7	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / Other
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless ar
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively m
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
colorama	0.4.6	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.1	Collection of perceptually uniform colormaps / CC-BY-4.0
comm	0.1.2	Python Comm implementation for the Jupyter kernel protocol / BSD-3-C
conda	23.1.0	OS-agnostic, system-level binary package and environment manager. / B
conda-build	3.23.3	tools for building conda packages / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause

Name	Version	Summary / License
constantly	15.1.0	Symbolic constants in Python / MIT
contourpy	1.0.5	Python library for calculating contours of 2D quadrilateral grids. / BSD-3
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project t
cryptography	39.0.1	Provides cryptographic recipes and primitives to Python developers / (BS
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.87.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cytoolz	0.12.0	Cython implementation of Toolz. High performance functional utilities /
daal4py	2023.0.2	A convenient Python API to Intel (R) oneAPI Data Analytics Library / A
dal	2023.0.1	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
datashader	0.14.4	Data visualization toolchain based on aggregating into a grid / BSD-3-Cl
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages tha
dill	0.3.6	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docstring-to-markdown	0.11	On the fly conversion of Python docstrings to markdown / LGPL-2.1-or-l
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
executing	0.8.3	Get the currently executing AST node of a frame, and other information /
expat	2.4.9	Expat XML parser library in C / MIT
filelock	3.9.0	A platform independent file lock. / Unlicense
flake8	6.0.0	Your Tool For Style Guide Enforcement / MIT
flask	2.2.2	A simple framework for building complex web applications. / BSD-3-Cla
flit-core	3.6.0	Simplified packaging of Python modules / BSD-3-Clause
fontconfig	2.14.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.12.1	A Free, High-Quality, and Portable Font Engine / GPL-2-only and Licens
fsspec	2022.11.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.3	Clean single-source support for Python 3 and 2 / MIT
gensim	4.3.0	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications w
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-
greenlet	2.0.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.4	Stop plotting your data - annotate your data and let it visualize itself. / BS
huggingface_hub	0.10.1	Client library to download and publish models, datasets and other repos c
hvplot	0.8.2	A high-level plotting API for the PyData ecosystem built on HoloViews /

Name	Version	Summary / License
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.4	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.26.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
imbalanced-learn	0.10.1	Python module to balance data set using under- and over-sampling / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.7	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.19.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.10.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.7.1	Pure Python DBus interface / MIT
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSD-
jinja2	3.1.2	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.17.3	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	7.3.4	Jupyter protocol implementation and client libraries. / BSD-3-Clause
jupyter_console	6.6.2	Jupyter terminal console / BSD-3-Clause
jupyter_core	5.2.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.23.4	Jupyter Server / BSD-3-Clause
jupyterlab	3.5.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.19.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.4	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.4	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.38	A set of programming tools for creating and managing binary programs,

Name	Version	Summary / License
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	10.0.1	Development headers and libraries for Clang / Apache-2.0 WITH LLVM
libcurl	7.87.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.17	libdeflate is a library for fast, whole-buffer DEFLATE-based compressio
libedit	3.1.20221030	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled
libevent	2.1.12	An event notification library. / BSD-3-Clause
libffi	3.4.2	A Portable Foreign Function Interface Library / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MI
libpng	1.6.39	PNG reference library / Zlib
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / Postgre
libprotobuf	3.20.3	Protocol Buffers - Google's data interchange format. C++ Libraries and p
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.5.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.41.5	Portable uuid C library 2.32.1 as pk-version 1.41.5. / BSD-3-Clause
libwebp	1.2.4	WebP image library / BSD-3-Clause
libwebp-base	1.2.4	WebP image library / BSD-3-Clause
libxcb	1.15	This is the C-language Binding (XCB) package to the X Window System
libxkbcommon	1.0.1	keymap handling library for toolkits and window systems / MIT/X11 Der
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvmlite	0.39.1	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.4	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markdown	3.4.1	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.1.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.7.0	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Cla
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings.

Name	Version	Summary / License
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point con
mpi	1.0	Metapackage to select the MPI variant. Use conda's pinning mechanism
mpich	3.3.2	A high performance widely portable implementation of the MPI standard
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the myp
nbclassic	0.5.2	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.5.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.7.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.4	Library for text-based user interfaces / MIT AND X11
nest-asyncio	1.5.6	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3
ninja	1.10.2	A small build system with a focus on speed / Apache-2.0
ninja-base	1.10.2	A small build system with a focus on speed / Apache-2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0
notebook	6.5.2	Jupyter Notebook / BSD-3-Clause
notebook-shim	0.2.2	A shim layer for notebook traits and config / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-2
nss	3.74	A set of libraries designed to support cross-platform development of secu
numba	0.56.4	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Cla
numpy-base	1.23.5	Array processing for numbers, strings, records, and objects. / BSD-3-Cla
numpydoc	1.5.0	Sphinx extension to support docstrings in Numpy format / BSD-3-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1t	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	22.0	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.5.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.14.3	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.3	Param: Make your Python code clearer and more reliable by declaring Pa
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selec
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Appendable key-value storage / BSD-3-Clause
pathspec	0.10.3	Utility library for gitignore style pattern matching of file paths. / MPL-2.
patsy	0.5.3	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.45	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR

Name	Version	Summary / License
pip	22.3.1	PyPA recommended tool for installing Python packages / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dir
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
pooch	1.4.0	A friend to fetch your data files / BSD-3-Clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.36	Library for building powerful interactive command lines in Python / BSD
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / B
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.10.0	Python style guide checker / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.5.0	python package common tasks for users (e.g. copy examples, fetch data,
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD-3-C
pydocstyle	6.3.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	3.0.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.16.2	python code static checker / GPL-2.0-or-later
pylint-venv	2.3.0	pylint-venv provides a Pylint init-hook to use the same Pylint installation
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	23.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-o
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0-o
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-o
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.10.9	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / M
python-lsp-server	1.7.1	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.1	Python library for the snappy compression library from Google / BSD-3-
pytoolconfig	1.2.5	Python tool configuration / LGPL-3.0-or-later
pytorch	1.12.1	PyTorch is an optimized tensor library for deep learning using GPUs and

Name	Version	Summary / License
pytz	2022.7	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.4.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qstylizer	0.2.2	Qt stylesheet generation utility for PyQt/PySide / MIT
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.2.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.4.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute JavaS
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . /
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	1.7.0	A python refactoring library / LGPL-3.0-or-later
rtree	1.0.1	R-Tree spatial index for Python GIS / MIT
scikit-image	0.19.3	Image processing in Python. / BSD-3-Clause
scikit-learn	1.2.1	A set of python modules for machine learning and data mining / BSD-3-C
scikit-learn-intelex	2023.0.2	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Sc
scipy	1.10.0	Scientific Library for Python / BSD-3-Clause
scrapy	2.8.0	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.12.2	Statistical data visualization / BSD-3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	65.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.3.2.post1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serial
spyder	5.4.1	The Scientific Python Development Environment / MIT
spyder-kernels	2.4.1	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.40.1	Implements a self-contained, zero-configuration, SQL database engine /

Name	Version	Summary / License

statsmodels	0.13.5	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.11.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility.
tbb	2021.7.0	High level abstract threading library / Apache-2.0
tbb4py	2021.7.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apac
terminado	0.17.1	Terminals served by tornado websockets / BSD-2-Clause
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss2	1.2.1	Low-level CSS parser for Python / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and T
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains
tokenizers	0.11.4	Fast State-of-the-Art Tokenizers optimized for Research and Production /
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.12.0	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.7.1	Configuration system for Python applications / BSD-3-Clause
transformers	4.24.0	State-of-the-art Machine Learning for JAX, PyTorch and TensorFlow / A
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.4.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022g	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR B
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings /
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.14	HTTP library with thread-safe connection pooling, file post, and more. /
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.2.2	The comprehensive WSGI web application library. / BSD-3-Clause
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files / M
wheel	0.38.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	2022.11.0	N-D labeled arrays and datasets in Python. / Apache-2.0
xz	5.2.10	Data compression software with high compression ratio / LGPL-2.1-or-la
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late

Name	Version	Summary / License
zfp	0.5.5	Library for compressed numerical arrays that support high throughput rea
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.11.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.13	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND

Anaconda 2022.10 (Oct 18, 2022)

User-facing changes

- Conda has been updated to v22.9.0.
- Anaconda Navigator has been updated to v2.3.1.
- This installer uses python-3.9.
- This is the first release that provides a python-3.10 variant for *anaconda* metapackages.
- This is the last release that will provide a python-3.7 variant for *anaconda* metapackages.
- Qt support for macOS M1 (osx-arm64), enabling full use of GUI applications like Anaconda Navigator and Spyder.

Major package updates

- anaconda-client 1.9.0 -> 1.11.0
- anaconda-project 0.10.2 -> 0.11.1
- bokeh 2.4.2 -> 2.4.3
- conda-content-trust 0.1.1 -> 0.1.3
- conda-token 0.3.0 -> 0.4.0
- daal4py 2021.5.0 -> 2021.6.0
- dask 2022.2.1 -> 2022.7.0
- datashader 0.13.0 -> 0.14.1
- holoviews 1.14.8 -> 1.15.0
- jupyter_client 6.1.12 -> 7.3.5
- jupyter_console 6.4.0 -> 6.4.3
- jupyter_core 4.9.2 -> 4.11.1
- jupyter_server 1.13.5 -> 1.18.1
- jupyterlab 3.3.2 -> 3.4.4
- matplotlib 3.5.1 -> 3.5.2

- pandas 1.4.2 -> 1.4.4
- pillow 9.0.1 -> 9.2.0
- python 3.9.12 -> 3.9.13
- requests 2.27.1 -> 2.28.1
- scipy 1.7.3 -> 1.9.1
- spyder 5.1.5 -> 5.3.3
- spyder-kernels 2.1.3 -> 2.3.3

Packages

Anaconda 2022.10 for 64-bit Windows with Python 3.9

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.11.0	anaconda.org command line client library / BSD-3-Clause
anaconda-navigator	2.3.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.11.1	Tool for encapsulating, running, and reproducing data science projects / BSD
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop impleme
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. /
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.11.7	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-late
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / B
bitarray	2.5.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster tha
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD
boto3	1.24.28	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.27.28	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT

Tab

Name	Version	Summary / License
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2022.07.19	Certificates for use with other packages. / MPL-2.0
certifi	2022.9.14	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and n
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maint
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
comtypes	1.1.10	pure Python COM package / MIT
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project temp
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apa
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BS
daal4py	2021.6.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / Apac
dal	2021.6.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.14.1	Data visualization toolchain based on aggregating into a grid / BSD-3-Claus
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that ma
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-
fftw	3.3.9	The fastest Fourier transform in the west. / GPL 2
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	4.0.1	Your Tool For Style Guide Enforcement / MIT

Tab

Name	Version	Summary / License
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseR
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can capture p
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.0	Stop plotting your data - annotate your data and let it visualize itself. / BSD-
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BS
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2022.1.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Cla
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryInt
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.31.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSD-2-C
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cl
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol.

Tab

Name	Version	Summary / License
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.4.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variabl
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications.
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.6.1	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT

openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.1	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Paran
paramiko	2.8.1	SSH2 protocol library / LGPL-2.1-or-later
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
pathspec	0.9.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cl
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-

Tab

prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Cl
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO f
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...)
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Clau
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, for
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pynacl	1.5.0	PyNaCl is a Python binding to the Networking and Cryptography library, a c
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.9.2	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks fo
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Ap
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.3.3	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Cla
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pywin32	302	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) / BSD 3 C
pywinpty	2.0.2	Pseudoterminals for Windows in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only

Tab

Name	Version	Summary / License
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT

clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-Clau
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-Claus
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apache-2.0
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD-3-Cl
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.14.1	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Dedicatio
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
fftw	3.3.9	The fastest Fourier transform in the west. / GPL 2
filelock	3.6.0	A platform independent file lock. / Unlicense
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-Free
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can capture patterns.
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-later
greenlet	1.1.0	Lightweight in-process concurrent programming / MIT

Table

Name	Version	Summary / License
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.12.1	HDF5 is a data model, library, and file format for storing and managing data / HDF5
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.0	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-Claus
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3-Cl
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Clause
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol. / BSD
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.4.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables / BS
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / BSD-
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSD-2-
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-Clause
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld64	530	Darwin Mach-O native linker / APSL-2.0
ld64_osx-arm64	530	Darwin Mach-O cross linker / APSL-2.0
ldid	2.1.2	pseudo-codesign Mach-O files / AGPL-3.0-only
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause

Table

Name	Version	Summary / License
libarchive	3.6.1	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libcurl	7.84.0	tool and library for transferring data with URL syntax / curl
libcxx	14.0.6	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and deco
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after libeve
libffi	3.4.2	A Portable Foreign Function Interface Library. / MIT
libgfortran	5.0.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only V
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only V
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert from/to Un
libidn2	2.3.1	Library for internationalized domain names (IDNA2008) support / LGPLv2 AND L
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libllvm14	14.0.6	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.4.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for manipulati
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate or z
llvm-openmp	14.0.6	The OpenMP API supports multi-platform shared-memory parallel programming in
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clause
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GPL-2
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v2+
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precision. /
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computations
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algorithm

Table

Name	Version	Summary / License
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreprocessor
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.5.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Clause
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	/ BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.12	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.4.0	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openblas	0.3.21	An optimized BLAS library / BSD-3-Clause
openblas-devel	0.3.21	OpenBLAS headers and libraries for developing software that used OpenBLAS. / B
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols / OpenS
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-Clau
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.1	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parameters /
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors / BSD-
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patch	2.7.6	Native Win32 versions of common unix tools / GPL 3
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Clause A
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g. a "u
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3-Clau
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Clause
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT

Table

Name	Version	Summary / License
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...) / BSD
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Clause
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forums, w
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for more
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amounts of data. /
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apache
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clause
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop / BSD-3-Cla
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apache-2.
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.6.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.1.1	A set of python modules for machine learning and data mining / BSD-3-Clause
scipy	1.9.1	Scientific Library for Python / BSD-3-Clause
scrapy	2.6.2	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. / BS
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	63.4.1	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only

Table

Name	Version	Summary / License
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache-2.0
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful documentation
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help books / BS
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp document / BSI
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files. / BSI
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BSD-2-C
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document / BSD-2
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized” HTM
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.39.3	Implements a self-contained, zero-configuration, SQL database engine / blessing
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays / MIT
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tapi	1100.0.11	TAPI is a Text-based Application Programming Interface / NCSA
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.6.0	Testpath is a collection of utilities for Python code working with files and command
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / TCL
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a URL,
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally develope
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022c	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-Clau
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.11	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause

Table

Name	Version	Summary / License
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet files /
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.27.15	Interact with Excel from Python and vice versa / BSD-3-Clause
xz	5.2.6	Data compression software with high compression ratio / LGPL-2.1-or-later and GP
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read and writ
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2.0-o

Anaconda 2022.10 for macOS on Intel 64-bit with Python 3.9

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.11.0	anaconda.org command line client library / BSD-3-Clause
anaconda-navigator	2.3.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.11.1	Tool for encapsulating, running, and reproducing data science projects / BSD-3-Cl
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementatio
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MIT
applaunchservices	0.3.0	Simple package for registering an app with apple Launch Services to handle UTI a
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.11.7	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by relievi
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style guide
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState. / MI
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT

Table

Name	Version	Summary / License
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / BSD-3-C
bitarray	2.5.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than *mem*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-Cla
boto3	1.24.28	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.27.28	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.07.19	Certificates for use with other packages. / MPL-2.0
cctools	949.0.1	Native assembler, archiver, ranlib, libtool, otool et al for Darwin Mach-O files / AP
cctools_osx-64	949.0.1	Assembler, archiver, ranlib, libtool, otool et al for Darwin Mach-O files / APSL-2.0
certifi	2022.9.24	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and near-los
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintained a
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-Clau
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project templates)
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-Clau
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apache-2.0
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD-3-Cl
daal4py	2021.6.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / Apache-2.0
dal	2021.6.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0

Table

Name	Version	Summary / License
datashader	0.14.1	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that manipula
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Dedicatio
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
fftw	3.3.9	The fastest Fourier transform in the west. / GPL 2
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	4.0.1	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-Free
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
gettext	0.21.0	Internationalization package / GPL-2.0
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications written in C
glob2	0.7	Version of the glob module that supports recursion via **, and can capture patterns
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-late
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data / HDF
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.0	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-Clau
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3-C
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryIntel
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.31.1	IPython: Productive Interactive Computing / BSD-3-Clause

Table

Name	Version	Summary / License
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSD-2-Clause
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Clause
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-Clause
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol. / BSD
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.4.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables / BS
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / BSD
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSD-2
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-Claus
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld64	530	Darwin Mach-O native linker / APSL-2.0
ld64_osx-64	530	Darwin Mach-O cross linker / APSL-2.0
ldid	2.1.2	pseudo-codesign Mach-O files / AGPL-3.0-only
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.6.1	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	12.0.0	Development headers and libraries for Clang / Apache-2.0 WITH LLVM-exception
libcurl	7.84.0	tool and library for transferring data with URL syntax / curl
libcxx	14.0.6	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and deco
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after libev
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgfortran	5.0.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only

Table

Name	Version	Summary / License
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert from/to Un
libidn2	2.3.2	Library for internationalized domain names (IDNA2008) support / LGPLv2 AND
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exceptio
libllvm12	12.0.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exceptio
libllvm14	14.0.6	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exceptio
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libpng	1.6.37	PNG reference library / zlib/libpng
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / PostgreSQL
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.4.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for manipulat
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate or
llvm-openmp	14.0.6	The OpenMP API supports multi-platform shared-memory parallel programming i
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clause
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GPL-
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v2+
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryIntel
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings. / BSD-3-
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R) Math Kern
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability distributio
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precision. /
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computations
mpi	1.0	A high performance widely portable implementation of the MPI standard. / MPICH
mpich	3.3.2	A high performance widely portable implementation of the MPI standard. / MPICH
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algorithm
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy typeche
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreprocesso
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause

Table

Name	Version	Summary / License
nbformat	5.5.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Clause
nltk	3.7	Natural Language Toolkit / Apache-2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.12	Jupyter Notebook / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-2.0
nss	3.74	A set of libraries designed to support cross-platform development of security-enabl
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.4.0	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols / OpenS
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-Cla
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.1	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parameters /
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors / BSD
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patch	2.7.6	Native Win32 versions of common unix tools / GPL 3
pathspec	0.9.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Clause A
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as Perl 5
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g. a "u
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3-Clau
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Clause
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats

Table

Name	Version	Summary / License
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...) / BSD
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Clause
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forums, w
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyobjc-core	8.5	Python<->ObjC Interoperability Module / MIT
pyobjc-framework-cocoa	8.5	Wrappers for the Cocoa frameworks on Mac OS X / MIT
pyobjc-framework-coreservices	8.5	Wrappers for the "CoreServices" framework on macOS. / MIT
pyobjc-framework-fsevents	8.5	Wrappers for the framework FSEvents on macOS / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for more
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of data.
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apache
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.5.0	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clause
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop / BSD-3-Cl
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy, PyQt
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT

Table

Name	Version	Summary / License
qtconsole	5.3.2	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute JavaScript code
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apache-2
requests-file	1.5.1	file transport adapter for Requests / Apache
ripgrep	13.0.0	ripgrep is a line-oriented search tool that recursively searches the current directory
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.6.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Clause
scikit-learn-intelex	2021.6.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Scikit-learn a
scipy	1.9.1	Scientific Library for Python / BSD-3-Clause
scrapy	2.6.2	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. / BS
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	63.4.1	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache-2.
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful documentation
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help books / BS
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp document / BS
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files. / BS
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BSD-2-C
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document / BSD-
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized” HTM
spyder	5.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	2.3.3	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.39.3	Implements a self-contained, zero-configuration, SQL database engine / blessing
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tapi	1000.10.8	TAPI is a Text-based Application Programming Interface / NCSA
tbb	2021.6.0	High level abstract threading library / Apache-2.0
tbb4py	2021.6.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0

Table

Name	Version	Summary / License
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.6.0	Testpath is a collection of utilities for Python code working with files and comman
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or more sequen
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / TCL
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a URL
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally develop
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022c	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-Clau
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings / BSD-3-C
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.11	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files / MIT
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet files /
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.27.15	Interact with Excel from Python and vice versa / BSD-3-Clause
xz	5.2.6	Data compression software with high compression ratio / LGPL-2.1-or-later and G
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read and wri
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD

Table

Name	Version	Summary / License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2.0-c

Anaconda 2022.10 for 64-bit Linux on IBM Z CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.11.0	anaconda.org command line client library / BSD-3-Clause
anaconda-project	0.11.1	Tool for encapsulating, running, and reproducing data science projects / BSD-3-Cla
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementation
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MIT
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.11.7	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the positio
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by relievin
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState. / MIT
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
bitarray	2.5.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than *memc*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-Cla
boto3	1.24.28	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.27.28	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.07.19	Certificates for use with other packages. / MPL-2.0
certifi	2022.9.24	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintained a
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause

Table 39 – continued from previous page

Name	Version	Summary / License
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-Clau
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-Claus
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apache-2.0
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD-3-Cl
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Dedicatio
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
expat	2.4.9	Expat XML parser library in C / MIT
filelock	3.6.0	A platform independent file lock. / Unlicense
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-Free
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications written in C
glob2	0.7	Version of the glob module that supports recursion via **, and can capture patterns.
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-later
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data / HDF5
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-Claus
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3-Cl
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause

Table 39 – continued from previous page

Name	Version	Summary / License
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.2	Data load and catalog system / BSD-2-Clause
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Clause
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-Clause
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol. / BSD
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables / BS
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / BSD
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSD-2-
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-Claus
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-s390x	2.38	A set of programming tools for creating and managing binary programs, object files
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.6.1	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libcurl	7.84.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and deco
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after libeve
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3.1
libidn2	2.3.0	Library for internationalized domain names (IDNA2008) support / LGPLv2 AND L
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.

