Name	Version	Summary / License
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python.
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.8.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.1.4	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like appl
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.1.1	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause

Table 88 – continued from prev

Name	Version	Summary / License
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common proba
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.2.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.3	Python package for creating and manipulating complex networks /
nltk	3.4.5	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.1	Jupyter Notebook / BSD 3-clause
numba	0.45.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.0	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.25.1	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.10	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain

Table 88 – continued from prev

Name	Version	Summary / License
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.4.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	5.2.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.4.0	Pytest plugin with advanced doctest features / BSD 3-Clause
pytest-openfiles	0.4.0	Pytest plugin for detecting inadvertent open file handles / BSD-3-C
pytest-remotedata	0.3.2	Pytest plugin for controlling remote data access / BSD
python	3.7.4	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.1	A set of python modules for machine learning and data mining / BS
scipy	1.3.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful

Table 88 – continued from prev

Name	Version	Summary / License
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tbb	2019.4	High level abstract threading library / Apache 2.0
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, ori
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.10	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for macOS on Intel 64-bit with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.3.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.2.2	Community-developed Python Library for Astronomy / BSD 3-clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.5.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.5.2	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0

Table 89 – continued from previou

Name	Version	Summary / License
distributed	2.5.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fsspec	0.5.2	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.8.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.1.4	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause

Table 89 – continued from previou

Name	Version	Summary / License
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	4.0.1	Support for the OpenMP language / MIT license or UIUC License
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.1	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.1	Jupyter Notebook / BSD 3-clause
numba	0.45.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.17.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.17.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause

Table 89 – continued from previou

Name	Version	Summary / License
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.0	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.25.1	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.10	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.4.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.2.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.4.0	Pytest plugin with advanced doctest features / BSD 3-Clause
pytest-openfiles	0.4.0	Pytest plugin for detecting inadvertent open file handles / BSD-3-Clause
pytest-remotedata	0.3.2	Pytest plugin for controlling remote data access / BSD
python	3.7.4	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause

Table 89 – continued from previou

Name	Version	Summary / License
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ripgrep	0.10.0	
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.3.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript /
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tbb	2019.8	High level abstract threading library / Apache 2.0
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T

Table 89 – continued from previou

Name	Version	Summary / License
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.3	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.10	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 64-bit Linux on IBM Power CPUs with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.3.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.2.2	Community-developed Python Library for Astronomy / BSD 3-clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF

Table 90 – continued from previou

Name	Version	Summary / License
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.5.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.5.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.5.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fsspec	0.5.2	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.8.0	Read and write HDF5 files from Python. / BSD-3-Clause

Table 90 – continued from previou

Name	Version	Summary / License
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2.0
ipykernel	5.1.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libopenblas	0.3.6	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.1	Publication quality figures in Python / PSF-based

Table 90 – continued from previou

Name	Version	Summary / License
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	7.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Build Python programs to work with human language data / Apache 2.0
nomkl	3.0	None / BSD
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.1	Jupyter Notebook / BSD 3-clause
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.17.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.17.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.3.6	An Optimized BLAS library / BSD
openblas-devel	0.3.6	OpenBLAS headers and libraries for developing software that used Open
openpyxl	3.0.0	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.25.1	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.10	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT

Table 90 – continued from previou

Name	Version	Summary / License
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.4.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.2.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.4.0	Pytest plugin with advanced doctest features / BSD 3-Clause
pytest-openfiles	0.4.0	Pytest plugin for detecting inadvertent open file handles / BSD-3-Clause
pytest-remotedata	0.3.2	Pytest plugin for controlling remote data access / BSD
python	3.7.4	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.3.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.2.0	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript A

Table 90 – continued from previou

Name	Version	Summary / License
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serial
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 64-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.3.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.2.2	Community-developed Python Library for Astronomy / BSD 3-clause

Table 91 – continued from previou

Name	Version	Summary / License
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python language /
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.5.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.5.2	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.5.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT

Table 91 – continued from previou

Name	Version	Summary / License
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
fsspec	0.5.2	A specification for pythonic filesystems / BSD-3-Clause
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.2	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.4.1	Pure Python DBus interface / MIT
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.8.5	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.1.4	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.6	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause

Table 91 – continued from previou

Name	Version	Summary / License
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.1	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.2.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.1	Jupyter Notebook / BSD 3-clause
numba	0.45.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.17.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.17.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	3.0.0	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT

Table 91 – continued from previou

Name	Version	Summary / License
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.25.1	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.10	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.4.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.2.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.4.0	Pytest plugin with advanced doctest features / BSD 3-Clause
pytest-openfiles	0.4.0	Pytest plugin for detecting inadvertent open file handles / BSD-3-Clause
pytest-remotedata	0.3.2	Pytest plugin for controlling remote data access / BSD
python	3.7.4	General purpose programming language / PSF

Table 91 – continued from previou

Name	Version	Summary / License
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ripgrep	0.10.0	
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.3.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo

unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.3	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD 3-clau
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT

Table 92 – continued from prev

Name	Version	Summary / License
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	4.0.2	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT

Table 92 – continued from prev

Name	Version	Summary / License
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause

Table 92 – continued from prev

Name	Version	Summary / License
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/

m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Inte
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4.5	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.45.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2t	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas /
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause

Table 92 – continued from prev

Name	Version	Summary / License
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause

Table 92 – continued from prev

Name	Version	Summary / License
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, ori
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typing	3.7.4.1	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.10	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT

Table 92 – continued from prev

Name	Version	Summary / License
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD 3-clau
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus

Table 93 – continued from prev

Name	Version	Summary / License
configparser	4.0.2	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Claus
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors.

Table 93 – continued from prev

Name	Version	Summary / License
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	/
m2w64-gcc-libs	5.3.0	/
m2w64-gcc-libs-core	5.3.0	/
m2w64-gmp	6.1.0	/
m2w64-libwinpthread-git	5.0.0.4634.697f757	/
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Inte
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	/
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /

Table 93 – continued from prev

Name	Version	Summary / License
nltk	3.4.5	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.45.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.5	Array processing for numbers, strings, records, and objects. / BSD
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.4	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2t	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.2	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF

Table 93 – continued from prev

Name	Version	Summary / License
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, ori
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0

Table 93 – continued from prev

Name	Version	Summary / License
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typing	3.7.4.1	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode string
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	
vs2015_runtime	14.16.27012	MSVC runtimes associated with cl.exe version 19.16.27032.1 (VS 2
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.10	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD 3-clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	None / BSD

Table 94 – continued from previou

Name	Version	Summary / License
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	4.0.2	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A

jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD

Table 94 – continued from previou

Name	Version	Summary / License
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.45.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause

Table 94 – continued from previou

Name	Version	Summary / License
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
portaudio	19.6.0	A cross platform, open-source, audio I/O library / MIT
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyaudio	0.2.11	Bindings for PortAudio v19, the cross-platform audio stream library / MI
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT

Table 94 – continued from previou

Name	Version	Summary / License
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ripgrep	0.10.0	
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tbb	2019.8	High level abstract threading library / Apache 2.0
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typing	3.7.4.1	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause

Table 94 – continued from previou

Name	Version	Summary / License
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.3	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.10	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD 3-clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0

Table 95 – continued from previou

Name	Version	Summary / License
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	4.0.2	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause

Table 95 – continued from previou

Name	Version	Summary / License
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2.0
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT

Table 95 – continued from previou

Name	Version	Summary / License
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	OpenBLAS headers and libraries for developing software that used Open
openpyxl	2.6.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.18.1	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.5.0	Python style guide checker / MIT

Table 95 – continued from previou

Name	Version	Summary / License
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause

Table 95 – continued from previou

Name	Version	Summary / License
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typing	3.7.4.1	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.10 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	1.0.1	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD 3-clause
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found

Table 96 – continued from previou

Name	Version	Summary / License
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.8.0	Python library designed for screen-scraping / MIT
bitarray	1.0.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.3.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.8.28	Certificates for use with other packages. / MPL 2.0
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.9.11	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	4.0.2	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.6.0	Backports and enhancements for the contextlib module / PSF 2
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.13	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.15.2	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP

Table 96 – continued from previou

Name	Version	Summary / License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.1	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.6.0	A Python library for reading and writing image data / BSD-2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.23	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.15.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.3	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.2	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.2	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.3	tool and library for transferring data with URL syntax / MIT/X derivate (

Table 96 – continued from previou

Name	Version	Summary / License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.4.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.3.0	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.14	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.1.0	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.6.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.45.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.7.0	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT

Table 96 – continued from previou

Name	Version	Summary / License
openssl	1.1.1d	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.2	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.5.1	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.5	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.2.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.13.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycairo	1.18.1	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL 2
pyodbc	4.0.27	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.2	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.15.4	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.1	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.3	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT

Table 96 – continued from previou

Name	Version	Summary / License
pyyaml	5.1.2	YAML parser and emitter for Python / MIT
pyzmq	18.1.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.6.0	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.5	Jupyter Qt console / BSD 3-Clause
qtpy	1.9.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ripgrep	0.10.0	
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	2.0.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.9.3	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.9	Database Abstraction Library. / MIT
sqlite	3.30.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.1	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x A
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tbb	2019.4	High level abstract threading library / Apache 2.0
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.36.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.3	Configuration system for Python applications / BSD-3-Clause
typing	3.7.4.1	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS

Table 96 – continued from previou

Name	Version	Summary / License
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.16.0	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.6	A built-package format for Python. / MIT
widgetsnbextension	3.5.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.3	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.2.1	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.6.0	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 (Jul 24, 2019)

User-facing changes

- Conda install times have decreased by more than half for large packages.
- Conda 4.7.10 improves environment management and error messages.
- Conda constructor now supports building installers with the new .conda file format as well as noarch packages.
- Documentation has been updated for our integration with PyCharm, including more tutorials and improved navigation for easier use.
- Updated packages, including R packages and ML/AI packages.

Backend improvements (non-visible changes)

- Conda is moving to a quarterly release cycle.
- Conda build 3.18 works with the new .conda file format.

Major package updates

- anaconda-project 0.8.2 -> 0.8.3
- dask 1.1.4 -> 2.1.0
- ipython 7.4.0 -> 7.6.1
- jupyter_client 5.2.4 -> 5.3.1
- jupyter_core 4.4.0 -> 4.5.0
- jupyterlab 0.35.4 -> 1.0.2
- jupyterlab_server 0.2.0 -> 1.0.0
- matplotlib 3.0.3 -> 3.1.0
- mkl 2019.3 -> 2019.4
- numba 0.43.1 -> 0.45.0
- numpy 1.16.2 -> 1.16.4
- pillow 5.4.1 -> 6.1.0
- requests 2.21.0 -> 2.22.0
- scikit-image 0.14.2 -> 0.15.0
- spyder 3.3.3 -> 3.3.6
- spyder-kernels 0.4.2 -> 0.5.1
- statsmodels 0.9.0 -> 0.10.0

Packages

Anaconda 2019.07 for 64-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.2.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause

Table 97 – continued from prev

Name	Version	Summary / License
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.10	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers
curl	7.65.2	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	2.1.0	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.1.0	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.1.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L

Table 97 – continued from prev

Name	Version	Summary / License
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.6.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python.
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.8.4	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.0.2	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.0	A set of server components for JupyterLab and JupyterLab like app
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT

Table 97 – continued from prev

Name	Version	Summary / License
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probai
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.3	Python package for creating and manipulating complex networks / I
nltk	3.4.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.0	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT

Table 97 – continued from prev

Name	Version	Summary / License
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	5.0.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.2	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted

Table 97 – continued from prev

Name	Version	Summary / License
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.1.2	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, ori
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.15.26706	MSVC runtimes associated with cl.exe version 19.15.26726 (VS 20
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 32-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.2.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.10	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers
curl	7.65.2	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	2.1.0	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.1.0	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.1.0	Distributed computing with Dask / BSD 3-Clause

Table 98 – continued from prev

Name	Version	Summary / License
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicts
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.6.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python.
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
json5	0.8.4	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.0.2	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.0	A set of server components for JupyterLab and JupyterLab like app
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.37	PNG reference library / zlib/libpng

Table 98 – continued from prev

Name	Version	Summary / License
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-C
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common proba
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.3	Python package for creating and manipulating complex networks / B
nltk	3.4.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.0	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause

Table 98 – continued from prev

Name	Version	Summary / License
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	5.0.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause

Table 98 – continued from prev

Name	Version	Summary / License
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.1	A set of python modules for machine learning and data mining / BS
scipy	1.3.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / I
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.1.2	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Cl
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaS
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp do
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, ori
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.15.26706	MSVC runtimes associated with cl.exe version 19.15.26726 (VS 20
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT

Table 98 – continued from prev

Name	Version	Summary / License
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnir
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for macOS on Intel 64-bit with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.2.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause

Table 99 – continued from previou

cython	0.29.12	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.1.0	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.1.0	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.1.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2.0

Table 99 – continued from previou

Name	Version	Summary / License
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.6.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.8.4	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.0.2	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvm-openmp	4.0.1	Support for the OpenMP language / MIT license or UIUC License
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause

Table 99 – continued from previou

Name	Version	Summary / License
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control settings.
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.0	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach

Table 99 – continued from previou

Name	Version	Summary / License
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.0.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.2	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.3.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0

Table 99 – continued from previou

Name	Version	Summary / License
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.1.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs “serial
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 64-bit Linux on IBM Power CPUs with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.0.5	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.10	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.1.0	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.1.0	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	2.1.0	Distributed computing with Dask / BSD 3-Clause

Table 100 – continued from previo

Name	Version	Summary / License

libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL

Table 100 – continued from previo

Name	Version	Summary / License
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	7.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	6.0.0	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	OpenBLAS headers and libraries for developing software that used Open
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2

Table 100 – continued from previo

Name	Version	Summary / License
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.0.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo

Table 100 – continued from previo

Name	Version	Summary / License
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.1.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 64-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.2.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	None / BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.10	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	2.1.0	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	2.1.0	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0

Table 101 – continued from previo

Name	Version	Summary / License
distributed	2.1.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.1	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.6.1	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.4	Pure Python DBus interface / MIT
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
joblib	0.13.2	Python function as pipeline jobs. / BSD 3-Clause
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
json5	0.8.4	A Python implementation of the JSON5 data format / Apache-2.0
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause

Table 101 – continued from previo

Name	Version	Summary / License
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	1.0.2	JupyterLab / BSD-3-Clause
jupyterlab_server	1.0.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control settings.
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	7.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.3	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1

Table 101 – continued from previo

Name	Version	Summary / License
notebook	6.0.0	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	12.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/PySock

Table 101 – continued from previo

Name	Version	Summary / License
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	5.0.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.15.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.21.2	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.3.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	2.1.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-applehelp	1.0.1	sphinxcontrib-applehelp is a sphinx extension which outputs Apple help t
sphinxcontrib-devhelp	1.0.1	sphinxcontrib-devhelp is a sphinx extension which outputs Devhelp docu
sphinxcontrib-htmlhelp	1.0.2	sphinxcontrib-htmlhelp is a sphinx extension which … / BSD-2-Clause
sphinxcontrib-jsmath	1.0.1	A sphinx extension which renders display math in HTML via JavaScript A
sphinxcontrib-qthelp	1.0.2	sphinxcontrib-qthelp is a sphinx extension which outputs QtHelp docume
sphinxcontrib-serializinghtml	1.1.3	sphinxcontrib-serializinghtml is a sphinx extension which outputs "serial
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT

Table 101 – continued from previo

Name	Version	Summary / License
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	6.0.3	A Python web framework and asynchronous networking library, originall
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	None / BSD

Table 102 – continued from pre

Name	Version	Summary / License
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.2	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.10	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.7.4	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicts
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free

Table 102 – continued from pre

Name	Version	Summary / License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT

Table 102 – continued from pre

Name	Version	Summary / License
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Inte
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks / B
nltk	3.4.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.3	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.3	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2s	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT

Table 102 – continued from pre

Name	Version	Summary / License
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all

Table 102 – continued from pre

Name	Version	Summary / License
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum

statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, ori
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.7.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	None / None
vs2015_runtime	14.15.26706	MSVC runtimes associated with cl.exe version 19.15.26726 (VS 20
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.8	Interact with Excel from Python and vice versa / 3-clause BSD

Table 102 – continued from pre

Name	Version	Summary / License
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at Ac
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause

Table 103 – continued from pre

Name	Version	Summary / License
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.7.10	OS-agnostic, system-level binary package and environment manage
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.7.4	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional util
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.7	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause

Table 103 – continued from pre

Name	Version	Summary / License
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-C
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control sett
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Inte
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS

Table 103 – continued from pre

Name	Version	Summary / License
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2s	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.6.3	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial

Table 103 – continued from pre

Name	Version	Summary / License
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause

Table 103 – continued from pre

Name	Version	Summary / License
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl

tornado	5.1.1	A Python web framework and asynchronous networking library, ori
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.7.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	None / None
vs2015_runtime	14.15.26706	MSVC runtimes associated with cl.exe version 19.15.26726 (VS 20
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /

Table 104 – continued from previo

Name	Version	Summary / License
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.10	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.7.4	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python language /
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT

Table 104 – continued from previo

Name	Version	Summary / License
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT

Table 104 – continued from previo

Name	Version	Summary / License
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control settings.
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause

Table 104 – continued from previo

Name	Version	Summary / License
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
portaudio	19.6.0	A cross platform, open-source, audio I/O library / MIT
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyaudio	0.2.11	Bindings for PortAudio v19, the cross-platform audio stream library / MI
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT

Table 104 – continued from previo

Name	Version	Summary / License
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.7.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1

Table 104 – continued from previo

Name	Version	Summary / License
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause

Table 105 – continued from previo

Name	Version	Summary / License
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause

gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT

Table 105 – continued from previo

Name	Version	Summary / License
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2.0
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause

Table 105 – continued from previo

Name	Version	Summary / License
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	OpenBLAS headers and libraries for developing software that used Open
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-

Table 105 – continued from previo

Name	Version	Summary / License
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.18.1	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Clause

Table 105 – continued from previo

Name	Version	Summary / License
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.7.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.07 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
_libgcc_mutex	0.1	Mutex for libgcc and libgcc-ng / None
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.3	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes

Table 106 – continued from previo

Name	Version	Summary / License
babel	2.7.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	None / BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.9.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	None / None
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.16.3	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.2.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.8	high-quality data compressor / bzip2
ca-certificates	2019.5.15	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.6.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.3	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	1.2.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.7.10	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.18.9	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.4.2	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.7.4	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.7	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.12	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.10.0	Cython implementation of Toolz. High performance functional utilities /
dask	1.2.2	Parallel PyData with Task Scheduling / BSD 3-Clause
dask-core	1.2.2	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.6.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.28.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.1.0	C implementation of Python 3 lru_cache / MIT
filelock	3.0.12	A platform independent file lock. / Public Domain

Table 106 – continued from previo

Name	Version	Summary / License
flask	1.1.1	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.3.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.7	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.17	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.4	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.5.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.21	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4.1	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10.1	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.3.1	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.5.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.1.0	A fast implementation of the Cassowary constraint solver / BSD 3-Clause

Table 106 – continued from previo

Name	Version	Summary / License
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.4.1	A fast and thorough lazy object proxy / BSD-2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.65.2	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	9.1.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.37	PNG reference library / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.2	the SSH library / BSD-3-Clause
libstdcxx-ng	9.1.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.29.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.4	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.4	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	2.0.2	Python hooks for Intel(R) Math Kernel Library runtime control settings.
mkl_fft	1.0.12	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
mock	3.0.5	A library for testing in Python / BSD-2-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.5.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD-3
nltk	3.4.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.44.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau

Table 106 – continued from previo

Name	Version	Summary / License
numpy-base	1.16.4	None / None
numpydoc	0.9.1	Numpy's Sphinx extensions / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1c	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.5.0	A Python Parser / MIT
partd	1.0.0	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.4	Fork of pathlib aiming to support the full stdlib Python API / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.7.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	6.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.1.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.12.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.7.1	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.3	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycairo	1.18.1	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.3	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.4.2	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.4.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.7.0	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.6.2	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF

Table 106 – continued from previo

Name	Version	Summary / License
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	Python interface to libarchive / CC0-1.0
pytz	2019.1	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.3	Discrete Wavelet Transforms in Python / MIT
pyyaml	5.1.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.5.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.8.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.22.0	Python HTTP for Humans / Apache 2.0
rope	0.14.0	A python refactoring library / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	41.0.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.9.0	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.2	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.6	The Scientific Python Development Environment / MIT
spyder-kernels	0.5.1	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.5	Database Abstraction Library. / MIT
sqlite	3.29.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.10.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.4	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x
sympy	1.4	Python library for symbolic mathematics / BSD-3-Clause
tblib	1.4.0	Traceback serialization library. / BSD 2-Clause
terminado	0.8.2	Terminals served by tornado websockets / BSD 2-Clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.10.0	A functional standard library for Python / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.32.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause

Table 106 – continued from previo

Name	Version	Summary / License
typing	3.7.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.2	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.15.4	The comprehensive WSGI web application library. / BSD 3-Clause
wheel	0.33.4	A built-package format for Python. / MIT
widgetsnbextension	3.5.0	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.2	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	1.0.0	Composable Dictionary Classes / BSD 3-Clause
zipp	0.5.1	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 (Apr 04, 2019)

User-facing changes

- Full conda integration with Windows Powershell.
- The Windows Python package includes an optional feature that, when enabled, will improve DLL handling of library conflicts.
- This is the first release which includes conda 4.6.
- A link is added to the installer so you have the option to easily install PyCharm for Anaconda.