Table 39 – continued from previous page

Name	Version	Summary / License
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.4.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for manipulati
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxcb	1.15	This is the C-language Binding (XCB) package to the X Window System protocol /
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate or z
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GPL-2
lz4	3.1.0	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v2+
markdown	3.3.3	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precision. /
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computations
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algorithm
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreprocessor
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.5.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Clause
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	/ BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.12	Jupyter Notebook / BSD-3-Clause
numexpr	2.8.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.4.0	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.21	An optimized BLAS library / BSD-3-Clause

Table 39 – continued from previous page

Name	Version	Summary / License
openblas-devel	0.3.21	OpenBLAS headers and libraries for developing software that used OpenBLAS. / B
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols / OpenS
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-Clau
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.12.6	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parameters /
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patch	2.7.6	Native Win32 versions of common unix tools / GPL 3
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables. / GPL
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Clause A
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as Perl 5.
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g. a “u
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Clause
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, …) / BSD
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forums, w
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for more
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of data. /
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0

Table 39 – continued from previous page

Name	Version	Summary / License
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apache
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apache-2.
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.6.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.1.1	A set of python modules for machine learning and data mining / BSD-3-Clause
scipy	1.9.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. / BSI
setuptools	63.4.1	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT AND
sniffio	1.1.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache-2.0
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful documentation
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help books / BS
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp document / BSI
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files. / BSI
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BSD-2-C
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document / BSD-2
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized” HTM
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.39.3	Implements a self-contained, zero-configuration, SQL database engine / blessing
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays / MIT
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.6.0	Testpath is a collection of utilities for Python code working with files and command
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / TCL
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT

Table 39 – continued from previous page

Name	Version	Summary / License
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally develope
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
typing-extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022c	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-Clau
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.11	HTTP library with thread-safe connection pooling, file post, and more. / MIT
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet files /
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.6	Data compression software with high compression ratio / LGPL-2.1-or-later and GP
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2.0-o

Anaconda 2022.10 for 64-bit Linux on IBM Power CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.11.0	anaconda.org command line client library / BSD-3-Clause
anaconda-project	0.11.1	Tool for encapsulating, running, and reproducing data science projects / BSD-3-Cla
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementation
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MIT
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.11.7	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the positi
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by relievin
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT

Table

Name	Version	Summary / License
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState. / MIT
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
bitarray	2.5.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than *memc*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-Cla
boto3	1.24.28	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.27.28	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.07.19	Certificates for use with other packages. / MPL-2.0
certifi	2022.9.14	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and near-loss
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintained a
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-Clau
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-Claus
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apache-2.0
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD-3-Cl
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.14.1	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause

Table

Name	Version	Summary / License
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Dedicatio
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
expat	2.4.9	Expat XML parser library in C / MIT
fftw	3.3.9	The fastest Fourier transform in the west. / GPL 2
filelock	3.6.0	A platform independent file lock. / Unlicense
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-Free
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can capture patterns.
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-later
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data / HDF5
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.0	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-Claus
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3-Cl
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause

Table

Name	Version	Summary / License
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Clause
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-Clause
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol. / BSD
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.4.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables / BS
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / BSD-
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSD-2-
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-Claus
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.38	A set of programming tools for creating and managing binary programs, object files
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libcurl	7.84.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and deco
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after libeve
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3.1
libidn2	2.3.2	Library for internationalized domain names (IDNA2008) support / LGPLv2 AND L
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for manipulati
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause

Table

Name	Version	Summary / License
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate or
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clause
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GPL-2
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v2+
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precision. /
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computations
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algorithm
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreprocessor
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.5.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Clause
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	/ BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.12	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.4.0	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openblas	0.3.21	An optimized BLAS library / BSD-3-Clause
openblas-devel	0.3.21	OpenBLAS headers and libraries for developing software that used OpenBLAS. / B
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols / OpenS
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-Clau
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.1	A high-level app and dashboarding solution for Python / BSD-3-Clause

Table

Name	Version	Summary / License
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parameters /
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors / BSD-
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patch	2.7.6	Native Win32 versions of common unix tools / GPL 3
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables. / GPL
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Clause A
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as Perl 5.
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g. a "u
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3-Clau
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Clause
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...) / BSD
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Clause
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forums, w
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for more
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of data. /
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apache
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0

Table

Name	Version	Summary / License
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clause
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apache-2.
requests-file	1.5.1	file transport adapter for Requests / Apache
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.6.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.1.1	A set of python modules for machine learning and data mining / BSD-3-Clause
scipy	1.9.1	Scientific Library for Python / BSD-3-Clause
scrapy	2.6.2	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. / BSI
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	63.4.1	Download, build, install, upgrade, and uninstall Python packages / MIT
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache-2.0
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful documentation
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help books / BS
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp document / BSI
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files. / BSI
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BSD-2-C
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document / BSD-2
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized” HTM
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.39.3	Implements a self-contained, zero-configuration, SQL database engine / blessing
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays / MIT
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tbb	2021.6.0	High level abstract threading library / Apache-2.0
tbb4py	2021.6.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.6.0	Testpath is a collection of utilities for Python code working with files and command
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause

Table

Name	Version	Summary / License
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / TCL
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a URL,
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally develope
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022c	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-Clau
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.11	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet files /
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.6	Data compression software with high compression ratio / LGPL-2.1-or-later and GP
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read and writ
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2.0-o

Anaconda 2022.10 for 64-bit Linux on ARMv8 CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.11.0	anaconda.org command line client library / BSD-3-Clause
anaconda-navigator	2.3.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.11.1	Tool for encapsulating, running, and reproducing data science projects / BSD-3-Cla
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementation

Table

Name	Version	Summary / License
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MIT
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.11.7	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by relievin
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style guide /
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState. / MIT
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / BSD-3-C
bitarray	2.5.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than *memc*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-Cla
boto3	1.24.28	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.27.28	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.07.19	Certificates for use with other packages. / MPL-2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
certifi	2022.9.24	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and near-loss
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintained a
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-Clau
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause

Table

Name	Version	Summary / License
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project templates),
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-Claus
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apache-2.0
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD-3-Cl
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.14.1	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that manipulat
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Dedicatio
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
expat	2.4.9	Expat XML parser library in C / MIT
fftw	3.3.9	The fastest Fourier transform in the west. / GPL 2
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	4.0.1	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-Free
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications written in C
glob2	0.7	Version of the glob module that supports recursion via **, and can capture patterns.
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-later
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.1.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.12.0	HDF5 is a data model, library, and file format for storing and managing data / HDF5
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.0	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-Claus

Table

Name	Version	Summary / License
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3-Cl
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.31.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jeepney	0.7.1	Pure Python DBus interface / MIT
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSD-2-Clause
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Clause
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-Clause
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol. / BSD
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.4.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables / BS
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / BSD-
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSD-2-
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-Claus
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-aarch64	2.38	A set of programming tools for creating and managing binary programs, object files

Table

Name	Version	Summary / License
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.6.1	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	10.0.1	Development headers and libraries for Clang / Apache-2.0 WITH LLVM-exception
libcurl	7.84.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and deco
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after libeve
libevent	2.1.12	An event notification library. / BSD-3-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only V
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3.1
libidn2	2.3.1	Library for internationalized domain names (IDNA2008) support / LGPLv2 AND L
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.21	An Optimized BLAS library / BSD-3-Clause
libpng	1.6.37	PNG reference library / zlib/libpng
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / PostgreSQL
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.4.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for manipulati
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxcb	1.15	This is the C-language Binding (XCB) package to the X Window System protocol /
libxkbcommon	1.0.1	keymap handling library for toolkits and window systems / MIT/X11 Derivative
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate or z
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clause
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GPL-2
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v2+
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause

Table

Name	Version	Summary / License
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precision. /
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computations
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algorithm
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy typechec
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreprocesso
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.5.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Clause
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	/ BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.12	Jupyter Notebook / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-2.0
nss	3.74	A set of libraries designed to support cross-platform development of security-enable
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.4.0	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openblas	0.3.21	An optimized BLAS library / BSD-3-Clause
openblas-devel	0.3.21	OpenBLAS headers and libraries for developing software that used OpenBLAS. / B
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols / OpenS
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-Clau
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.1	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parameters /
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors / BSD-
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patch	2.7.6	Native Win32 versions of common unix tools / GPL 3
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables. / GPL
pathspec	0.9.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Clause A
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as Perl 5.
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC

Table

Name	Version	Summary / License
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g. a "u
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3-Clau
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Clause
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...) / BSD
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Clause
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forums, w
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for more
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of data. /
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apache
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.5.0	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT

Table

Name	Version	Summary / License
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clause
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python. / GNU L
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy, PyQt
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.2	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute JavaScript code
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apache-2.
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.6.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.1.1	A set of python modules for machine learning and data mining / BSD-3-Clause
scipy	1.9.1	Scientific Library for Python / BSD-3-Clause
scrapy	2.6.2	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD-3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. / BSI
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	63.4.1	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache-2.0
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful documentation
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help books / BS
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp document / BSI
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files. / BSI
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BSD-2-C
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document / BSD-2
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized” HTM

Table

Name	Version	Summary / License
spyder	5.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	2.3.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.39.3	Implements a self-contained, zero-configuration, SQL database engine / blessing
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tbb	2021.6.0	High level abstract threading library / Apache-2.0
tbb4py	2021.6.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.6.0	Testpath is a collection of utilities for Python code working with files and command
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or more sequenc
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / TCL
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a URL,
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally develope
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022c	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-Clau
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings / BSD-3-Cl
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.11	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files / MIT
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet files /

Table

Name	Version	Summary / License
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.6	Data compression software with high compression ratio / LGPL-2.1-or-later and GP
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2.0-o

Anaconda 2022.10 for 64-bit Linux with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.11.0	anaconda.org command line client library / BSD-3-Clause
anaconda-navigator	2.3.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.11.1	Tool for encapsulating, running, and reproducing data science projects / BSD-3-Cla
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implementation
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / MIT
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.11.7	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.1	Community-developed Python Library for Astronomy / BSD-3-Clause
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by relievin
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style guide /
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState. / MIT
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / BSD-3-C
bitarray	2.5.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	22.6.0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than *memc*
bokeh	2.4.3	Bokeh is an interactive visualization library for modern web browsers. / BSD-3-Cla

Table

Name	Version	Summary / License
boto3	1.24.28	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.27.28	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.5	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotli-bin	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.07.19	Certificates for use with other packages. / MPL-2.0
certifi	2022.9.14	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.1	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and near-loss
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively maintained a
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.5	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	22.9.0	OS-agnostic, system-level binary package and environment manager. / BSD-3-Clau
conda-build	3.22.0	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.3	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.4.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project templates),
cryptography	37.0.1	Provides cryptographic recipes and primitives to Python developers / (BSD-3-Claus
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.84.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.32	The Cython compiler for writing C extensions for the Python language / Apache-2.0
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD-3-Cl
daal4py	2021.6.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / Apache-2.0
dal	2021.6.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.7.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.7.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.14.1	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that manipula
dill	0.3.4	Serialize all of python (almost) / BSD-3-Clause
distributed	2022.7.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.18.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Dedicatio

Table

Name	Version	Summary / License
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2.0
expat	2.4.9	Expat XML parser library in C / MIT
fftw	3.3.9	The fastest Fourier transform in the west. / GPL 2
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	4.0.1	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A simple framework for building complex web applications. / BSD-3-Clause
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2-only and LicenseRef-Free
fsspec	2022.7.1	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications written in C.
glob2	0.7	Version of the glob module that supports recursion via **, and can capture patterns.
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-or-later
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.7.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data / HDF5
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.15.0	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3-Claus
hvplot	0.8.0	A high-level plotting API for the PyData ecosystem built on HoloViews / BSD-3-Cl
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clause
imageio	2.19.3	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.4.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryIntel
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.15.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.31.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clause
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT

Table

Name	Version	Summary / License
jeepney	0.7.1	Pure Python DBus interface / MIT
jellyfish	0.9.0	a library for doing approximate and phonetic matching of strings. / BSD-2-Clause
jinja2	2.11.3	A very fast and expressive template engine. / BSD-3-Clause
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Clause
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.16.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-Clause
jupyter_client	7.3.4	jupyter_client contains the reference implementation of the Jupyter protocol. / BSD
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.11.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.18.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.4.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variables / BS
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. / BSD-
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / BSD-2-
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-Claus
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.38	A set of programming tools for creating and managing binary programs, object files
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.6.1	Multi-format archive and compression library / BSD-2-Clause
libbrotlicommon	1.0.9	Brotli compression format / MIT
libbrotlidec	1.0.9	Brotli compression format / MIT
libbrotlienc	1.0.9	Brotli compression format / MIT
libclang	10.0.1	Development headers and libraries for Clang / Apache-2.0 WITH LLVM-exception
libcurl	7.84.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and deco
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after libeve
libevent	2.1.12	An event notification library. / BSD-3-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	11.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran-ng	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libgfortran5	11.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-only
libgomp	11.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3.1
libidn2	2.3.2	Library for internationalized domain names (IDNA2008) support / LGPLv2 AND L
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exception
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libpng	1.6.37	PNG reference library / zlib/libpng
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / PostgreSQL

Table

Name	Version	Summary / License
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	11.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.4.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for manipulati
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxcb	1.15	This is the C-language Binding (XCB) package to the X Window System protocol /
libxkbcommon	1.0.1	keymap handling library for toolkits and window systems / MIT/X11 Derivative
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, deflate or
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clause
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.9.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and GPL-2
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL v2+
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.6	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryIntel
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings. / BSD-3-C
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R) Math Kern
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability distributio
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precision. /
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computations
mpi	1.0	A high performance widely portable implementation of the MPI standard. / MPICH
mpich	3.3.2	A high performance widely portable implementation of the MPI standard. / MPICH
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clause
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres algorithm
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy typechec
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePreprocessor
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.5.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.8.4	Python package for creating and manipulating complex networks / BSD-3-Clause
nltk	3.7	Natural Language Toolkit / Apache-2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1

Table

Name	Version	Summary / License
notebook	6.4.12	Jupyter Notebook / BSD-3-Clause
nspr	4.33	A platform-neutral API for system level and libc-like functions. / MPL-2.0
nss	3.74	A set of libraries designed to support cross-platform development of security-enable
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.4.0	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1q	OpenSSL is an open-source implementation of the SSL and TLS protocols / OpenS
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.4	High-performance, easy-to-use data structures and data analysis tools. / BSD-3-Clau
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.1	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parameters /
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors / BSD-
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patch	2.7.6	Native Win32 versions of common unix tools / GPL 3
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables. / GPL
pathspec	0.9.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Clause A
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as Perl 5.
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-PIL
pip	22.2.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.5.2	A small Python module for determining appropriate platform-specific dirs, e.g. a "u
plotly	5.9.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.14.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-Clause
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3-Clau
psutil	5.9.0	A cross-platform process and system utilities module for Python / BSD-3-Clause
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO formats.
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause

Table

Name	Version	Summary / License
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...) / BSD
pycurl	7.45.1	A Python Interface To The cURL library / LGPL-2.1-only, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Clause
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, forums, w
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.14.5	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.34	DB API Module for ODBC / MIT-0
pyopenssl	22.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.9	Create and execute simple grammars / MIT
pyqt	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyqt5-sip	12.11.0	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyqtwebengine	5.15.7	Python bindings for the Qt cross platform application toolkit / GPL-3.0-only
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for more
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of data. /
pytest	7.1.2	Simple and powerful testing with Python. / MIT
python	3.9.13	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apache
python-fastjsonschema	2.16.2	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.2.1	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.5.0	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clause
pytz	2022.1	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python. / GNU L
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	23.2.0	Python bindings for zeromq / BSD-3-Clause AND LGPL-3.0-or-later
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy, PyQt
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-main	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qt-webengine	5.15.9	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.2	Jupyter Qt Console / BSD-3-Clause
qtpy	2.2.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
qtwebkit	5.212	WebKit is one of the major engine to render webpages and execute JavaScript code
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.7.9	Alternative regular expression module, to replace re / Apache-2.0
requests	2.28.1	Requests is an elegant and simple HTTP library for Python, built with . / Apache-2.
requests-file	1.5.1	file transport adapter for Requests / Apache
ripgrep	13.0.0	ripgrep is a line-oriented search tool that recursively searches the current directory f

Table

Name	Version	Summary / License
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.6.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Clause
scikit-learn-intelex	2021.6.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Scikit-learn a
scipy	1.9.1	Scientific Library for Python / BSD-3-Clause
scrapy	2.6.2	A high-level Python Screen Scraping framework / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD-3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms. / BSI
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	63.4.1	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.6.2	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apache-2.0
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	5.0.2	Sphinx is a tool that makes it easy to create intelligent and beautiful documentation
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help books / BS
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp document / BSI
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files. / BSI
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BSD-2-C
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document / BSD-2
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized” HTM
spyder	5.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	2.3.3	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.39	Database Abstraction Library. / MIT
sqlite	3.39.3	Implements a self-contained, zero-configuration, SQL database engine / blessing
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.10	Pretty-print tabular data in Python, a library and a command-line utility. / MIT
tbb	2021.6.0	High level abstract threading library / Apache-2.0
tbb4py	2021.6.0	TBB module for Python / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2.0
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.6.0	Testpath is a collection of utilities for Python code working with files and command
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or more sequenc
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. / TCL

Table

Name	Version	Summary / License
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a URL,
toml	0.10.2	Python lib for TOML. / MIT
tomli	2.0.1	A simple TOML parser / MIT
tomlkit	0.11.1	Style preserving TOML library / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally develope
tqdm	4.64.1	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.3.0	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022c	The Time Zone Database (called tz, tzdb or zoneinfo) / CC-PDDC OR BSD-3-Clau
ujson	5.4.0	Ultra fast JSON decoder and encoder written in C with Python bindings / BSD-3-Cl
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.11	ODBC on non MS Windows platforms / LGPL-2.1-or-later
urllib3	1.26.11	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
whatthepatch	1.0.2	What The Patch!? is a library for both parsing and applying patch files / MIT
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.14.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet files /
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.6	Data compression software with high compression ratio / LGPL-2.1-or-later and GP
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read and writ
zict	2.1.0	Composable Dictionary Classes / BSD-3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.5.2	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL-2.0-o

Anaconda 2022.05 (May 10, 2022)

User-facing changes

- Anaconda Navigator has been updated to 2.1.4.
- Conda has been updated to 4.12.0.
- CVE-2022-26526 for Windows has been fixed. Now installations for "All Users" will not be allowed the option to modify the system PATH environment variable during installation. Installations for "Just Me" will still be allowed the option to add Anaconda3 to their PATH environment variable. Additionally, when installing with Administrator privileges, non-admin system Users will no longer have "Write" permissions.
- JetBrains PyCharm Pro has been replaced with JetBrains DataSpell.
- This is the first release of Anaconda Distribution that supports macOS M1 (osx-arm64).
- This is the last release of Anaconda Distribution that will support Windows 32-bit (win-32).

Major package updates

- anaconda-project 0.10.1 -> 0.10.2
- bokeh 2.4.1 -> 2.4.2
- dask 2021.10.0 -> 2022.2.1
- ipython 7.29.0 -> 8.2.0
- jupyter_core 4.8.1 -> 4.9.2
- jupyter_server 1.4.1 -> 1.13.5
- jupyterlab 3.2.1 -> 3.3.2
- jupyterlab_server 2.8.2 -> 2.10.3
- matplotlib 3.4.3 -> 3.5.1
- numba 0.54.1 -> 0.55.1
- numpy 1.20.3 -> 1.21.5
- pandas 1.3.4 -> 1.4.2
- pillow 8.4.0 -> 9.0.1
- python 3.9.7 -> 3.9.12
- requests 2.26.0 -> 2.27.1
- scikit-learn 0.24.2 -> 1.0.2
- statsmodels 0.12.2 -> 0.13.2
- sympy 1.9 -> 1.10.1

Added:

- conda-verify 3.4.2
- datashader 0.13.0
- holoviews 1.14.8

Packages

Anaconda 2022.05 for 64-bit Windows with Python 3.9

Name	Version	Summary / License
aiohttp	3.8.1	Async http client/server framework (asyncio) / Apache-2.0
aiosignal	1.2.0	aiosignal: a list of registered asynchronous callbacks / Apache-2.0
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.4	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects /
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop imp
appdirs	1.4.4	A small Python module for determining appropriate platform-specific d
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) wi
async-timeout	4.0.1	Timeout context manager for asyncio programs / Apache-2.0
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classe
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-cl
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Claus
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at Active
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faste
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
cachetools	4.2.2	Extensible memoizing collections and decorators / MIT
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio

Name	Version	Summary / License
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless a
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively r
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
comtypes	1.1.10	pure Python COM package / MIT
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / I
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Ap
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language /
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities
daal4py	2021.5.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / A
dal	2021.5.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-C
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages th
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND
executing	0.8.3	Get the currently executing AST node of a frame, and other information
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BS
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lic
frozenlist	1.2.0	A list-like structure which implements collections.abc.MutableSequenc
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT

Name	Version	Summary / License
glob2	0.7	Version of the glob module that supports recursion via **, and can capt
google-api-core	1.25.1	Core Library for Google Client Libraries / Apache-2.0
google-auth	1.33.0	Google authentication library for Python / Apache-2.0
google-cloud-core	1.7.1	API Client library for Google Cloud: Core Helpers / Apache-2.0
google-cloud-storage	1.31.0	Python Client for Google Cloud Storage / Apache-2.0
google-crc32c	1.1.2	Python wrapper for a hardware-based implementation of the CRC32C h
google-resumable-media	1.3.1	Utilities for Google Media Downloads and Resumable Uploads / Apach
googleapis-common-protos	1.53.0	Common protobufs used in Google APIs / Apache-2.0
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
grpcio	1.42.0	HTTP/2-based RPC framework / Apache-2.0
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / B
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprieta
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Cla
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprieta
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Cla
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / M
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BS
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BS
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter prot

Name	Version	Summary / License
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.13.5	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS va
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applicat
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / B
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcrc32c	1.1.1	CRC32C implementation with support for CPU-specific acceleration ins
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compressio
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and Mac
libpng	1.6.37	PNG reference library / zlib/libpng
libprotobuf	3.19.1	Protocol Buffers - Google's data interchange format. C++ Libraries and
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libwebp	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C.
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Cl
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.18	cross platform install of menu items / BSD-3-Clause
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Cl
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprieta
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	

Name	Version	Summary / License
multidict	5.1.0	multidict implementation / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkr
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the my
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's Executel
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD
nltk	3.7	Natural Language Toolkit / Apache-2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Cl
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Cl
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protoc
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. /
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring P
paramiko	2.8.1	SSH2 protocol library / LGPL-2.1-or-later
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS sele
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. /
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / License
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BS
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BS
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions /
protobuf	3.19.1	Protocol Buffers - Google's data interchange format. / BSD-3-Clause
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC

Name	Version	Summary / License
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and Mac
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography librar
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GP
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySoc
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amoun
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause an
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. /
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pywin32	302	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) / BSI
pywinpty	2.0.2	Pseudoterminals for Windows in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5,
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.0	Jupyter Qt Console / BSD-3-Clause

Name	Version	Summary / License
qtpy	2.0.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with .
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rsa	4.7.2	Pure-Python RSA implementation / Apache-2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3
scikit-learn-intelex	2021.5.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your S
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all plat
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	4.19.13	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.1.0	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful doc
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp doc
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScrip
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docun
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “seria
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine /
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative di
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility.
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apa
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files an
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic

Name	Version	Summary / License
textdistance	4.2.1	TextDistance – python library for comparing distance between two or m
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Cl
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Claus
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomain
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, origina
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
twisted-iocpsupport	1.0.2	An extension for use in the twisted I/O Completion Ports reactor. / MIT
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apac
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain
ujson	5.1.0	Ultra fast JSON decoder and encoder written in C with Python bindings
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more.
vc	14.2	A meta-package to impose mutual exclusivity among software built wit
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 2019 u
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Windows
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Py
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for communic
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreads
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.24.9	Interact with Excel from Python and vice versa / BSD-3-clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
yarl	1.6.3	Yet another URL library / Apache 2.0
zfp	0.5.5	Library for compressed numerical arrays that support high throughput r
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD

Name	Version	Summary / License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND

Anaconda 2022.05 for 32-bit Windows with Python 3.9

Name	Version	Summary / License
aiohttp	3.8.1	Async http client/server framework (asyncio) / Apache-2.0
aiosignal	1.2.0	aiosignal: a list of registered asynchronous callbacks / Apache-2.0
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.4	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects /
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop imp
appdirs	1.4.4	A small Python module for determining appropriate platform-specific d
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) wi
async-timeout	4.0.1	Timeout context manager for asyncio programs / Apache-2.0
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classe
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-cl
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Claus
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at Active
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faste
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT

Table 44 – continued from pr

Name	Version	Summary / License
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
cachetools	4.2.2	Extensible memoizing collections and decorators / MIT
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively m
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
comtypes	1.1.10	pure Python COM package / MIT
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / B
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Ap
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language /
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-C
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages th
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND
executing	0.8.3	Get the currently executing AST node of a frame, and other information
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BS
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lic
frozenlist	1.2.0	A list-like structure which implements collections.abc.MutableSequenc
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT

Table 44 – continued from pr

Name	Version	Summary / License
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
glob2	0.7	Version of the glob module that supports recursion via **, and can capt
google-api-core	1.25.1	Core Library for Google Client Libraries / Apache-2.0
google-auth	1.33.0	Google authentication library for Python / Apache-2.0
google-cloud-core	1.7.1	API Client library for Google Cloud: Core Helpers / Apache-2.0
google-cloud-storage	1.28.1	Python Client for Google Cloud Storage / Apache-2.0
google-resumable-media	0.5.1	Utilities for Google Media Downloads and Resumable Uploads / Apach
googleapis-common-protos	1.53.0	Common protobufs used in Google APIs / Apache-2.0
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
grpcio	1.42.0	HTTP/2-based RPC framework / Apache-2.0
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / B
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprieta
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Cla
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprieta
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Cl
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / M
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BS
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BS
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter prot
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause

Table 44 – continued from pr

Name	Version	Summary / License
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.13.5	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS va
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applicat
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / B
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and Mac
libpng	1.6.37	PNG reference library / zlib/libpng
libprotobuf	3.14.0	Protocol Buffers - Google's data interchange format. C++ Libraries and
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libwebp	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C.
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Cl
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.18	cross platform install of menu items / BSD-3-Clause
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Cl
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprieta
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multidict	5.1.0	multidict implementation / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkr
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the my
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's Executel
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause

Table 44 – continued from pr

Name	Version	Summary / License
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD
nltk	3.7	Natural Language Toolkit / Apache-2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Cl
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Cl
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protoc
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. /
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring P
paramiko	2.8.1	SSH2 protocol library / LGPL-2.1-or-later
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS sele
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. /
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / License
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BS
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BS
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions /
protobuf	3.14.0	Protocol Buffers - Google's data interchange format. / BSD-3-Clause
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and Mac
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause

Table 44 – continued from pr

Name	Version	Summary / License
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data,
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography librar
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GP
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySoc
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amoun
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause an
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. /
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pywin32	302	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) / BSI
pywinpty	2.0.2	Pseudoterminals for Windows in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5,
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.0.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with .
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rsa	4.7.2	Pure-Python RSA implementation / Apache-2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT

Table 44 – continued from pr

Name	Version	Summary / License
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.16.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all plat
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	4.19.13	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.1.0	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful doc
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp doc
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScrip
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docun
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “seria
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine /
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative di
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apa
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files an
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or m
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Cl
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Claus
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomain
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause

Table 44 – continued from pr

Name	Version	Summary / License
tornado	6.1	A Python web framework and asynchronous networking library, origina
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
twisted-iocpsupport	1.0.2	An extension for use in the twisted I/O Completion Ports reactor. / MIT
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apac
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain
ujson	5.1.0	Ultra fast JSON decoder and encoder written in C with Python bindings
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more.
vc	14.2	A meta-package to impose mutual exclusivity among software built wit
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 2019 u
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Windows
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Py
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for communic
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreads
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.24.9	Interact with Excel from Python and vice versa / BSD-3-clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
yarl	1.6.3	Yet another URL library / Apache 2.0
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND

Anaconda 2022.05 for macOS on Apple M1 with Python 3.9

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.2.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects / BSD-
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implemer
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / M
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.9.0	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by re
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState.
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
bitarray	2.5.0	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.7	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.4.26	Certificates for use with other packages. / MPL-2.0
certifi	2022.5.18.1	Python package for providing Mozilla's CA Bundle. / MPL-2.0
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and ne
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively mainta
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	3.0.0	Collection of perceptually uniform colormaps / CC-BY-4.0

Name	Version	Summary / License
conda	4.13.0	OS-agnostic, system-level binary package and environment manager. / BSD-3
conda-build	3.21.9	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / (BSD-3
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language / Apac
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD
dask	2022.5.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.5.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2022.5.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
filelock	3.6.0	A platform independent file lock. / Unlicense
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3-
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and LicenseR
fsspec	2022.3.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can capture pa
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-o
greenlet	1.1.0	Lightweight in-process concurrent programming / MIT
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.12.1	HDF5 is a data model, library, and file format for storing and managing data /
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews / BSI
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clau
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0

Name	Version	Summary / License
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.3.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD-3-C
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cla
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter_client	7.2.2	jupyter_client contains the reference implementation of the Jupyter protocol.
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.10.0	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.13.5	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variable
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications.
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / B
kiwisolver	1.4.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libcxx	12.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after
libffi	3.4.2	A Portable Foreign Function Interface Library. / MIT
libgfortran	5.0.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-
libgfortran5	11.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert from
libidn2	2.3.1	Library for internationalized domain names (IDNA2008) support / LGPLv2 A
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exc
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.20	An Optimized BLAS library / BSD-3-clause

Name	Version	Summary / License
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for mani
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.14	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.35	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, defla
llvm-openmp	12.0.0	The OpenMP API supports multi-platform shared-memory parallel programm
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clau
locket	1.0.0	File-based locks for Python for Linux and Windows / BSD-2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and
lz4	3.1.3	LZ4 Bindings for Python / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	Safely add untrusted strings to HTML/XML markup. / BSD-3-Clause
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precis
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computa
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Claus
msgpack-python	1.0.3	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres alg
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePrepro
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD-3-Cla
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.11	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD-3-Clause
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openblas	0.3.20	An optimized BLAS library / BSD-3-clause

Name	Version	Summary / License
openblas-devel	0.3.20	OpenBLAS headers and libraries for developing software that used OpenBLA
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1o	OpenSSL is an open-source implementation of the SSL and TLS protocols / C
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. / BSD-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Param
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors /
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cla
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-P
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.4.0	A small Python module for determining appropriate platform-specific dirs, e.g
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3-Cla
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data, ...) /
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Claus
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, foru
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.12.2	python code static checker / GPL-2.0-or-later
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for
pytables	3.7.0	Brings together Python, HDF5 and NumPy to easily handle large amounts of

Name	Version	Summary / License
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apa
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clau
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop / BSD
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with . / Apa
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Claus
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.5.1	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.2.1	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apac
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful documen
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help book
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp documen
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files.
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document /
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized”
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.3	Implements a self-contained, zero-configuration, SQL database engine / bless
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility. / MI

Name	Version	Summary / License
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and com
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.12	A dynamic programming language with GUI support. Bundles Tcl and Tk. /
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally de
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain AND
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.13.3	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet f
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.24.6	Interact with Excel from Python and vice versa / BSD-3-clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and GPL
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read ar
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.8.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL

Anaconda 2022.05 for macOS on Intel 64-bit with Python 3.9

Name	Version	Summary / License
aiohttp	3.8.1	Async http client/server framework (asyncio) / Apache-2.0
aiosignal	1.2.0	aiosignal: a list of registered asynchronous callbacks / Apache-2.0
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.4	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects / BSD-
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implemer
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / M
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to handle U
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the
async-timeout	4.0.1	Timeout context manager for asyncio programs / Apache-2.0
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by re
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style g
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState.
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / BS
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
cachetools	4.2.2	Extensible memoizing collections and decorators / MIT
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC

Name	Version	Summary / License
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and ne
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively mainta
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / BSD-3
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project temp
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Apache-
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language / Apac
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD
daal4py	2021.5.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / Apach
dal	2021.5.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that ma
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MI
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3-
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and LicenseF
frozenlist	1.2.0	A list-like structure which implements collections.abc.MutableSequence / Ap
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT

Name	Version	Summary / License
glob2	0.7	Version of the glob module that supports recursion via **, and can capture pa
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-c
google-api-core	1.25.1	Core Library for Google Client Libraries / Apache-2.0
google-auth	1.33.0	Google authentication library for Python / Apache-2.0
google-cloud-core	1.7.1	API Client library for Google Cloud: Core Helpers / Apache-2.0
google-cloud-storage	1.31.0	Python Client for Google Cloud Storage / Apache-2.0
google-crc32c	1.1.2	Python wrapper for a hardware-based implementation of the CRC32C hashing
google-resumable-media	1.3.1	Utilities for Google Media Downloads and Resumable Uploads / Apache-2.0
googleapis-common-protos	1.53.0	Common protobufs used in Google APIs / Apache-2.0
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
grpcio	1.42.0	HTTP/2-based RPC framework / Apache-2.0
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data /
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews / BSI
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clau
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryInte
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD-3-C
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cla
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-C

Name	Version	Summary / License
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protocol.
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.13.5	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variable
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications.
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / B
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcrc32c	1.1.1	CRC32C implementation with support for CPU-specific acceleration instructi
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libcxx	12.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgfortran	3.0.1	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert from/
libidn2	2.3.2	Library for internationalized domain names (IDNA2008) support / LGPLv2 /
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exc
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libpng	1.6.37	PNG reference library / zlib/libpng
libprotobuf	3.19.1	Protocol Buffers - Google's data interchange format. C++ Libraries and proto
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for mani
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, defla
llvm-openmp	12.0.0	The OpenMP API supports multi-platform shared-memory parallel programm
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clau
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clause

Name	Version	Summary / License
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryInte
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings. / BS
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R) Math
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability distr
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precis
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computa
mpi	1.0	A high performance widely portable implementation of the MPI standard. / M
mpich	3.3.2	A high performance widely portable implementation of the MPI standard. / M
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Claus
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multidict	5.2.0	multidict implementation / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres alg
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy typ
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePrepro
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD-3-Cla
nltk	3.7	Natural Language Toolkit / Apache-2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protocols / C
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. / BSD-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Param
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cla

Name	Version	Summary / License
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-P
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3
protobuf	3.19.1	Protocol Buffers - Google's data interchange format. / BSD-3-Clause
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3-Cla
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data, ...) /
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Claus
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, foru
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2.0
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apa
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT

Name	Version	Summary / License
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clau
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop / BSD
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy,
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.0.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with . / Apa
requests-file	1.5.1	file transport adapter for Requests / Apache
ripgrep	12.1.1	
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rsa	4.7.2	Pure-Python RSA implementation / Apache-2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Claus
scikit-learn-intelex	2021.5.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Scikit-l
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	4.19.13	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.1.0	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apac
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful documen
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help book
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp documen
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files.
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document /
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized”
spyder	5.1.5	The Scientific Python Development Environment / MIT

Name	Version	Summary / License
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine / bless
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility. / MI
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and com
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or more se
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and Tk. /
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally de
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apache-2.0
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain AND
ujson	5.1.0	Ultra fast JSON decoder and encoder written in C with Python bindings / BSI
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause

Name	Version	Summary / License
xlwings	0.24.9	Interact with Excel from Python and vice versa / BSD-3-clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and GPL
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
yarl	1.6.3	Yet another URL library / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read ar
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL

Anaconda 2022.05 for 64-bit Linux on IBM Z CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	4.5	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects / BSD-
anyio	2.0.2	High level compatibility layer for multiple asynchronous event loop implemer
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / M
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.9.0	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by re
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState.
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause

Table 47 – continued from previous

Name	Version	Summary / License
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively mainta
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / BSD-3
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apache-
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language / Apac
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MI
expat	2.4.4	Expat XML parser library in C / MIT
filelock	3.6.0	A platform independent file lock. / Unlicense
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3-(
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and LicenseR
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications writte
glob2	0.7	Version of the glob module that supports recursion via **, and can capture pa
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-(

Table 47 – continued from previous

Name	Version	Summary / License
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data /
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews / BSI
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.1.11	Image transformation, compression, and decompression codecs / BSD-3-Clau
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.2	Data load and catalog system / BSD-2-Clause
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD-3-C
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cla
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-C
jupyter_client	7.2.2	jupyter_client contains the reference implementation of the Jupyter protocol.
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variable
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. /
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / B
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-s390x	2.33.1	A set of programming tools for creating and managing binary programs, obje
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after
libffi	3.3	A Portable Foreign Function Interface Library. / MIT

Table 47 – continued from previous

Name	Version	Summary / License
libgcc-ng	9.3.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.
libgfortran-ng	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libgfortran4	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libgomp	9.3.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3
libidn2	2.3.0	Library for internationalized domain names (IDNA2008) support / LGPLv2 A
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.18	An Optimized BLAS library / BSD-3-clause
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.3.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for mani
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System prot
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, defla
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL
markdown	3.3.3	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clause
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precis
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computa
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Claus
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres alg
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePrepro
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD-3-Cla
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT

Table 47 – continued from previous

Name	Version	Summary / License
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.18	An optimized BLAS library / BSD-3-clause
openblas-devel	0.3.18	OpenBLAS headers and libraries for developing software that used OpenBLA
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protocols / C
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. / BSD-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.12.7	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Parame
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables.
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cla
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-P
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.4.0	A small Python module for determining appropriate platform-specific dirs, e.g
plotly	4.14.3	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3-Cla
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data, ...) /
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, foru
pylint	2.12.2	python code static checker / GPL-2.0-or-later
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for

Table 47 – continued from previous

Name	Version	Summary / License
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apa
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with . / Apa
retrying	1.3.3	Simplify the task of adding retry behavior to just about anything. / Apache 2.0
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Claus
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.5.1	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT
sniffio	1.1.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apac
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful documen
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help book
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp documen
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files.
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document /
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized”
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine / bless
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.7	Pretty-print tabular data in Python, a library and a command-line utility. / MI
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and com
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tifffile	2021.3.17	Read and write image data from and to TIFF files. / BSD-3-Clause

Table 47 – continued from previous

Name	Version	Summary / License
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and Tk. /
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally de
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain AND
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more. / MIT
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.13.3	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet f
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and GPL
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL

Anaconda 2022.05 for 64-bit Linux on IBM Power CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
aiohttp	3.8.1	Async http client/server framework (asyncio) / Apache-2.0
aiosignal	1.2.0	aiosignal: a list of registered asynchronous callbacks / Apache-2.0
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects / BSD-
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / M
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
astroid	2.9.0	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the
async-timeout	4.0.1	Timeout context manager for asyncio programs / Apache-2.0
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by re

Name	Version	Summary / License
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState.
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
cachetools	4.2.2	Extensible memoizing collections and decorators / MIT
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and ne
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively mainta
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / BSD-3
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Apache-
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language / Apac
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause

Name	Version	Summary / License
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MIT
expat	2.4.4	Expat XML parser library in C / MIT
filelock	3.6.0	A platform independent file lock. / Unlicense
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3-
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and LicenseR
frozenlist	1.2.0	A list-like structure which implements collections.abc.MutableSequence / Ap
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can capture pa
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-
google-api-core	1.25.1	Core Library for Google Client Libraries / Apache-2.0
google-auth	1.33.0	Google authentication library for Python / Apache-2.0
google-cloud-core	1.7.1	API Client library for Google Cloud: Core Helpers / Apache-2.0
google-cloud-storage	1.31.0	Python Client for Google Cloud Storage / Apache-2.0
google-crc32c	1.1.2	Python wrapper for a hardware-based implementation of the CRC32C hashing
google-resumable-media	1.3.1	Utilities for Google Media Downloads and Resumable Uploads / Apache-2.0
googleapis-common-protos	1.53.0	Common protobufs used in Google APIs / Apache-2.0
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
grpcio	1.42.0	HTTP/2-based RPC framework / Apache-2.0
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data /
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews / BSI
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clau
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause

Name	Version	Summary / License
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD-3-C
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cla
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-C
jupyter_client	7.2.2	jupyter_client contains the reference implementation of the Jupyter protocol.
jupyter_console	6.4.3	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variable
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / B
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs, objec
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcrc32c	1.1.1	CRC32C implementation with support for CPU-specific acceleration instructi
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libidn2	2.3.2	Library for internationalized domain names (IDNA2008) support / LGPLv2 A
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exc
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.18	An Optimized BLAS library / BSD-3-clause
libpng	1.6.37	PNG reference library / zlib/libpng
libprotobuf	3.19.1	Protocol Buffers - Google's data interchange format. C++ Libraries and proto
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND

Name	Version	Summary / License
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for mani
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, defla
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clau
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clause
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.7.0	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precis
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computa
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Claus
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multidict	5.2.0	multidict implementation / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres alg
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePrepro
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD-3-Cla
nltk	3.7	Natural Language Toolkit / Apache-2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openblas	0.3.18	An optimized BLAS library / BSD-3-clause
openblas-devel	0.3.18	OpenBLAS headers and libraries for developing software that used OpenBLA
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause

Name	Version	Summary / License
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. / BSD-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Param
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables.
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cla
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-P
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
platformdirs	2.4.0	A small Python module for determining appropriate platform-specific dirs, e.g
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3
protobuf	3.19.1	Protocol Buffers - Google's data interchange format. / BSD-3-Clause
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3-Cla
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.8.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data, ...) /
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Claus
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.4.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, foru
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.12.2	python code static checker / GPL-2.0-or-later
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0

Name	Version	Summary / License
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apa
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clau
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with . / Apa
requests-file	1.5.1	file transport adapter for Requests / Apache
rsa	4.7.2	Pure-Python RSA implementation / Apache-2.0
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Claus
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.1.0	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apac
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful documen
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help book
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp documen
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files.
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document /
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized”
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine / bless
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility. / MI
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause

Name	Version	Summary / License
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and com
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and Tk. /
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally de
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain AND
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.13.3	Module for decorators, wrappers and monkey patching / BSD-2-Clause
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet f
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and GPL
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yarl	1.6.3	Yet another URL library / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read ar
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL

Anaconda 2022.05 for 64-bit Linux on ARMv8 CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
adwaita-icon-theme	40.1.1	The default icon theme used by the GNOME desktop / LGPL-3.0-or-later OR
aiohttp	3.8.1	Async http client/server framework (asyncio) / Apache-2.0
aiosignal	1.2.0	aiosignal: a list of registered asynchronous callbacks / Apache-2.0
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.4	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects / BSD-
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implemer
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / M
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the
async-timeout	4.0.1	Timeout context manager for asyncio programs / Apache-2.0
at-spi2-atk	2.34.2	bridge for AT-SPI and ATK accessibility technologies / LGPL-2.1-or-later
at-spi2-core	2.36.0	D-Bus-based implementation of AT-SPI accessibility framework / LGPL-2.1-
atk-1.0	2.36.0	Accessibility Toolkit. / LGPL-2.0-or-later
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by re
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style g
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState.
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / BS
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT

Name	Version	Summary / License
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
cachetools	4.2.2	Extensible memoizing collections and decorators / MIT
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. / LGF
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and ne
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively mainta
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / BSD-3
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project temp
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apache-
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language / Apac
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that ma
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
epoxy	1.5.4	A library for handling OpenGL function pointer management for you. / MIT
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MI
expat	2.4.4	Expat XML parser library in C / MIT
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3-
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT

Name	Version	Summary / License
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and LicenseF
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGPL-2.
frozenlist	1.2.0	A list-like structure which implements collections.abc.MutableSequence / Ap
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
gdk-pixbuf	2.38.2	GdkPixbuf is a library for image loading and manipulation. / LGPL-2.1-or-lat
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
gettext	0.21.0	Internationalization package / GPL-2.0
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications writte
glob2	0.7	Version of the glob module that supports recursion via **, and can capture pa
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-o
gobject-introspection	1.68.0	Middleware for binding GObject-based code to other languages. / LGPL-2.0-
google-api-core	1.25.1	Core Library for Google Client Libraries / Apache-2.0
google-auth	1.33.0	Google authentication library for Python / Apache-2.0
google-cloud-core	1.7.1	API Client library for Google Cloud: Core Helpers / Apache-2.0
google-cloud-storage	1.31.0	Python Client for Google Cloud Storage / Apache-2.0
google-crc32c	1.1.2	Python wrapper for a hardware-based implementation of the CRC32C hashing
google-resumable-media	1.3.1	Utilities for Google Media Downloads and Resumable Uploads / Apache-2.0
googleapis-common-protos	1.53.0	Common protobufs used in Google APIs / Apache-2.0
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known language
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
grpcio	1.42.0	HTTP/2-based RPC framework / Apache-2.0
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
gtk3	3.24.21	Version 3 of the Gtk+ graphical toolkit / LGPL-2.0-or-later
h5py	3.1.0	Read and write HDF5 files from Python / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.12.0	HDF5 is a data model, library, and file format for storing and managing data /
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
hicolor-icon-theme	0.17	Fallback theme for FreeDesktop.org icon themes / GPL-2.0-or-later
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews / BSI
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clau
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause

Name	Version	Summary / License
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jeepney	0.7.1	Pure Python DBus interface / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD-3-C
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cla
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-C
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protocol.
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.13.5	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variable
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications. /
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / B
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-aarch64	2.36.1	A set of programming tools for creating and managing binary programs, objec
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcrc32c	1.1.1	CRC32C implementation with support for CPU-specific acceleration instructi
libcups	2.2.12	CUPS is the standards-based, open source printing system / LGPL-2.0-or-late
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after
libevent	2.1.10	An event notification library. / BSD-3-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	10.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.
libgfortran-ng	10.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libgfortran5	10.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL-3.0-
libgomp	10.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3
libidn2	2.3.1	Library for internationalized domain names (IDNA2008) support / LGPLv2 A
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exc

Name	Version	Summary / License
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libopenblas	0.3.18	An Optimized BLAS library / BSD-3-clause
libpng	1.6.37	PNG reference library / zlib/libpng
libpq	12.9	The postgres runtime libraries and utilities (not the server itself) / PostgreSQL
libprotobuf	3.19.1	Protocol Buffers - Google's data interchange format. C++ Libraries and proto
librsvg	2.50.7	librsvg is a library to render SVG files using cairo. / LGPL-2.1-or-later
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	10.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for mani
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System prot
libxkbcommon	1.0.1	keymap handling library for toolkits and window systems / MIT/X11 Derivati
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, defl
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clau
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clause
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precis
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computa
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Claus
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multidict	5.2.0	multidict implementation / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres alg
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy typ
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePrepro
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD-3-Cla
ninja	1.10.2	A small build system with a focus on speed / Apache 2.0
nltk	3.7	Natural Language Toolkit / Apache-2.0

Name	Version	Summary / License
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.18	An optimized BLAS library / BSD-3-clause
openblas-devel	0.3.18	OpenBLAS headers and libraries for developing software that used OpenBLA
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protocols / C
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. / BSD-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Param
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors /
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables.
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cla
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-P
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3
protobuf	3.19.1	Protocol Buffers - Google's data interchange format. / BSD-3-Clause
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3-Cla
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.7.0	Python style guide checker / MIT

Name	Version	Summary / License
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.8	python package common tasks for users (e.g. copy examples, fetch data, ...) /
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Claus
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, foru
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.7.4	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.15.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2.0
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apa
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clau
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python. / G
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy,
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.0.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with . / Apa
requests-file	1.5.1	file transport adapter for Requests / Apache
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rsa	4.7.2	Pure-Python RSA implementation / Apache-2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT

Name	Version	Summary / License
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Claus
scipy	1.7.1	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3-Cla
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	6.5.1	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.1.0	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apac
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful documen
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help book
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp documen
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files.
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document /
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serialized”
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine / bless
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility. / MI
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and com
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or more se
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and Tk. / T
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT

Name	Version	Summary / License
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally de
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apache-2.0
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain AND
ujson	5.1.0	Ultra fast JSON decoder and encoder written in C with Python bindings / BSI
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.13.3	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet f
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and GPL
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
yarl	1.6.3	Yet another URL library / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL

Anaconda 2022.05 for 64-bit Linux with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	4.5	OpenMP Implementation Mutex / BSD-3-Clause
aiohttp	3.8.1	Async http client/server framework (asyncio) / Apache-2.0
aiosignal	1.2.0	aiosignal: a list of registered asynchronous callbacks / Apache-2.0
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.4	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.2	Tool for encapsulating, running, and reproducing data science projects / BSD-
anyio	3.5.0	High level compatibility layer for multiple asynchronous event loop implemer
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dirs. / M
argon2-cffi	21.3.0	The secure Argon2 password hashing algorithm. / MIT
argon2-cffi-bindings	21.2.0	Low-level Python CFFI Bindings for Argon2 / MIT
arrow	1.2.2	Better dates & times for Python / Apache-2.0
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-later
astropy	5.0.4	Community-developed Python Library for Astronomy / BSD-3-Clause
asttokens	2.0.5	The asttokens module annotates Python abstract syntax trees (ASTs) with the
async-timeout	4.0.1	Timeout context manager for asyncio programs / Apache-2.0
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.4.0	attrs is the Python package that will bring back the joy of writing classes by re
automat	20.2.0	self-service finite-state machines for the programmer on the go / MIT
autopep8	1.6.0	A tool that automatically formats Python code to conform to the PEP 8 style g
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clause
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.1	Namespace for backported Python features. / MIT
backports.functools_lru_cache	1.6.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveState.
backports.tempfile	1.0	Backports of new features in Python's tempfile module / PSF 2
backports.weakref	1.0.post1	Backport of new features in Python's weakref module / Python-2.0
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apache-2.0
beautifulsoup4	4.11.1	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text. / BS
bitarray	2.4.1	efficient arrays of booleans – C extension / PSF-2.0
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster than
bokeh	2.4.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto3	1.21.32	Amazon Web Services SDK for Python / Apache-2.0
botocore	1.24.32	Low-level, data-driven core of boto 3. / Apache-2.0
bottleneck	1.3.4	Fast NumPy array functions written in Cython. / BSD-2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.18.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2022.3.29	Certificates for use with other packages. / MPL-2.0
cachetools	4.2.2	Extensible memoizing collections and decorators / MIT
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.15.0	Foreign Function Interface for Python calling C code. / MIT

Name	Version	Summary / License
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless and ne
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively mainta
click	8.0.4	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
colorcet	2.0.6	Collection of perceptually uniform colormaps / CC-BY-4.0
conda	4.12.0	OS-agnostic, system-level binary package and environment manager. / BSD-3
conda-build	3.21.8	tools for building conda packages / BSD-3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
cookiecutter	1.7.3	A command-line utility that creates projects from cookiecutters (project temp
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Apache-
cssselect	1.1.0	CSS Selectors for Python / BSD 3-Clause
curl	7.82.0	tool and library for transferring data with URL syntax / curl
cycler	0.11.0	Composable style cycles. / BSD-3-Clause
cython	0.29.28	The Cython compiler for writing C extensions for the Python language / Apac
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities / BSD
daal4py	2021.5.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / Apach
dal	2021.5.1	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2022.2.1	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2022.2.1	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
datashader	0.13.0	Data visualization toolchain based on aggregating into a grid / BSD-3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.5.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.1	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that ma
distributed	2022.2.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / LicenseRef-Public-Domain-Ded
entrypoints	0.4	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND PSF-2
executing	0.8.3	Get the currently executing AST node of a frame, and other information / MI
expat	2.4.4	Expat XML parser library in C / MIT
filelock	3.6.0	A platform independent file lock. / Unlicense
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3-
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.11.0	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and LicenseR
frozenlist	1.2.0	A list-like structure which implements collections.abc.MutableSequence / Ap
fsspec	2022.2.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT

Name	Version	Summary / License
gensim	4.1.2	Topic Modelling for Humans / LGPL-2.1-only
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications writte
glob2	0.7	Version of the glob module that supports recursion via **, and can capture pa
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-later
gmpy2	2.1.2	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL-3.0-o
google-api-core	1.25.1	Core Library for Google Client Libraries / Apache-2.0
google-auth	1.33.0	Google authentication library for Python / Apache-2.0
google-cloud-core	1.7.1	API Client library for Google Cloud: Core Helpers / Apache-2.0
google-cloud-storage	1.31.0	Python Client for Google Cloud Storage / Apache-2.0
google-crc32c	1.1.2	Python wrapper for a hardware-based implementation of the CRC32C hashing
google-resumable-media	1.3.1	Utilities for Google Media Downloads and Resumable Uploads / Apache-2.0
googleapis-common-protos	1.53.0	Common protobufs used in Google APIs / Apache-2.0
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
grpcio	1.42.0	HTTP/2-based RPC framework / Apache-2.0
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.6.0	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing data /
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
holoviews	1.14.8	Stop plotting your data - annotate your data and let it visualize itself. / BSD-3
hvplot	0.7.3	A high-level plotting API for the PyData ecosystem built on HoloViews / BSI
hyperlink	21.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.3	Internationalized Domain Names in Applications (IDNA). / BSD-3-Clause
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-Clau
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.3.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
importlib_metadata	4.11.3	A library to access the metadata for a Python package. / Apache-2.0
incremental	21.3.0	Incremental is a small library that versions your Python projects. / MIT
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intake	0.6.5	Data load and catalog system / BSD-2-Clause
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryInte
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.9.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	8.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itemadapter	0.3.0	Common interface for different data containers / BSD-3-Clause
itemloaders	1.0.4	Collect data from HTML and XML sources / BSD-3-Clause
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-Clau
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.18.1	An autocompletion tool for Python that can be used for text editors. / MIT
jeepney	0.7.1	Pure Python DBus interface / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD-3-C
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
jmespath	0.10.0	Query language for JSON / MIT

Name	Version	Summary / License
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3-Cla
jpeg	9e	read/write jpeg COM, EXIF, IPTC medata / IJG
jq	1.6	A command-line JSON processor. / MIT
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	4.4.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-C
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protocol.
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.9.2	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.13.5	Jupyter Server / BSD-3-Clause
jupyterlab	3.3.2	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS variable
jupyterlab_server	2.10.3	A set of server components for JupyterLab and JupyterLab like applications.
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources. / B
keyring	23.4.0	Store and access your passwords safely / MIT
kiwisolver	1.3.2	An efficient C++ implementation of the Cassowary constraint solver / BSD-3-
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.35.1	A set of programming tools for creating and managing binary programs, obje
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcrc32c	1.1.1	CRC32C implementation with support for CPU-specific acceleration instructi
libcurl	7.82.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compression and
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled after
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	9.3.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exception-3.
libgfortran-ng	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libgfortran4	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exception-3.
libgomp	9.3.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-exception-3
libidn2	2.3.2	Library for internationalized domain names (IDNA2008) support / LGPLv2 A
liblief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM-exc
libnghttp2	1.46.0	This is an implementation of Hypertext Transfer Protocol version 2. / MIT
libpng	1.6.37	PNG reference library / zlib/libpng
libprotobuf	3.19.1	Protocol Buffers - Google's data interchange format. C++ Libraries and proto
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.10.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.3.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3.1
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libunistring	0.9.10	This library provides functions for manipulating Unicode strings and for mani
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libwebp	1.2.2	WebP image library / BSD-3-Clause
libwebp-base	1.2.2	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System prot

Name	Version	Summary / License
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow, defl
llvmlite	0.38.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-Clau
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause and
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GPL
markdown	3.3.4	Python implementation of Markdown. / BSD-3-Clause
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clause
matplotlib	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.5.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	A sane Markdown parser with useful plugins and renderers. / BSD-3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-ProprietaryInte
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings. / BS
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R) Math
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability distr
mock	4.0.3	A library for testing in Python / BSD-2-Clause
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high precis
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point computa
mpi	1.0	A high performance widely portable implementation of the MPI standard. / M
mpich	3.3.2	A high performance widely portable implementation of the MPI standard. / M
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Claus
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multidict	5.2.0	multidict implementation / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres alg
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy typ
nbclassic	0.3.5	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.13	A client library for executing notebooks. Formally nbconvert's ExecutePrepro
nbconvert	6.4.4	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.3.0	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.5	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.7.1	Python package for creating and manipulating complex networks / BSD-3-Cla
nltk	3.7	Natural Language Toolkit / Apache-2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.8	Jupyter Notebook / BSD-3-Clause
numba	0.55.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.8.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.21.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	1.2	Numpy's Sphinx extensions / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
oniguruma	6.9.7.1	A regular expression library. / BSD-2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1n	OpenSSL is an open-source implementation of the SSL and TLS protocols /

Name	Version	Summary / License
packaging	21.3	Core utilities for Python packages / Apache-2.0 or BSD-2-Clause
pandas	1.4.2	High-performance, easy-to-use data structures and data analysis tools. / BSD-
pandocfilters	1.5.0	A python module for writing pandoc filters / BSD-3-Clause
panel	0.13.0	A high-level app and dashboarding solution for Python / BSD-3-Clause
param	1.12.0	Param: Make your Python code clearer and more reliable by declaring Param
parsel	1.6.0	library to extract data from HTML and XML using XPath and CSS selectors
parso	0.8.3	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executables.
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2-Cla
pcre	8.45	Regular expression pattern matching using the same syntax and semantics as
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	9.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseRef-P
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.8.2	Query metadatdata from sdists / bdists / installed packages. / MIT
plotly	5.6.0	An interactive JavaScript-based visualization library for Python / MIT
pluggy	1.0.0	Plugin registration and hook calling for Python / MIT
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.13.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD-3-C
protego	0.1.16	A pure-Python robots.txt parser with support for modern conventions / BSD 3
protobuf	3.19.1	Protocol Buffers - Google's data interchange format. / BSD-3-Clause
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3-Cla
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
pure_eval	0.2.2	Safely evaluate AST nodes without side effects / MIT
py	1.11.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.11.5	A cross platform library to parse, modify and abstract ELF, PE and MachO fo
pyasn1	0.4.8	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.8	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.21	Complete C99 parser in pure Python / BSD-3-clause
pyct	0.4.6	python package common tasks for users (e.g. copy examples, fetch data, ...) /
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydispatcher	2.0.5	Multi-producer-multi-consumer signal dispatching mechanism / BSD 3-Claus
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.11.2	Pygments is a generic syntax highlighter suitable for use in code hosting, foru
pyhamcrest	2.0.2	Hamcrest framework for matcher objects / BSD 3-Clause
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.32	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache-2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2.0

Name	Version	Summary / License
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySocks for
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amounts of
pytest	7.1.1	Simple and powerful testing with Python. / MIT
python	3.9.12	General purpose programming language / PSF-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and Apa
python-fastjsonschema	2.15.1	Fastest Python implementation of JSON schema / BSD-3-Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / MIT
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python-snappy	0.6.0	Python library for the snappy compression library from Google / BSD-3-Clau
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pyviz_comms	2.0.2	Bidirectional communication for PyViz / BSD-3-Clause
pywavelets	1.3.0	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python. / G
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.3.0	Python bindings for zeromq / BSD-3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, QtPy,
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.3.0	Jupyter Qt Console / BSD-3-Clause
qtpy	2.0.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
queuelib	1.5.0	Collection of persistent (disk-based) queues / BSD
readline	8.1.2	library for editing command lines as they are typed in / GPL-3.0-only
regex	2022.3.15	Alternative regular expression module, to replace re / Apache-2.0
requests	2.27.1	Requests is an elegant and simple HTTP library for Python, built with . / Apa
requests-file	1.5.1	file transport adapter for Requests / Apache
ripgrep	12.1.1	
rope	0.22.0	A python refactoring library / LGPL-3.0-or-later
rsa	4.7.2	Pure-Python RSA implementation / Apache-2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
s3transfer	0.5.0	An Amazon S3 Transfer Manager / Apache-2.0
scikit-image	0.19.2	Image processing in Python. / BSD-3-Clause
scikit-learn	1.0.2	A set of python modules for machine learning and data mining / BSD-3-Claus
scikit-learn-intelex	2021.5.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Scikit-l
scipy	1.7.3	Scientific Library for Python / BSD 3-Clause
scrapy	2.6.1	A high-level Python Screen Scraping framework / BSD-3-Clause-Clear
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3-Cla
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platforms
service_identity	18.1.0	Service identity verification for pyOpenSSL. / MIT
setuptools	61.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
sip	4.19.13	A Python bindings generator for C/C++ libraries / GPL-3.0-only
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
smart_open	5.1.0	Python library for efficient streaming of large files / MIT
snappy	1.1.9	A fast compressor/decompressor / BSD-3-clause AND CC-BY-3.0 AND MIT

Name	Version	Summary / License
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.2.0	Snowball stemming library collection for Python / BSD-3-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Apac
soupsieve	2.3.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful documen
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help book
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp documen
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help files.
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript / BS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp document /
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serialized"
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.32	Database Abstraction Library. / MIT
sqlite	3.38.2	Implements a self-contained, zero-configuration, SQL database engine / bless
stack_data	0.2.0	Extract data from python stack frames and tracebacks for informative displays
statsmodels	0.13.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.10.1	Python library for symbolic mathematics / BSD-3-Clause AND MIT
tabulate	0.8.9	Pretty-print tabular data in Python, a library and a command-line utility. / MI
tbb	2021.5.0	High level abstract threading library / Apache-2.0
tbb4py	2021.5.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
tenacity	8.0.1	Retry a flaky function whenever an exception occurs until it works / Apache-2
terminado	0.13.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and com
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or more se
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clause
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and Tk. /
tldextract	3.2.0	Accurately separate the TLD from the registered domain andsubdomains of a
toml	0.10.2	Python lib for TOML. / MIT
tomli	1.2.2	A simple TOML parser / MIT
toolz	0.11.2	List processing tools and functional utilities / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originally de
tqdm	4.64.0	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.1	Configuration system for Python applications / BSD-3-Clause
twisted	22.2.0	An asynchronous networking framework written in Python / MIT
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apache-2.0
typing-extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
typing_extensions	4.1.1	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2022a	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain AND
ujson	5.1.0	Ultra fast JSON decoder and encoder written in C with Python bindings / BSI
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.9	HTTP library with thread-safe connection pooling, file post, and more. / MIT
w3lib	1.21.0	Library of web-related functions / BSD

Name	Version	Summary / License
watchdog	2.1.6	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
websocket-client	0.58.0	WebSocket client for python. hybi13 is supported. / BSD-3-Clause
werkzeug	2.0.3	The comprehensive WSGI web application library. / BSD-3-Clause
wget	1.21.3	utility for non-interactive download of files from the Web / GPL-3.0-or-later
wheel	0.37.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.2	Interactive Widgets for Jupyter / BSD-3-Clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD-2-Clause
wurlitzer	3.0.2	Capture C-level stdout/stderr in Python / MIT
xarray	0.20.1	N-D labeled arrays and datasets in Python. / Apache-2.0
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsheet f
xlsxwriter	3.0.3	A Python module for creating Excel XLSX files / BSD-2-Clause
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and GPL
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
yarl	1.6.3	Yet another URL library / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-later
zfp	0.5.5	Library for compressed numerical arrays that support high throughput read ar
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.7.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.12	Massively spiffy yet delicately unobtrusive compression library / Zlib
zope	1.0	web application server / BSD
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD-3-Clause AND GPL

Anaconda 2021.11 (Nov 17, 2021)

User-facing changes

- Anaconda Navigator has been updated to 2.1.1
- Conda has been updated to 4.10.3
- The installer and base environment now use Python 3.9. Meta-packages for Python 3.7, 3.8, and 3.9 are also available.
- Updated EULA includes disclaimers for the Arm Performance Libraries.
- The installer for linux-64 will now error out if a glibc version older than 2.17 is found.
- Improved the macOS pkg installer installation already detected error message.