Backend improvements (non-visible changes)

- Anaconda uninstalls faster on Windows.

Major package updates

- bokeh 1.0.2 -> 1.0.4
- dask 1.0.0 -> 1.1.4
- ipython 7.2.0 -> 7.4.0
- jupyterlab 0.35.3 -> 0.35.4
- matplotlib 3.0.2 -> 3.0.3
- mkl 2019.1 -> 2019.3
- numba 0.41.0 -> 0.43.1
- numpy 1.15.4 -> 1.16.2
- pandas 0.23.4 -> 0.24.2
- pillow 5.3.0 -> 5.4.1
- python 3.7.1 -> 3.7.3
- scikit-image 0.14.1 -> 0.14.2
- scikit-learn 0.20.1 -> 0.20.3
- scipy 1.1.0 -> 1.2.1
- spyder 3.3.2 -> 3.3.3
- spyder-kernels 0.3.0 -> 0.4.2

Removed:

- conda
- conda-build
- conda-env

Packages

Anaconda 2019.03 for 64-bit Windows with Python 3.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.1.2	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu

Table 107 – continued from pre

Name	Version	Summary / License
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.6.11	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop

Table 107 – continued from pre

Name	Version	Summary / License
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.0.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT

Table 107 – continued from pre

Name	Version	Summary / License
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common proba
more-itertools	6.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python
psutil	5.6.1	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause

Table 107 – continued from pre

Name	Version	Summary / License
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.3.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.7.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.12.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT

Table 107 – continued from pre

Name	Version	Summary / License
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	0.4.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	6.0.2	A Python web framework and asynchronous networking library, ori
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 32-bit Windows with Python 3.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.1.2	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.6.11	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedict
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice

Table 108 – continued from pre

Name	Version	Summary / License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT

Table 108 – continued from pre

Name	Version	Summary / License
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.0.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common proba
more-itertools	6.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL

Table 108 – continued from pre

Name	Version	Summary / License
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python
psutil	5.6.1	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P

appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.1.2	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.6.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers / Apa

Table 109 – continued from previo

Name	Version	Summary / License
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause

Table 109 – continued from previo

Name	Version	Summary / License
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.0.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	6.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause

Table 109 – continued from previo

Name	Version	Summary / License
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.3.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD

Table 109 – continued from previo

Name	Version	Summary / License
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.7.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.12.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	0.4.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	6.0.2	A Python web framework and asynchronous networking library, originall
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause

Table 109 – continued from previo

Name	Version	Summary / License
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 64-bit Linux on IBM Power CPUs with Python 3.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.0.5	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT

Table 110 – continued from previo

Name	Version	Summary / License
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2

ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.0.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	6.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause

Table 110 – continued from previo

Name	Version	Summary / License
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0

Table 110 – continued from previo

Name	Version	Summary / License
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.3.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	6.0.2	A Python web framework and asynchronous networking library, originall
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS

Table 110 – continued from previo

Name	Version	Summary / License
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 64-bit Linux with Python 3.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.2.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.1.2	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC

Table 111 – continued from previo

Name	Version	Summary / License
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.6.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A "smart font" system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like

Table 111 – continued from previo

Name	Version	Summary / License
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.4.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C

jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.4	Pure Python DBus interface / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.4	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau

Table 111 – continued from previo

Name	Version	Summary / License
matplotlib	3.0.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	6.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p

pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0

Table 111 – continued from previo

Name	Version	Summary / License
prompt_toolkit	2.0.9	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.3.1	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.3.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.3.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.2	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.3	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.7.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.12.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.1	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT

Table 111 – continued from previo

Name	Version	Summary / License
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	0.4.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	6.0.2	A Python web framework and asynchronous networking library, originall
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.6.11	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.7.3	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause

Table 112 – continued from pre

Name	Version	Summary / License
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicts
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C

Table 112 – continued from pre

Name	Version	Summary / License
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Inte
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks / I
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2r	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause

Table 112 – continued from pre

Name	Version	Summary / License
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.5.0	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause

tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT

Table 112 – continued from pre

Name	Version	Summary / License
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.1.0	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnir
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau

bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2

Table 113 – continued from pre

Name	Version	Summary / License
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.6.11	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.7.3	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L

Table 113 – continued from pre

Name	Version	Summary / License
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.16	cross platform menu item installation / BSD

Table 113 – continued from pre

Name	Version	Summary / License
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Inte
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2r	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis too
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
powershell_shortcut	0.0.1	Powershell shortcut creator for Windows (using menuinst) / BSD
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.5.0	A cross-platform process and system utilities module for Python / B
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities /
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT

Table 113 – continued from pre

Name	Version	Summary / License
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pyreadline	2.1	A python implmementation of GNU readline. / BSD 3-Clause
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.5.1	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.3.1	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.7.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.12.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BS
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	0.4.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database eng

Table 113 – continued from pre

Name	Version	Summary / License
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2

winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Cla
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.1.0	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.6.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.7.3	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause

Table 114 – continued from previo

Name	Version	Summary / License
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause

Table 114 – continued from previo

Name	Version	Summary / License
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	18.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause

Table 114 – continued from previo

Name	Version	Summary / License
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
portaudio	19.6.0	A cross platform, open-source, audio I/O library / MIT
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyaudio	0.2.11	Bindings for PortAudio v19, the cross-platform audio stream library / MI
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.3.1	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF

Table 114 – continued from previo

Name	Version	Summary / License
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.7.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.12.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	0.4.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0

Table 114 – continued from previo

Name	Version	Summary / License
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	

Table 115 – continued from previo

Name	Version	Summary / License
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.6.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.7.3	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3

Table 115 – continued from previo

Name	Version	Summary / License
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD-3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2.0
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause

Table 115 – continued from previo

Name	Version	Summary / License
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0

Table 115 – continued from previo

Name	Version	Summary / License
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.18.0	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.3.1	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database engine. /

Table 115 – continued from previo

Name	Version	Summary / License
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2019.03 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.3.0	Atomic file writes / MIT
attrs	19.1.0	attrs is the Python package that will bring back the joy of writing classes

Table 116 – continued from previo

Name	Version	Summary / License
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.7.1	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.1.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.15.0	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.4	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2019.1.23	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2019.3.9	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.12.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.8.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.6.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.8	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.7.3	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.6.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.6	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.1.4	Parallel Python with task scheduling / BSD 3-Clause
dbus	1.13.6	Simple message bus system for applications to talk to one another / GPL2
decorator	4.4.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.26.0	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI

Table 116 – continued from previo

Name	Version	Summary / License
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.4.0	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.13	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.9.0	Read and write HDF5 files from Python. / BSD-3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.4	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.5.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.8	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.3	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.16	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.3	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	3.0.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT

Table 116 – continued from previo

Name	Version	Summary / License
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.64.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20181209	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.36	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.10	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.9	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.33	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.28.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.3.2	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.1	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.3	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.10	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	5.0.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.6.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.4.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.8	Jupyter Notebook / BSD 3-clause
numba	0.43.1	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.9	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.16.2	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.16.2	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause

Table 116 – continued from previo

Name	Version	Summary / License
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.6.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1b	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	19.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.24.2	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.2.3.2	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.4	A Python Parser / MIT
partd	0.3.10	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.43	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.4.1	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	19.0.3	PyPA recommended tool for installing Python packages / MIT
pixman	0.38.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.5.0.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.9.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.6.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.6.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.8.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pycairo	1.18.0	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.5.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.1.1	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.26	DB API Module for ODBC / MIT
pyopenssl	19.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.1	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pyrsistent	0.14.11	Persistent/Functional/Immutable data structures / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.5.1	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.3.1	Simple and powerful testing with Python. / MIT
python	2.7.16	General purpose programming language / PSF
python-dateutil	2.8.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	

Table 116 – continued from previo

Name	Version	Summary / License
pytz	2018.9	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	5.1	YAML parser and emitter for Python / MIT
pyzmq	18.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.7	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.7.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.12.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.10.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.2	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.3	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.2.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.8.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.1.2	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
soupsieve	1.8	A modern CSS selector implementation for BeautifulSoup / MIT
sphinx	1.8.5	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.3	The Scientific Python Development Environment / MIT
spyder-kernels	0.4.2	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.3.1	Database Abstraction Library. / MIT
sqlite	3.27.2	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.7.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.31.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS

Table 116 – continued from previo

Name	Version	Summary / License
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.33.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.11.1	Module for decorators, wrappers and monkey patching / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.5	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.3.1	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.4	Composable Dictionary Classes / BSD 3-Clause
zipp	0.3.3	A pathlib-compatible Zipfile object wrapper / MIT
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 (Dec 21, 2018)

User-facing changes

- Anaconda version numbers now follow a year.month format.
- OpenSSL 1.1.1 is installed on all platforms and versions except for the Python 2.7 on win-32 and win-64.
- This is the last Anaconda release for the linux-32 platform.

Backend improvements (non-visible changes)

- Improvements have been made to conda which will decrease the time it takes to solve and install packages.

Major package updates

- bokeh 0.13.0 -> 1.0.2
- dask 0.19.1 -> 1.0.0
- ipython 6.5.0 -> 7.2.0
- jupyter_client 5.2.3 -> 5.2.4
- jupyter_console 5.2.0 -> 6.0.0
- jupyterlab 0.34.9 -> 0.35.3
- matplotlib 2.2.3 -> 3.0.2

- mkl 2019.0 -> 2019.1
- numba 0.39.0 -> 0.41.0
- numpy 1.15.1 -> 1.15.4
- pillow 5.2.0 -> 5.3.0
- python 3.7.0 -> 3.7.1
- requests 2.19.1 -> 2.21.0
- scikit-image 0.14.0 -> 0.14.1
- scikit-learn 0.19.2 -> 0.20.1
- spyder 3.3.1 -> 3.3.2
- spyder-kernels 0.2.6 -> 0.3.0
- sympy 1.2 -> 1.3
- conda 4.5.12
- conda-build 3.17.6
- conda-env 2.6.0
- jupyterlab_server 0.2.0

Packages

Anaconda 2018.12 for 64-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.1.0	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be

Table 117 – continued from pre

Name	Version	Summary / License
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop

Table 117 – continued from pre

Name	Version	Summary / License
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	17.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT

Table 117 – continued from pre

Name	Version	Summary / License
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common proba
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics,
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.7	Library for building powerful interactive command lines in Python
psutil	5.4.8	A cross-platform process and system utilities module for Python / B
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT

Table 117 – continued from pre

Name	Version	Summary / License
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.2.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.0.2	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.2.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.1	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful

Table 117 – continued from pre

Name	Version	Summary / License
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, ori
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 32-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.1.0	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Claus
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause

Table 118 – continued from pre

Name	Version	Summary / License
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like app
keyring	17.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C

Table 118 – continued from pre

Name	Version	Summary / License
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-C
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	3.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common proba
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks / I
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT

Table 118 – continued from pre

Name	Version	Summary / License
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.7	Library for building powerful interactive command lines in Python
psutil	5.4.8	A cross-platform process and system utilities module for Python / B
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.2.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.0.2	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.2.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.1	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Claus
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT

appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.1.0	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2

Table 119 – continued from previo

Name	Version	Summary / License
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause

Table 119 – continued from previo

Name	Version	Summary / License
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	17.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Intel

Table 119 – continued from previo

Name	Version	Summary / License
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.7	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach

Table 119 – continued from previo

Name	Version	Summary / License
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.2.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.2.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.1	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /

Table 119 – continued from previo

Name	Version	Summary / License
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 64-bit Linux on IBM Power CPUs with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /

Table 120 – continued from previo

Name	Version	Summary / License
astroid	2.1.0	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.0.5	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF

heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
incremental	17.5.0	A library that versions your Python projects / MIT License
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL

Table 120 – continued from previo

Name	Version	Summary / License
libgfortran	3.0.0	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libiconv	1.14	Provides iconv for systems which don't have one (or that cannot convert f
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause

Table 120 – continued from previo

Name	Version	Summary / License
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.7	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.2.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.2.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.1	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause

Table 120 – continued from previo

Name	Version	Summary / License
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 64-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.1.0	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause

Table 121 – continued from previo

Name	Version	Summary / License
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.4	Pure Python DBus interface / MIT

Table 121 – continued from previo

Name	Version	Summary / License

Name	Version	Summary / License
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.7	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT

Table 121 – continued from previo

Name	Version	Summary / License
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.2.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.2.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.1	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.0	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT

Table 121 – continued from previo

Name	Version	Summary / License
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 32-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.1.0	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.1	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau

Table 122 – continued from previo

Name	Version	Summary / License
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language /
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT

Table 122 – continued from previo

Name	Version	Summary / License
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	5.1.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	7.2.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.4	Pure Python DBus interface / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	6.0.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.35.3	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_server	0.2.0	A set of server components for JupyterLab and JupyterLab like applicatio
keyring	17.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause

Table 122 – continued from previo

Name	Version	Summary / License
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	3.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause

Table 122 – continued from previo

Name	Version	Summary / License
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	2.0.7	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	2.2.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.3	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.5.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.2.0	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.1	Pytest plugin for detecting inadvertent open file handles / BSD

Table 122 – continued from previo

Name	Version	Summary / License
pytest-remotedata	0.3.1	Pytest plugin for controlling remote data access / BSD
python	3.7.1	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.0	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1

Table 122 – continued from previo

Name	Version	Summary / License
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be

Table 123 – continued from pre

Name	Version	Summary / License
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT

Table 123 – continued from pre

Name	Version	Summary / License
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	17.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause

Table 123 – continued from pre

Name	Version	Summary / License
lzo	2.10	LZO is a portable lossless data compression library written in ANS

markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Inte
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics,
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks /
nltk	3.4	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT

Table 123 – continued from pre

Name	Version	Summary / License
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.8	A cross-platform process and system utilities module for Python / B
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.0.2	Simple and powerful testing with Python. / MIT

wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl

Anaconda 2018.12 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.os	0.1.1	Backport of new features in Python's os module / Python Software
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.2	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.12	OS-agnostic, system-level binary package and environment manage
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri

Table 124 – continued from pre

Name	Version	Summary / License
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2019.0.0	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.

Table 124 – continued from pre

Name	Version	Summary / License
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	17.0.0	Store and access your passwords safely / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Inte
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.2	Python package for creating and manipulating complex networks / I
nltk	3.4	Build Python programs to work with human language data / Apache

Table 124 – continued from pre

Name	Version	Summary / License
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.8	A cross-platform process and system utilities module for Python / B
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	4.0.2	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Claus

Table 124 – continued from pre

Name	Version	Summary / License
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.5	Python bindings for the winpty library / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, ori
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF

Table 124 – continued from pre

Name	Version	Summary / License
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode string
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character code
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) sp
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl

Anaconda 2018.12 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M

Table 125 – continued from previo

colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A

Table 125 – continued from previo

Name	Version	Summary / License
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	17.0.0	Store and access your passwords safely / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20170329	Editline Library (libedit) / NetBSD

Table 125 – continued from previo

Name	Version	Summary / License
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert f
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0

Table 125 – continued from previo

Name	Version	Summary / License
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
portaudio	19.6.0	A cross platform, open-source, audio I/O library / MIT
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyaudio	0.2.11	Bindings for PortAudio v19, the cross-platform audio stream library / MI
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSI
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT

Table 125 – continued from previo

Name	Version	Summary / License
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause

Table 125 – continued from previo

Name	Version	Summary / License
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.15.1	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT

Table 126 – continued from previo

Name	Version	Summary / License
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.16.3	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT

Table 126 – continued from previo

Name	Version	Summary / License
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
incremental	17.5.0	A library that versions your Python projects / MIT License
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran	3.0.0	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libiconv	1.14	Provides iconv for systems which don't have one (or that cannot convert f
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,

Table 126 – continued from previo

Name	Version	Summary / License
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0

Table 126 – continued from previo

Name	Version	Summary / License
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycairo	1.18.0	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2

Table 126 – continued from previo

Name	Version	Summary / License
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes

Table 127 – continued from previo

Name	Version	Summary / License
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedication a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD

Table 127 – continued from previo

Name	Version	Summary / License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT

Table 127 – continued from previo

Name	Version	Summary / License
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause

mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)

Table 127 – continued from previo

Name	Version	Summary / License
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.4	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.4	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.12	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycairo	1.18.0	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL

Table 127 – continued from previo

Name	Version	Summary / License
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause

Table 127 – continued from previo

Name	Version	Summary / License
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 2018.12 for 32-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.12	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.6	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.9	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS

Table 128 – continued from previo

Name	Version	Summary / License
backports.os	0.1.1	Backport of new features in Python's os module / Python Software Found
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	3.0.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	1.0.2	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.11.29	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	7.0	Python composable command line interface toolkit / BSD-3-Clause
cloudpickle	0.6.1	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.4.1	Cross-platform colored terminal text / BSD-3-Clause
conda	4.5.12	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.17.6	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.1.1	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.4.2	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.29.2	The Cython compiler for writing C extensions for the Python language /
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	1.0.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.25.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.10	A platform independent file lock. / Public Domain

Table 128 – continued from previo

Name	Version	Summary / License
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.7	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
future	0.17.1	Clean single-source support for Python 3 and 2 / MIT
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.7	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.8	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
importlib_metadata	0.6	A library to access the metadata for a Python package / APACHE-2.0
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.1	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD-3-Clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD-3-Clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.2	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	1.1.0	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.13.2	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.4	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD-3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause

Table 128 – continued from previo

Name	Version	Summary / License
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
krb5	1.16.1	A network authentication protocol. / MIT
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libarchive	3.3.3	Multi-format archive and compression library / BSD 2-Clause
libcurl	7.63.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
liblief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
libpng	1.6.35	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.26.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lz4-c	1.8.1.2	Extremely Fast Compression algorithm / BSD 2-clause
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.1.0	A Python module that implements the jinja2.Markup string / BSD-3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.6	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.2	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.1.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.2	Python package for creating and manipulating complex networks / BSD 3
nltk	3.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.7.4	Jupyter Notebook / BSD 3-clause

Table 128 – continued from previo

Name	Version	Summary / License
numba	0.41.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT

openssl	1.1.1a	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	18.0	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.9	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.5.0	A module wrapper for os.path / MIT
pathlib2	2.3.3	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.5	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.3.0	Pillow is the friendly PIL fork by Alex Clark and Contributors / PIL
pip	18.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.8.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.5.0	Python client for the Prometheus monitoring system / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.8	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.7.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
py-lief	0.9.0	A cross platform library to parse, modify and abstract ELF, PE and Mach
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycairo	1.18.0	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.19	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.3.1	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.25	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.3.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL

Table 128 – continued from previo

Name	Version	Summary / License
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	4.0.2	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.5	Extensions to the standard Python datetime module. / BSD 3 Clause
python-libarchive-c	2.8	
pytz	2018.7	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.1	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.7	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.5.3	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.3	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.2	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.21.0	Python HTTP for Humans / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.20.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	40.6.3	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.12.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.1.0	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.8.2	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.2	The Scientific Python Development Environment / MIT
spyder-kernels	0.3.0	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.15	Database Abstraction Library. / MIT
sqlite	3.26.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.3	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.3	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.4.2	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1.1	A Python web framework and asynchronous networking library, originall

Table 128 – continued from previo

Name	Version	Summary / License
tqdm	4.28.1	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.24.1	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.32.3	A built-package format for Python. / MIT
widgetsnbextension	3.4.2	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
wurlitzer	1.0.2	Capture C-level stdout/stderr in Python / MIT
xlrd	1.2.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zstd	1.3.7	Zstandard - Fast real-time compression algorithm / BSD 3-Clause

Anaconda 5.3.1 (Nov 19, 2018)

User-facing changes

- The Anaconda Installers are shipped with a fix for VSCode Installation. xref: https://github.com/ContinuumIO/anaconda-issues/issues/10286

Anaconda 5.3.0 (Sept 28, 2018)

User-facing changes

- The Anaconda3 installers ship with python 3.7 instead of python 3.6
- Windows installers disallow the character , in installation path to prevent usability issues.
- Instructions in the macOS pkg installer for choice of initializing installation has been improved.

Backend improvements (non-visible changes)

- Installers mimic the functionality of "conda init" (a highly anticipated feature in conda 4.6) instead of just adding $PREFIX/bin to PATH in bash profile.
- The repodata_record.json file for each package in the package cache directory is populated correctly, which will assist in offline installation of packages in new environments.

Major package updates

- anaconda-client 1.6.14 -> 1.7.2
- bokeh 0.12.16 -> 0.13.0
- dask 0.17.5 -> 0.19.1
- ipython 6.4.0 -> 6.5.0
- jupyterlab 0.32.1 -> 0.34.9
- jupyterlab_launcher 0.10.5 -> 0.13.1
- matplotlib 2.2.2 -> 2.2.3
- mkl 2018.0.2 -> 2019.0
- numba 0.38.0 -> 0.39.0
- numpy 1.14.3 -> 1.15.1
- pandas 0.23.0 -> 0.23.4
- pillow 5.1.0 -> 5.2.0
- python 3.6.5 -> 3.7.0
- requests 2.18.4 -> 2.19.1
- scikit-image 0.13.1 -> 0.14.0
- scikit-learn 0.19.1 -> 0.19.2
- seaborn 0.8.1 -> 0.9.0
- spyder 3.2.8 -> 3.3.1
- sympy 1.1.1 -> 1.2
- spyder-kernels 0.2.6

Packages

Anaconda 5.3.0 for 64-bit Windows with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.

Table 129 – continued from pre

Name	Version	Summary / License
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
appdirs	1.4.3	A small Python module for determining appropriate platform-speci
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	2.0.4	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.0.4	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utili
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.11	OS-agnostic, system-level binary package and environment manage
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat

Table 129 – continued from pre

Name	Version	Summary / License
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.5.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.34.9	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.13.1	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	13.2.1	Store and access your passwords safely. / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT

Table 129 – continued from pre

Name	Version	Summary / License
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common proba
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.1	Python package for creating and manipulating complex networks / I
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT

Table 129 – continued from pre

Name	Version	Summary / License
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.7	A cross-platform process and system utilities module for Python / B
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	2.1.1	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	3.8.0	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.4.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.0	Pytest plugin for controlling remote data access / BSD
python	3.7.0	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Claus
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.4	Python bindings for the winpty library / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.6	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BS

Table 129 – continued from pre

Name	Version	Summary / License
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.1	The Scientific Python Development Environment / MIT
spyder-kernels	0.2.6	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1	A Python web framework and asynchronous networking library, ori
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.7.0	event-driven networking engine / MIT
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and mo
vc	14.1	A meta-package to impose mutual exclusivity among software built
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT

automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utili
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.11	OS-agnostic, system-level binary package and environment manage

Table 130 – continued from pre

Name	Version	Summary / License
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.5.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l

Table 130 – continued from pre

jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.34.9	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.13.1	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	13.2.1	Store and access your passwords safely. / Python Software Foundat
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Inte
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common proba
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.1	Python package for creating and manipulating complex networks / I
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT

Table 130 – continued from pre

Name	Version	Summary / License
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.7	A cross-platform process and system utilities module for Python / B
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	2.1.1	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	3.8.0	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.4.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.0	Pytest plugin for controlling remote data access / BSD

cffi	1.9.1	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.3	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.2	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.10.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
cryptography	1.7.1	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python language / Ap
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.7	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.3.0	Coroutine-based network library / MIT
glib	2.56.1	Provides core application building blocks for libraries and applications writ
glob2	0.5	Version of the glob module that supports recursion via **, and can capture p
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
icu	58.2	International Components for Unicode. / MIT
idna	2.2	Internationalized Domain Names in Applications (IDNA). / BSD Like
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.4.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause

Table 131 – continued from previous page

Name	Version	Summary / License
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT

libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC Ru
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fro
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GF
markupsafe	0.23	A Python module that implements the jinja2.Markup string / BSD 3-Clause
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using Intel (R) Ma
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probability dis
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C

Table 131 – continued from previous page

Name	Version	Summary / License
nltk	3.3.0	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	Jupyter Notebook / BSD 3-clause
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pcre	8.42	Regular expression pattern matching using the same syntax and semantics a
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.5.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.1.9	ASN.1 types and codecs / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.17	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	16.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.5.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.3.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD

Table 131 – continued from previous page

Name	Version	Summary / License
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.2.1	Pytest plugin for controlling remote data access / BSD
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSD
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.12.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platform
setuptools	38.5.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	The Scientific Python Development Environment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
tornado	5.0.2	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT

Table 131 – continued from previous page

Name	Version	Summary / License
widgetsnbextension	3.2.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.3.0 for 64-bit Linux on IBM Power CPUs with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appdirs	1.4.3	A small Python module for determining appropriate platform-specific dir
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.0.4	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.0.4	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / N
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /

Table 132 – continued from previo

Name	Version	Summary / License
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause

mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3
nltk	3.3.0	Build Python programs to work with human language data / Apache 2.0

Table 132 – continued from previo

Name	Version	Summary / License
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numexpr	2.6.7	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.5	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.14.5	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	2.1.1	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT

Table 132 – continued from previo

Name	Version	Summary / License
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	3.8.0	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.4.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.0	Pytest plugin for controlling remote data access / BSD
python	3.7.0	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.2	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1	A Python web framework and asynchronous networking library, originall
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.4.0	event-driven networking engine / MIT
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and more. /

Table 132 – continued from previo

Name	Version	Summary / License
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for 64-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appdirs	1.4.3	A small Python module for determining appropriate platform-specific dir
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.0.4	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.0.4	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause

Table 133 – continued from previo

Name	Version	Summary / License
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A "smart font" system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT

Table 133 – continued from previo

Name	Version	Summary / License
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.9.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.5.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.3.1	Pure Python DBus interface / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.34.9	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.13.1	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	13.2.1	Store and access your passwords safely. / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,

Table 133 – continued from previo

Name	Version	Summary / License
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p

python	3.7.0	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.6	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
secretstorage	3.1.0	Provides a way for securely storing passwords and other secrets. / BSD-3
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo

Table 133 – continued from previo

Name	Version	Summary / License
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.1	The Scientific Python Development Environment / MIT
spyder-kernels	0.2.6	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.2	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1	A Python web framework and asynchronous networking library, originall
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.7.0	event-driven networking engine / MIT
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for 32-bit Linux with Python 3.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appdirs	1.4.3	A small Python module for determining appropriate platform-specific dir
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	2.0.4	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	3.0.4	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-Clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause

Table 134 – continued from previo

Name	Version	Summary / License
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.9.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.5.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors. / MI
jeepney	0.3.1	Pure Python DBus interface / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT

Table 134 – continued from previo

Name	Version	Summary / License
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.34.9	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.13.1	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	13.2.1	Store and access your passwords safely. / Python Software Foundation or
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Intel (R)
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3
nltk	3.3.0	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause

Table 134 – continued from previo

Name	Version	Summary / License
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	2.1.1	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock

Table 134 – continued from previo

Name	Version	Summary / License
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	3.8.0	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.4.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.3.0	Pytest plugin for controlling remote data access / BSD
python	3.7.0	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.6	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause

xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
appdirs	1.4.3	A small Python module for determining appropriate platform-speci
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.8	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.1	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF

Table 135 – continued from pre

Name	Version	Summary / License
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utili
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.7	pure Python COM package / MIT
conda	4.5.11	OS-agnostic, system-level binary package and environment manage
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Pyt
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python langu
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional util
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7

Table 135 – continued from pre

Name	Version	Summary / License
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.10.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	13.2.1	Store and access your passwords safely. / Python Software Foundat
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause

Table 135 – continued from pre

Name	Version	Summary / License
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Inte
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics,
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.1	Python package for creating and manipulating complex networks /
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT

Table 135 – continued from pre

Name	Version	Summary / License
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.7	A cross-platform process and system utilities module for Python / B
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	3.8.0	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Claus
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.4	Python bindings for the winpty library / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0

Table 135 – continued from pre

Name	Version	Summary / License
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.1	The Scientific Python Development Environment / MIT
spyder-kernels	0.2.6	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.2	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.2	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1	A Python web framework and asynchronous networking library, ori
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.7.0	event-driven networking engine / MIT
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause

Table 135 – continued from pre

Name	Version	Summary / License
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clau
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
appdirs	1.4.3	A small Python module for determining appropriate platform-speci
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.8	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing cl
automat	0.7.0	self-service finite-state machines for the programmer on the go / M
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at A
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports.shutil_which	3.5.1	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utili
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.7	pure Python COM package / MIT

Table 136 – continued from pre

Name	Version	Summary / License
conda	4.5.11	OS-agnostic, system-level binary package and environment manage

defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicat
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Lice
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Cla
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel prop
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD L
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD 3-clause

Table 136 – continued from pre

Name	Version	Summary / License
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software l
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
keyring	13.2.1	Store and access your passwords safely. / Python Software Foundati
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X deri
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot cor
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Inte
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BS
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics,

Table 136 – continued from pre

Name	Version	Summary / License
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BS
networkx	2.1	Python package for creating and manipulating complex networks /
nltk	3.3.0	Build Python programs to work with human language data / Apach
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.7	A cross-platform process and system utilities module for Python / B
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities /
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial

Table 136 – continued from pre

Name	Version	Summary / License
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/P
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large ar
pytest	3.8.0	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Claus
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.4	Python bindings for the winpty library / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages /
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.1	The Scientific Python Development Environment / MIT
spyder-kernels	0.2.6	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.2	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.2	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause

Table 136 – continued from pre

Name	Version	Summary / License
tornado	5.1	A Python web framework and asynchronous networking library, ori
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.7.0	event-driven networking engine / MIT
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and mo
vc	9	A meta-package to impose mutual exclusivity among software built
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.15.26706	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Wind
win_unicode_console	0.5	A Python package to enable Unicode input and display when runnin
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert st
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for comm
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zl
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.3	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BSI
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.6	Community-developed Python Library for Astronomy / BSD

Table 137 – continued from previous page

Name	Version	Summary / License
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveStat
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.9.1	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.3	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.2	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.10.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.6-
cryptography	1.7.1	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python language / Ap
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD 3-
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.7	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / Ap
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and PyP
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

Table 137 – continued from previous page

Name	Version	Summary / License

Name	Version	Summary / License
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.3.0	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	Jupyter Notebook / BSD 3-clause
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pcre	8.42	Regular expression pattern matching using the same syntax and semantics a
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.5.0	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.1.9	ASN.1 types and codecs / BSD 2-Clause
pyaudio	0.2.7	Bindings for PortAudio v19, the cross-platform audio stream library / MIT

Table 137 – continued from previous page

Name	Version	Summary / License
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.17	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	16.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.5.1	Simple and powerful testing with Python. / MIT
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.0	Extensions to the standard Python datetime module. / BSD 3 Clause
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSD
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.12.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platforn
setuptools	38.5.1	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	The Scientific Python Development Environment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.0	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x. /

Table 137 – continued from previous page

Name	Version	Summary / License
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
tornado	5.0.2	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.3.0 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appdirs	1.4.3	A small Python module for determining appropriate platform-specific dir
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.8	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF

Table 138 – continued from previo

Name	Version	Summary / License
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

Table 138 – continued from previo

Name	Version	Summary / License
gevent	1.3.6	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.9.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran	3.0.0	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libiconv	1.14	Provides iconv for systems which don't have one (or that cannot convert f
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception

Table 138 – continued from previo

Name	Version	Summary / License
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based

requests	2.19.1	Python HTTP for Humans. / Apache 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause

Table 138 – continued from previo

Name	Version	Summary / License
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and SortedSet /
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.2	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.2	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1	A Python web framework and asynchronous networking library, originall
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.4.0	event-driven networking engine / MIT
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appdirs	1.4.3	A small Python module for determining appropriate platform-specific dir
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.8	Community-developed Python Library for Astronomy / BSD
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /

Table 139 – continued from previo

Name	Version	Summary / License
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A “smart font” system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.9.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause

Table 139 – continued from previo

Name	Version	Summary / License
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause

Table 139 – continued from previo

Name	Version	Summary / License
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3
nltk	3.3.0	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycairo	1.17.1	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain

Table 139 – continued from previo

Name	Version	Summary / License
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	3.8.0	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.6	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.1	The Scientific Python Development Environment / MIT
spyder-kernels	0.2.6	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause

Table 139 – continued from previo

Name	Version	Summary / License
subprocess32	3.5.2	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.

wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.3.0 for 32-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.11	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.7.2	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.9.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
appdirs	1.4.3	A small Python module for determining appropriate platform-specific dir
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.5	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.8	Community-developed Python Library for Astronomy / BSD

Table 140 – continued from previo

Name	Version	Summary / License
atomicwrites	1.2.1	Atomic file writes. / MIT
attrs	18.2.0	attrs is the Python package that will bring back the joy of writing classes
automat	0.7.0	self-service finite-state machines for the programmer on the go / MIT
babel	2.6.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. /
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.3	Python library designed for screen-scraping / MIT
bitarray	0.8.3	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.4	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.4	A blocking, shuffling and loss-less compression library that can be faster
bokeh	0.13.0	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.49.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.8.24	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.5	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.11	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.15.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
constantly	15.1.0	Symbolic constants in Python / MIT
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.3.1	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.5	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utilities. /
dask	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.19.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
defusedxml	0.5.0	XML bomb protection for Python stdlib modules / PSF 2.0
distributed	1.23.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedication a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD

Table 140 – continued from previo

Name	Version	Summary / License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.6	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.8	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.6	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.13.0	A library for configuring and customizing font access. / MIT
freetype	2.9.1	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
fribidi	1.0.5	The Free Implementation of the Unicode Bidirectional Algorithm. / LGP
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.6	Coroutine-based network library / MIT
glib	2.56.2	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.12	A "smart font" system that handles the complexities of lesser-known lang
greenlet	0.4.15	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.8.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.8.8	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
hyperlink	18.0.0	Immutable, Pythonic, correct URLs. / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.7	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.4.1	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.1.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
incremental	17.5.0	A library that versions your Python projects / MIT License
intel-openmp	2019.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.9.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.8.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.4.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.12.1	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause

Table 140 – continued from previo

Name	Version	Summary / License
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.33.11	JupyterLab PRE-ALPHA / BSD-3-Clause
jupyterlab_launcher	0.11.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.61.0	tool and library for transferring data with URL syntax / MIT/X derivate (
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	8.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.3.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	8.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libuuid	1.0.3	Portable uuid C library. / BSD 3-Clause
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
linecache2	1.0.0	Backport of the linecache module / PSF 1.0
llvmlite	0.24.0	A lightweight LLVM python binding for writing JIT compilers / New BS
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.5	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.2.3	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2019.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.4	NumPy-based implementation of Fast Fourier Transform using Intel (R) M
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probability
more-itertools	4.3.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.1.0	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	4.0.1	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.6.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.4.0	Converting Jupyter Notebooks / BSD-3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3
nltk	3.3.0	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.6.0	Jupyter Notebook / BSD 3-clause
numba	0.39.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clause
numexpr	2.6.8	Fast numerical expression evaluator for NumPy. / MIT

Table 140 – continued from previo

Name	Version	Summary / License
numpy	1.15.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpy-base	1.15.1	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.46	parse, read and write Microsoft OLE2 files / BSD 2-Clause
openpyxl	2.5.6	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2p	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.4	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.42.4	Text layout and rendering engine. / LGPL-2.1
parso	0.3.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	11.1.0	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.42	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.6.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.2.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.7.1	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prometheus_client	0.3.1	Python client for the Prometheus monitoring system. / Apache 2.0
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.7	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.6.0	Run a subprocess in a pseudo terminal / ISC
py	1.6.0	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.4.4	ASN.1 types and codecs / BSD 2-Clause
pyasn1-modules	0.2.2	A collection of ASN.1-based protocols modules. / BSD 2-Clause
pycairo	1.17.1	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.2	A Python Interface To The cURL library / LGPL, MIT
pyflakes	2.0.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.9.2	python code static checker / GPL
pyodbc	4.0.24	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.4	Brings together Python, HDF5 and NumPy to easily handle large amount

Table 140 – continued from previo

Name	Version	Summary / License
pytest	3.8.0	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.5	World timezone definitions, modern and historical. / MIT
pywavelets	1.0.0	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.13	YAML parser and emitter for Python / MIT
pyzmq	17.1.2	Python bindings for zeromq / BSD 3-clause
qt	5.9.6	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.4.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.5.0	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL-3.0
requests	2.19.1	Python HTTP for Humans. / Apache 2.0
rope	0.11.0	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.46	A patched copy of ruamel.yaml. / MIT
scandir	1.9.0	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.14.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.2	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.9.0	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all platfo
service_identity	17.0.0	Service identity verification for pyOpenSSL. / MIT
setuptools	40.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	1.0.1	Python Sorted Collections / Apache-2.0
sortedcontainers	2.0.5	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.7.9	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.1.0	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.3.1	The Scientific Python Development Environment / MIT
spyder-kernels	0.2.6	Jupyter kernels for the Spyder console / MIT
sqlalchemy	1.2.11	Database Abstraction Library. / MIT
sqlite	3.24.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.5.2	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.2	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 2-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.8	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.1	A Python web framework and asynchronous networking library, originall
tqdm	4.26.0	A Fast, Extensible Progress Meter / MPLv2.0, MIT
traceback2	1.4.0	Backports of the traceback module / PSF 2.0

Table 140 – continued from previo

Name	Version	Summary / License
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
twisted	18.7.0	event-driven networking engine / MIT
typing	3.6.6	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unittest2	1.1.0	The new features in unittest backported to Python 2.4+ / BSD
unixodbc	2.3.7	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.23	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.4.1	Interactive Widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.1.0	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib
zope	1.0	web application server / BSD
zope.interface	4.5.0	Interfaces for Python / ZPL 2.1

Anaconda 5.2.0 (May 30, 2018)

User-facing changes

- Windows installers disallow the characters `! % ^ =` in installation path to prevent later usability issues
- Improved Windows multi-user installations by providing more dynamic shortcut working directory behavior
- Default channels point to repo.anaconda.com instead of repo.anaconda.com

Backend improvements (non-visible changes)

- Security fixes for more than 20 packages based on a deep-dive of CVE vulnerabilities
- Windows installer uses a trimmed down value for `PATH` env var, to avoid DLL hell with existing software
- History file in the conda-meta directory is populated correctly to improve behavior of `--prune`
- Developer certificate for macOS pkg installers has been updated to Anaconda, Inc.