Major package updates

- anaconda-client 1.7.2 -> 1.9.0
- anaconda-project 0.9.1 -> 0.10.1
- bokeh 2.3.2 -> 2.4.1
- dask 2021.4.0 -> 2021.10.0
- ipython 7.22.0 -> 7.29.0
- jupyter_core 4.7.1 -> 4.8.1
- jupyterlab 3.0.14 -> 3.2.1
- jupyterlab_server 2.4.0 -> 2.8.2
- matplotlib 3.3.4 -> 3.4.3
- mkl 2021.2.0 -> 2021.4.0
- numba 0.53.1 -> 0.54.1
- numpy 1.20.1 -> 1.20.3
- pandas 1.2.4 -> 1.3.4
- pillow 8.2.0 -> 8.4.0
- python 3.9.4 -> 3.9.7
- requests 2.25.1 -> 2.26.0
- seaborn 0.11.1 -> 0.11.2
- spyder 4.2.5 -> 5.1.5
- spyder-kernels 1.10.2 -> 2.1.3
- sympy 1.8 -> 1.9

Added:

- conda-content-trust 0.1.1
- conda-token 0.3.0

Packages

Anaconda 2021.11 for 64-bit Windows with Python 3.9

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science proje
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT

Name	Version	Summary / License
arrow	0.13.1	Better dates & times for Python / Apache-2.0
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.7	A tool that automatically formats Python code to conform to the PE
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or
bitarray	2.3.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.6	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossl
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and activ
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.10	pure Python COM package / MIT
conda	4.10.3	OS-agnostic, system-level binary package and environment manage
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cookiecutter	1.7.2	A command-line utility that creates projects from cookiecutters (pr
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers

Name	Version	Summary / License
curl	7.78.0	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
daal4py	2021.3.0	A convenient Python API to Intel (R) oneAPI Data Analytics Libra
dal	2021.3.0	Intel® oneDAL runtime libraries / Intel Simplified Software Licens
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MI
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / Public Domain Dedict
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT A
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / M
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only an
fsspec	2021.10.1	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.8.0	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.2.1	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BS
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT

Name	Version	Summary / License
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python.
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.2.1	An extensible environment for interactive and reproducible comput
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.8.2	A set of server components for JupyterLab and JupyterLab like app
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	23.1.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.78.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compr
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libwebp	1.2.0	WebP image library / Google
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but
llvmlite	0.37.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	GNU Compiler Collection (libgfortran) for MinGW-w64 / GPL, LG
m2w64-gcc-libs	5.3.0	None / GPL3+, partial:GCCRLE, partial:LGPL2+
m2w64-gcc-libs-core	5.3.0	GNU Compiler Collection (core libraries) for MinGW-w64 / GPL3
m2w64-gmp	6.1.0	None / LGPL3
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based

Name	Version	Summary / License
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.18	cross platform install of menu items / BSD-3-Clause
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Mu
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / I
nltk	3.6.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause
numba	0.54.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis too
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic

Name	Version	Summary / License
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python
psutil	5.8.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.31	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.2.4	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Claus
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protoco
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / M
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	228	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.2.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-o

Name	Version	Summary / License
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.1.1	Jupyter Qt Console / BSD-3-Clause
qtpy	1.10.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2021.8.3	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built w
rope	0.19.0	A python refactoring library / LGPL 3.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.3	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BS
scikit-learn-intelex	2021.3.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up yo
scipy	1.7.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Python binding of the cross-platform builder toolkit for Qt. / Comm
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.22	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tbb	2021.4.0	High level abstract threading library / Apache-2.0
tbb4py	2021.4.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with file
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tifffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause

Name	Version	Summary / License
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-C
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support /
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Dom
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
watchdog	2.1.3	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT
whichcraft	0.6.1	This package provides cross-platform cross-python shutil.which fun
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.24.9	Interact with Excel from Python and vice versa / BSD-3-clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zfp	0.5.5	Library for compressed numerical arrays that support high throughp
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.11 for 32-bit Windows with Python 3.9

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science proje
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
arrow	0.13.1	Better dates & times for Python / Apache-2.0
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.7	A tool that automatically formats Python code to conform to the PE
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or
bitarray	2.3.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.6	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and activ
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.10	pure Python COM package / MIT
conda	4.10.3	OS-agnostic, system-level binary package and environment manage
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause

Table 52 – continued from

Name	Version	Summary / License
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cookiecutter	1.7.2	A command-line utility that creates projects from cookiecutters (pr
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers
curl	7.78.0	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MI
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT A
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / M
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only an
fsspec	2021.10.1	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.8.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.2.1	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause

Table 52 – continued from

Name	Version	Summary / License
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python.
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.2.1	An extensible environment for interactive and reproducible comput
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.8.2	A set of server components for JupyterLab and JupyterLab like app
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	23.1.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.78.0	tool and library for transferring data with URL syntax / curl
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libwebp	1.2.0	WebP image library / Google
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.37.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	GNU Compiler Collection (libgfortran) for MinGW-w64 / GPL, LG
m2w64-gcc-libs	5.3.0	None / GPL3+, partial:GCCRLE, partial:LGPL2+
m2w64-gcc-libs-core	5.3.0	GNU Compiler Collection (core libraries) for MinGW-w64 / GPL3
m2w64-gmp	6.1.0	None / LGPL3
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause

Table 52 – continued from

Name	Version	Summary / License
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.18	cross platform install of menu items / BSD-3-Clause
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Mu
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / B
nltk	3.6.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause
numba	0.54.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis too
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT

Table 52 – continued from

Name	Version	Summary / License
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python
psutil	5.8.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.31	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.2.4	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Claus
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protoco
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / M
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	228	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.2.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-o
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.1.1	Jupyter Qt Console / BSD-3-Clause
qtpy	1.10.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT

Table 52 – continued from

Name	Version	Summary / License
regex	2021.8.3	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built w
rope	0.19.0	A python refactoring library / LGPL 3.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BS
scipy	1.6.2	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Python binding of the cross-platform builder toolkit for Qt. / Comm
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.22	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tbb	2021.4.0	High level abstract threading library / Apache-2.0
tbb4py	2021.4.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with file
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-C
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT

Table 52 – continued from

Name	Version	Summary / License
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support /
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Dom
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode string
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
watchdog	2.1.3	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character code
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT
whichcraft	0.6.1	This package provides cross-platform cross-python shutil.which fun
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.24.9	Interact with Excel from Python and vice versa / BSD-3-clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.11 for macOS on Intel 64-bit with Python 3.9

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir

Name	Version	Summary / License
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to han
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
arrow	0.13.1	Better dates & times for Python / Apache-2.0
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.7	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text.
bitarray	2.3.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.6	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless an
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively ma
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause

Name	Version	Summary / License
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cookiecutter	1.7.2	A command-line utility that creates projects from cookiecutters (project t
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.78.0	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
daal4py	2021.3.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / A
dal	2021.3.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	2021.8.1	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.8.0	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.2.1	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0

Name	Version	Summary / License
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.2.1	An extensible environment for interactive and reproducible computing, ba
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.8.2	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
keyring	23.1.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.78.0	tool and library for transferring data with URL syntax / curl
libcxx	12.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgfortran	3.0.1	Fortran compiler and libraries from the GNU Compiler Collection / GPL
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libnghttp2	1.41.0	This is an implementation of Hypertext Transfer Protocol version 2. / MI
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libuv	1.40.0	Cross-platform asynchronous I/O / MIT

Name	Version	Summary / License
libwebp	1.2.0	WebP image library / Google
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvm-openmp	12.0.0	The OpenMP API supports multi-platform shared-memory parallel progr
llvmlite	0.37.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings.
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpi	1.0	A high performance widely portable implementation of the MPI standard
mpich	3.3.2	A high performance widely portable implementation of the MPI standard
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the myp
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause
numba	0.54.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT

Name	Version	Summary / License
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.(
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.31	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.4	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / M

Name	Version	Summary / License
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop /
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.2.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.1.1	Jupyter Qt Console / BSD-3-Clause
qtpy	1.10.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.8.3	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.19.0	A python refactoring library / LGPL 3.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.3	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BSD-3-C
scikit-learn-intelex	2021.3.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Sci
scipy	1.7.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Python binding of the cross-platform builder toolkit for Qt. / Commercial
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help f
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.22	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database engine / P

Name	Version	Summary / License
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tbb	2021.4.0	High level abstract threading library / Apache-2.0
tbb4py	2021.4.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain A
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	2.1.3	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT
whichcraft	0.6.1	This package provides cross-platform cross-python shutil.which functiona
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.1.1	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.24.9	Interact with Excel from Python and vice versa / BSD-3-clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zfp	0.5.5	Library for compressed numerical arrays that support high throughput rea
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License

Name	Version	Summary / License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.11 for 64-bit Linux on IBM Z CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	4.5	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.0.2	High level compatibility layer for multiple asynchronous event loop imple
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-l
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.6	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively ma
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause

Table 54 – continued from previou

Name	Version	Summary / License
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
expat	2.4.1	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	2021.8.1	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.8.0	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.1.11	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0

Table 54 – continued from previou

Name	Version	Summary / License
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	7.0.1	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.2.1	An extensible environment for interactive and reproducible computing, ba
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.8.2	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-s390x	2.33.1	A set of programming tools for creating and managing binary programs,
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / curl
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	9.3.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran4	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgomp	9.3.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.13	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.3.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3

Table 54 – continued from previou

Name	Version	Summary / License
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.3	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1

Table 54 – continued from previou

Name	Version	Summary / License
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executal
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.45	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-or-later
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built with . /
rope	0.19.0	A python refactoring library / LGPL 3.0

Table 54 – continued from previou

Name	Version	Summary / License
ruamel_yaml	0.15.80	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.3	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.7.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.25	Python binding of the cross-platform builder toolkit for Qt. / Commercial
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.1.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help f
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.4.22	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2021.3.17	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain A
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT

Table 54 – continued from previou

Name	Version	Summary / License
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.11 for 64-bit Linux on IBM Power CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science projects / B
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-l
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
bitarray	2.3.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2

Name	Version	Summary / License
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.6	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless an
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively ma
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.78.0	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
expat	2.4.1	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	2021.8.1	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.8.0	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l

Name	Version	Summary / License
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
h5py	3.2.1	Read and write HDF5 files from Python / BSD-3-Clause
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	7.0.1	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs,
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.78.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach

Name	Version	Summary / License
libnghttp2	1.41.0	This is an implementation of Hypertext Transfer Protocol version 2. / MI
libopenblas	0.3.13	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	2.0.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.5	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open

Name	Version	Summary / License
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executal
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.45	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyodbc	4.0.31	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.4	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT

Name	Version	Summary / License
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.2.1	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.8.3	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built with . /
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.3	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.7.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help f
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript A
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.4.22	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.13.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tbb	2021.4.0	High level abstract threading library / Apache-2.0
tbb4py	2021.4.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain A
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1

Name	Version	Summary / License
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zfp	0.5.5	Library for compressed numerical arrays that support high throughput rea
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.11 for 64-bit Linux on ARMv8 CPUs with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
adwaita-icon-theme	40.1.1	The default icon theme used by the GNOME desktop / LGPL-3.0-or-later
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
arrow	0.13.1	Better dates & times for Python / Apache-2.0
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-l
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
at-spi2-atk	2.34.2	bridge for AT-SPI and ATK accessibility technologies / LGPL-2.1-or-late
at-spi2-core	2.36.0	D-Bus-based implementation of AT-SPI accessibility framework / LGPL-
atk-1.0	2.36.0	Accessibility Toolkit. / LGPL-2.0-or-later
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing classes

Name	Version	Summary / License
autopep8	1.5.7	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text.
bitarray	1.7.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless an
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively ma
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cookiecutter	1.7.2	A command-line utility that creates projects from cookiecutters (project t
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0

Name	Version	Summary / License
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
epoxy	1.5.4	A library for handling OpenGL function pointer management for you. / M
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
expat	2.4.1	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	2021.8.1	A specification for pythonic filesystems / BSD-3-Clause
gdk-pixbuf	2.38.2	GdkPixbuf is a library for image loading and manipulation. / LGPL-2.1-o
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.21.0	Internationalization package / GPL-2.0
gevent	21.8.0	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
gobject-introspection	1.68.0	Middleware for binding GObject-based code to other languages. / LGPL-
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
gtk3	3.24.21	Version 3 of the Gtk+ graphical toolkit / LGPL-2.0-or-later
h5py	3.1.0	Read and write HDF5 files from Python / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.12.0	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
hicolor-icon-theme	0.17	Fallback theme for FreeDesktop.org icon themes / GPL-2.0-or-later
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	68.1	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT

Name	Version	Summary / License
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.7.1	Pure Python DBus interface / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.2.1	An extensible environment for interactive and reproducible computing, ba
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.8.2	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-aarch64	2.36.1	A set of programming tools for creating and managing binary programs, c
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcups	2.2.12	CUPS is the standards-based, open source printing system / LGPL-2.0-or
libcurl	7.71.1	tool and library for transferring data with URL syntax / curl
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libevent	2.1.10	An event notification library. / BSD-3-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	10.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	10.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran5	10.2.0	Fortran compiler and libraries from the GNU Compiler Collection / GPL
libgomp	10.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libopenblas	0.3.13	An Optimized BLAS library / BSD

Name	Version	Summary / License
libpng	1.6.37	PNG reference library / zlib/libpng
libpq	12.2	The postgres runtime libraries and utilities (not the server itself) / Postgre
librsvg	2.50.7	librsvg is a library to render SVG files using cairo. / LGPL-2.1-or-later
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	10.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxkbcommon	1.0.1	keymap handling library for toolkits and window systems / MIT/X11 Der
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvmlite	0.37.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres
mypy_extensions	0.4.1	Experimental type system extensions for programs checked with the myp
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / BSD-3
ninja	1.10.2	A small build system with a focus on speed / Apache 2.0
nltk	3.6.5	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause

Name	Version	Summary / License
numba	0.54.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executab
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.45	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-or-later

Name	Version	Summary / License
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.15.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / M
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.15.2	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.1.1	Jupyter Qt Console / BSD-3-Clause
qtpy	1.10.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.8.3	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built with . /
rope	0.19.0	A python refactoring library / LGPL 3.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.80	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.3	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.7.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.25	Python binding of the cross-platform builder toolkit for Qt. / Commercial
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT

Name	Version	Summary / License
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.23	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database engine /
statsmodels	0.13.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tbb	2021.4.0	High level abstract threading library / Apache-2.0
tbb4py	2021.4.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain A
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT
whichcraft	0.6.1	This package provides cross-platform cross-python shutil.which functiona
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.0.1	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh

Name	Version	Summary / License
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.11 for 64-bit Linux with Python 3.9

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	4.5	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.9.0	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	2.1.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.10.1	Tool for encapsulating, running, and reproducing data science projects /
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
arrow	0.13.1	Better dates & times for Python / Apache-2.0
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.6.6	A abstract syntax tree for Python with inference support. / LGPL-2.1-or-
astropy	4.3.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	21.2.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.7	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.10.0	Python library designed for screen-scraping / MIT
binaryornot	0.4.4	Ultra-lightweight pure Python package to check if a file is binary or text.
bitarray	2.3.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	Linear Algebra PACKage / BSD-3-Clause
bleach	4.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0

Name	Version	Summary / License
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.4.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.10.26	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2021.10.8	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.6	Foreign Function Interface for Python calling C code. / MIT
cfitsio	3.470	A library for reading and writing FITS files / fitsio
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless an
charset-normalizer	2.0.4	The Real First Universal Charset Detector. Open, modern and actively ma
click	8.0.3	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	2.0.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.6	tools for building conda packages / BSD 3-Clause
conda-content-trust	0.1.1	Signing and verification tools for conda / BSD-3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-token	0.3.0	Set repository access token / BSD-3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cookiecutter	1.7.2	A command-line utility that creates projects from cookiecutters (project t
cryptography	3.4.8	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.78.0	tool and library for transferring data with URL syntax / curl
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.24	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
daal4py	2021.3.0	A convenient Python API to Intel (R) oneAPI Data Analytics Library / A
dal	2021.3.0	Intel® oneDAL runtime libraries / Intel Simplified Software License
dask	2021.10.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.10.0	Parallel Python with task scheduling / BSD-3-Clause
dataclasses	0.8	An implementation of PEP 557: Data Classes / Apache-2.0
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
debugpy	1.4.1	An implementation of the Debug Adapter Protocol for Python / MIT
decorator	5.1.0	Better living through Python with decorators. / BSD-2-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.10.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / Public Domain Dedication a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.1.0	An implementation of lxml.xmlfile for the standard library / MIT AND P
expat	2.4.1	Expat XML parser library in C / MIT

Name	Version	Summary / License
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.3.1	A platform independent file lock. / Public Domain
flake8	3.9.2	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
fonttools	4.25.0	fontTools is a library for manipulating fonts, written in Python. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	2021.8.1	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.8.0	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.69.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.1.1	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.3.0	Read and write HDF5 files from Python / BSD-3-Clause
harfbuzz	2.8.1	An OpenType text shaping engine. / MIT
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	3.2	Internationalized Domain Names in Applications (IDNA). / BSD-3-Claus
imagecodecs	2021.8.26	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	4.8.1	A library to access the metadata for a Python package / Apache-2.0
inflection	0.5.1	A port of Ruby on Rails inflector to Python / MIT
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	6.4.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.29.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.5	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.9.3	A Python utility / library to sort Python imports. / MIT
itsdangerous	2.0.1	Various helpers to pass trusted data to untrusted environments. / BSD-3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.18.0	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.7.1	Pure Python DBus interface / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
jinja2-time	0.2.0	Jinja2 Extension for Dates and Times / MIT
joblib	1.1.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license

Name	Version	Summary / License
json5	0.9.6	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.8.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.2.1	An extensible environment for interactive and reproducible computing, ba
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.8.2	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
keyring	23.1.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.35.1	A set of programming tools for creating and managing binary programs,
lerc	3.0	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.78.0	tool and library for transferring data with URL syntax / curl
libdeflate	1.8	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210910	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / MIT
libgcc-ng	9.3.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran4	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgomp	9.3.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm11	11.1.0	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libnghttp2	1.41.0	This is an implementation of Hypertext Transfer Protocol version 2. / MI
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.3.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.12	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvmlite	0.37.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause

Name	Version	Summary / License
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.4.3	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-inline	0.1.2	Inline Matplotlib backend for Jupyter / BSD-3-Clause
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.4.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.4.0	Python hooks for Intel(R) Math Kernel Library runtime control settings.
mkl_fft	1.3.1	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.2.2	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.10.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpi	1.0	A high performance widely portable implementation of the MPI standard
mpich	3.3.2	A high performance widely portable implementation of the MPI standard
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
munkres	1.1.4	The Munkres module provides an O(n^3) implementation of the Munkres
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the myp
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.1.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.3	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.6.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.4.5	Jupyter Notebook / BSD-3-Clause
numba	0.54.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openjpeg	2.4.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.9	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1l	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	21.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.3.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.8.2	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.13	A small utility to modify the dynamic linker and RPATH of ELF executal

Name	Version	Summary / License
path	16.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.6	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.(
patsy	0.5.2	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.45	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.4.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
poyo	0.5.0	A lightweight YAML Parser for Python / MIT
prometheus_client	0.11.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.20	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.44.1	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.1.1	Python docstring style checker (formerly pep257) / MIT
pyerfa	2.0.0	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.10.0	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.9.6	python code static checker / GPL-2.0-or-later
pyls-spyder	0.4.0	Spyder extensions for the python-lsp-server / MIT
pyodbc	4.0.31	DB API Module for ODBC / MIT
pyopenssl	21.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	3.0.4	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.18.0	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.4	Simple and powerful testing with Python. / MIT
python	3.9.7	General purpose programming language / Python-2.0
python-dateutil	2.8.2	Extensions to the standard Python datetime module. / BSD-3-Clause and
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python-lsp-black	1.0.0	Black plugin for the Python LSP Server / MIT
python-lsp-jsonrpc	1.0.0	A Python 3.6+ server implementation of the JSON RPC 2.0 protocol. / M
python-lsp-server	1.2.4	An implementation of the Language Server Protocol for Python / MIT
python-slugify	5.0.2	A Python Slugify application that handles Unicode / MIT
pytz	2021.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT

Name	Version	Summary / License
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	6.0	YAML parser and emitter for Python / MIT
pyzmq	22.2.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	3.0.2	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qstylizer	0.1.10	Qt stylesheet generation utility for PyQt/PySide / MIT
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0-only
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.1.1	Jupyter Qt Console / BSD-3-Clause
qtpy	1.10.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.8.3	Alternative regular expression module, to replace re / Apache 2.0
requests	2.26.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.19.0	A python refactoring library / LGPL 3.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.3	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.2	A set of python modules for machine learning and data mining / BSD-3-C
scikit-learn-intelex	2021.3.0	Intel(R) Extension for Scikit-learn is a seamless way to speed up your Sci
scipy	1.7.1	Scientific Library for Python / BSD-3-Clause
seaborn	0.11.2	Statistical data visualization / BSD 3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.8.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	58.0.4	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.7.0	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Python binding of the cross-platform builder toolkit for Qt. / Commercial
six	1.16.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.4.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	2.0.0	sphinxcontrib-htmlhelp is a sphinx extension which renders HTML help f
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript A
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.5	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	5.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	2.1.3	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.22	Database Abstraction Library. / MIT
sqlite	3.36.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.9	Python library for symbolic mathematics / BSD-3-Clause
tbb	2021.4.0	High level abstract threading library / Apache-2.0

Name	Version	Summary / License
tbb4py	2021.4.0	TBB module for Python / Apache 2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.5.0	Testpath is a collection of utilities for Python code working with files and
text-unidecode	1.3	The most basic Text::Unidecode port / Artistic
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.2.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2021.7.2	Read and write image data from and to TIFF files. / BSD-3-Clause
tinycss	0.4	Tinycss is a complete yet simple CSS parser for Python. / BSD-3-Clause
tk	8.6.11	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.62.3	A Fast, Extensible Progress Meter / MPL-2.0 AND MIT
traitlets	5.1.0	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.3	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.10.0.2	Backported and Experimental Type Hints for Python / PSF-2.0
tzdata	2021e	The Time Zone Database (called tz, tzdb or zoneinfo) / Public-Domain A
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unidecode	1.2.0	ASCII transliterations of Unicode text / GPL-2.0-or-later
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.7	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	2.1.3	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	2.0.2	The comprehensive WSGI web application library. / BSD-3-Clause
wheel	0.37.0	A built-package format for Python. / MIT
whichcraft	0.6.1	This package provides cross-platform cross-python shutil.which functiona
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.1.1	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	3.0.1	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zfp	0.5.5	Library for compressed numerical arrays that support high throughput rea
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.4.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 (May 13, 2021)

User-facing changes

- Anaconda Navigator has been updated to 2.0.3
- Conda has been updated to 4.10.1
- Added support for the 64-bit AWS Graviton2 (ARM64) platform
- Added support for the 64-bit Linux on IBM Z & LinuxONE (s390x) platform
- Meta-packages are available for Python 3.7, 3.8 and 3.9. The installer uses Python 3.8.
- EULA has been updated to include a more complete cryptography list
- On macOS, all available shells are now initialized for conda as part of the default macOS .pkg installation.