Major package updates

- anaconda-client 1.6.9 -> 1.6.14
- bokeh 0.12.13 -> 0.12.16
- dask 0.16.1 -> 0.17.5
- ipython 6.2.1 -> 6.4.0
- jupyter_client 5.2.2 -> 5.2.3
- jupyterlab 0.31.5 -> 0.32.1
- jupyterlab_launcher 0.10.2 -> 0.10.5
- matplotlib 2.1.2 -> 2.2.2
- mkl 2018.0.1 -> 2018.0.2
- numba 0.36.2 -> 0.38.0
- numpy 1.14.0 -> 1.14.3
- pandas 0.22.0 -> 0.23.0
- pillow 5.0.0 -> 5.1.0
- python 3.6.4 -> 3.6.5
- scipy 1.0.0 -> 1.1.0
- spyder 3.2.6 -> 3.2.8
- statsmodels 0.8.0 -> 0.9.0
- blas 1.0

Packages

Anaconda 5.2.0 for 64-bit Windows with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pyth
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LG
astropy	3.0.2	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writ
babel	2.5.3	Utilities to internationalize and localize Python applications /
backcall	0.1.0	Specifications for callback functions passed in to an API / BS
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause

Table 141 – continued from

Name	Version	Summary / License
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that ca
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Claus
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-C
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.4	pure Python COM package / MIT
conda	4.5.4	OS-agnostic, system-level binary package and environment m
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Claus
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python devel
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functiona
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain D
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / M
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good inten
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 an
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification /
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Inte

Table 141 – continued from

Name	Version	Summary / License
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / B
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-C
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.4.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / I
jedi	0.12.0	An autocompletion tool for Python that can be used for text ed
jinja2	2.10	An easy to use stand-alone template engine written in pure py
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free softv
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / M
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in on
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-c
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-claus
jupyterlab	0.32.1	An extensible environment for interactive and reproducible co
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Claus
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BS
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X
libiconv	1.15	Provides iconv for systems which don't have one (or that cann
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compiler
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-C
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD
lzo	2.10	LZO is a portable lossless data compression library written in
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.0	A Python module that implements the jinja2.Markup string / I
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common

Table 141 – continued from

Name	Version	Summary / License
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MI
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analy
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format
networkx	2.1	Python package for creating and manipulating complex netwo
nltk	3.3.0	Build Python programs to work with human language data / A
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. /
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BS
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-C
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MI
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and T
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clau
pandas	0.23.0	High-performance, easy-to-use data structures and data analys
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. /
patsy	0.5.0	Describing statistical models in Python using symbolic formu
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / M
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Py
psutil	5.4.5	A cross-platform process and system utilities module for Pyth
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facili
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT

Table 141 – continued from

Name	Version	Summary / License
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Comm
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Ano
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle la
pytest	3.5.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests /
pytest-astropy	0.3.0	Meta-package containing dependencies for testing Astropy / B
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.2.1	Pytest plugin for controlling remote data access / BSD
python	3.6.5	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.1	Python bindings for the winpty library / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin)
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packag
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickl
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Cla
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and S
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and bea
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL databas
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause

Table 141 – continued from

mkl	2018.0.2	Math library for Intel and compatible processors / proprietary
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD

Table 142 – continued from

Name	Version	Summary / License
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MI
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analy
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format
networkx	2.1	Python package for creating and manipulating complex netwo
nltk	3.3.0	Build Python programs to work with human language data / A
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. /
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BS
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-C
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MI
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and T
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clau
pandas	0.23.0	High-performance, easy-to-use data structures and data analys
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. /
patsy	0.5.0	Describing statistical models in Python using symbolic formu
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. /
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Py
psutil	5.4.5	A cross-platform process and system utilities module for Pyth
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facili
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause

Table 142 – continued from

Name	Version	Summary / License
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Comm
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Ano
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle la
pytest	3.5.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests /
pytest-astropy	0.3.0	Meta-package containing dependencies for testing Astropy / B
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.2.1	Pytest plugin for controlling remote data access / BSD
python	3.6.5	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.1	Python bindings for the winpty library / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin)
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packag
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickl
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Cla
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and S
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and bea
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL databas
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD

Table 142 – continued from

Name	Version	Summary / License
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working wi
tk	8.6.7	A dynamic programming language with GUI support. Bundle
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking librar
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode s
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, a
vc	14	A meta-package to track VC features. / Modified BSD License
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Cl
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on
win_unicode_console	0.5	A Python package to enable Unicode input and display when r
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' c
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (t
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clau
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression librar

Anaconda 5.2.0 for macOS on Intel 64-bit with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Claus
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.0.2	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD

Table 143 – continued from p

Name	Version	Summary / License
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that can be f
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilit
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.4	OS-agnostic, system-level binary package and environment manage
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Claus
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python developers
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python langua
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utili
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another /
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicta
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Licer
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.3.0	Coroutine-based network library / MIT

Table 143 – continued from p

Name	Version	Summary / License
glib	2.56.1	Provides core application building blocks for libraries and applicati
glob2	0.6	Version of the glob module that supports recursion via **, and can
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / L
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clau
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Li
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.4.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software li
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.32.1	An extensible environment for interactive and reproducible computi
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot con
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl

Table 143 – continued from p

Name	Version	Summary / License
lzo	2.10	LZO is a portable lossless data compression library written in ANS
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using Intel
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probal
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily h
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-poir
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSI
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSI
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / B
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau

singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause

Table 143 – continued from p

Name	Version	Summary / License
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl a
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking library, ori
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and mo
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.2.0 for 64-bit Linux on IBM Power CPUs with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Claus
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.23.0	Python ASN.1 library with a focus on performance and a pythonic A

Name	Version	Summary / License
astroid	1.6.2	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.0.2	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that can be f
bokeh	0.12.15	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devi
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilit
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.4	OS-agnostic, system-level binary package and environment manage
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.0.0	tool for validating conda recipes and conda packages / BSD 3-Claus
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python developers
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.1	The Cython compiler for writing C extensions for the Python langua
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utili
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicta
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Licer
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.6	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free

Table 144 – continued from p

Name	Version	Summary / License

gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / L
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clau
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Li
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.4.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.11.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software li
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.32.1	An extensible environment for interactive and reproducible computi
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran	3.0.0	Fortran libraries from the GNU Compiler Collection / GPL 3 (with
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libiconv	1.14	Provides iconv for systems which don't have one (or that cannot con
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window Sy
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT

Table 144 – continued from p

Name	Version	Summary / License
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily h
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-poin
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSI
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSI
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / B
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis too
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF ex
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / B
pcre	8.42	Regular expression pattern matching using the same syntax and sem
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.3.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python

Table 144 – continued from p

Name	Version	Summary / License
psutil	5.4.1	A cross-platform process and system utilities module for Python / B
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / M
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/Py
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large an
pytest	3.5.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.3.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.2.1	Pytest plugin for controlling remote data access / BSD
python	3.6.5	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause

gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LG
graphite2	1.3.11	A "smart font" system that handles the complexities of lesser-known

Table 145 – continued from p

Name	Version	Summary / License
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LG
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.7.6	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clau
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Li
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Inte
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.4.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software li
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. /
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.32.1	An extensible environment for interactive and reproducible computi
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window Sy
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl

Table 145 – continued from p

Name	Version	Summary / License
lzo	2.10	LZO is a portable lossless data compression library written in ANS
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using Intel
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probal
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily h
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-poir
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSI
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSI
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / B
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. / BSD 3
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.41.0	Text layout and rendering engine. / LGPL-2.1
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF ex
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pcre	8.42	Regular expression pattern matching using the same syntax and sem
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.5.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT

Table 145 – continued from p

Name	Version	Summary / License
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.5	A cross-platform process and system utilities module for Python / B
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / M
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/Py
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large an
pytest	3.5.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.3.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.2.1	Pytest plugin for controlling remote data access / BSD
python	3.6.5	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0

Table 145 – continued from p

Name	Version	Summary / License
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl a
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking library, ori
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and mo
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.2.0 for 32-bit Linux with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Claus
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	3.0.2	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD
backcall	0.1.0	Specifications for callback functions passed in to an API / BSD-3-C
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that can be f
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devi
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilit
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.4	OS-agnostic, system-level binary package and environment manage
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Claus
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python developers
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python langua
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utili
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another /
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause

Table 146 – continued from p

Name	Version	Summary / License
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicta
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Licer
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.6	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pcre	8.42	Regular expression pattern matching using the same syntax and sem
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.5.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python /
psutil	5.4.5	A cross-platform process and system utilities module for Python / B
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / M
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/Py
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large an
pytest	3.5.1	Simple and powerful testing with Python. / MIT
pytest-arraydiff	0.2	pytest plugin to help with comparing array output from tests / BSD
pytest-astropy	0.3.0	Meta-package containing dependencies for testing Astropy / BSD
pytest-doctestplus	0.1.3	Pytest plugin with advanced doctest features / BSD
pytest-openfiles	0.3.0	Pytest plugin for detecting inadvertent open file handles / BSD
pytest-remotedata	0.2.1	Pytest plugin for controlling remote data access / BSD
python	3.6.5	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause

Table 146 – continued from p

Name	Version	Summary / License
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL database eng
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl a
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking library, ori
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and mo
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD

Table 146 – continued from p

Name	Version	Summary / License
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.2.0 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pyth
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LG
astropy	2.0.6	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writ
babel	2.5.3	Utilities to internationalize and localize Python applications /
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3
backports.shutil_which	3.5.1	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module.
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that ca
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Claus
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-C
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.4	pure Python COM package / MIT
conda	4.5.4	OS-agnostic, system-level binary package and environment m

Table 147 – continued from

Name	Version	Summary / License
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Claus
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-
configparser	3.5.0	This library brings the updated configparser from Python 3.5 t
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python devel
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functiona
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain D
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / M
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good inten
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 a
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use o
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 /
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification /
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Inte
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / B
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-C
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.7.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments

Table 147 – continued from

Name	Version	Summary / License
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. /
jedi	0.12.0	An autocompletion tool for Python that can be used for text ed
jinja2	2.10	An easy to use stand-alone template engine written in pure py
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free softv
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / M
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in on
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-c
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-claus
jupyterlab	0.32.1	An extensible environment for interactive and reproducible co
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Claus
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BS
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X
libiconv	1.15	Provides iconv for systems which don't have one (or that cann
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compiler
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-C
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD
lzo	2.10	LZO is a portable lossless data compression library written in
m2w64-gcc-libgfortran	5.3.0

markupsafe	1.0	A Python module that implements the jinja2.Markup string /
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform usin
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / M
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analy
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format
networkx	2.1	Python package for creating and manipulating complex netwo
nltk	3.3.0	Build Python programs to work with human language data / A
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing

Table 147 – continued from

dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain D
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / M
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good inten
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 a
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use o
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 /
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.0	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification /
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Inte
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / B

Table 148 – continued from

Name	Version	Summary / License
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-C
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.7.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / I
jedi	0.12.0	An autocompletion tool for Python that can be used for text ed
jinja2	2.10	An easy to use stand-alone template engine written in pure py
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free softv
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / M
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in on
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-c
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-claus
jupyterlab	0.32.1	An extensible environment for interactive and reproducible co
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Claus
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BS
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X
libiconv	1.15	Provides iconv for systems which don't have one (or that cann
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compiler
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-C
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD
lzo	2.10	LZO is a portable lossless data compression library written in
m2w64-gcc-libgfortran	5.3.0	
m2w64-gcc-libs	5.3.0	
m2w64-gcc-libs-core	5.3.0	
m2w64-gmp	6.1.0	
m2w64-libwinpthread-git	5.0.0.4634.697f757	
markupsafe	1.0	A Python module that implements the jinja2.Markup string / I
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.14	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MI
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic

Table 148 – continued from

Name	Version	Summary / License
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
msys2-conda-epoch	20160418	
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analy
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format
networkx	2.1	Python package for creating and manipulating complex netwo
nltk	3.3.0	Build Python programs to work with human language data / A
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. /
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BS
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-C
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MI
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and T
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clau
pandas	0.23.0	High-performance, easy-to-use data structures and data analys
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. /
patsy	0.5.0	Describing statistical models in Python using symbolic formu
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / M
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Py
psutil	5.4.5	A cross-platform process and system utilities module for Pyth
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facili
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache
pyparsing	2.2.0	Create and execute simple grammars / MIT

Table 148 – continued from

Name	Version	Summary / License
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Comm
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Ano
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle la
pytest	3.5.1	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	223	Python extensions for Windows / PSF
pywinpty	0.5.1	Python bindings for the winpty library / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library… / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.7	scandir, a better directory iterator and faster os.walk() / BSD 3
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin)
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packag
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickl
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Cla
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and S
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and bea
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL databas
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD
subprocess32	3.5.0	A backport of the subprocess module from Python 3.2/3.3 for
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working wi
tk	8.6.7	A dynamic programming language with GUI support. Bundle
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking librar

flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 a
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2

Table 149 – continued from p

Name	Version	Summary / License
gevent	1.3.0	Coroutine-based network library / MIT
glib	2.56.1	Provides core application building blocks for libraries and applicati
glob2	0.6	Version of the glob module that supports recursion via **, and can
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / L
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clau
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Li
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.7.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software li
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go.
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.32.1	An extensible environment for interactive and reproducible computi
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot con
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT

Table 149 – continued from p

Name	Version	Summary / License
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily h
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-poin
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSI
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSI
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / B
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. / BSD 3
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis too
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pcre	8.42	Regular expression pattern matching using the same syntax and sem
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.5.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT

Table 149 – continued from p

Name	Version	Summary / License
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python /
psutil	5.4.5	A cross-platform process and system utilities module for Python / B
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / M
pyaudio	0.2.7	Bindings for PortAudio v19, the cross-platform audio stream library
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/Py
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large an
pytest	3.5.1	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.7	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause

Table 149 – continued from p

Name	Version	Summary / License
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.0	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking library, ori
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and mo
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.8	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.2.0 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Claus
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.23.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	1.6.2	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.6	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at Ac
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that can be f
bokeh	0.12.15	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devi
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilit
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.4	OS-agnostic, system-level binary package and environment manage
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.0.0	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Pyt
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python developers
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.1	The Cython compiler for writing C extensions for the Python langua
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utili
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicta

Table 150 – continued from p

Name	Version	Summary / License
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Licer
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.6	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 a
functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at Ac
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis too
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT

Table 150 – continued from p

Name	Version	Summary / License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF ex
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / B
pcre	8.42	Regular expression pattern matching using the same syntax and sem
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.3.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python
psutil	5.4.1	A cross-platform process and system utilities module for Python / B
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / M
pycairo	1.13.3	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/Py
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large an
pytest	3.5.1	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packages / M

Table 150 – continued from p

Name	Version	Summary / License
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.0	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking library, ori
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and mo
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.3	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.2.0 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Claus
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.6	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at Ac
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that can be f
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devi
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilit
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.4	OS-agnostic, system-level binary package and environment manage
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Pyt
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python developers
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python langua
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utili
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause

Table 151 – continued from p

Name	Version	Summary / License
dbus	1.13.2	Simple message bus system for applications to talk to one another /
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicta
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Licer
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.6	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.0	Coroutine-based network library / MIT
glib	2.56.1	Provides core application building blocks for libraries and applicatio
glob2	0.6	Version of the glob module that supports recursion via **, and can c
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LG
graphite2	1.3.11	A “smart font” system that handles the complexities of lesser-known
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LG
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.7.6	An OpenType text shaping engine. / MIT
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clau
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Li
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.7.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software li

Name	Version	Summary / License
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. /
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.32.1	An extensible environment for interactive and reproducible computi
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window Sy
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using Intel
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probal
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily h
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-poir
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSI
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSI
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / B
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau

sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.8	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.7	Database Abstraction Library. / MIT
sqlite	3.23.1	Implements a self-contained, zero-configuration, SQL database eng
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.9.0	Statistical computations and models for use with SciPy / BSD 3-Cla
subprocess32	3.5.0	A backport of the subprocess module from Python 3.2/3.3 for use o
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with file
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl a
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	5.0.2	A Python web framework and asynchronous networking library, ori
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.4	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings
unixodbc	2.3.6	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and mo
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes

Table 151 – continued from p

Name	Version	Summary / License
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.31.1	A built-package format for Python. / MIT
widgetsnbextension	3.2.1	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Cl
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spr
xlsxwriter	1.0.4	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.4	Data compression software with high compression ratio / LGPL-2.1
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.5	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.2.0 for 32-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyt
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Claus
anaconda-client	1.6.14	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.8.7	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science proje
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic A
astroid	1.6.3	A abstract syntax tree for Python with inference support. / LGPL 2.
astropy	2.0.6	Community-developed Python Library for Astronomy / BSD
attrs	18.1.0	attrs is the Python package that will bring back the joy of writing cl
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports.functools_lru_cache	1.5	Backport of functools.lru_cache from Python 3.3 as published at Ac
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shu
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blas	1.0	
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.3	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
blosc	1.14.3	A blocking, shuffling and loss-less compression library that can be f
bokeh	0.12.16	Statistical and novel interactive HTML plots for Python / BSD 3-Cl
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2018.03.07	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devi
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.4.16	Python package for providing Mozilla's CA Bundle. / ISC

Table 152 – continued from p

Name	Version	Summary / License
cffi	1.11.5	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilit
cloudpickle	0.5.3	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.5.4	OS-agnostic, system-level binary package and environment manage
conda-build	3.10.5	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Claus
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Pyt
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.2.2	Provides cryptographic recipes and primitives to Python developers
curl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.28.2	The Cython compiler for writing C extensions for the Python langua
cytoolz	0.9.0.1	Cython implementation of Toolz. High performance functional utili
dask	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.17.5	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.13.2	Simple message bus system for applications to talk to one another /
decorator	4.3.0	Better living through Python with decorators. / BSD 3-Clause
distributed	1.21.8	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedicta
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT Licer
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 /
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	3.0.4	A platform independent file lock. / Public Domain
flask	1.0.2	A microframework based on Werkzeug, Jinja2 and good intentions.
flask-cors	3.0.4	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.6	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and Free
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 a
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.3.0	Coroutine-based network library / MIT
glib	2.56.1	Provides core application building blocks for libraries and applicatio
glob2	0.6	Version of the glob module that supports recursion via **, and can c
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LG
graphite2	1.3.11	A “smart font” system that handles the complexities of lesser-known
greenlet	0.4.13	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.14.0	GStreamer Base Plug-ins / GPL2
gstreamer	1.14.0	Library for constructing graphs of media-handling components / LG
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.7.6	An OpenType text shaping engine. / MIT

Table 152 – continued from p

Name	Version	Summary / License
hdf5	1.10.2	HDF5 is a data model, library, and file format for storing and manag
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clau
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Li
imageio	2.3.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	1.0.0	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Inte
ipaddress	1.0.22	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.2	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.7.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.2.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.3.4	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BS
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.4	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2
jedi	0.12.0	An autocompletion tool for Python that can be used for text editors.
jinja2	2.10	An easy to use stand-alone template engine written in pure python.
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software li
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. /
jupyter_client	5.2.3	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.32.1	An extensible environment for interactive and reproducible computi
jupyterlab_launcher	0.10.5	A Launcher for JupyterLab based applications. / BSD 3-Clause
kiwisolver	1.0.1	A fast implementation of the Cassowary constraint solver / BSD 3-C
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.60.0	tool and library for transferring data with URL syntax / MIT/X deri
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.16	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.13	This is the C-language Binding (XCB) package to the X Window Sy
libxml2	2.9.8	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.23.1	A lightweight LLVM python binding for writing JIT compilers / Ne
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.2.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Cl
lzo	2.10	LZO is a portable lossless data compression library written in ANS
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3
matplotlib	2.2.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT

Table 152 – continued from p

Name	Version	Summary / License
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.2	Math library for Intel and compatible processors / proprietary - Inte
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mkl_fft	1.0.1	NumPy-based implementation of Fast Fourier Transform using Intel
mkl_random	1.0.1	Intel (R) MKL-powered package for sampling from common probal
more-itertools	4.1.0	More routines for operating on iterables, beyond itertools / MIT
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily h
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-poin
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSI
msgpack-python	0.5.6	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.5.0	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.2.1	Anaconda Navigator Updater / proprietary - Continuum Analytics, I
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSI
ncurses	6.1	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / B
nltk	3.3.0	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.5.0	A web-based notebook environment for interactive computing / BSI
numba	0.38.0	NumPy aware dynamic Python compiler using LLVM / BSD 2-clau
numexpr	2.6.5	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.3	Array processing for numbers, strings, records, and objects. / BSD 3
numpy-base	1.14.3	
numpydoc	0.8.0	Sphinx extension to support docstrings in Numpy format / BSD 3-C
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.5.3	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2o	OpenSSL is an open-source implementation of the SSL and TLS pr
packaging	17.1	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.23.0	High-performance, easy-to-use data structures and data analysis too
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.41.0	Text layout and rendering engine. / LGPL-2.1
parso	0.2.0	A Python Parser / MIT
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF ex
path.py	11.0.1	A module wrapper for os.path / MIT
pathlib2	2.3.2	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / B
pcre	8.42	Regular expression pattern matching using the same syntax and sem
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.5.0	Pexpect makes Python a better tool for controlling other application
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.1.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PI
pip	10.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.2	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.11	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python /

Table 152 – continued from p

Name	Version	Summary / License
psutil	5.4.5	A cross-platform process and system utilities module for Python / B
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.3	library with cross-python path, ini-parsing, io, code, log facilities / M
pycairo	1.15.4	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.
pycodestyle	2.4.0	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.4	python code static checker / GPL
pyodbc	4.0.23	DB API Module for ODBC / MIT
pyopenssl	18.0.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.9.2	Python binding of the cross-platform GUI toolkit Qt. / Commercial
pysocks	1.6.8	A Python SOCKS client module. See https://github.com/Anorov/Py
pytables	3.4.3	Brings together Python, HDF5 and NumPy to easily handle large an
pytest	3.5.1	Simple and powerful testing with Python. / MIT
python	2.7.15	General purpose programming language / PSF
python-dateutil	2.7.3	Extensions to the standard Python datetime module. / BSD 3 Clause
pytz	2018.4	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	17.0.0	Python bindings for zeromq / BSD 3-clause
qt	5.9.5	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.4.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.7	scandir, a better directory iterator and faster os.walk() / BSD 3-Clau
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BS
scipy	1.1.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.5.0	Python library to natively send files to Trash (or Recycle bin) on all
setuptools	39.1.0	Download, build, install, upgrade, and uninstall Python packages / M
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dum
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.19.8	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snappy	1.1.7	A fast compressor/decompressor / BSD 3-clause
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.6.1	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.10	Python Sorted Container Types: SortedList, SortedDict, and Sorted
sphinx	1.7.4	Sphinx is a tool that makes it easy to create intelligent and beautiful
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD

zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zli

Anaconda 5.1.0 (Feb 15, 2018)

User-facing changes

- Microsoft Visual Studio Code added as an install option
- Anaconda Navigator has install and launch options for VS Code
- The installer support link has been replaced with the *Getting Started* page
- JupyterLab updated to 0.31.5 on most platforms (Updated to 0.31.4 on Windows)

Backend improvements (non-visible changes)

- Power packages are built with same recipes as rest of distribution
- Fixed some incomplete Windows installations due to interactions with antivirus software
- Fixed spaces in paths problems on Windows
- Anaconda Navigator was removed from the anaconda metapackage (but not the Anaconda installer)
- Installers present warnings when executed on the wrong platform

Major package updates

- anaconda-client 1.6.5 -> 1.6.9
- anaconda-project 0.8.0 -> 0.8.2
- anaconda-navigator 1.6.9 -> 1.7.0
- bokeh 0.12.10 -> 0.12.13
- conda 4.3.27 -> 4.4.10
- conda-build 3.0.27 -> 3.4.1
- dask 0.15.3 -> 0.16.1
- ipython 6.1.0 -> 6.2.1
- jupyter_client 5.1.0 -> 5.2.2
- jupyter_core 4.3.0 -> 4.4.0
- jupyterlab_launcher 0.4.0 -> 0.10.2
- matplotlib 2.1.0 -> 2.1.2
- mkl 2018.0.0 -> 2018.0.1
- numba 0.35.0 -> 0.36.2
- numpy 1.13.3 -> 1.14.0
- pandas 0.20.3 -> 0.22.0
- pillow 4.2.1 -> 5.0.0
- python 3.6.3 -> 3.6.4
- scikit-image 0.13.0 -> 0.13.1
- scipy 0.19.1 -> 1.0.0
- seaborn 0.8.0 -> 0.8.1
- spyder 3.2.4 -> 3.2.6

Packages

Anaconda 5.1.0 for 64-bit Windows with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BSI
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.4	pure Python COM package / MIT
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. / B
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distlib	0.2.5	Distribution utilities / Python Software Foundation License

Table 153 – continued from previou

Name	Version	Summary / License
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can capture p
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.2.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-Cla
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Clau
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.4	A pre-alpha version of a computational environment for Jupyter. / BSD 3-C
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fro
libpng	1.6.34	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause

Table 153 – continued from previou

Name	Version	Summary / License
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GP
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clause
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.11	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause

Table 153 – continued from previou

Name	Version	Summary / License
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	222	Python extensions for Windows / PSF
pywinpty	0.5	Python bindings for the winpty library / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platforn
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause

Table 153 – continued from previou

Name	Version	Summary / License
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
vc	14	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (wi
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pytho
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (cty
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for communicatin
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.5	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 32-bit Windows with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BS
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause

Table 154 – continued from previou

Name	Version	Summary / License
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC

networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau

Table 154 – continued from previou

Name	Version	Summary / License
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	222	Python extensions for Windows / PSF
pywinpty	0.5	Python bindings for the winpty library / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT

Table 154 – continued from previou

Name	Version	Summary / License
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platform
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
vc	14	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (wi
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pytho
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (cty
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for communicatin

Table 154 – continued from previou

Name	Version	Summary / License
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.5	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for macOS on Intel 64-bit with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BS
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause

Table 155 – continued from previou

Name	Version	Summary / License
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. / B
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.12.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications writt
glob2	0.6	Version of the glob module that supports recursion via **, and can capture p
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.2.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-Cla
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Clau
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license

Table 155 – continued from previou

Name	Version	Summary / License
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3-C
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC Ru
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fro
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GI
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clause
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause

Table 155 – continued from previou

Name	Version	Summary / License
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols /

traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.5	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause

Table 155 – continued from previou

Name	Version	Summary / License
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 64-bit Linux on IBM Power CPUs with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.6	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.23.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.4.9	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.16.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause

Table 156 – continued from previous page

Name	Version	Summary / License
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.2.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.11.0	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran	3.0.0	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL

Table 156 – continued from previous page

Name	Version	Summary / License
libiconv	1.14	Provides iconv for systems which don't have one (or that cannot convert f
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.1	The fastest markdown parser in pure Python. / BSD 3-Clause
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high p
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-C
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-cl
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openblas	0.2.20	An Optimized BLAS library / BSD
openblas-devel	0.2.20	
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protoco
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	2.0.0.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executal
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2
pcre	8.41	Regular expression pattern matching using the same syntax and semantic
pep8	1.7.0	Python style guide checker / MIT

Table 156 – continued from previous page

Name	Version	Summary / License
pexpect	4.3.0	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.1	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	3.2.5	Simple and powerful testing with Python. / MIT
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.1	Database Abstraction Library. / MIT

Table 156 – continued from previous page

Name	Version	Summary / License
sqlite	3.21.0	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originall
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3-C
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
libedit	3.1	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System pr
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GI
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clause

Table 157 – continued from previou

Name	Version	Summary / License
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.41.0	Text layout and rendering engine. / LGPL-2.1
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executable
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pcre	8.41	Regular expression pattern matching using the same syntax and semantics a
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.3.1	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC

Table 157 – continued from previou

Name	Version	Summary / License
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platform
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause

Table 157 – continued from previou

Name	Version	Summary / License
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 32-bit Linux with Python 3.6

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BSI
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause

Table 158 – continued from previou

Name	Version	Summary / License
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. / LG
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. / B
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.12.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications writt
glob2	0.6	Version of the glob module that supports recursion via **, and can capture p
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A "smart font" system that handles the complexities of lesser-known langua
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.12.4	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.4	Library for constructing graphs of media-handling components / LGPL 2

Table 158 – continued from previou

Name	Version	Summary / License
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.7.4	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.2.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-Cla
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Clau
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-

pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	3.6.4	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platform
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause

Table 158 – continued from previou

tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter exte
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes b
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports.shutil_which	3.5.1	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause

Table 159 – continued from previo

Name	Version	Summary / License
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.4	pure Python COM package / MIT
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. /
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distlib	0.2.5	Distribution utilities / Python Software Foundation License
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can capture
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT

Table 159 – continued from previo

Name	Version	Summary / License
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.19	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.4	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (h
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.34	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSI
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.11	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0

Table 159 – continued from previo

Name	Version	Summary / License
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts

backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports.shutil_which	3.5.1	Backport of shutil.which from Python 3.3 / PSF2 & MIT
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT

Table 160 – continued from previo

Name	Version	Summary / License
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.4	pure Python COM package / MIT
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. /
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distlib	0.2.5	Distribution utilities / Python Software Foundation License
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.6	Version of the glob module that supports recursion via **, and can capture
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause

Table 160 – continued from previo

Name	Version	Summary / License
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.19	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (h
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.34	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSI
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.11	cross platform menu item installation / BSD
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl

Table 160 – continued from previo

Name	Version	Summary / License
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.1	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT

Table 160 – continued from previo

Name	Version	Summary / License
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	222	Python extensions for Windows / PSF
pywinpty	0.5	Python bindings for the winpty library / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	9	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI

Table 160 – continued from previo

Name	Version	Summary / License
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
winpty	0.4.3	Winpty provides an interface similar to a Unix pty-master for communicat
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.5	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BS
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveStat
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC

jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3-C
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC Ru
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fro
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GI
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clause
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec

Table 161 – continued from previou

Name	Version	Summary / License
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pcre	8.41	Regular expression pattern matching using the same syntax and semantics a
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.3.1	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyaudio	0.2.7	Bindings for PortAudio v19, the cross-platform audio stream library / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause

Table 161 – continued from previou

Name	Version	Summary / License
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSD
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platform
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x. /
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co

Table 161 – continued from previou

Name	Version	Summary / License
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.5	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter ext
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.6	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / B
asn1crypto	0.23.0	Python ASN.1 library with a focus on performance and a pythonic API /
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause

Table 162 – continued from previous page

Name	Version	Summary / License
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.2	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.4.9	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	3.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.16.0	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.0	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSI
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and P
functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveS
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications w
glob2	0.6	Version of the glob module that supports recursion via **, and can captur
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause

Table 162 – continued from previous page

Name	Version	Summary / License
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing d
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.11.0	An autocompletion tool for Python that can be used for text editors. / MI
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1.20170329	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran	3.0.0	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libiconv	1.14	Provides iconv for systems which don't have one (or that cannot convert f
libopenblas	0.2.20	An Optimized BLAS library / BSD
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clau
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.1	The fastest markdown parser in pure Python. / BSD 3-Clause

pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT

Table 162 – continued from previous page

Name	Version	Summary / License
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySock
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amount
pytest	3.2.5	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platfo
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), e
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.21.0	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and T
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originall
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BS
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1

Table 162 – continued from previous page

Name	Version	Summary / License
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. /
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / M
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BS
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveStat
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. / LG
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC

Table 163 – continued from previou

Name	Version	Summary / License
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.6-
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. / B
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.12.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD 3-
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / Ap
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and PyP
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications writ
glob2	0.6	Version of the glob module that supports recursion via **, and can capture p
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A “smart font” system that handles the complexities of lesser-known langua
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.12.4	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.4	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.7.4	An OpenType text shaping engine. / MIT

Table 163 – continued from previou

Name	Version	Summary / License
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.19	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-Cla
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Clau
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3-
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3-C
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
libedit	3.1	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System pr
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GI
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clause
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause

Table 163 – continued from previou

Name	Version	Summary / License
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.41.0	Text layout and rendering engine. / LGPL-2.1
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executable
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pcre	8.41	Regular expression pattern matching using the same syntax and semantics a
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.3.1	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.15.4	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT

Table 163 – continued from previou

Name	Version	Summary / License
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platform
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause

zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.1.0 for 32-bit Linux with Python 2.7

Name	Version	Summary / License
_ipyw_jlab_nb_ext_conf	0.1.0	A configuration metapackage for enabling Anaconda-bundled jupyter extens
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.9	Anaconda Cloud command line client library / BSD 3-Clause
anaconda-navigator	1.7.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.2	Tool for encapsulating, running, and reproducing data science projects / BSI
asn1crypto	0.24.0	Python ASN.1 library with a focus on performance and a pythonic API / MI
astroid	1.6.1	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.3	Community-developed Python Library for Astronomy / BSD
attrs	17.4.0	attrs is the Python package that will bring back the joy of writing classes by
babel	2.5.3	Utilities to internationalize and localize Python applications / BSD 3-clause
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveStat
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / MI
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT

Table 164 – continued from previou

Name	Version	Summary / License
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.1.2	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.13	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.12	Cairo is a 2D graphics library with support for multiple output devices. / LG
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2018.1.18	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.11.4	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / BS
cloudpickle	0.5.2	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.4.10	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	3.4.1	tools for building conda packages / BSD 3-Clause
conda-env	2.6.0	Tools for interacting with conda environments. / BSD 3-Clause
conda-verify	2.0.0	tool for validating conda recipes and conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.6-
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.1.4	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.27.3	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.9.0	Cython implementation of Toolz. High performance functional utilities. / B
dask	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.16.1	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.12.2	Simple message bus system for applications to talk to one another / GPL2
decorator	4.2.1	Better living through Python with decorators. / BSD 3-Clause
distributed	1.20.2	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation and
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD 3-
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.5	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.13	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD 3
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / Ap
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and PyP
futures	3.2.0	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

Table 164 – continued from previou

Name	Version	Summary / License
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications writ
glob2	0.6	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A "smart font" system that handles the complexities of lesser-known langua
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.12.4	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.4	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.7.1	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.7.4	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing data
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	1.0.1	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.19	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.8.0	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.1.1	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-Cla
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clause
jedi	0.11.1	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.10	An easy to use stand-alone template engine written in pure python. / 3-Clau
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD 3
jupyter_client	5.2.2	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.4.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.31.5	A pre-alpha version of a computational environment for Jupyter. / BSD 3-C
jupyterlab_launcher	0.10.2	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcurl	7.58.0	tool and library for transferring data with URL syntax / MIT/X derivate (htt
libedit	3.1	Editline Library (libedit) / NetBSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.34	PNG reference library. / zlib/libpng
libsodium	1.0.15	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	The GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.9	Support for the Tag Image File Format (TIFF). / HPND

Table 164 – continued from previou

Name	Version	Summary / License
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System pr
libxml2	2.9.7	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.32	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.21.0	A lightweight LLVM python binding for writing JIT compilers / New BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.1	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause, GI
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. / GP
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Clause
matplotlib	2.1.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.8.3	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high prec
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point compu
mpmath	1.0.0	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Clau
msgpack-python	0.5.1	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-clau
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.1	Python package for creating and manipulating complex networks / BSD 3-C
nltk	3.2.5	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.4.0	A web-based notebook environment for interactive computing / BSD 3-clau
numba	0.36.2	a just-in-time Python function compiler based on LLVM / BSD
numexpr	2.6.4	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.14.0	Array processing for numbers, strings, records, and objects. / BSD 3-Clause
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.45.1	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.10	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2n	OpenSSL is an open-source implementation of the SSL and TLS protocols
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.22.0	High-performance, easy-to-use data structures and data analysis tools. / BSI
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.41.0	Text layout and rendering engine. / LGPL-2.1
parso	0.1.1	A Python Parser / MIT License
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executable
path.py	10.5	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.5.0	Describing statistical models in Python using symbolic formulas / BSD-2-C
pcre	8.41	Regular expression pattern matching using the same syntax and semantics a
pep8	1.7.1	Python style guide checker / MIT
pexpect	4.3.1	Pexpect makes Python a better tool for controlling other applications. / ISC
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT

Table 164 – continued from previou

Name	Version	Summary / License
pillow	5.0.0	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
pluggy	0.6.0	Plugin registration and hook calling for Python / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD 3-
psutil	5.4.3	A cross-platform process and system utilities module for Python / BSD 3-C
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.5.2	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.15.4	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.3	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0.1	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.8.2	python code static checker / GPL
pyodbc	4.0.22	DB API Module for ODBC / MIT
pyopenssl	17.5.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-2
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks f
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts o
pytest	3.3.2	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.3	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.3	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.7	A python refactoring library... / GPL 2.0
ruamel_yaml	0.15.35	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.1	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-Cla
scipy	1.0.0	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.1	Statistical data visualization / BSD 3-Clause
send2trash	1.4.2	Python library to natively send files to Trash (or Recycle bin) on all platforn
setuptools	38.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), etc.
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0

Table 164 – continued from previou

Name	Version	Summary / License
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.9	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / Ap
sphinx	1.6.6	Sphinx is a tool that makes it easy to create intelligent and beautiful docume
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.6	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.2.1	Database Abstraction Library. / MIT
sqlite	3.22.0	Implements a self-contained, zero-configuration, SQL database engine. / Pu
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x. /
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.8.1	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and co
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk.
toolz	0.9.0	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.3	A Python web framework and asynchronous networking library, originally d
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / MI
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MIT
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.14.1	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.30.0	A built-package format for Python. / MIT
widgetsnbextension	3.1.0	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadshee
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and GP
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 (Oct 25, 2017)

- R has been updated to version 3.4.2. All R packages (including RStudio) have been rebuilt to be compatible with the new Anaconda 5.0 compilers.
- Updated many packages, including Python, Numpy, Spyder, Navigator, and Bokeh.
- The MKL library load path has been modified to address issue for Julia users.
- Fixed an OpenSSL issue with WSL on Windows.
- Fixed Anaconda Installer Configuration (AIC) feature for Unix installers.
- Re-enabled spaces in installation paths on Windows (temporarily disabled in 5.0.0).

Major package updates

- anaconda-navigator 1.6.8 -> 1.6.9
- bokeh 0.12.7 -> 0.12.10
- conda 4.3.27 -> 4.3.30
- conda-build 3.0.22 -> 3.0.27
- dask 0.15.2 -> 0.15.3
- matplotlib 2.0.2 -> 2.1.0
- numpy 1.13.1 -> 1.13.3
- python 2.7.13 -> 2.7.14
- python 3.6.2 -> 3.6.3
- scikit-learn 0.19.0 -> 0.19.1
- spyder 3.2.3 -> 3.2.4

Packages

Anaconda 5.0.1 for 64-bit Windows with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause

Table 165 – continued from previous page

Name	Version	Summary / License
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cachecontrol	0.12.3	httplib2 caching algorithms for use with requests / Apache Software Licen
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.2	pure Python COM package / MIT
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distlib	0.2.5	Distribution utilities / Python Software Foundation License
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like

Table 165 – continued from previous page

Name	Version	Summary / License
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lockfile	0.12.2	Platform-independent file locking module / MIT
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.10	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD

Table 165 – continued from previous page

Name	Version	Summary / License
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.0	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.3	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause

Table 165 – continued from previous page

Name	Version	Summary / License
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docur
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	14	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause

Table 165 – continued from previous page

Name	Version	Summary / License
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 for 32-bit Windows with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cachecontrol	0.12.3	httplib2 caching algorithms for use with requests / Apache Software Licen
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.2	pure Python COM package / MIT
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause

Table 166 – continued from previous page

Name	Version	Summary / License
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distlib	0.2.5	Distribution utilities / Python Software Foundation License
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT

rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause

Table 166 – continued from previous page

Name	Version	Summary / License
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	14	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 for macOS on Intel 64-bit with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT

Table 167 – continued from previous page

Name	Version	Summary / License
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT

Table 167 – continued from previous page

Name	Version	Summary / License
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0

Table 167 – continued from previous page

Name	Version	Summary / License
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks

Table 167 – continued from previous page

Name	Version	Summary / License
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.3	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSD
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0

gevent	1.2.2	Coroutine-based Python network library / MIT
glob2	0.5	Enhanced glob that can capture patterns and supports recursive wildcards / BSD Lice
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	0.9999999	HTML parser based on the WHATWG HTML specification / MIT
idna	2.6	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.6.1	Provides a rich toolkit to help you make the most of using Python interactively / BSD
ipython	6.1.0	Productive Interactive Computing / BSD
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD
ipywidgets	6.0.0	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.15	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.10.2	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg files / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	web-based notebook environment for interactive computing. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.2.0	Jupyter terminal console / BSD
jupyter_core	4.3.0	core Jupyter functionality / BSD
lazy-object-proxy	1.3.1	Fast and thorough lazy object proxy / BSD
libffi	3.2.1	portable foreign-function interface library / MIT
libgfortran	3.0.0	the GNU Fortran compiler, part of GCC / GPL3
libiconv	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.30	official PNG reference library / libpng license
libsodium	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT

continu

Table 168 – continued from previous page

Name	Version	Summary / License
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.3	XML and HTML with Python / BSD
markupsafe	1.0	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.2	Python 2D plotting library / PSF-based
mistune	0.7.4	The fastest markdown parser in pure Python with renderer feature / BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
msgpack-python	0.4.8	An efficient binary serialization format / Apache
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
nbconvert	5.2.1	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.4.0	reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.4	Build Python programs to work with human language data / Apache Software Licens
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	5.0.0	web-based notebook environment for interactive computing / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects / BSD
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.1	Shapeshifting for your data / BSD
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License
openblas	0.2.19	An Optimized BLAS library / BSD
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apache-
packaging	16.8	core utilities for Python packages / BSD or Apache 2.0
pandas	0.20.3	Powerful Python data analysis toolkit / BSD
pandocfilters	1.4.2	utilities for writing pandoc filters in python / BSD License
partd	0.3.8	Appendable key-value byte store / BSD
patchelf	0.9	Modify the dynamic linker and RPATH of ELF executables / GPL3
path.py	10.3.1	An object representing a path to a file or directory / MIT
pathlib2	2.3.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre	8.39	A set of functions that implement regular expression pattern matching / 3-clause BSD
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.2.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation / MIT
pkginfo	1.4.1	query metadatdata from sdists or bdists installed packages / PSF
ply	3.10	implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.15	library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	cross-platform process and system utilities module for Python / BSD
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT License
pycosat	0.6.2	Python bindings to the picosat SAT solver / MIT
pycparser	2.18	C parser in Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	passive checker of Python programs / MIT

continu

Table 168 – continued from previous page

Name	Version	Summary / License
pygments	2.2.0	Generic syntax highlighting package / BSD
pylint	1.7.2	Python code static checker / GPL
pyodbc	4.0.16	DB API Module for ODBC / MIT
pyopenssl	17.0.0	Python wrapper module around the OpenSSL library / Apache Software License
pyparsing	2.2.0	Create and execute simple grammars / MIT
pytables	3.4.2	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.2.1	Simple and powerful testing with Python / MIT
python	3.6.2	General purpose programming language / PSF
python-dateutil	2.6.1	extensions to the standard Python datetime module / Simplified BSD
pytz	2017.2	World timezone definitions, modern and historical / MIT
pywavelets	0.5.2	wavelet transform module / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
requests	2.14.2	Python HTTP for Humans / Apache Software License
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scikit-image	0.13.0	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.19.0	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.19.1	Scientific Library for Python / BSD
seaborn	0.8	Statistical data visualization / BSD
setuptools	36.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sortedcollections	0.5.3	Python Sorted Collections / Apache Software License
sortedcontainers	1.5.7	sorted Container Types: SortedList, SortedDict, and SortedSet / Apache 2.0
sphinx	1.6.3	Documentation generator / BSD
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.1.13	Python SQL toolkit and Object Relational Mapper / MIT
sqlite	3.13.0	SQL database engine / Public-Domain
statsmodels	0.8.0	Statistical computations and models / 3-clause BSD
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library / BSD
terminado	0.6	Terminals served to term.js using Tornado websockets / BSD
testpath	0.3.1	collection of utilities for Python code working with files and commands / MIT
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.2	List processing tools and functional utilities / BSD
tornado	4.5.2	Tornado Web Server / Apache 2.0
traitlets	4.3.2	Configuration system for Python applications / Modified BSD
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC (Open Database Connectivity) implementation for Unix / LGPLv2
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.12.2	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.1.0	extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD
xlwt	1.3.0	writing data and formatting information to Excel files / BSD

continu

Table 168 – continued from previous page

xz	5.2.3	Data compression software with high compression ratio / Public-Domain, GPL
yaml	0.1.6	YAML Ain't Markup Language / MIT
zeromq	4.1.5	Distributed messaging / LGPL
zict	0.1.2	Composable Mutable Mapping tools / BSD
zlib	1.2.11	Unobtrusive compression library / zlib