Major package updates

- anaconda-project 0.8.4 -> 0.9.1
- bokeh 2.2.3 -> 2.3.2
- dask 2.30.0 -> 2021.4.0
- ipython 7.19.0 -> 7.22.0
- jupyter_client 6.1.7 -> 6.1.12
- jupyter_console 6.2.0 -> 6.4.0
- jupyter_core 4.6.3 -> 4.7.1
- jupyterlab 2.2.6 -> 3.0.14
- jupyterlab_server 1.2.0 -> 2.4.0
- numba 0.51.2 -> 0.53.1
- numpy 1.19.2 -> 1.20.1
- pandas 1.1.3 -> 1.2.4
- pillow 8.0.1 -> 8.2.0
- python 3.8.5 -> 3.9.4
- requests 2.24.0 -> 2.25.1
- scipy 1.5.2 -> 1.6.2
- seaborn 0.11.0 -> 0.11.1
- spyder 4.1.5 -> 4.2.5
- spyder-kernels 1.9.4 -> 1.10.2
- statsmodels 0.12.0 -> 0.12.2
- sympy 1.6.2 -> 1.8

Added:

- jupyter-packaging 0.7.12
- jupyter_server 1.4.1

- jupyterlab_widgets 1.0.0

Packages

Anaconda 2021.05 for 64-bit Windows with Python 3.8

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science proje
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PE
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be
bokeh	2.3.2	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossl
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.9	pure Python COM package / MIT
conda	4.10.1	OS-agnostic, system-level binary package and environment manage

Name	Version	Summary / License
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imagecodecs	2021.3.31	Image transformation, compression, and decompression codecs / BS
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause

Name	Version	Summary / License
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python.
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like app
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	2.2.1	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compr
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	GNU Compiler Collection (libgfortran) for MinGW-w64 / GPL, LG
m2w64-gcc-libs	5.3.0	None / GPL3+, partial:GCCRLE, partial:LGPL2+
m2w64-gcc-libs-core	5.3.0	GNU Compiler Collection (core libraries) for MinGW-w64 / GPL3
m2w64-gmp	6.1.0	None / LGPL3
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3

Name	Version	Summary / License
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.2.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / I
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numba	0.53.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis too
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic

Name	Version	Summary / License
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python
psutil	5.8.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT

Name	Version	Summary / License
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built w
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BS
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.3	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tiffile	2021.4.8	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause

Name	Version	Summary / License
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support / A
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.23.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL-3.0-o
zfp	0.5.5	Library for compressed numerical arrays that support high throughp
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 for 32-bit Windows with Python 3.8

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science proje
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT

Table 59 – continued from prev

Name	Version	Summary / License
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PE
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be
bokeh	2.3.2	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.9	pure Python COM package / MIT
conda	4.10.1	OS-agnostic, system-level binary package and environment manage
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause

Table 59 – continued from prev

Name	Version	Summary / License
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedicts
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python.
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like appl

Table 59 – continued from prev

Name	Version	Summary / License
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	GNU Compiler Collection (libgfortran) for MinGW-w64 / GPL, LG
m2w64-gcc-libs	5.3.0	None / GPL3+, partial:GCCRLE, partial:LGPL2+
m2w64-gcc-libs-core	5.3.0	GNU Compiler Collection (core libraries) for MinGW-w64 / GPL3
m2w64-gmp	6.1.0	None / LGPL3
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / B
nltk	3.6.1	Natural Language Toolkit / Apache 2.0

Table 59 – continued from prev

Name	Version	Summary / License
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numba	0.53.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis too
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python
psutil	5.8.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.2	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li

Table 59 – continued from prev

Name	Version	Summary / License
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built w
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.1	A set of python modules for machine learning and data mining / BS
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp

Table 59 – continued from prev

Name	Version	Summary / License
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.0	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support /
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.23.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.2	A high-performance asynchronous messaging library. / LGPL-3.0-o

Table 59 – continued from prev

Name	Version	Summary / License
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 for macOS on Intel 64-bit with Python 3.8

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to han
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT

Table 60 – continued from previou

Name	Version	Summary / License
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.21.0	Internationalization package / GPL-2.0
gevent	21.1.2	Coroutine-based network library / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like

Table 60 – continued from previou

Name	Version	Summary / License
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	10.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause

Table 60 – continued from previou

Name	Version	Summary / License
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	10.0.0	The OpenMP API supports multi-platform shared-memory parallel progr
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.2.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numba	0.53.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause

Table 60 – continued from previou

Name	Version	Summary / License
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.(
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop / P
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT

Table 60 – continued from previou

Name	Version	Summary / License
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.3	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau

Table 60 – continued from previou

Name	Version	Summary / License
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.1.0	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.23.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 for 64-bit Linux on IBM Z CPUs with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	4.5	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B

Table 61 – continued from previou

Name	Version	Summary / License
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT

Table 61 – continued from previou

Name	Version	Summary / License
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	68.1	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imagecodecs	2021.1.11	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.3.1	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var

Table 61 – continued from previou

Name	Version	Summary / License
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-s390x	2.33.1	A set of programming tools for creating and managing binary programs,
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.3.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran4	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgomp	9.3.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.13	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.3.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause

Table 61 – continued from previou

Name	Version	Summary / License
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.16.0	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executab
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT

Table 61 – continued from previou

Name	Version	Summary / License
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyerfa	1.7.1.1	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
rope	0.18.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.80	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	51.1.2	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.25	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause

Table 61 – continued from previou

Name	Version	Summary / License
sqlalchemy	1.3.17	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / I
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tifffile	2021.3.31	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. / I
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.2.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 for 64-bit Linux on IBM Power CPUs with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0

Table 62 – continued from previou

Name	Version	Summary / License
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter proto
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT

Table 62 – continued from previou

Name	Version	Summary / License
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.10	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT

Table 62 – continued from previou

Name	Version	Summary / License
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.10	An optimized BLAS library / BSD
openblas-devel	0.3.10	OpenBLAS headers and libraries for developing software that used Open
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executab
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount

Table 62 – continued from previou

Name	Version	Summary / License
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0

Table 62 – continued from previou

Name	Version	Summary / License
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 for 64-bit Linux on ARMv8 CPUs with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.7.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	

Name	Version	Summary / License
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless an
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT

Name	Version	Summary / License
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.1.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.12.0	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	68.1	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imagecodecs	2021.1.11	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.1	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause

Name	Version	Summary / License
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-aarch64	2.36.1	A set of programming tools for creating and managing binary programs,
lerc	2.2.1	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	10.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	10.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran5	10.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgomp	10.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libopenblas	0.3.13	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	10.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause

Name	Version	Summary / License
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numba	0.53.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.11	A small utility to modify the dynamic linker and RPATH of ELF executal
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT

Name	Version	Summary / License
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyerfa	1.7.2	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
rope	0.18.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.80	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.25	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause

Name	Version	Summary / License
sqlalchemy	1.3.23	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.2	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2021.3.31	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zfp	0.5.5	Library for compressed numerical arrays that support high throughput rea
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.2.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.05 for 64-bit Linux with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	2.1.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.2	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (

Table 64 – continued from previou

Name	Version	Summary / License
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.4.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.17.1	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause

Table 64 – continued from previou

Name	Version	Summary / License
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MIT
jeepney	0.6.0	Pure Python DBus interface / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT

Table 64 – continued from previou

Name	Version	Summary / License
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.2.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numba	0.53.1	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executab
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT

Table 64 – continued from previou

Name	Version	Summary / License
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.(
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q

Table 64 – continued from previou

Name	Version	Summary / License
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	4.0.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.15	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.3	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tifffile	2020.10.1	Read and write image data from and to TIFF files. / BSD-3-Clause

Table 64 – continued from previou

Name	Version	Summary / License
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.1.0	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 (May 7, 2021)

Packages

Anaconda 2021.04 for 64-bit Windows with Python 3.8

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.

Name	Version	Summary / License
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science proje
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PE
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossl
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.9	pure Python COM package / MIT
conda	4.10.1	OS-agnostic, system-level binary package and environment manage
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python langu

Name	Version	Summary / License
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only an
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imagecodecs	2021.3.31	Image transformation, compression, and decompression codecs / BS
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python.
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT

Name	Version	Summary / License
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like app
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
lerc	2.2.1	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compr
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	GNU Compiler Collection (libgfortran) for MinGW-w64 / GPL, LG
m2w64-gcc-libs	5.3.0	None / GPL3+, partial:GCCRLE, partial:LGPL2+
m2w64-gcc-libs-core	5.3.0	GNU Compiler Collection (core libraries) for MinGW-w64 / GPL3
m2w64-gmp	6.1.0	None / LGPL3
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.2.1	Intel (R) MKL-powered package for sampling from common proba

Name	Version	Summary / License
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / I
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis too
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python
psutil	5.8.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC

Name	Version	Summary / License
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built w
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BS
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all

Name	Version	Summary / License
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tifffile	2021.4.8	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support /
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause

Name	Version	Summary / License
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnir
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) sp
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.23.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL-3.0-o
zfp	0.5.5	Library for compressed numerical arrays that support high throughp
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 for 32-bit Windows with Python 3.8

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science proje
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop
appdirs	1.4.4	A small Python module for determining appropriate platform-speci
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PE
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu

Table 66 – continued from prev

Name	Version	Summary / License
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.9	pure Python COM package / MIT
conda	4.10.1	OS-agnostic, system-level binary package and environment manage
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only an
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

Table 66 – continued from prev

Name	Version	Summary / License
gevent	21.1.2	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python.
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like app
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC

Table 66 – continued from prev

Name	Version	Summary / License
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	GNU Compiler Collection (libgfortran) for MinGW-w64 / GPL, LG
m2w64-gcc-libs	5.3.0	None / GPL3+, partial:GCCRLE, partial:LGPL2+
m2w64-gcc-libs-core	5.3.0	GNU Compiler Collection (core libraries) for MinGW-w64 / GPL3
m2w64-gmp	6.1.0	None / LGPL3
m2w64-libwinpthread-git	5.0.0.4634.697f757	None / MIT, BSD
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / B
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis too

Table 66 – continued from prev

Name	Version	Summary / License
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / M
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python
psutil	5.8.0	A cross-platform process and system utilities module for Python / B
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.2	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0

Table 66 – continued from prev

Name	Version	Summary / License
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF-2.0
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built w
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.1	A set of python modules for machine learning and data mining / BS
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause

Table 66 – continued from prev

Name	Version	Summary / License
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
textdistance	4.2.1	TextDistance – python library for comparing distance between two
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings /
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, ori
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support /
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.2	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.27.29016	MSVC runtimes associated with cl.exe version 19.27.29111 (VS 20
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.23.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.2	A high-performance asynchronous messaging library. / LGPL-3.0-
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 for macOS on Intel 64-bit with Python 3.8

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to han
appnope	0.1.2	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.2	Control AppleScriptable applications from Python. / Public Domain
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa

Table 67 – continued from previou

Name	Version	Summary / License
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.21.0	Internationalization package / GPL-2.0
gevent	21.1.2	Coroutine-based network library / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0

Table 67 – continued from previou

Name	Version	Summary / License
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter proto
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	10.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	10.0.0	The OpenMP API supports multi-platform shared-memory parallel progr
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based

Table 67 – continued from previou

Name	Version	Summary / License
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.2.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the mypy
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT

Table 67 – continued from previou

Name	Version	Summary / License
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python.app	3	Proxy on macOS letting Python libraries hook into the GUI event loop /
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause

Table 67 – continued from previou

Name	Version	Summary / License
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tifffile	2020.10.1	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. / M
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M

Table 67 – continued from previou

Name	Version	Summary / License
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.1.0	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.23.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 for 64-bit Linux on IBM Z CPUs with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	4.5	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster

Table 68 – continued from previou

Name	Version	Summary / License
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A "smart font" system that handles the complexities of lesser-known lang

Table 68 – continued from previou

Name	Version	Summary / License
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.10.6	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	68.1	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imagecodecs	2021.1.11	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter proto
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.3.1	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-s390x	2.33.1	A set of programming tools for creating and managing binary programs,
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.3.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio

Table 68 – continued from previou

Name	Version	Summary / License
libgfortran-ng	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran4	7.5.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgomp	9.3.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.13	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.3.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD

Table 68 – continued from previou

Name	Version	Summary / License
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.16.0	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executal
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyerfa	1.7.1.1	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause

Table 68 – continued from previou

Name	Version	Summary / License
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
rope	0.18.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.80	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	51.1.2	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.25	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.17	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2021.3.31	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0

Table 68 – continued from previou

Name	Version	Summary / License
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.2.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 for 64-bit Linux on IBM Power CPUs with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster

Table 69 – continued from previou

Name	Version	Summary / License
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause

Table 69 – continued from previou

Name	Version	Summary / License
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.10	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System

Table 69 – continued from previou

Name	Version	Summary / License
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.10	An optimized BLAS library / BSD
openblas-devel	0.3.10	OpenBLAS headers and libraries for developing software that used Open
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executab
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT

Table 69 – continued from previou

Name	Version	Summary / License
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
six	1.15.0	Python 2 and 3 compatibility utilities / MIT

Table 69 – continued from previou

Name	Version	Summary / License
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine /
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1

Table 69 – continued from previou

Name	Version	Summary / License
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 for 64-bit Linux on ARMv8 CPUs with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
_openmp_mutex	5.1	OpenMP Implementation Mutex / BSD-3-Clause
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.7.0	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotli	1.0.9	Brotli compression format / MIT
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
brunsli	0.1	Practical JPEG Repacker / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cached-property	1.5.2	A decorator for caching properties in classes. / BSD-3-Clause
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
charls	2.2.0	CharLS is a C++ implementation of the JPEG-LS standard for lossless an
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause

Name	Version	Summary / License
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
giflib	5.2.1	Library for reading and writing gif images / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.1	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.1	Library for constructing graphs of media-handling components / LGPL 2
h5py	3.1.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.12.0	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	68.1	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imagecodecs	2021.1.11	Image transformation, compression, and decompression codecs / BSD-3-
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0

Name	Version	Summary / License
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9d	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
jxrlib	1.1	jxrlib - JPEG XR Library by Microsoft, built from Debian hosted sources
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.19.1	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-aarch64	2.36.1	A set of programming tools for creating and managing binary programs,
lerc	2.2.1	LERC - Limited Error Raster Compression / Apache-2.0
libaec	1.0.4	Adaptive Entropy Coding library / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libdeflate	1.7	libdeflate is a library for fast, whole-buffer DEFLATE-based compressior
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled a
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	10.2.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	10.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgfortran5	10.2.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
libgomp	10.2.0	The GCC OpenMP implementation. / GPL-3.0-only WITH GCC-excepti
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libopenblas	0.3.13	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	10.2.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3

Name	Version	Summary / License
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp	1.2.0	WebP image library / Google
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
libzopfli	1.0.3	A compression library programmed in C to perform very good, but slow,
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.13	An optimized BLAS library / BSD
openblas-devel	0.3.13	OpenBLAS headers and libraries for developing software that used Open
openjpeg	2.3.0	An open-source JPEG 2000 codec written in C / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0

Name	Version	Summary / License
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.11	A small utility to modify the dynamic linker and RPATH of ELF executal
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.7.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyerfa	1.7.2	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.3.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0

Name	Version	Summary / License
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
rope	0.18.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.80	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.25	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.8	A fast compressor/decompressor / BSD 3-clause
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.23	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2021.3.31	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause

Name	Version	Summary / License
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zfp	0.5.5	Library for compressed numerical arrays that support high throughput rea
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.2.0	Interfaces for Python / ZPL-2.1
zstd	1.4.9	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2021.04 for 64-bit Linux with Python 3.8

Name	Version	Summary / License
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	2.0.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.9.1	Tool for encapsulating, running, and reproducing data science projects / B
anyio	2.2.0	High level compatibility layer for multiple asynchronous event loop imple
appdirs	1.4.4	A small Python module for determining appropriate platform-specific dir
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.5	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.2.1	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.6	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.9.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
black	19.10b0	The Uncompromising Code Formatter / MIT
blas	1.0	

Table 71 – continued from previou

Name	Version	Summary / License
bleach	3.3.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.21.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.3.1	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
c-ares	1.17.1	This is c-ares, an asynchronous resolver library / MIT
ca-certificates	2021.4.13	Certificates for use with other packages. / MPL 2.0
cairo	1.16.0	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.12.5	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.5	Foreign Function Interface for Python calling C code. / MIT
chardet	4.0.0	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.10.1	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.21.4	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.4.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.23	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2021.4.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2021.4.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	5.0.6	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.7.1	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2021.4.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.17	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.3.0	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.9.0	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.1	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.9.0	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	21.1.2	Coroutine-based network library / MIT
glib	2.68.1	Provides core application building blocks for libraries and applications w

Table 71 – continued from previou

Name	Version	Summary / License
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.2.1	The GNU multiprecision library. / GPL-2.0-or-later AND LGPL-3.0-or-l
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A "smart font" system that handles the complexities of lesser-known lang
greenlet	1.0.0	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.8.0	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	3.10.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.22.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.6.3	Jupyter Interactive Widgets / BSD-3-Clause
isort	5.8.0	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.6.0	Pure Python DBus interface / MIT
jinja2	2.11.3	An easy to use stand-alone template engine written in pure python. / BSD
joblib	1.0.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter-packaging	0.7.12	Jupyter Packaging Utilities / BSD-3-Clause
jupyter_client	6.1.12	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.4.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.7.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyter_server	1.4.1	Jupyter Server / BSD-3-Clause
jupyterlab	3.0.14	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	2.4.0	A set of server components for JupyterLab and JupyterLab like applicatio
jupyterlab_widgets	1.0.0	JupyterLab extension providing HTML widgets / BSD-3-Clause
keyring	22.3.0	Store and access your passwords safely / MIT
kiwisolver	1.3.1	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.6.0	A fast and thorough lazy object proxy / BSD-2-Clause

Table 71 – continued from previou

Name	Version	Summary / License
lcms2	2.12	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20210216	Editline Library (libedit) / BSD-2-Clause
libev	4.33	A full-featured and high-performance event loop that is loosely modeled
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL-3.0-only WITH GCC-exceptio
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL-3.0-only WITH GCC-exceptio
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL-3.0-only WITH GCC-exception-3
libtiff	4.2.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libuv	1.40.0	Cross-platform asynchronous I/O / MIT
libwebp-base	1.2.0	WebP image library / BSD-3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.36.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.1	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.3	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.3	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.4	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2021.2.0	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.3.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.2.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.3	A library for testing in Python / BSD-2-Clause
more-itertools	8.7.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.2.1	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.2	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
mypy_extensions	0.4.3	Experimental type system extensions for programs checked with the myp
nbclassic	0.2.6	Jupyter Notebook as a Jupyter Server Extension. / BSD-3-Clause
nbclient	0.5.3	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.1.3	The Jupyter Notebook format / BSD-3-Clause

Table 71 – continued from previou

Name	Version	Summary / License
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.5.1	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.6.1	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.3.0	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.3	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.20.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1k	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.9	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.2.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.12	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.2.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executab
path	15.1.2	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathspec	0.7.0	Utility library for gitignore style pattern matching of file paths. / MPL-2.0
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	21.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.7.0	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.10.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.17	Library for building powerful interactive command lines in Python / BSD
psutil	5.8.0	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.7.0	Run a subprocess in a pseudo terminal / ISC
py	1.10.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	6.0.0	Python docstring style checker (formerly pep257) / MIT
pyerfa	1.7.3	Python bindings for ERFA routines / BSD-3-Clause
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT

Table 71 – continued from previou

Name	Version	Summary / License
pygments	2.8.1	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.7.4	python code static checker / GPL-2.0-only
pyls-black	0.4.6	Black plugin for the Python Language Server / MIT
pyls-spyder	0.3.2	Spyder extensions for the python-language-server / MIT
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	20.0.1	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.2.3	Simple and powerful testing with Python. / MIT
python	3.8.8	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.36.2	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2021.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	5.4.1	YAML parser and emitter for Python / MIT
pyzmq	20.0.0	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.2	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	5.0.3	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.1	library for editing command lines as they are typed in / GPL-3.0
regex	2021.4.4	Alternative regular expression module, to replace re / Python-2.0
requests	2.25.1	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.7	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.100	A patched copy of ruamel.yaml. / MIT
scikit-image	0.18.1	Image processing in Python. / BSD-3-Clause
scikit-learn	0.24.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.6.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.1	Statistical data visualization / BSD 3-Clause
secretstorage	3.3.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	52.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.6.1	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
sniffio	1.2.0	Sniff out which async library your code is running under / Apache-2.0
snowballstemmer	2.1.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	2.1.0	Python Sorted Collections / Apache-2.0
sortedcontainers	2.3.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.2.1	A modern CSS selector implementation for BeautifulSoup / MIT

Table 71 – continued from previou

Name	Version	Summary / License
sphinx	3.5.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.2.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.10.2	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.4.7	Database Abstraction Library. / MIT
sqlite	3.35.4	Implements a self-contained, zero-configuration, SQL database engine /
statsmodels	0.12.2	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.8	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.4	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
textdistance	4.2.1	TextDistance – python library for comparing distance between two or mo
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
three-merge	0.1.1	Simple Python library to perform a 3-way merge between strings / MIT
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD-3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.2	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.1	A Python web framework and asynchronous networking library, originall
tqdm	4.59.0	A Fast, Extensible Progress Meter / MPL-2.0 or MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.2	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.2	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.26.4	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	1.0.2	Filesystem events monitoring / Apache-2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.36.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.12.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.1.0	Capture C-level stdout/stderr in Python / MIT
xlrd	2.0.1	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.8	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.31.0	A formatter for Python files / Apache 2.0
zeromq	4.3.4	A high-performance asynchronous messaging library. / LGPL-3.0-or-late
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause

Table 71 – continued from previou

Name	Version	Summary / License
zipp	3.4.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.3.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.11 (Nov 19, 2020)

User-facing changes

- Anaconda Navigator has been updated to 1.10.0.
- The Python 3.6 meta-package was dropped; meta-packages are now available for Python 3.7 and 3.8 only. The installer uses Python 3.8.
- Update PyCharm text and links in the GUI installers.
- Clarify EULA for repo.anaconda.com terms-of-service.

Major package updates

- bokeh 2.1.1 -> 2.2.3
- dask 2.20.0 -> 2.30.0
- ipython 7.16.1 -> 7.19.0
- jupyter_client 6.1.6 -> 6.1.7
- jupyter_console 6.1.0 -> 6.2.0
- jupyterlab 2.1.5 -> 2.2.6
- numba 0.50.1 -> 0.51.2
- numpy 1.18.5 -> 1.19.2
- pandas 1.0.5 -> 1.1.3
- pillow 7.2.0 -> 8.0.1
- python 3.8.3 -> 3.8.5
- scikit-learn 0.23.1 -> 0.23.2
- scipy 1.5.0 -> 1.5.2
- seaborn 0.10.1 -> 0.11.0
- spyder 4.1.4 -> 4.1.5
- spyder-kernels 1.9.2 -> 1.9.4
- statsmodels 0.11.1 -> 0.12.0
- sympy 1.6.1 -> 1.6.2

Added:

- jupyterlab_pygments 0.1.2

Packages

Anaconda 2020.11 for 64-bit Windows with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science proje
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PE
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.9.2	OS-agnostic, system-level binary package and environment manage
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus

Table 72 – continued from prev

Name	Version	Summary / License
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python.