Anaconda 5.0.1 for 64-bit Linux with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. / I
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / I
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause

Table 169 – continued from previous page

Name	Version	Summary / License
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A “smart font” system that handles the complexities of lesser-known langu
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.12.2	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.2	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.5.0	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause

Table 169 – continued from previous page

Name	Version	Summary / License
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B

Table 169 – continued from previous page

Name	Version	Summary / License
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.40.11	Text layout and rendering engine. / LGPL-2.1
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.3	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT

sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 for 32-bit Linux with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. / I
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / I
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD

Table 170 – continued from previous page

Name	Version	Summary / License
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A “smart font” system that handles the complexities of lesser-known langu
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.12.2	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.2	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.5.0	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception

Table 170 – continued from previous page

Name	Version	Summary / License
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.40.11	Text layout and rendering engine. / LGPL-2.1
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT

Table 170 – continued from previous page

Name	Version	Summary / License
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.3	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A

Table 170 – continued from previous page

Name	Version	Summary / License
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause

greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lockfile	0.12.2	Platform-independent file locking module / MIT
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.10	cross platform menu item installation / BSD

Table 171 – continued from previous page

Name	Version	Summary / License
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.0	Python style guide checker / MIT
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
progress	1.3	Easy progress reporting for Python / ISC
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT

Table 171 – continued from previous page

Name	Version	Summary / License
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M

Table 171 – continued from previous page

Name	Version	Summary / License
vc	9	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cachecontrol	0.12.3	httplib2 caching algorithms for use with requests / Apache Software Licen

Table 172 – continued from previous page

Name	Version	Summary / License
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.2	pure Python COM package / MIT
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distlib	0.2.5	Distribution utilities / Python Software Foundation License
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.1.1	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.5	Version of the glob module that supports recursion via **, and can captur
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause

Table 172 – continued from previous page

Name	Version	Summary / License
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lockfile	0.12.2	Platform-independent file locking module / MIT
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.10	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD

pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause

Table 172 – continued from previous page

Name	Version	Summary / License
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docur
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. / I
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	9	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause

Table 172 – continued from previous page

Name	Version	Summary / License
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / I
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa

Table 173 – continued from previous page

Name	Version	Summary / License
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.1.1	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause

Table 173 – continued from previous page

Name	Version	Summary / License
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1

Table 173 – continued from previous page

Name	Version	Summary / License
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyaudio	0.2.7	Bindings for PortAudio v19, the cross-platform audio stream library / MI
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
python.app	2	Proxy on OS X letting Python libraries hook into the gui event loop / BSD
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT

Table 173 – continued from previous page

Name	Version	Summary / License
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause

anaconda-project	0.6.0	reproducible, executable project directories / BSD 3-clause
asn1crypto	0.22.0	ASN.1 parser and serializer / MIT
astroid	1.5.3	abstract syntax tree for Python with inference support / LGPL version 2.1
astropy	2.0.1	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports_abc	0.5	backport of recent additions to the 'collections.abc' module / PSF
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
bkcharts	0.2	optional High Level charts API built on top of Bokeh / New BSD
bleach	1.5.0	easy whitelist-based HTML-sanitizing tool / Apache License Version 2.0
bokeh	0.12.7	Python interactive visualization library for modern web browsers / BSD
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / Simplified BSD
cairo	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL 1.1
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD
certifi	2016.2.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	C Foreign Function Interface for Python / MIT
chardet	3.0.4	Universal character encoding detector / GNU Lesser General Public License
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.4.0	extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.9	Cross-platform colored terminal text in Python / BSD
conda	4.3.27	Package management system and Environment management system / BSD
conda-build	3.0.22	Commands and tools for building conda packages / BSD 3-clause
configparser	3.5.0	brings the updated configparser from Python 3.5 to Python 2.6-3.5 / MIT
contextlib2	0.5.5	backports and enhancements for the contextlib module / PSF
cryptography	1.8.1	Provides cryptographic recipes and primitives to Python developers / Apache and BS
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.26	The Cython compiler for writing C extensions for the Python language / Apache vers

co

Table 174 – continued from previous page

Name	Version	Summary / License
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BSD
dask	0.15.2	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
decorator	4.1.2	Better living through Python with decorators / BSD
distributed	1.18.1	Distributed computing / BSD 3-Clause
docutils	0.14	Utilities for general- and special-purpose documentation / Public-Domain, PSF, 2-cla
entrypoints	0.2.3	/ MIT
enum34	1.1.6	Robust enumerated type support in Python / BSD
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
filelock	2.0.7	A platform independent file lock. / Public Domain
flask	0.12.2	Microframework for Python based on Werkzeug, Jinja2. / BSD
flask-cors	3.0.3	Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+ / Apache
functools32	3.2.3.2	backport of the functools module from Python 3.2.3 for use on 2.7 and PyPy. / PSF
functools_lru_cache	1.4	backport of functools.lru_cache from Python 3.3 / MIT
futures	3.1.1	A Java-style futures package for Python / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based Python network library / MIT
glob2	0.5	Enhanced glob that can capture patterns and supports recursive wildcards / BSD Lice
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD
h5py	2.7.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	0.9999999	HTML parser based on the WHATWG HTML specification / MIT
idna	2.6	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipaddress	1.0.18	IPv4/IPv6 manipulation library / Python Software Foundation License
ipykernel	4.6.1	Provides a rich toolkit to help you make the most of using Python interactively / BSD
ipython	5.3.0	Productive Interactive Computing / BSD
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD
ipywidgets	6.0.0	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.15	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.10.2	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg files / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	web-based notebook environment for interactive computing. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.2.0	Jupyter terminal console / BSD
jupyter_core	4.3.0	core Jupyter functionality / BSD
lazy-object-proxy	1.3.1	Fast and thorough lazy object proxy / BSD
libffi	3.2.1	portable foreign-function interface library / MIT

cc

Table 174 – continued from previous page

Name	Version	Summary / License
libgfortran	3.0.0	the GNU Fortran compiler, part of GCC / GPL3
libiconv	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.30	official PNG reference library / libpng license
libsodium	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.3	XML and HTML with Python / BSD
markupsafe	1.0	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.2	Python 2D plotting library / PSF-based
mistune	0.7.4	The fastest markdown parser in pure Python with renderer feature / BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
msgpack-python	0.4.8	An efficient binary serialization format / Apache
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
nbconvert	5.2.1	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.4.0	reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.4	Build Python programs to work with human language data / Apache Software Licens
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	5.0.0	web-based notebook environment for interactive computing / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects / BSD
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.1	Shapeshifting for your data / BSD
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License
openblas	0.2.19	An Optimized BLAS library / BSD
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apache-
packaging	16.8	core utilities for Python packages / BSD or Apache 2.0
pandas	0.20.3	Powerful Python data analysis toolkit / BSD
pandocfilters	1.4.2	utilities for writing pandoc filters in python / BSD License
partd	0.3.8	Appendable key-value byte store / BSD
patchelf	0.9	Modify the dynamic linker and RPATH of ELF executables / GPL3
path.py	10.3.1	An object representing a path to a file or directory / MIT
pathlib2	2.3.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre	8.39	A set of functions that implement regular expression pattern matching / 3-clause BSD
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.2.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation / MIT
pkginfo	1.4.1	query metadatdata from sdists or bdists installed packages / PSF
ply	3.10	implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.15	library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	cross-platform process and system utilities module for Python / BSD
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	Library with cross-python path, ini-parsing, io, code, log facilities / MIT

CO

Table 174 – continued from previous page

Name	Version	Summary / License
pycairo	1.10.0	A set of Python bindings for the cairo graphics library / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT License
pycosat	0.6.2	Python bindings to the picosat SAT solver / MIT
pycparser	2.18	C parser in Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	passive checker of Python programs / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD
pylint	1.7.2	Python code static checker / GPL
pyodbc	4.0.16	DB API Module for ODBC / MIT
pyopenssl	17.0.0	Python wrapper module around the OpenSSL library / Apache Software License
pyparsing	2.2.0	Create and execute simple grammars / MIT
pytables	3.4.2	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.2.1	Simple and powerful testing with Python / MIT
python	2.7.13	General purpose programming language / PSF
python-dateutil	2.6.1	extensions to the standard Python datetime module / Simplified BSD
pytz	2017.2	World timezone definitions, modern and historical / MIT
pywavelets	0.5.2	wavelet transform module / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
requests	2.14.2	Python HTTP for Humans / Apache Software License
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD License
scikit-image	0.13.0	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.19.0	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.19.1	Scientific Library for Python / BSD
seaborn	0.8	Statistical data visualization / BSD
setuptools	36.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sortedcollections	0.5.3	Python Sorted Collections / Apache Software License
sortedcontainers	1.5.7	sorted Container Types: SortedList, SortedDict, and SortedSet / Apache 2.0
sphinx	1.6.3	Documentation generator / BSD
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.1.13	Python SQL toolkit and Object Relational Mapper / MIT
sqlite	3.13.0	SQL database engine / Public-Domain
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.4 / PSF
statsmodels	0.8.0	Statistical computations and models / 3-clause BSD
subprocess32	3.2.7	backport of the subprocess module from Python 3.2/3.3 for use on 2.x / Python Softw
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library / BSD
terminado	0.6	Terminals served to term.js using Tornado websockets / BSD
testpath	0.3.1	collection of utilities for Python code working with files and commands / MIT
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.2	List processing tools and functional utilities / BSD
tornado	4.5.2	Tornado Web Server / Apache 2.0
traitlets	4.3.2	Configuration system for Python applications / Modified BSD

cc

Table 174 – continued from previous page

Name	Version	Summary / License
typing	3.6.2	backport of the standard library typing module to Python versions older than 3.6 / PS
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC (Open Database Connectivity) implementation for Unix / LGPLv2
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.12.2	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.1.0	extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD
xlwt	1.3.0	writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / Public-Domain, GPL
yaml	0.1.6	YAML Ain't Markup Language / MIT
zeromq	4.1.5	Distributed messaging / LGPL
zict	0.1.2	Composable Mutable Mapping tools / BSD
zlib	1.2.11	Unobtrusive compression library / zlib

Anaconda 5.0.1 for 64-bit Linux with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. / I
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC

Table 175 – continued from previous page

Name	Version	Summary / License
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF

imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr

olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.40.11	Text layout and rendering engine. / LGPL-2.1
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.13.3	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	Pyflakes analyzes programs and detects various errors. / MIT

Table 175 – continued from previous page

Name	Version	Summary / License
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.4	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.14	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.6	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.1	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.11.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk

Table 175 – continued from previous page

Name	Version	Summary / License
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.1 for 32-bit Linux with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.9	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.10	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2

Table 176 – continued from previous page

Name	Version	Summary / License
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. /
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.30	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.27	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.3	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.19.1	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.1.1	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A "smart font" system that handles the complexities of lesser-known langu
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.12.2	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.2	Library for constructing graphs of media-handling components / LGPL 2

Table 176 – continued from previous page

Name	Version	Summary / License
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.5.0	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Clau
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	4.1.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.1.0	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT

Table 176 – continued from previous page

Name	Version	Summary / License
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	2.0	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.3	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.15.0.6	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.40.11	Text layout and rendering engine. / LGPL-2.1
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.4.0	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.13.3	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT

Table 176 – continued from previous page

Name	Version	Summary / License
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain

Name	Version	Summary / License
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	1.0.2	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.3	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0.1 (Oct 02, 2017)

- Fixes Python & C compiler fallback path for all cases on x86/x86_64 Linux. Without this fix, people were required to use our new compilers, which is not something we want to enforce at this time. This was affecting travis-ci builds and pip installs of packages that require compilation for extensions.

Anaconda 5.0.0 (Sep 26, 2017)

- Over 100 packages updated and added. MKL is updated to 2018.0.0. JupyterLab alpha preview 0.27.0 is included.
- All new compilers on macOS and Linux, giving substantial security and performance improvements.
- Where possible, all build recipes use conda-forge as a base, using https://github.com/AnacondaRecipes .
- A new channel, `pkgs/main`, has been added to `defaults`. The new channel is given top priority within `defaults` and holds packages built with the new compiler stack.
- Continuum Analytics has been renamed to Anaconda, Inc. See this blog post for more.
- Spaces are no longer allowed in the installation path on Windows.
- Transitioned to more flexible dependency pinning of numpy packages, giving wider ranges of compatibility.

Major package updates

- anaconda-client 1.6.3 -> 1.6.5
- anaconda-navigator 1.6.2 -> 1.6.8
- anaconda-project 0.6.0 -> 0.8.0
- bokeh 0.12.5 -> 0.12.7
- conda 4.3.21 -> 4.3.27
- dask 0.14.3 -> 0.15.2
- jupyter_client 5.0.1 -> 5.1.0
- jupyter_console 5.1.0 -> 5.2.0
- numba 0.33.0 -> 0.35.0
- numpy 1.12.1 -> 1.13.1
- pandas 0.20.1 -> 0.20.3
- pillow 4.1.1 -> 4.2.1
- requests 2.14.2 -> 2.18.4
- scikit-learn 0.18.1 -> 0.19.0
- scipy 0.19.0 -> 0.19.1
- seaborn 0.7.1 -> 0.8.0
- spyder 3.1.4 -> 3.2.3
- sympy 1.0 -> 1.1.1
- conda-build 3.0.22
- jupyterlab 0.27.0
- jupyterlab_launcher 0.4.0

Packages

Anaconda 5.0.0 for 64-bit Windows with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT

Table 177 – continued from previous page

Name	Version	Summary / License
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.2	pure Python COM package / MIT
conda	4.3.27	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.22	tools for building conda packages / BSD 3-Clause
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.18.3	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like

Table 177 – continued from previous page

Name	Version	Summary / License
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.8	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau

Table 177 – continued from previous page

Name	Version	Summary / License
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.0	Python style guide checker / MIT
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.2	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0

Table 177 – continued from previous page

Name	Version	Summary / License
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docur
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. / I
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	14	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 32-bit Windows with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2

ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.8	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl

Table 178 – continued from previous page

Name	Version	Summary / License
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cl
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cl
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.0	Python style guide checker / MIT
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.2	General purpose programming language / PSF

Table 178 – continued from previous page

Name	Version	Summary / License
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	14	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v

Table 178 – continued from previous page

Name	Version	Summary / License
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for macOS on Intel 64-bit with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.27	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.22	tools for building conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa

Table 179 – continued from previous page

Name	Version	Summary / License
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.18.3	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause

Table 179 – continued from previous page

singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docur
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. / I
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 64-bit Linux on IBM Power CPUs with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.3	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.6.0	reproducible, executable project directories / BSD 3-clause
asn1crypto	0.22.0	ASN.1 parser and serializer / MIT
astroid	1.5.3	abstract syntax tree for Python with inference support / LGPL version 2.1
astropy	2.0.1	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
bkcharts	0.2	optional High Level charts API built on top of Bokeh / New BSD
bleach	1.5.0	easy whitelist-based HTML-sanitizing tool / Apache License Version 2.0
bokeh	0.12.7	Python interactive visualization library for modern web browsers / BSD
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / Simplified BSD
cairo	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL 1.1
certifi	2016.2.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	C Foreign Function Interface for Python / MIT
chardet	3.0.4	Universal character encoding detector / GNU Lesser General Public License
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.4.0	extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.9	Cross-platform colored terminal text in Python / BSD
conda	4.3.27	Package management system and Environment management system / BSD
conda-build	3.0.22	Commands and tools for building conda packages / BSD 3-clause
contextlib2	0.5.5	backports and enhancements for the contextlib module / PSF
cryptography	1.8.1	Provides cryptographic recipes and primitives to Python developers / Apache and BS
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.26	The Cython compiler for writing C extensions for the Python language / Apache vers
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BSD
dask	0.15.2	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
decorator	4.1.2	Better living through Python with decorators / BSD
distributed	1.18.1	Distributed computing / BSD 3-Clause
docutils	0.14	Utilities for general- and special-purpose documentation / Public-Domain, PSF, 2-cla
entrypoints	0.2.3	/ MIT
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
filelock	2.0.7	A platform independent file lock. / Public Domain
flask	0.12.2	Microframework for Python based on Werkzeug, Jinja2. / BSD
flask-cors	3.0.3	Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based Python network library / MIT
glob2	0.5	Enhanced glob that can capture patterns and supports recursive wildcards / BSD Lice
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT

continu

Table 180 – continued from previous page

Name	Version	Summary / License
h5py	2.7.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	0.9999999	HTML parser based on the WHATWG HTML specification / MIT
idna	2.6	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.6.1	Provides a rich toolkit to help you make the most of using Python interactively / BSD
ipython	6.1.0	Productive Interactive Computing / BSD
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD
ipywidgets	6.0.0	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.15	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.10.2	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg files / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	web-based notebook environment for interactive computing. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.2.0	Jupyter terminal console / BSD
jupyter_core	4.3.0	core Jupyter functionality / BSD
lazy-object-proxy	1.3.1	Fast and thorough lazy object proxy / BSD
libffi	3.2.1	portable foreign-function interface library / MIT
libgfortran	3.0.0	the GNU Fortran compiler, part of GCC / GPL3
libiconv	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.30	official PNG reference library / libpng license
libsodium	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.3	XML and HTML with Python / BSD
markupsafe	1.0	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.2	Python 2D plotting library / PSF-based
mistune	0.7.4	The fastest markdown parser in pure Python with renderer feature / BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
msgpack-python	0.4.8	An efficient binary serialization format / Apache
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
nbconvert	5.2.1	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.4.0	reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.4	Build Python programs to work with human language data / Apache Software Licens
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	5.0.0	web-based notebook environment for interactive computing / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects / BSD
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.1	Shapeshifting for your data / BSD
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License

continu

Table 180 – continued from previous page

Name	Version	Summary / License
openblas	0.2.19	An Optimized BLAS library / BSD
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apache-
packaging	16.8	core utilities for Python packages / BSD or Apache 2.0
pandas	0.20.3	Powerful Python data analysis toolkit / BSD
pandocfilters	1.4.2	utilities for writing pandoc filters in python / BSD License
partd	0.3.8	Appendable key-value byte store / BSD
patchelf	0.9	Modify the dynamic linker and RPATH of ELF executables / GPL3
path.py	10.3.1	An object representing a path to a file or directory / MIT
pathlib2	2.3.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre	8.39	A set of functions that implement regular expression pattern matching / 3-clause BSD
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.2.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation / MIT
pkginfo	1.4.1	query metadatdata from sdists or bdists installed packages / PSF
ply	3.10	implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.15	library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	cross-platform process and system utilities module for Python / BSD
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT License
pycosat	0.6.2	Python bindings to the picosat SAT solver / MIT
pycparser	2.18	C parser in Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	passive checker of Python programs / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD
pylint	1.7.2	Python code static checker / GPL
pyodbc	4.0.16	DB API Module for ODBC / MIT
pyopenssl	17.0.0	Python wrapper module around the OpenSSL library / Apache Software License
pyparsing	2.2.0	Create and execute simple grammars / MIT
pytables	3.4.2	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.2.1	Simple and powerful testing with Python / MIT
python	3.6.2	General purpose programming language / PSF
python-dateutil	2.6.1	extensions to the standard Python datetime module / Simplified BSD
pytz	2017.2	World timezone definitions, modern and historical / MIT
pywavelets	0.5.2	wavelet transform module / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
requests	2.14.2	Python HTTP for Humans / Apache Software License
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scikit-image	0.13.0	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.19.0	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.19.1	Scientific Library for Python / BSD
seaborn	0.8	Statistical data visualization / BSD
setuptools	36.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT

multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.40.11	Text layout and rendering engine. / LGPL-2.1
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT

Table 181 – continued from previous page

Name	Version	Summary / License
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	3.6.2	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause

Table 181 – continued from previous page

Name	Version	Summary / License
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 32-bit Linux with Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause

Table 182 – continued from previous page

Name	Version	Summary / License
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. /
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.27	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.22	tools for building conda packages / BSD 3-Clause
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.18.3	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A "smart font" system that handles the complexities of lesser-known langu
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
gst-plugins-base	1.12.2	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.2	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.5.0	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like

Table 182 – continued from previous page

Name	Version	Summary / License
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	6.1.0	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause

Table 182 – continued from previous page

webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 64-bit Windows with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / I
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause

Table 183 – continued from previous page

Name	Version	Summary / License
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
comtypes	1.1.2	pure Python COM package / MIT
conda	4.3.27	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.22	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
console_shortcut	0.1.1	Console shortcut creator for Windows (using menuinst) / BSD
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.18.3	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.1.1	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based network library / MIT
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icc_rt	2017.0.4	Intel runtime libraries for C, C++ and Fortran compilers / Intel proprietary
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT

Table 183 – continued from previous page

Name	Version	Summary / License
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.8	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0

Table 183 – continued from previous page

Name	Version	Summary / License
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.0	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.13	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et

Table 183 – continued from previous page

Name	Version	Summary / License
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	9	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 32-bit Windows with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
bzip2	1.0.6	high-quality data compressor / bzip2
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause

jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD

Table 184 – continued from previous page

Name	Version	Summary / License
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
menuinst	1.4.8	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pep8	1.7.0	Python style guide checker / MIT
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT

Table 184 – continued from previous page

Name	Version	Summary / License
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.13	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pywin32	221	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause

Table 184 – continued from previous page

Name	Version	Summary / License
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
vc	9	A meta-package to track VC features. / Modified BSD License (3-clause)
vs2008_runtime	9.00.30729.1	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
win_inet_pton	1.0.1	Native inet_pton and inet_ntop implementation for Python on Windows (v
win_unicode_console	0.5	A Python package to enable Unicode input and display when running Pyth
wincertstore	0.2	Python module to extract CA and CRL certs from Windows' cert store (ct
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for macOS on Intel 64-bit with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
appnope	0.1.0	Disable App Nap on OS X 10.9 / BSD 2-Clause
appscript	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause

Table 185 – continued from previous page

Name	Version	Summary / License
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. /
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.27	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.22	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.18.3	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.1.1	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gettext	0.19.8.1	Internationalization package. / GPLv2
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause

Table 185 – continued from previous page

Name	Version	Summary / License
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libcxx	4.0.1	C++ Standard Library / MIT license or UIUC License
libcxxabi	4.0.1	C++ Standard Library Support / MIT license or UIUC License
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgfortran	3.0.1	Fortran libraries from the GNU Compiler Collection / GPL 3 (with GCC
libiconv	1.15	Provides iconv for systems which don't have one (or that cannot convert fr
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD

Table 185 – continued from previous page

Name	Version	Summary / License
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0

pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause

Table 185 – continued from previous page

Name	Version	Summary / License
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwings	0.11.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 64-bit Linux on IBM Power CPUs with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.3	anaconda.org command line client library / BSD 3-clause
anaconda-project	0.6.0	reproducible, executable project directories / BSD 3-clause
asn1crypto	0.22.0	ASN.1 parser and serializer / MIT
astroid	1.5.3	abstract syntax tree for Python with inference support / LGPL version 2.1
astropy	2.0.1	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports_abc	0.5	backport of recent additions to the 'collections.abc' module / PSF
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
bkcharts	0.2	optional High Level charts API built on top of Bokeh / New BSD
bleach	1.5.0	easy whitelist-based HTML-sanitizing tool / Apache License Version 2.0
bokeh	0.12.7	Python interactive visualization library for modern web browsers / BSD
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / Simplified BSD
cairo	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL 1.1
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD
certifi	2016.2.28	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	C Foreign Function Interface for Python / MIT
chardet	3.0.4	Universal character encoding detector / GNU Lesser General Public License

co

Table 186 – continued from previous page

Name	Version	Summary / License
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.4.0	extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.9	Cross-platform colored terminal text in Python / BSD
conda	4.3.27	Package management system and Environment management system / BSD
conda-build	3.0.22	Commands and tools for building conda packages / BSD 3-clause
configparser	3.5.0	brings the updated configparser from Python 3.5 to Python 2.6-3.5 / MIT
contextlib2	0.5.5	backports and enhancements for the contextlib module / PSF
cryptography	1.8.1	Provides cryptographic recipes and primitives to Python developers / Apache and BS
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.26	The Cython compiler for writing C extensions for the Python language / Apache vers
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BSD
dask	0.15.2	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
decorator	4.1.2	Better living through Python with decorators / BSD
distributed	1.18.1	Distributed computing / BSD 3-Clause
docutils	0.14	Utilities for general- and special-purpose documentation / Public-Domain, PSF, 2-cla
entrypoints	0.2.3	/ MIT
enum34	1.1.6	Robust enumerated type support in Python / BSD
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
filelock	2.0.7	A platform independent file lock. / Public Domain
flask	0.12.2	Microframework for Python based on Werkzeug, Jinja2. / BSD
flask-cors	3.0.3	Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+ / Apache
functools32	3.2.3.2	backport of the functools module from Python 3.2.3 for use on 2.7 and PyPy. / PSF
functools_lru_cache	1.4	backport of functools.lru_cache from Python 3.3 / MIT
futures	3.1.1	A Java-style futures package for Python / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT
gevent	1.2.2	Coroutine-based Python network library / MIT
glob2	0.5	Enhanced glob that can capture patterns and supports recursive wildcards / BSD Lice
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD
h5py	2.7.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	0.9999999	HTML parser based on the WHATWG HTML specification / MIT
idna	2.6	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipaddress	1.0.18	IPv4/IPv6 manipulation library / Python Software Foundation License
ipykernel	4.6.1	Provides a rich toolkit to help you make the most of using Python interactively / BSD
ipython	5.3.0	Productive Interactive Computing / BSD
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD
ipywidgets	6.0.0	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.15	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD

co

Table 186 – continued from previous page

Name	Version	Summary / License
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.10.2	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg files / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	web-based notebook environment for interactive computing. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.2.0	Jupyter terminal console / BSD
jupyter_core	4.3.0	core Jupyter functionality / BSD
lazy-object-proxy	1.3.1	Fast and thorough lazy object proxy / BSD
libffi	3.2.1	portable foreign-function interface library / MIT
libgfortran	3.0.0	the GNU Fortran compiler, part of GCC / GPL3
libiconv	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.30	official PNG reference library / libpng license
libsodium	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.3	XML and HTML with Python / BSD
markupsafe	1.0	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.2	Python 2D plotting library / PSF-based
mistune	0.7.4	The fastest markdown parser in pure Python with renderer feature / BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
msgpack-python	0.4.8	An efficient binary serialization format / Apache
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
nbconvert	5.2.1	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.4.0	reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.4	Build Python programs to work with human language data / Apache Software Licens
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	5.0.0	web-based notebook environment for interactive computing / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects / BSD
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.1	Shapeshifting for your data / BSD
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License
openblas	0.2.19	An Optimized BLAS library / BSD
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apache-
packaging	16.8	core utilities for Python packages / BSD or Apache 2.0
pandas	0.20.3	Powerful Python data analysis toolkit / BSD
pandocfilters	1.4.2	utilities for writing pandoc filters in python / BSD License
partd	0.3.8	Appendable key-value byte store / BSD
patchelf	0.9	Modify the dynamic linker and RPATH of ELF executables / GPL3
path.py	10.3.1	An object representing a path to a file or directory / MIT
pathlib2	2.3.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre	8.39	A set of functions that implement regular expression pattern matching / 3-clause BSD

cc

Table 186 – continued from previous page

Name	Version	Summary / License
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.2.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation / MIT
pkginfo	1.4.1	query metadatdata from sdists or bdists installed packages / PSF
ply	3.10	implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.15	library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	cross-platform process and system utilities module for Python / BSD
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.10.0	A set of Python bindings for the cairo graphics library / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT License
pycosat	0.6.2	Python bindings to the picosat SAT solver / MIT
pycparser	2.18	C parser in Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.6.0	passive checker of Python programs / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD
pylint	1.7.2	Python code static checker / GPL
pyodbc	4.0.16	DB API Module for ODBC / MIT
pyopenssl	17.0.0	Python wrapper module around the OpenSSL library / Apache Software License
pyparsing	2.2.0	Create and execute simple grammars / MIT
pytables	3.4.2	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.2.1	Simple and powerful testing with Python / MIT
python	2.7.13	General purpose programming language / PSF
python-dateutil	2.6.1	extensions to the standard Python datetime module / Simplified BSD
pytz	2017.2	World timezone definitions, modern and historical / MIT
pywavelets	0.5.2	wavelet transform module / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
requests	2.14.2	Python HTTP for Humans / Apache Software License
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD License
scikit-image	0.13.0	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.19.0	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.19.1	Scientific Library for Python / BSD
seaborn	0.8	Statistical data visualization / BSD
setuptools	36.4.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sortedcollections	0.5.3	Python Sorted Collections / Apache Software License
sortedcontainers	1.5.7	sorted Container Types: SortedList, SortedDict, and SortedSet / Apache 2.0
sphinx	1.6.3	Documentation generator / BSD
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
sqlalchemy	1.1.13	Python SQL toolkit and Object Relational Mapper / MIT

CO

Table 186 – continued from previous page

Name	Version	Summary / License
sqlite	3.13.0	SQL database engine / Public-Domain
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.4 / PSF
statsmodels	0.8.0	Statistical computations and models / 3-clause BSD
subprocess32	3.2.7	backport of the subprocess module from Python 3.2/3.3 for use on 2.x / Python Softw
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library / BSD
terminado	0.6	Terminals served to term.js using Tornado websockets / BSD
testpath	0.3.1	collection of utilities for Python code working with files and commands / MIT
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.2	List processing tools and functional utilities / BSD
tornado	4.5.2	Tornado Web Server / Apache 2.0
traitlets	4.3.2	Configuration system for Python applications / Modified BSD
typing	3.6.2	backport of the standard library typing module to Python versions older than 3.6 / PS
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc	2.3.4	ODBC (Open Database Connectivity) implementation for Unix / LGPLv2
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.12.2	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.1.0	extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD
xlwt	1.3.0	writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / Public-Domain, GPL
yaml	0.1.6	YAML Ain't Markup Language / MIT
zeromq	4.1.5	Distributed messaging / LGPL
zict	0.1.2	Composable Mutable Mapping tools / BSD
zlib	1.2.11	Unobtrusive compression library / zlib

Anaconda 5.0.0 for 64-bit Linux with Python 2.7

imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT

Table 187 – continued from previous page

Name	Version	Summary / License
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File-based locks for Python for Linux and Windows / BSD 2-Clause
lxml	3.8.0	Pythonic binding for the C libraries libxml2 and libxslt. / BSD 3-Clause,
lzo	2.10	LZO is a portable lossless data compression library written in ANSI C. /
markupsafe	1.0	A Python module that implements the jinja2.Markup string / BSD 3-Claus
matplotlib	2.0.2	Publication quality figures in Python / PSF-based
mccabe	0.6.1	McCabe complexity checker for Python / MIT
mistune	0.7.4	The fastest markdown parser in pure Python. / BSD 3-Clause
mkl	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpc	1.0.3	A C library for the arithmetic of complex numbers with arbitrarily high pr
mpfr	3.1.5	The MPFR library is a C library for multiple-precision floating-point com
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD 3-Cl
msgpack-python	0.4.8	MessagePack (de)serializer. / Apache 2.0
multipledispatch	0.4.9	Multiple dispatch in Python / BSD 3-Clause
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.3.1	Converting Jupyter Notebooks / BSD 3-Clause
nbformat	4.4.0	The reference implementation of the Jupyter Notebook format / BSD 3-cla
ncurses	6.0	Library for text-based user interfaces / Free software (MIT-like)
networkx	1.11	Python package for creating and manipulating complex networks / BSD 3-
nltk	3.2.4	Build Python programs to work with human language data / Apache 2.0
nose	1.3.7	Nose extends unittest to make testing easier / LGPL-2.1
notebook	5.0.0	A web-based notebook environment for interactive computing / BSD 3-cla
numba	0.35.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy. / MIT
numpy	1.13.1	Array processing for numbers, strings, records, and objects. / BSD 3-Clau
numpydoc	0.7.0	Sphinx extension to support docstrings in Numpy format / BSD 3-Clause
odo	0.5.1	Data migration in Python / BSD-3-Clause
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License 2-Clause
openpyxl	2.4.8	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocol
packaging	16.8	Core utilities for Python packages / Apache 2.0 or BSD 2-Clause
pandas	0.20.3	High-performance, easy-to-use data structures and data analysis tools. / B
pandoc	1.19.2.1	Universal markup converter (repackaged binaries). / GPL-2.0
pandocfilters	1.4.2	A python module for writing pandoc filters / BSD-3-Clause
pango	1.40.11	Text layout and rendering engine. / LGPL-2.1
partd	0.3.8	Data structure for on-disk shuffle operations / BSD 3-Clause
patchelf	0.9	A small utility to modify the dynamic linker and RPATH of ELF executab
path.py	10.3.1	A module wrapper for os.path / MIT
pathlib2	2.3.0	Fork of pathlib aiming to support the full stdlib Python API. / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD-2-
pcre	8.41	Regular expression pattern matching using the same syntax and semantics
pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny ‘shelve’-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause

Table 187 – continued from previous page

Name	Version	Summary / License
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.13.3	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.13	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause

Table 187 – continued from previous page

Name	Version	Summary / License
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 5.0.0 for 32-bit Linux with Python 2.7

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme. / BSD 3-Clause
anaconda-client	1.6.5	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.8	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.8.0	Reproducible, executable project directories. / BSD 3-Clause
asn1crypto	0.22.0	Python ASN.1 library with a focus on performance and a pythonic API / M
astroid	1.5.3	A abstract syntax tree for Python with inference support. / LGPL 2.1
astropy	2.0.2	Community-developed Python Library for Astronomy / BSD
babel	2.5.0	Utilities to internationalize and localize Python applications / BSD 3-clau
backports	1.0	/ BSD
backports.functools_lru_cache	1.4	Backport of functools.lru_cache from Python 3.3 as published at ActiveSt

Table 188 – continued from previous page

Name	Version	Summary / License
backports.shutil_get_terminal_size	1.0.0	A backport of the get_terminal_size function from Python 3.3's shutil. / M
backports_abc	0.5	A backport of recent additions to the *collections.abc* module. / PSF 2
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient arrays of booleans – C extension / PSF
bkcharts	0.2	High level chart types built on top of Bokeh / BSD 3-Clause
blaze	0.11.3	NumPy and Pandas interface to big data / BSD 3-Clause
bleach	2.0.0	Easy, whitelist-based HTML-sanitizing tool / Apache-2.0
bokeh	0.12.7	Statistical and novel interactive HTML plots for Python / BSD 3-Clause
boto	2.48.0	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / BSD 2-Clause
ca-certificates	2017.08.26	Certificates for use with other packages. / ISC
cairo	1.14.10	Cairo is a 2D graphics library with support for multiple output devices. / I
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD 2-Clause
certifi	2017.7.27.1	Python package for providing Mozilla's CA Bundle. / ISC
cffi	1.10.0	Foreign Function Interface for Python calling C code. / MIT
chardet	3.0.4	Universal character encoding detector / LGPL2
click	6.7	A simple wrapper around optparse for powerful command line utilities. / I
cloudpickle	0.4.0	Extended pickling support for Python objects / BSD 3-Clause
clyent	1.2.2	Command line client library for windows and posix / BSD 3-Clause
colorama	0.3.9	Cross-platform colored terminal text. / BSD 3-Clause
conda	4.3.27	OS-agnostic, system-level binary package and environment manager. / BS
conda-build	3.0.22	tools for building conda packages / BSD 3-Clause
configparser	3.5.0	This library brings the updated configparser from Python 3.5 to Python 2.
contextlib2	0.5.5	Backports and enhancements for the contextlib module / PSF
cryptography	2.0.3	Provides cryptographic recipes and primitives to Python developers / Apa
curl	7.55.1	tool and library for transferring data with URL syntax / MIT/X derivate (h
cycler	0.10.0	Composable style cycles. / BSD 3-Clause
cython	0.26.1	The Cython compiler for writing C extensions for the Python language / A
cytoolz	0.8.2	Cython implementation of Toolz. High performance functional utilities. /
dask	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
dask-core	0.15.2	Parallel Python with task scheduling / BSD 3-Clause
datashape	0.5.4	A data description language. / BSD 2-Clause
dbus	1.10.22	Simple message bus system for applications to talk to one another / GPL2
decorator	4.1.2	Better living through Python with decorators. / BSD 3-Clause
distributed	1.18.3	Distributed computing with Dask / BSD 3-Clause
docutils	0.14	Docutils – Python Documentation Utilities / Public Domain Dedictation a
entrypoints	0.2.3	Discover and load entry points from installed packages. / MIT License
enum34	1.1.6	Python 3.4 Enum backported to 3.3, 3.2, 3.1, 2.7, 2.6, 2.5, and 2.4 / BSD 2
et_xmlfile	1.0.1	An implementation of lxml.xmlfile for the standard library / MIT
expat	2.2.4	Expat XML parser library in C. / MIT
fastcache	1.0.2	C implementation of Python 3 lru_cache / MIT
filelock	2.0.12	A platform independent file lock. / Public Domain
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions. / BSD
flask-cors	3.0.3	A Flask extension adding a decorator for CORS support / MIT
fontconfig	2.12.4	A library for configuring and customizing font access. / MIT
freetype	2.8	A Free, High-Quality, and Portable Font Engine / GPL-2.0 and FreeType
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+. / A
functools32	3.2.3.2	Backport of the functools module from Python 3.2.3 for use on 2.7 and Py
futures	3.1.1	Backport of the concurrent.futures package from Python 3.2 / PSF
get_terminal_size	1.0.0	Get the size of the terminal window. / MIT

Table 188 – continued from previous page

Name	Version	Summary / License
gevent	1.2.2	Coroutine-based network library / MIT
glib	2.53.6	Provides core application building blocks for libraries and applications wr
glob2	0.5	Version of the glob module that supports recursion via **, and can capture
gmp	6.1.2	The GNU multiprecision library. / GPL 2 and LGPL 3
gmpy2	2.0.8	GMP/MPIR, MPFR, and MPC interface to Python 2.6+ and 3.x / LGPL 3
graphite2	1.3.10	A “smart font” system that handles the complexities of lesser-known langu
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD 3-Clause
gst-plugins-base	1.12.2	GStreamer Base Plug-ins / GPL2
gstreamer	1.12.2	Library for constructing graphs of media-handling components / LGPL 2
h5py	2.7.0	Read and write HDF5 files from Python. / BSD 3-Clause
harfbuzz	1.5.0	An OpenType text shaping engine. / MIT
hdf5	1.10.1	HDF5 is a data model, library, and file format for storing and managing da
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD 3-Clause
html5lib	0.999999999	HTML parser based on the WHATWG HTML specification / MIT
icu	58.2	International Components for Unicode. / MIT
idna	2.6	Internationalized Domain Names in Applications (IDNA). / BSD Like
imageio	2.2.0	a Python library for reading and writing image data / BSD 2-Clause
imagesize	0.7.1	Getting image size from png/jpeg/jpeg2000/gif file / MIT
intel-openmp	2018.0.0	Math library for Intel and compatible processors / proprietary - Intel
ipaddress	1.0.18	IPv4/IPv6 manipulation library / PSF 2
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD 3-clause
ipython	5.4.1	IPython: Productive Interactive Computing / BSD 3-clause
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD 3-Clause
ipywidgets	7.0.0	Jupyter Interactive Widgets / BSD 3-clause
isort	4.2.15	A Python utility / library to sort Python imports. / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments. / BSD 3-C
jbig	2.1	Implementation of the JBIG1 data compression standard / GPL-2.0
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD 2-Claus
jedi	0.10.2	An autocompletion tool for Python that can be used for text editors. / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / 3-Cl
jpeg	9b	read/write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Jupyter metapackage. Install all the Jupyter components in one go. / BSD
jupyter_client	5.1.0	Jupyter protocol implementation and client libraries / BSD 3-clause
jupyter_console	5.2.0	Jupyter terminal console / BSD 3-Clause
jupyter_core	4.3.0	Core common functionality of Jupyter projects. / BSD 3-clause
jupyterlab	0.27.0	A pre-alpha version of a computational environment for Jupyter. / BSD 3-
jupyterlab_launcher	0.4.0	A Launcher for JupyterLab based applications. / BSD 3-Clause
lazy-object-proxy	1.3.1	A fast and thorough lazy object proxy. / BSD 2-Clause
libedit	3.1	Editline Library (libedit) / 3-Clause BSD
libffi	3.2.1	A Portable Foreign Function Interface Library. / Custom
libgcc-ng	7.2.0	The GCC low-level runtime library / GPL
libgfortran-ng	7.2.0	The GNU Fortran Runtime Library / GPL
libpng	1.6.32	PNG reference library. / zlib/libpng
libsodium	1.0.13	A modern and easy-to-use crypto library. / ISC
libssh2	1.8.0	the SSH library / BSD 3-Clause
libstdcxx-ng	7.2.0	he GNU C++ Runtime Library / GPL3 with runtime exception
libtiff	4.0.8	Support for the Tag Image File Format (TIFF). / HPND
libtool	2.4.6	The GNU Portable Library Tool / GPL 3