Table 72 – continued from prev

Name	Version	Summary / License
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	21.4.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0

Table 72 – continued from prev

Name	Version	Summary / License
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's Exe
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BS
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks /
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis too
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python
psutil	5.7.2	A cross-platform process and system utilities module for Python / B
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT

Table 72 – continued from prev

Name	Version	Summary / License
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.6.0	python code static checker / GPL-2.0-only
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built w
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BS
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful

Table 72 – continued from prev

Name	Version	Summary / License
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
tifffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, ori
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.20.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.2	A high-performance asynchronous messaging library. / LGPL 3

Table 72 – continued from prev

Name	Version	Summary / License
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.11 for 32-bit Windows with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science proje
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PE
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause

Table 73 – continued from prev

Name	Version	Summary / License
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.9.2	OS-agnostic, system-level binary package and environment manage
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause

Table 73 – continued from prev

Name	Version	Summary / License
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python.
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	21.4.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.8.5	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.1	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop

Table 73 – continued from prev

Name	Version	Summary / License
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BS
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks /
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis too
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python
psutil	5.7.2	A cross-platform process and system utilities module for Python / B

Table 73 – continued from prev

Name	Version	Summary / License
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.6.0	python code static checker / GPL-2.0-only
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built w
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.1	A set of python modules for machine learning and data mining / BS
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT

Table 73 – continued from prev

Name	Version	Summary / License
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, ori
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause

Table 73 – continued from prev

Name	Version	Summary / License
xlwings	0.20.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.2	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.11 for macOS on Intel 64-bit with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to han
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.1	Control AppleScriptable applications from Python. / Public Domain
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause

Table 74 – continued from previou

Name	Version	Summary / License
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.9.2	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.10	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	20.9.0	Coroutine-based network library / MIT
glib	2.66.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT

Table 74 – continued from previou

Name	Version	Summary / License
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2019.4	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	21.4.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	10.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libedit	3.1.20191231	Editline Library (libedit) / BSD-2-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT

Table 74 – continued from previou

Name	Version	Summary / License
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	10.0.0	The OpenMP API supports multi-platform shared-memory parallel progr
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT

Table 74 – continued from previou

Name	Version	Summary / License
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
psutil	5.7.2	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.6.0	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0

Table 74 – continued from previou

Name	Version	Summary / License
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, originall
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and more. /

Table 74 – continued from previou

Name	Version	Summary / License
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.0.1	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.20.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.11 for 64-bit Linux on IBM Power CPUs with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	

Table 75 – continued from previou

Name	Version	Summary / License
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.9.2	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.10	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glib	2.66.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d

Table 75 – continued from previou

Name	Version	Summary / License
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20191231	Editline Library (libedit) / BSD-2-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.10	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause

Table 75 – continued from previou

Name	Version	Summary / License
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.5	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.10	An optimized BLAS library / BSD
openblas-devel	0.3.10	OpenBLAS headers and libraries for developing software that used Open
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executab
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR

Table 75 – continued from previou

Name	Version	Summary / License
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
psutil	5.7.2	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.6.0	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
readline	8.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built with . /
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT

testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, originall
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.11 for 64-bit Linux with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.9.2	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause

Table 76 – continued from previou

Name	Version	Summary / License
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.10	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glib	2.66.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.4.0	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2020.2	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0

Table 76 – continued from previou

Name	Version	Summary / License
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.5.0	Pure Python DBus interface / MIT
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter proto
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	21.4.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20191231	Editline Library (libedit) / BSD-2-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause

Table 76 – continued from previou

Name	Version	Summary / License
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executal
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT

Table 76 – continued from previou

Name	Version	Summary / License
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
psutil	5.7.2	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.6.0	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause

Table 76 – continued from previou

Name	Version	Summary / License
secretstorage	3.1.2	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.3	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tifffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, originall
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and more. / M
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause

Table 76 – continued from previou

Name	Version	Summary / License
wurlitzer	2.0.1	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.07 (Jul 23, 2020)

User-facing changes

- The installer and base environment now use Python 3.8. Meta-packages for Python 3.6, 3.7, and 3.8 are also available.
- Fixed an issue where the win-32 installer would install win-64 executables in the base environment.
- Fixed an issue where the Windows installer would hang on systems with >64 cores.
- Update PyCharm text and links in the GUI installers.
- Update EULA to reflect terms-of-service change for repo.anaconda.com

Backend improvements (non-visible changes)

- Fixed signing of PyCharm bundle for macOS 10.15

Major package updates

- bokeh 1.4.0 -> 2.1.1
- dask 2.11.0 -> 2.20.0
- ipython 7.12.0 -> 7.16.1
- jupyter_client 5.3.4 -> 6.1.6
- jupyter_core 4.6.1 -> 4.6.3
- jupyterlab 1.2.6 -> 2.1.5
- jupyterlab_server 1.0.6 -> 1.2.0

- matplotlib 3.1.3 -> 3.2.2
- numba 0.48.0 -> 0.50.1
- numpy 1.18.1 -> 1.18.5
- pandas 1.0.1 -> 1.0.5
- pillow 7.0.0 -> 7.2.0
- python 3.8.1 -> 3.8.3
- requests 2.22.0 -> 2.24.0
- scikit-learn 0.22.1 -> 0.23.1
- scipy 1.4.1 -> 1.5.0
- seaborn 0.10.0 -> 0.10.1
- spyder 4.0.1 -> 4.1.4
- spyder-kernels 1.8.1 -> 1.9.2
- statsmodels 0.11.0 -> 0.11.1
- sympy 1.5.1 -> 1.6.1

Packages

Anaconda 2020.07 for 64-bit Windows with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science proje
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PE
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be

Table 77 – continued from prev

Name	Version	Summary / License
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.9.2	OS-agnostic, system-level binary package and environment manage
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop

Table 77 – continued from prev

Name	Version	Summary / License
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python.
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	21.4.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/

Table 77 – continued from prev

Name	Version	Summary / License
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BS
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / I
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis too
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application

Table 77 – continued from prev

Name	Version	Summary / License
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python
psutil	5.7.2	A cross-platform process and system utilities module for Python / B
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.6.0	python code static checker / GPL-2.0-only
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built w

Table 77 – continued from prev

Name	Version	Summary / License
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BS
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
tifffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, ori
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0

Table 77 – continued from prev

Name	Version	Summary / License
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character code
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.20.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.2	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.07 for 32-bit Windows with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science proje
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Cla
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PE
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu

Table 78 – continued from prev

Name	Version	Summary / License
bcrypt	3.2.0	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.9.2	OS-agnostic, system-level binary package and environment manage
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1	Provides cryptographic recipes and primitives to Python developers
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional util
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languag
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only an
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT

Table 78 – continued from prev

Name	Version	Summary / License
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python.
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CS
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	21.4.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.8.5	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT

Table 78 – continued from prev

Name	Version	Summary / License
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / B
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.3.1	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.1	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Prop
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's Exec
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BS
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks /
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Cla
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis too
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.2	SSH2 protocol library / LGPL-2.1-or-later
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause

Table 78 – continued from prev

Name	Version	Summary / License
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python
psutil	5.7.2	A cross-platform process and system utilities module for Python / B
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.6.0	python code static checker / GPL-2.0-only
pynacl	1.4.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause

Table 78 – continued from prev

Name	Version	Summary / License
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built wi
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.1	A set of python modules for machine learning and data mining / BS
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, ori
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0

Table 78 – continued from prev

Name	Version	Summary / License
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode string
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.20.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.2	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.0	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.07 for macOS on Intel 64-bit with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to han
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.1	Control AppleScriptable applications from Python. / Public Domain
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl

Table 79 – continued from previou

Name	Version	Summary / License
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.9.2	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.10	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT

Table 79 – continued from previou

Name	Version	Summary / License
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	20.9.0	Coroutine-based network library / MIT
glib	2.66.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2019.4	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	21.4.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solver / BS

Table 79 – continued from previou

Name	Version	Summary / License
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	10.0.0	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libedit	3.1.20191231	Editline Library (libedit) / BSD-2-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.16	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	10.0.0	The OpenMP API supports multi-platform shared-memory parallel progr
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause

Table 79 – continued from previou

Name	Version	Summary / License
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
psutil	5.7.2	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.6.0	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount

Table 79 – continued from previou

Name	Version	Summary / License
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database engine / P

Table 79 – continued from previou

Name	Version	Summary / License
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, originall
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.0.1	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.20.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.07 for 64-bit Linux on IBM Power CPUs with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.9.2	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0

Table 80 – continued from previou

Name	Version	Summary / License
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.10	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glib	2.66.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter proto
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause

Table 80 – continued from previou

Name	Version	Summary / License
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20191231	Editline Library (libedit) / BSD-2-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.10	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.5	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause

Table 80 – continued from previou

Name	Version	Summary / License
openblas	0.3.10	An optimized BLAS library / BSD
openblas-devel	0.3.10	OpenBLAS headers and libraries for developing software that used Open
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executal
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
psutil	5.7.2	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.6.0	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT

Table 80 – continued from previou

Name	Version	Summary / License
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
readline	8.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built with . /
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript A
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tifffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, originall
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause

Table 80 – continued from previou

Name	Version	Summary / License
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.07 for 64-bit Linux with Python 3.8

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
argh	0.26.2	The Natural CLI. / LGPL 3
argon2-cffi	20.1.0	The secure Argon2 password hashing algorithm. / MIT
asn1crypto	1.4.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.4.2	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0.2	Community-developed Python Library for Astronomy / BSD-3-Clause
async_generator	1.10	Async generators and context managers for Python 3.5+ / MIT
atomicwrites	1.4.0	Atomic file writes / MIT
attrs	20.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.5.4	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.8.1	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.2.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.9.3	Python library designed for screen-scraping / MIT
bitarray	1.6.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.2.1	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.20.1	A blocking, shuffling and loss-less compression library that can be faster
bokeh	2.2.3	Statistical and novel interactive HTML plots for Python / BSD-3-Clause

Table 81 – continued from previou

Name	Version	Summary / License
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.10.14	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2020.6.20	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.1.2	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.6.0	Extended pickling support for Python objects / BSD-3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.4	Cross-platform colored terminal text / BSD-3-Clause
conda	4.9.2	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.20.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	3.1.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.21	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.11.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.30.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.30.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.18	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.2	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20200713	Diff Match Patch is a high-performance library in multiple languages that
distributed	2.30.1	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.10	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.8.4	Your Tool For Style Guide Enforcement / MIT
flask	1.1.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.10.4	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.10	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.8.3	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	20.9.0	Coroutine-based network library / MIT
glib	2.66.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.14	A "smart font" system that handles the complexities of lesser-known lang

Table 81 – continued from previou

Name	Version	Summary / License
greenlet	0.4.17	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	2.4.0	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.10	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.9.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	2.0.0	A library to access the metadata for a Python package / Apache-2.0
iniconfig	1.1.1	iniconfig: brain-dead simple config-ini parsing / MIT
intel-openmp	2020.2	Math library for Intel and compatible processors / LicenseRef-Proprietary
intervaltree	3.1.0	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.3.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.19.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	5.6.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.17.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.5.0	Pure Python DBus interface / MIT
jinja2	2.11.2	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.17.0	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	6.1.7	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.3	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	2.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_pygments	0.1.2	Pygments syntax coloring scheme making use of the JupyterLab CSS var
jupyterlab_server	1.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	21.4.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.3.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.18.2	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.4.2	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.71.1	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20191231	Editline Library (libedit) / BSD-2-Clause
libffi	3.3	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL

Table 81 – continued from previou

Name	Version	Summary / License
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm10	10.0.1	Development headers and libraries for LLVM / Apache-2.0 WITH LLVM
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.18	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.14	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.10	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.34	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.34.0	A lightweight LLVM python binding for writing JIT compilers. / BSD-2-
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.6.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.9.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
matplotlib-base	3.3.2	Publication quality figures in Python / LicenseRef-PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.2	Math library for Intel and compatible processors / LicenseRef-Proprietary
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.2.0	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.1	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.2	A library for testing in Python / BSD-2-Clause
more-itertools	8.6.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	1.0.0	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbclient	0.5.1	A client library for executing notebooks. Formally nbconvert's ExecutePr
nbconvert	6.0.7	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.8	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
nest-asyncio	1.4.2	Patch asyncio to allow nested event loops / BSD-2-Clause
networkx	2.5	Python package for creating and manipulating complex networks / BSD-3
nltk	3.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.1.4	Jupyter Notebook / BSD-3-Clause
numba	0.51.2	NumPy aware dynamic Python compiler using LLVM / BSD-2-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.19.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	1.1.0	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause

Table 81 – continued from previou

Name	Version	Summary / License
openpyxl	3.0.5	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1h	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.4	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.1.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.11	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.3	A python module for writing pandoc filters / BSD-3-Clause
pango	1.45.3	Text layout and rendering engine. / LGPL-2.1
parso	0.7.0	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.12	A small utility to modify the dynamic linker and RPATH of ELF executal
path	15.0.0	A module wrapper for os.path / MIT
path.py	12.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.44	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	8.0.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.2.4	PyPA recommended tool for installing Python packages / MIT
pixman	0.40.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.6.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.8.0	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.8	Library for building powerful interactive command lines in Python / BSD
psutil	5.7.2	A cross-platform process and system utilities module for Python / BSD-3
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.9.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.6.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.20	Complete C99 parser in pure Python / BSD 3-clause
pycurl	7.43.0.6	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	5.1.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.2.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.7.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.6.0	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.7	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.17.3	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	6.1.1	Simple and powerful testing with Python. / MIT
python	3.8.5	General purpose programming language / Python-2.0
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause

Table 81 – continued from previou

Name	Version	Summary / License
python-jsonrpc-server	0.4.0	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.35.1	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.9	Python interface to libarchive / CC0-1.0
pytz	2020.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.27	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	5.3.1	YAML parser and emitter for Python / MIT
pyzmq	19.0.2	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8.1	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	1.0.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.7.7	Jupyter Qt Console / BSD-3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	8.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.10.15	Alternative regular expression module, to replace re / Python-2.0
requests	2.24.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	12.1.1	
rope	0.18.0	A python refactoring library / GPL 2.0
rtree	0.9.4	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.17.2	Image processing in Python. / BSD-3-Clause
scikit-learn	0.23.2	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.5.2	Scientific Library for Python / BSD 3-Clause
seaborn	0.11.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.2	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	50.3.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.13	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.15.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.2.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.2.2	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	2.0.1	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	3.2.1	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.2	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.2	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.3	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.3	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.4	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.4	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.1.5	The Scientific Python Development Environment / MIT
spyder-kernels	1.9.4	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.20	Database Abstraction Library. / MIT
sqlite	3.33.0	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.12.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.6.2	Python library for symbolic mathematics / BSD-3-Clause

Table 81 – continued from previou

Name	Version	Summary / License
tbb	2020.3	High level abstract threading library / Apache-2.0
tblib	1.7.0	Traceback serialization library. / BSD 2-Clause
terminado	0.9.1	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tiffile	2020.10.1	Read and write image data from and to TIFF files. / BSD 3-Clause
tk	8.6.10	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.11.1	A functional standard library for Python / BSD-3-Clause
tornado	6.0.4	A Python web framework and asynchronous networking library, originall
tqdm	4.50.2	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	5.0.5	Configuration system for Python applications / BSD-3-Clause
typing_extensions	3.7.4.3	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	4.0.1	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.9	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.11	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	0.10.3	Filesystem events monitoring / Apache 2.0
wcwidth	0.2.5	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.1	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.35.1	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.0.1	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.3.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.5	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.2.5	A C library for parsing and emitting YAML / MIT
yapf	0.30.0	A formatter for Python files / Apache 2.0
zeromq	4.3.3	A high-performance asynchronous messaging library. / LGPL 3
zict	2.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	3.4.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.5.0	Very basic event publishing system / Zope Public License
zope.interface	5.1.2	Interfaces for Python / ZPL-2.1
zstd	1.4.5	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.02 (Mar 11, 2020)

User-facing changes

- Name changed to Anaconda Individual Edition.
- The previous 2019.10 release was the last for Python 2.7, and Python 2 will not be supported going forward.
- Python 3.6, 3.7 and 3.8 meta-packages available, installer is Python 3.7.
- Last official release to support Windows 7.
- Updated links to in GUI installer.
- Anaconda Navigator updated to 1.9.12.

Backend improvements (non-visible changes)

- Deadlock fixes on single core computers.
- Improved menu removal on Windows.

Major package updates

- anaconda-project 0.8.3 -> 0.8.4
- bokeh 1.3.4 -> 1.4.0
- dask 2.5.2 -> 2.11.0
- ipython 7.8.0 -> 7.12.0
- jupyter_client 5.3.3 -> 5.3.4
- jupyter_console 6.0.0 -> 6.1.0
- jupyter_core 4.5.0 -> 4.6.1
- jupyterlab 1.1.4 -> 1.2.6
- matplotlib 3.1.1 -> 3.1.3
- pandas 0.25.1 -> 1.0.1
- pillow 6.2.0 -> 7.0.0
- python 3.7.4 -> 3.7.6
- scikit-image 0.15.0 -> 0.16.2
- scipy 1.3.1 -> 1.4.1
- seaborn 0.9.0 -> 0.10.0
- spyder 3.3.6 -> 4.0.1
- spyder-kernels 0.5.2 -> 1.8.1
- statsmodels 0.10.1 -> 0.11.0
- sympy 1.4 -> 1.5.1

Packages

Anaconda 2020.02 for 64-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science proje
argh	0.26.2	The Natural CLI. / LGPL 3
asn1crypto	1.3.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.3.3	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.0	Community-developed Python Library for Astronomy / BSD-3-Cla
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.4.4	A tool that automatically formats Python code to conform to the PE
babel	2.8.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.1.7	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.8.2	Python library designed for screen-scraping / MIT
bitarray	1.2.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.4.0	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.1.1	Certificates for use with other packages. / MPL 2.0
certifi	2019.11.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.3.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.3	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.8.3	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.11	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.8	Provides cryptographic recipes and primitives to Python developers
curl	7.68.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.15	The Cython compiler for writing C extensions for the Python langu

Table 82 – continued from prev

Name	Version	Summary / License
cytoolz	0.10.1	Cython implementation of Toolz. High performance functional util
dask	2.11.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.11.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.1	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20181111	Diff Match Patch is a high-performance library in multiple languag
distributed	2.11.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.7.9	Your Tool For Style Guide Enforcement / MIT
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only an
fsspec	0.6.2	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / L
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.6.1	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	1.7.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	1.5.0	A library to access the metadata for a Python package / Apache-2.0
intel-openmp	2020.0	Math library for Intel and compatible processors / proprietary - Inte
intervaltree	3.0.2	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.1.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.12.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.14.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.1	An easy to use stand-alone template engine written in pure python.
joblib	0.14.1	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.1	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.4	jupyter_client contains the reference implementation of the Jupyter

Table 82 – continued from prev

Name	Version	Summary / License
jupyter_console	6.1.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	1.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like app
keyring	21.1.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.17.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.68.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libllvm9	9.0.1	Development headers and libraries for LLVM / LLVM-Exception
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.31.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.5.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.1.3	Publication quality figures in Python / PSF-based
matplotlib-base	3.1.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.0	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.15	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.1	A library for testing in Python / BSD-2-Clause
more-itertools	8.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-poi
mpir	3.0.0	Multiple Precision Integers and Rationals. / LGPL 3
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.1	Converting Jupyter Notebooks / BSD-3-Clause

Table 82 – continued from prev

Name	Version	Summary / License
nbformat	5.0.4	The reference implementation of the Jupyter Notebook format / BS
networkx	2.4	Python package for creating and manipulating complex networks /
nltk	3.4.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.3	Jupyter Notebook / BSD-3-Clause
numba	0.48.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.18.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.18.1	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	0.9.2	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.0.1	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.1	SSH2 protocol library / LGPL 2.1
parso	0.5.2	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	13.1.0	A module wrapper for os.path / MIT
path.py	12.4.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas /
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	7.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	20.0.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.5	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.3	Library for building powerful interactive command lines in Python
psutil	5.6.7	A cross-platform process and system utilities module for Python /
py	1.8.1	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.5	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	4.0.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.5.2	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.4.4	python code static checker / GPL-2.0-only
pynacl	1.3.0	PyNaCl is a Python binding to the Networking and Cryptography li

Table 82 – continued from prev

Name	Version	Summary / License
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.6	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.15.7	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	5.3.5	Simple and powerful testing with Python. / MIT
python	3.7.6	General purpose programming language / PSF
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.3.4	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.31.7	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.3	YAML parser and emitter for Python / MIT
pyzmq	18.1.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.6.0	Jupyter Qt Console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2020.6.8	Alternative regular expression module, to replace re / Python-2.0
requests	2.22.0	Requests is an elegant and simple HTTP library for Python, built w
rope	0.16.0	A python refactoring library / GPL 2.0
rtree	0.9.3	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.22.1	A set of python modules for machine learning and data mining / BS
scipy	1.4.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.10.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	45.2.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.14.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.9.5	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp

Table 82 – continued from prev

Name	Version	Summary / License
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.0.1	The Scientific Python Development Environment / MIT
spyder-kernels	1.8.1	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.13	Database Abstraction Library. / MIT
sqlite	3.31.1	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.11.0	Statistical computations and models for use with SciPy / BSD-3-Cla
sympy	1.5.1	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.0	High level abstract threading library / Apache 2.0
tblib	1.6.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.3	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, ori
tqdm	4.42.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.1	a fork of Python 2 and 3 ast modules with type comment support / A
typing_extensions	3.7.4.2	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	1.35	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.25.8	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
watchdog	0.10.2	Filesystem events monitoring / Apache 2.0
wcwidth	0.1.8	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.34.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.2.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.17.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
yapf	0.28.0	A formatter for Python files / Apache 2.0
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	2.2.0	A pathlib-compatible Zipfile object wrapper / MIT

Table 82 – continued from prev

Name	Version	Summary / License
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.4	Very basic event publishing system / Zope Public License
zope.interface	4.7.1	Interfaces for Python / ZPL 2.1
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.02 for 32-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science proje
argh	0.26.2	The Natural CLI. / LGPL 3
asn1crypto	1.3.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.3.3	A abstract syntax tree for Python with inference support. / LGPL-2
astropy	4.0	Community-developed Python Library for Astronomy / BSD-3-Cla
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.3.0	attrs is the Python package that will bring back the joy of writing cl
autopep8	1.4.4	A tool that automatically formats Python code to conform to the PE
babel	2.8.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
bcrypt	3.1.7	Modern password hashing for your software and your servers / Apa
beautifulsoup4	4.8.2	Python library designed for screen-scraping / MIT
bitarray	1.2.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.4.0	Statistical and novel interactive HTML plots for Python / BSD-3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.1.1	Certificates for use with other packages. / MPL 2.0
certifi	2019.11.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.3.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.3	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.8.3	OS-agnostic, system-level binary package and environment manage

Table 83 – continued from prev

Name	Version	Summary / License
conda-build	3.18.11	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.8	Provides cryptographic recipes and primitives to Python developers
curl	7.68.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.15	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.1	Cython implementation of Toolz. High performance functional util
dask	2.11.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.11.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.1	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20181111	Diff Match Patch is a high-performance library in multiple languag
distributed	2.11.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.7.9	Your Tool For Style Guide Enforcement / MIT
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and
fsspec	0.6.2	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / L
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.6.1	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	1.6.1	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	1.5.0	A library to access the metadata for a Python package / Apache-2.0
intel-openmp	2020.0	Math library for Intel and compatible processors / proprietary - Inte
intervaltree	3.0.2	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.1.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.12.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS

Table 83 – continued from prev

Name	Version	Summary / License
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.14.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.11.1	An easy to use stand-alone template engine written in pure python.
joblib	0.14.1	Lightweight pipelining: using Python functions as pipeline jobs. / B
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.9.1	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.4	jupyter_client contains the reference implementation of the Jupyter
jupyter_console	6.1.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	1.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like app
keyring	21.1.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	An efficient C++ implementation of the Cassowary constraint solve
krb5	1.17.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.68.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libllvm9	9.0.1	Development headers and libraries for LLVM / LLVM-Exception
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.8.5	Extensible framework for robust spatial indexing / MIT
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.31.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.5.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-C
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.1.3	Publication quality figures in Python / PSF-based
matplotlib-base	3.1.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.0	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.15	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common proba
mock	4.0.1	A library for testing in Python / BSD-2-Clause

Table 83 – continued from prev

Name	Version	Summary / License
more-itertools	8.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily l
mpfr	4.0.2	The MPFR library is a C library for multiple-precision floating-poi
mpir	3.0.0	Multiple Precision Integers and Rationals. / LGPL 3
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer / Apache-2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.4	The reference implementation of the Jupyter Notebook format / BS
networkx	2.4	Python package for creating and manipulating complex networks /
nltk	3.4.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.3	Jupyter Notebook / BSD-3-Clause
numba	0.48.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.18.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.18.1	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	0.9.2	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	20.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.0.1	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
paramiko	2.7.1	SSH2 protocol library / LGPL 2.1
parso	0.5.2	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	13.1.0	A module wrapper for os.path / MIT
path.py	12.4.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas /
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	7.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / Lic
pip	20.0.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.5	Library for building powerful interactive command lines in Python
prompt_toolkit	3.0.3	Library for building powerful interactive command lines in Python
psutil	5.6.7	A cross-platform process and system utilities module for Python / B
py	1.8.1	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT

Table 83 – continued from prev

Name	Version	Summary / License
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.5	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	4.0.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.5.2	Pygments is a generic syntax highlighter suitable for use in code ho
pylint	2.4.4	python code static checker / GPL-2.0-only
pynacl	1.3.0	PyNaCl is a Python binding to the Networking and Cryptography li
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.6	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.15.7	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	5.3.5	Simple and powerful testing with Python. / MIT
python	3.7.6	General purpose programming language / PSF
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Claus
python-jsonrpc-server	0.3.4	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0
python-language-server	0.31.7	An implementation of the Language Server Protocol for Python / M
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pywin32	227	Python extensions for Windows / PSF
pywin32-ctypes	0.2.0	A limited subset of pywin32 re-implemented using ctypes (or cffi) /
pywinpty	0.5.7	Python bindings for the winpty library / MIT
pyyaml	5.3	YAML parser and emitter for Python / MIT
pyzmq	18.1.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQ
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.6.0	Jupyter Qt Console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
regex	2020.6.8	Alternative regular expression module, to replace re / Python-2.0
requests	2.22.0	Requests is an elegant and simple HTTP library for Python, built w
rope	0.16.0	A python refactoring library / GPL 2.0
rtree	0.9.3	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.1	A set of python modules for machine learning and data mining / BS
scipy	1.4.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.10.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	45.2.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.14.0	Python 2 and 3 compatibility utilities / MIT

Table 83 – continued from prev

Name	Version	Summary / License
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.9.5	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.2.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.0.1	The Scientific Python Development Environment / MIT
spyder-kernels	1.8.1	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.13	Database Abstraction Library. / MIT
sqlite	3.31.1	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.11.0	Statistical computations and models for use with SciPy / BSD-3-Cl
sympy	1.5.1	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.0	High level abstract threading library / Apache 2.0
tblib	1.6.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.3	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with file
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, ori
tqdm	4.42.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.1	a fork of Python 2 and 3 ast modules with type comment support /
typing_extensions	3.7.4.2	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	1.35	Ultra fast JSON decoder and encoder written in C with Python bind
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.25.8	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
watchdog	0.10.2	Filesystem events monitoring / Apache 2.0
wcwidth	0.1.8	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.34.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr

Table 83 – continued from prev

Name	Version	Summary / License
xlsxwriter	1.2.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.17.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
yapf	0.28.0	A formatter for Python files / Apache 2.0
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	2.2.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.event	4.4	Very basic event publishing system / Zope Public License
zope.interface	4.7.1	Interfaces for Python / ZPL 2.1
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.02 for macOS on Intel 64-bit with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
applaunchservices	0.2.1	Simple package for registering an app with apple Launch Services to han
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python. / Public Domain
argh	0.26.2	The Natural CLI. / LGPL 3
asn1crypto	1.3.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.3.3	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0	Community-developed Python Library for Astronomy / BSD-3-Clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.4.4	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.8.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.8.2	Python library designed for screen-scraping / MIT
bitarray	1.2.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.4.0	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT

Table 84 – continued from previou

Name	Version	Summary / License
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.1.1	Certificates for use with other packages. / MPL 2.0
certifi	2019.11.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.3.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.3	Cross-platform colored terminal text / BSD-3-Clause
conda	4.8.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.11	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.8	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.68.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.15	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.1	Cython implementation of Toolz. High performance functional utilities /
dask	2.11.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.11.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.12	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.1	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20181111	Diff Match Patch is a high-performance library in multiple languages that
distributed	2.11.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.7.9	Your Tool For Style Guide Enforcement / MIT
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.6.2	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.63.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT

Table 84 – continued from previou

Name	Version	Summary / License
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.1	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	1.7.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	1.5.0	A library to access the metadata for a Python package / Apache-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
intervaltree	3.0.2	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.1.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.12.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.14.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.11.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.14.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.1	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.4	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.1.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	1.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	21.1.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.17.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
libarchive	3.3.3	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.68.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	LLVM C++ standard library / Apache-2.0 WITH LLVM-exception
libedit	3.1.20181209	Editline Library (libedit) / BSD-2-Clause
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm9	9.0.1	Development headers and libraries for LLVM / LLVM-Exception
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.9.0	the SSH library / BSD-3-Clause
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	4.0.1	The OpenMP API supports multi-platform shared-memory parallel progr
llvmlite	0.31.0	A lightweight LLVM python binding for writing JIT compilers / New BS

Table 84 – continued from previou

Name	Version	Summary / License
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.5.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.3	Publication quality figures in Python / PSF-based
matplotlib-base	3.1.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.15	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common probability
mock	4.0.1	A library for testing in Python / BSD-2-Clause
more-itertools	8.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.4	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.4	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.3	Jupyter Notebook / BSD-3-Clause
numba	0.48.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.18.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.18.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.2	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.0.1	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.2	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path	13.1.0	A module wrapper for os.path / MIT
path.py	12.4.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT

Table 84 – continued from previou

Name	Version	Summary / License
pillow	7.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.0.2	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.5	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.3	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.1	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.5	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	4.0.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.5.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.4.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.6	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.15.7	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.3.5	Simple and powerful testing with Python. / MIT
python	3.7.6	General purpose programming language / PSF
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.3.4	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.31.7	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.3	YAML parser and emitter for Python / MIT
pyzmq	18.1.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.6.0	Jupyter Qt Console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.6.8	Alternative regular expression module, to replace re / Python-2.0
requests	2.22.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	11.0.2	
rope	0.16.0	A python refactoring library / GPL 2.0
rtree	0.9.3	R-Tree spatial index for Python GIS / MIT

Table 84 – continued from previou

Name	Version	Summary / License
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.22.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.4.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.10.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	46.0.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.14.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.5	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help b
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.2.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.0.1	The Scientific Python Development Environment / MIT
spyder-kernels	1.8.1	Jupyter kernels for Spyder's console / MIT
sqlalchemy	1.3.13	Database Abstraction Library. / MIT
sqlite	3.31.1	Implements a self-contained, zero-configuration, SQL database engine / P
statsmodels	0.11.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.5.1	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.0	High level abstract threading library / Apache 2.0
tblib	1.6.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.3	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.42.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.1	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.2	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	1.35	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.8	HTTP library with thread-safe connection pooling, file post, and more. / M
watchdog	0.10.2	Filesystem events monitoring / Apache 2.0
wcwidth	0.1.8	Measures number of Terminal column cells of wide-character codes. / M

Table 84 – continued from previou

Name	Version	Summary / License
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.34.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.0.0	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwings	0.17.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
yapf	0.28.0	A formatter for Python files / Apache 2.0
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	2.2.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.4	Very basic event publishing system / Zope Public License
zope.interface	4.7.1	Interfaces for Python / ZPL 2.1
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.02 for 64-bit Linux on IBM Power CPUs with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	1.3.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.3.3	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0	Community-developed Python Library for Astronomy / BSD-3-Clause
attrs	19.3.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.8.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.8.2	Python library designed for screen-scraping / MIT
bitarray	1.2.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.4.0	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT

Table 85 – continued from previou

Name	Version	Summary / License
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.1.1	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.11.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.3.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.3	Cross-platform colored terminal text / BSD-3-Clause
conda	4.8.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.11	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.8	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.68.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.15	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.1	Cython implementation of Toolz. High performance functional utilities /
dask	2.11.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.11.0	Parallel Python with task scheduling / BSD-3-Clause
decorator	4.4.1	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.11.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fsspec	0.6.2	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.63.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like

Table 85 – continued from previou

Name	Version	Summary / License
imageio	2.6.1	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	1.7.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	1.5.0	A library to access the metadata for a Python package / Apache-2.0
ipykernel	5.1.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.12.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.16.0	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.11.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.14.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.4	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.1.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
kiwisolver	1.1.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.17.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-ppc64le	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.3.3	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.68.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / BSD-2-Clause
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
libopenblas	0.3.6	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.5.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.3	Publication quality figures in Python / PSF-based
matplotlib-base	3.1.3	Publication quality figures in Python / PSF-based

Table 85 – continued from previou

Name	Version	Summary / License
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mock	4.0.1	A library for testing in Python / BSD-2-Clause
more-itertools	8.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.4	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.4	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Natural Language Toolkit / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.3	Jupyter Notebook / BSD-3-Clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.18.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.18.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.2	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.6	An optimized BLAS library / BSD
openblas-devel	0.3.6	OpenBLAS headers and libraries for developing software that used Open
openpyxl	3.0.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.0.1	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.6.1	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.10	A small utility to modify the dynamic linker and RPATH of ELF executab
path	13.1.0	A module wrapper for os.path / MIT
path.py	12.4.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	7.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.0.2	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.5	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.3	Library for building powerful interactive command lines in Python / BSD

Table 85 – continued from previou

Name	Version	Summary / License
psutil	5.6.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.1	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.10.1	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.5	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.5.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.4.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.6	Create and execute simple grammars / MIT
pyrsistent	0.15.7	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.3.5	Simple and powerful testing with Python. / MIT
python	3.7.6	General purpose programming language / PSF
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.3	YAML parser and emitter for Python / MIT
pyzmq	18.1.1	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.6.8	Alternative regular expression module, to replace re / Python-2.0
requests	2.22.0	Requests is an elegant and simple HTTP library for Python, built with . /
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.22.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.4.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.10.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	45.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.14.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.5	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript A

Table 85 – continued from previou

Name	Version	Summary / License
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serial
sphinxcontrib-websupport	1.2.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.13	Database Abstraction Library. / MIT
sqlite	3.31.1	Implements a self-contained, zero-configuration, SQL database engine /
statsmodels	0.11.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.5.1	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.6.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.3	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.42.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.1	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.2	Backported and Experimental Type Hints for Python / PSF-2.0
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.8	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.8	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.34.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	2.2.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.4	Very basic event publishing system / Zope Public License
zope.interface	4.7.1	Interfaces for Python / ZPL 2.1
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2020.02 for 64-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.4	Tool for encapsulating, running, and reproducing data science projects / B
argh	0.26.2	The Natural CLI. / LGPL 3
asn1crypto	1.3.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.3.3	A abstract syntax tree for Python with inference support. / LGPL-2.1-onl
astropy	4.0	Community-developed Python Library for Astronomy / BSD-3-Clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.3.0	attrs is the Python package that will bring back the joy of writing classes
autopep8	1.4.4	A tool that automatically formats Python code to conform to the PEP 8 st
babel	2.8.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.8.2	Python library designed for screen-scraping / MIT
bitarray	1.2.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.4.0	Statistical and novel interactive HTML plots for Python / BSD-3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.3.2	Fast NumPy array functions written in Cython. / BSD 2-Clause
brotlipy	0.7.0	Python bindings to the Brotli compression library / MIT
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2020.1.1	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.11.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.14.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.3.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.3	Cross-platform colored terminal text / BSD-3-Clause
conda	4.8.3	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.11	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0.post1	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.8	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.68.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.15	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.1	Cython implementation of Toolz. High performance functional utilities /
dask	2.11.0	Parallel PyData with Task Scheduling / BSD-3-Clause
dask-core	2.11.0	Parallel Python with task scheduling / BSD-3-Clause
dbus	1.13.12	Simple message bus system for applications to talk to one another / GPL2

Table 86 – continued from previou

Name	Version	Summary / License
decorator	4.4.1	Better living through Python with decorators. / BSD-3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
diff-match-patch	20181111	Diff Match Patch is a high-performance library in multiple languages that
distributed	2.11.0	Distributed computing with Dask / BSD-3-Clause
docutils	0.16	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flake8	3.7.9	Your Tool For Style Guide Enforcement / MIT
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0-only and Lice
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.6.2	A specification for pythonic filesystems / BSD-3-Clause
future	0.18.2	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.63.1	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.10.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.1	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.2.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib-metadata	1.7.0	A library to access the metadata for a Python package / Apache-2.0
importlib_metadata	1.5.0	A library to access the metadata for a Python package / Apache-2.0
intel-openmp	2020.0	Math library for Intel and compatible processors / proprietary - Intel
intervaltree	3.0.2	Editable interval tree data structure for Python 2 and 3 / Apache-2.0
ipykernel	5.1.4	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.12.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.14.1	An autocompletion tool for Python that can be used for text editors. / MIT
jeepney	0.4.2	Pure Python DBus interface / MIT

Table 86 – continued from previou

Name	Version	Summary / License
jinja2	2.11.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.14.1	Lightweight pipelining: using Python functions as pipeline jobs. / BSD-3
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.9.1	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.2.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.4	jupyter_client contains the reference implementation of the Jupyter protoc
jupyter_console	6.1.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.6.1	Core common functionality of Jupyter projects. / BSD-3-Clause
jupyterlab	1.2.6	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	21.1.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	An efficient C++ implementation of the Cassowary constraint solver / BS
krb5	1.17.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.3	A fast and thorough lazy object proxy / BSD-2-Clause
lcms2	2.11	Open Source Color Management Engine / MIT
ld_impl_linux-64	2.33.1	A set of programming tools for creating and managing binary programs,
libarchive	3.3.3	Multi-format archive and compression library / BSD-2-Clause
libcurl	7.68.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / BSD-2-Clause
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libllvm9	9.0.1	Development headers and libraries for LLVM / LLVM-Exception
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libspatialindex	1.9.3	Extensible framework for robust spatial indexing / MIT
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.1.0	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.31.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.5.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD-3-Clause
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD-2-Clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.3	Publication quality figures in Python / PSF-based
matplotlib-base	3.1.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2020.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.15	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common probability

Table 86 – continued from previou

Name	Version	Summary / License
mock	4.0.1	A library for testing in Python / BSD-2-Clause
more-itertools	8.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer / Apache-2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	5.0.4	The reference implementation of the Jupyter Notebook format / BSD-3-C
ncurses	6.2	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.4	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Natural Language Toolkit / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.3	Jupyter Notebook / BSD-3-Clause
numba	0.48.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.7.1	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.18.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.18.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.2	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	20.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	1.0.1	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries) / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.5.2	A Python Parser / MIT
partd	1.1.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.10	A small utility to modify the dynamic linker and RPATH of ELF executab
path	13.1.0	A module wrapper for os.path / MIT
path.py	12.4.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
pathtools	0.1.2	Path utilities for Python. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.8.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	7.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / LicenseR
pip	20.0.2	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache-2.0
prompt-toolkit	3.0.5	Library for building powerful interactive command lines in Python / BSD
prompt_toolkit	3.0.3	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC

Table 86 – continued from previou

Name	Version	Summary / License
py	1.8.1	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.5	A Python Interface To The cURL library / LGPL, MIT
pydocstyle	4.0.1	Python docstring style checker (formerly pep257) / MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.5.2	Pygments is a generic syntax highlighter suitable for use in code hosting,
pylint	2.4.4	python code static checker / GPL-2.0-only
pyodbc	4.0.30	DB API Module for ODBC / MIT
pyopenssl	19.1.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.6	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.15.7	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.6.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.3.5	Simple and powerful testing with Python. / MIT
python	3.7.6	General purpose programming language / PSF
python-dateutil	2.8.1	Extensions to the standard Python datetime module. / BSD 3 Clause
python-jsonrpc-server	0.3.4	A Python 2.7 and 3.4+ server implementation of the JSON RPC 2.0 proto
python-language-server	0.31.7	An implementation of the Language Server Protocol for Python / MIT
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.1.1	Discrete Wavelet Transforms in Python / MIT
pyxdg	0.26	PyXDG contains implementations of freedesktop.org standards in python
pyyaml	5.3	YAML parser and emitter for Python / MIT
pyzmq	18.1.1	Python bindings for zeromq / BSD 3-clause
qdarkstyle	2.8	A dark stylesheet for Qt applications (Qt4, Qt5, PySide, PyQt4, PyQt5, Q
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.1	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.6.0	Jupyter Qt Console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
regex	2020.6.8	Alternative regular expression module, to replace re / Python-2.0
requests	2.22.0	Requests is an elegant and simple HTTP library for Python, built with . /
ripgrep	11.0.2	
rope	0.16.0	A python refactoring library / GPL 2.0
rtree	0.9.3	R-Tree spatial index for Python GIS / MIT
ruamel_yaml	0.15.87	A patched copy of ruamel.yaml. / MIT
scikit-image	0.16.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.22.1	A set of python modules for machine learning and data mining / BSD-3-C
scipy	1.4.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.10.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.2	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	45.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT

Table 86 – continued from previou

Name	Version	Summary / License
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.14.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	1.9.5	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.4.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serial
sphinxcontrib-websupport	1.2.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	4.0.1	The Scientific Python Development Environment / MIT
spyder-kernels	1.8.1	Jupyter kernels for Spyder’s console / MIT
sqlalchemy	1.3.13	Database Abstraction Library. / MIT
sqlite	3.31.1	Implements a self-contained, zero-configuration, SQL database engine /
statsmodels	0.11.0	Statistical computations and models for use with SciPy / BSD-3-Clause
sympy	1.5.1	Python library for symbolic mathematics / BSD-3-Clause
tbb	2020.0	High level abstract threading library / Apache 2.0
tblib	1.6.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.3	Terminals served by tornado websockets / BSD-2-Clause
testpath	0.4.4	Testpath is a collection of utilities for Python code working with files and
threadpoolctl	2.1.0	Python helpers to control the threadpools of native libraries / BSD 3-Clau
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toml	0.10.1	Python lib for TOML. / MIT
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.42.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typed-ast	1.4.1	a fork of Python 2 and 3 ast modules with type comment support / Apach
typing_extensions	3.7.4.2	Backported and Experimental Type Hints for Python / PSF-2.0
ujson	1.35	Ultra fast JSON decoder and encoder written in C with Python bindings /
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.25.8	HTTP library with thread-safe connection pooling, file post, and more. /
watchdog	0.10.2	Filesystem events monitoring / Apache 2.0
wcwidth	0.1.8	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	1.0.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.34.2	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	2.0.0	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.7	A Python module for creating Excel XLSX files / BSD-2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD

Table 86 – continued from previou

Name	Version	Summary / License
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML / MIT
yapf	0.28.0	A formatter for Python files / Apache 2.0
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	2.2.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.event	4.4	Very basic event publishing system / Zope Public License
zope.interface	4.7.1	Interfaces for Python / ZPL 2.1
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 (Oct 15, 2019)

User-facing changes

- Updated packages.
- For macOS Catalina, we have notarized the package installers and changed the default install directory to /opt/anaconda{2,3}.

Backend improvements (non-visible changes)

- Added a new Cython-based Python wrapper to clear up library loading problems with libarchive.
- Extraction scripts work better with older operating systems.

Major package updates

- dask 2.1.0 -> 2.5.2
- ipython 7.6.1 -> 7.8.0
- jupyter_client 5.3.1 -> 5.3.3
- jupyterlab 1.0.2 -> 1.1.4
- jupyterlab_server 1.0.0 -> 1.0.6
- matplotlib 3.1.0 -> 3.1.1
- pandas 0.24.2 -> 0.25.1
- pillow 6.1.0 -> 6.2.0
- python 3.7.3 -> 3.7.4
- spyder-kernels 0.5.1 -> 0.5.2
- statsmodels 0.10.0 -> 0.10.1

Packages

Anaconda 2019.10 for 64-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.3.1	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.2.1	Community-developed Python Library for Astronomy / BSD 3-clau
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	2.5.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.5.2	Parallel Python with task scheduling / BSD 3-Clause

Table 87 – continued from prev

Name	Version	Summary / License
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.5.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
fsspec	0.5.2	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python.
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.8.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.1.4	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like app
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause

Table 87 – continued from prev

Name	Version	Summary / License
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.1.1	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common proba
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.2.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.3	Python package for creating and manipulating complex networks / B
nltk	3.4.5	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.1	Jupyter Notebook / BSD 3-clause
numba	0.45.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.0	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.25.1	High-performance, easy-to-use data structures and data analysis too

Table 87 – continued from prev

Name	Version	Summary / License
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.10	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.4.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	5.2.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.4.0	Pytest plugin with advanced doctest features / BSD 3-Clause
pytest-openfiles	0.4.0	Pytest plugin for detecting inadvertent open file handles / BSD-3-C
pytest-remotedata	0.3.2	Pytest plugin for controlling remote data access / BSD
python	3.7.4	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT

Table 87 – continued from prev

Name	Version	Summary / License
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.3	A set of python modules for machine learning and data mining / BS
scipy	1.3.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tbb	2019.4	High level abstract threading library / Apache 2.0
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, ori
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built

Table 87 – continued from prev

Name	Version	Summary / License
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character code
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.10	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 32-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.3.1	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.2.1	Community-developed Python Library for Astronomy / BSD 3-clau
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be

Table 88 – continued from prev

Name	Version	Summary / License
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	2.5.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.5.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.5.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
fsspec	0.5.2	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