Table 188 – continued from previous page

Name	Version	Summary / License
libxcb	1.12	This is the C-language Binding (XCB) package to the X Window System
libxml2	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.20.0	Lightweight wrapper around basic LLVM functionality / BSD

pep8	1.7.0	Python style guide checker / MIT
pexpect	4.2.1	Pexpect makes Python a better tool for controlling other applications. / IS
pickleshare	0.7.4	Tiny 'shelve'-like database with concurrency support / MIT
pillow	4.2.1	Pillow is the friendly PIL fork by Alex Clark and Contributors. / PIL
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT

Table 188 – continued from previous page

Name	Version	Summary / License
pixman	0.34.0	A low-level software library for pixel manipulation. / MIT
pkginfo	1.4.1	Query metadatdata from sdists / bdists / installed packages. / MIT
ply	3.10	Python Lex-Yacc / BSD 3-clause
prompt_toolkit	1.0.15	Library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	A cross-platform process and system utilities module for Python / BSD 3-
ptyprocess	0.5.2	Run a subprocess in a pseudo terminal / ISC
py	1.4.34	library with cross-python path, ini-parsing, io, code, log facilities / MIT
pycairo	1.13.3	Python bindings for the Cairo graphics library. / LGPL 2.1, MPL 1.1
pycodestyle	2.3.1	Python style guide checker / MIT
pycosat	0.6.2	Bindings to picosat (a SAT solver) / MIT
pycparser	2.18	Complete C99 parser in pure Python / BSD 3-clause
pycrypto	2.6.1	Cryptographic modules for Python. / Public Domain
pycurl	7.43.0	A Python Interface To The cURL library / LGPL, MIT
pyflakes	1.5.0	Pyflakes analyzes programs and detects various errors. / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD 2-clause
pylint	1.7.2	python code static checker / GPL
pyodbc	4.0.17	DB API Module for ODBC / MIT
pyopenssl	17.2.0	Python wrapper module around the OpenSSL library / Apache 2.0
pyparsing	2.2.0	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt. / Commercial, GPL-
pysocks	1.6.7	A Python SOCKS client module. See https://github.com/Anorov/PySocks
pytables	3.4.2	Brings together Python, HDF5 and NumPy to easily handle large amounts
pytest	3.2.1	Simple and powerful testing with Python. / MIT
python	2.7.13	General purpose programming language / PSF
python-dateutil	2.6.1	Extensions to the standard Python datetime module. / BSD 3-clause
pytz	2017.2	World timezone definitions, modern and historical. / MIT
pywavelets	0.5.2	Discrete Wavelet Transforms in Python. / MIT
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	Python bindings for zeromq / BSD 3-clause
qt	5.6.2	Qt is a cross-platform application and UI framework. / LGPL-3.0
qtawesome	0.4.4	Iconic fonts in PyQt and PySide applications / MIT
qtconsole	4.3.1	Jupyter Qt console / BSD 3-Clause
qtpy	1.3.1	Abstraction layer for PyQt5/PyQt4/PySide / MIT
readline	7.0	library for editing command lines as they are typed in / GPL3
requests	2.18.4	Python HTTP for Humans. / Apache 2.0
rope	0.10.5	A python refactoring library... / GPL 2.0
ruamel_yaml	0.11.14	A patched copy of ruamel.yaml. / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD 3-Clause
scikit-image	0.13.0	Image processing routines for SciPy. / BSD 3-Clause
scikit-learn	0.19.0	A set of python modules for machine learning and data mining / BSD 3-C
scipy	0.19.1	Scientific Library for Python / BSD 3-Clause
seaborn	0.8.0	Statistical data visualization / BSD 3-Clause
setuptools	36.5.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Simple generic functions (similar to Python's own len(), pickle.dump(), et
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18.1	Create Python bindings for C and C++ libraries / GPL-3.0
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD-2-Clause
sortedcollections	0.5.3	Python Sorted Collections / Apache-2.0
sortedcontainers	1.5.7	Python Sorted Container Types: SortedList, SortedDict, and SortedSet / A

Table 188 – continued from previous page

Name	Version	Summary / License
sphinx	1.6.3	Sphinx is a tool that makes it easy to create intelligent and beautiful docu
sphinxcontrib	1.0	Python namespace for sphinxcontrib / BSD
sphinxcontrib-websupport	1.0.1	Sphinx API for Web Apps / BSD-2-Clause
spyder	3.2.3	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.13	Database Abstraction Library. / MIT
sqlite	3.20.1	Implements a self-contained, zero-configuration, SQL database engine. /
ssl_match_hostname	3.5.0.1	The ssl.match_hostname() function from Python 3.5 / PSF 2
statsmodels	0.8.0	Statistical computations and models for use with SciPy / BSD 3-Clause
subprocess32	3.2.7	A backport of the subprocess module from Python 3.2/3.3 for use on 2.x.
sympy	1.1.1	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback serialization library. / BSD 2-Clause
terminado	0.6	Terminals served by tornado websockets / BSD 3-clause
testpath	0.3.1	Testpath is a collection of utilities for Python code working with files and
tk	8.6.7	A dynamic programming language with GUI support. Bundles Tcl and Tk
toolz	0.8.2	A functional standard library for Python. / BSD 3-Clause
tornado	4.5.2	A Python web framework and asynchronous networking library, originally
traitlets	4.3.2	Configuration system for Python applications / BSD 3-clause
typing	3.6.2	Type Hints for Python - backport for Python<3.5 / PSF
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSI
unixodbc	2.3.4	ODBC on non MS Windows platforms / LGPL-2.1
urllib3	1.22	HTTP library with thread-safe connection pooling, file post, and more. / M
wcwidth	0.1.7	Measures number of Terminal column cells of wide-character codes. / MI
webencodings	0.5.1	Character encoding aliases for legacy web content / BSD 3-Clause
werkzeug	0.12.2	The Python WSGI Utility Library. / BSD 3-Clause
wheel	0.29.0	A built-package format for Python. / MIT
widgetsnbextension	3.0.2	IPython HTML widgets for Jupyter / BSD 3-clause
wrapt	1.10.11	Module for decorators, wrappers and monkey patching. / BSD 2-Clause
xlrd	1.1.0	Library for developers to extract data from Microsoft Excel (tm) spreadsh
xlsxwriter	0.9.8	A Python module for creating Excel XLSX files / BSD 2-Clause
xlwt	1.3.0	Writing data and formatting information to Excel files / BSD
xz	5.2.3	Data compression software with high compression ratio / LGPL-2.1 and G
yaml	0.1.7	A C library for parsing and emitting YAML. / MIT
zeromq	4.2.2	A high-performance asynchronous messaging library. / LGPL 3
zict	0.1.2	Composable Dictionary Classes / BSD 3-Clause
zlib	1.2.11	Massively spiffy yet delicately unobtrusive compression library / zlib

Anaconda 4.4.0 (May 31, 2017)

Anaconda 4.4 was released on May 31, 2017 and includes the following:

- Support added for the "ppc64le" machine type, for the POWER8 LE architecture used by IBM Power Systems and OpenPOWER servers.
- On Windows, the PATH environment variable is no longer changed by default, as this can cause trouble with other software. Instead, use Anaconda Navigator or the Anaconda Prompt in the Start Menu under "Anaconda" to use Anaconda software. If a user does choose to change the PATH variable, Anaconda is no longer appended to the PATH in system mode, and is now always added to the front of PATH in either system mode or user mode.
- Python 3.5 is updated from 3.5.2 to 3.5.3 and Python 3.6 from 3.6.0 to 3.6.1. Anaconda 4.4 supports Python 2.7, 3.5, and 3.6. Anaconda 4.3 was the last release to support Python 3.4.

- Minimum supported version of CentOS is now CentOS 6. Anaconda 4.3 was the last release to support CentOS 5.
- Applied pycrypto patch for CVE-2013-7439.
- Improved cp_acp support for install paths with non-ASCII characters on Windows.
- conda is updated from 4.3.14 to 4.3.21.
- Navigator is updated from 1.5.0 to 1.6.2.
- Project is updated from 0.4.1 to 0.6.0.
- Added distributed and pyodbc to the installers.
- Updated EULA.
- Conda packages with "mkl" in the package name now contain a file license.txt with a copy of the Intel Simplified Software License that applies to the Intel Math Kernel Library (MKL).
- Over 90 packages are updated or added.

Highlights:

- add support for the ppc64le (POWER8 LE used by IBM Power Systems and OpenPOWER servers) machine types

Other changes:

- On Windows, the PATH environment variable is no longer changed by default, as this can cause trouble with other software. The recommended approach is to instead use Anaconda Navigator or the Anaconda Prompt (located in the Start Menu under "Anaconda") when you wish to use Anaconda software. Also, Anaconda will always be added to the front of PATH, for either system or user mode. (Previously it was appended to the system path.)
- improve cp_acp support for install path on Windows
- updated 80 packages in the installer (and their dependencies)
- added distributed and pyodbc to the installers
- apply pycrypto patch for CVE-2013-7439
- end support for CentOS 5. CentOS 6 is now the minimum supported version.

Updates:

- anaconda-client from 1.6.0 to 1.6.3
- bokeh from 0.12.4 to 0.12.5
- dask from 0.13.0 to 0.14.3
- ipython from 5.1.0 to 5.3.0
- jupyter_client from 4.4.0 to 5.0.1
- jupyter_console from 5.0.0 to 5.1.0
- jupyter_core from 4.2.1 to 4.3.0
- matplotlib from 2.0.0 to 2.0.2
- numba from 0.30.1 to 0.33.0
- numpy from 1.11.3 to 1.12.1
- pandas from 0.19.2 to 0.20.1

- pillow from 4.0.0 to 4.1.1
- python 3.5 from 3.5.2 to 3.5.3
- python 3.6 from 3.6.0 to 3.6.1
- requests from 2.12.4 to 2.14.2
- scikit-image from 0.12.3 to 0.13.0
- scipy from 0.18.1 to 0.19.0
- spyder from 3.1.2 to 3.1.4
- statsmodels from 0.6.1 to 0.8.0

Packages

Python 3.6

Name	Version	Summary / License
alabaster	0.7.10	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.3	anaconda.org command line client library / BSD 3-clause
anaconda-navigator	1.6.2	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.6.0	reproducible, executable project directories / BSD 3-clause
appnope [Mac]	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript [Mac]	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.22.0	ASN.1 parser and serializer / MIT
astroid	1.4.9	abstract syntax tree for Python with inference support / LGPL
astropy	1.3.2	Community-developed Python Library for Astronomy / BSD
babel	2.4.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bleach	1.5.0	easy whitelist-based HTML-sanitizing tool / Apache License Version 2.0
bokeh	0.12.5	Python interactive visualization library for modern web browsers / BSD
boto	2.46.1	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / Simplified BSD
bzip2	1.0.6	high-quality data compressor / BSD
cairo [Linux]	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL
cffi	1.10.0	C Foreign Function Interface for Python / MIT
chardet	3.0.3	Universal character encoding detector / GNU Lesser General Public License
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.2.2	Extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.9	Cross-platform colored terminal text in Python / BSD
comtypes [Windows]	1.1.2	pure Python COM package / MIT
conda	4.3.21	OS-agnostic, system-level binary package and environment manager. / BSD
contextlib2	0.5.5	backports and enhancements for the contextlib module / PSF
cryptography	1.8.1	Provides cryptographic recipes and primitives to Python developers / Apache
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.25.2	The Cython compiler for writing C extensions for the Python language / Apache v

cont

Table 189 – continued from previous page

Name	Version	Summary / License
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BSD
dask	0.14.3	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
dbus Linux	1.10.10	message bus system, a simple way for applications to talk to one another / GPL2
decorator	4.0.11	Better living through Python with decorators / BSD
distributed	1.16.3	Lightweight library for distributed computing in Python / BSD 3-Clause
docutils	0.13.1	Utilities for general- and special-purpose documentation / Public-Domain, PSF, 2
entrypoints	0.2.2	/ MIT
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat Linux Mac	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	3.0.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.2.1	Coroutine-based Python network library / MIT
glib Linux	2.50.2	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.7.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	0.999	HTML parser based on the WHATWG HTML specification / MIT
idna	2.5	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD
ipython	5.3.0	Productive Interactive Computing / BSD
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD
ipywidgets	6.0.0	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.5	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig Linux Mac	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.10.2	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Open source, interactive data science and scientific computing / BSD
jupyter_client	5.0.1	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.1.0	Jupyter terminal console / BSD
jupyter_core	4.3.0	core Jupyter functionality / BSD
lazy-object-proxy	1.2.2	Fast and thorough lazy object proxy / BSD
libffi Linux	3.2.1	portable foreign-function interface library / MIT
libgcc Linux	4.8.5	Shared libraries for the GNU Compiler Collection / GPL3
libgfortran Linux	3.0.0	GNU Fortran runtime library / GPL3
libiconv Linux Mac	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.27	official PNG reference library / libpng license

cont

Table 189 – continued from previous page

Name	Version	Summary / License
libsodium Linux	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libtool Linux	2.4.2	The GNU Portable Library Tool / GPL3
libxcb Linux	1.12	This is the C-language Bindings package to the X Window System protocol / MIT
libxml2 Linux Mac	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt Linux Mac	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.18.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.3	Pythonic binding for the C libraries libxml2 and libxslt / BSD
markupsafe	0.23	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.2	Python 2D plotting library / PSF-based
menuinst Windows	1.4.7	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python with renderer feature / BSD
mkl	2017.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
msgpack-python	0.4.8	An efficient binary serialization format / Apache
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.1.1	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.3.0	The reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.3	Build Python programs to work with human language data / Apache Software Lic
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	5.0.0	web-based notebook environment for interactive computing / BSD
numba	0.33.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy / MIT
numpy	1.11.3	array processing for numbers, strings, records, and objects / BSD
numpydoc	0.6.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.0	Shapeshifting for your data / BSD
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License
openpyxl	2.4.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apac
packaging	16.8	core utilities for Python packages / BSD or Apache 2.0
pandas	0.20.1	Powerful data structures and data analysis tools / BSD
pandocfilters	1.4.1	utilities for writing pandoc filters in python / BSD License
pango Linux	1.40.3	Text layout and rendering engine / LGPL
partd	0.3.8	Appendable key-value byte store / BSD
path.py	10.3.1	module wrapper for os.path / MIT
pathlib2	2.2.1	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre Linux Mac	8.39	A set of functions that implement regular expression pattern matching / 3-clause
pep8	1.7.0	Python style guide checker / MIT
pexpect Linux Mac	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.1.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman Linux	0.34.0	A low-level software library for pixel manipulation / MIT
ply	3.10	implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.14	library for building powerful interactive command lines in Python / BSD

cont

appnope Mac	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript Mac	1.0.1	Control AppleScriptable applications from Python / Public-Domain
asn1crypto	0.22.0	ASN.1 parser and serializer / MIT
astroid	1.4.9	abstract syntax tree for Python with inference support / LGPL
astropy	1.3.2	Community-developed Python Library for Astronomy / BSD
babel	2.4.0	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports_abc	0.5	backport of recent additions to the 'collections.abc' module / PSF
beautifulsoup4	4.6.0	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bleach	1.5.0	easy whitelist-based HTML-sanitizing tool / Apache License Version 2.0
bokeh	0.12.5	Python interactive visualization library for modern web browsers / BSD
boto	2.46.1	Amazon Web Services Library / MIT
bottleneck	1.2.1	Fast NumPy array functions written in Cython. / Simplified BSD
bzip2	1.0.6	high-quality data compressor / BSD

Table 190 – continued from previous page

Name	Version	Summary / License
cairo Linux	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1,
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD
cffi	1.10.0	C Foreign Function Interface for Python / MIT
chardet	3.0.3	Universal character encoding detector / GNU Lesser General Public License
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.2.2	Extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.9	Cross-platform colored terminal text in Python / BSD
comtypes Windows	1.1.2	pure Python COM package / MIT
conda	4.3.21	OS-agnostic, system-level binary package and environment manager. / BSD
configparser	3.5.0	brings the updated configparser from Python 3.5 to Python 2.6-3.5 / MIT
contextlib2	0.5.5	backports and enhancements for the contextlib module / PSF
cryptography	1.8.1	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.25.2	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BS
dask	0.14.3	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
dbus Linux	1.10.10	message bus system, a simple way for applications to talk to one another / G
decorator	4.0.11	Better living through Python with decorators / BSD
distributed	1.16.3	Lightweight library for distributed computing in Python / BSD 3-Clause
docutils	0.13.1	Utilities for general- and special-purpose documentation / Public-Domain, P
entrypoints	0.2.2	/ MIT
enum34	1.1.6	Robust enumerated type support in Python / BSD
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat Linux Mac	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
flask	0.12.2	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	3.0.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+ / Apa
functools32	3.2.3.2	backport of the functools module from Python 3.2.3 for use on 2.7 / PSF
futures	3.1.1	A Java-style futures package for Python / PSF
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.2.1	Coroutine-based Python network library / MIT
glib Linux	2.50.2	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.12	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.7.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-l
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
html5lib	0.999	HTML parser based on the WHATWG HTML specification / MIT
idna	2.5	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipaddress	1.0.18	IPv4/IPv6 manipulation library / Python Software Foundation License

Table 190 – continued from previous page

Name	Version	Summary / License
ipykernel	4.6.1	IPython Kernel for Jupyter / BSD
ipython	5.3.0	Productive Interactive Computing / BSD
ipython_genutils	0.2.0	vestigial utilities from IPython / BSD
ipywidgets	6.0.0	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.5	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig Linux Mac	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.10.2	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.6	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg COM, EXIF, IPTC medata / Custom free software licer
jsonschema	2.6.0	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Open source, interactive data science and scientific computing / BSD
jupyter_client	5.0.1	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.1.0	Jupyter terminal console / BSD
jupyter_core	4.3.0	core Jupyter functionality / BSD
lazy-object-proxy	1.2.2	Fast and thorough lazy object proxy / BSD
libffi Linux	3.2.1	portable foreign-function interface library / MIT
libgcc Linux	4.8.5	Shared libraries for the GNU Compiler Collection / GPL3
libgfortran Linux	3.0.0	GNU Fortran runtime library / GPL3
libiconv Linux Mac	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.27	official PNG reference library / libpng license
libsodium Linux	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libtool Linux	2.4.2	The GNU Portable Library Tool / GPL3
libxcb Linux	1.12	This is the C-language Bindings package to the X Window System protocol
libxml2 Linux Mac	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt Linux Mac	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.18.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.3	Pythonic binding for the C libraries libxml2 and libxslt / BSD
markupsafe	0.23	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.2	Python 2D plotting library / PSF-based
menuinst Windows	1.4.7	cross platform menu item installation / BSD
mistune	0.7.4	The fastest markdown parser in pure Python with renderer feature / BSD
mkl	2017.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
msgpack-python	0.4.8	An efficient binary serialization format / Apache
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
navigator-updater	0.1.0	Anaconda Navigator Updater / proprietary - Continuum Analytics, Inc.
nbconvert	5.1.1	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.3.0	The reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.3	Build Python programs to work with human language data / Apache Softwa
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	5.0.0	web-based notebook environment for interactive computing / BSD
numba	0.33.0	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.2	Fast numerical expression evaluator for NumPy / MIT
numpy	1.11.3	array processing for numbers, strings, records, and objects / BSD

Table 190 – continued from previous page

Name	Version	Summary / License
numpydoc	0.6.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.0	Shapeshifting for your data / BSD
olefile	0.44	parse, read and write Microsoft OLE2 files / BSD License
openpyxl	2.4.7	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2l	OpenSSL is an open-source implementation of the SSL and TLS protocols /
packaging	16.8	core utilities for Python packages / BSD or Apache 2.0
pandas	0.20.1	Powerful data structures and data analysis tools / BSD
pandocfilters	1.4.1	utilities for writing pandoc filters in python / BSD License
pango Linux	1.40.3	Text layout and rendering engine / LGPL
partd	0.3.8	Appendable key-value byte store / BSD
path.py	10.3.1	module wrapper for os.path / MIT
pathlib2	2.2.1	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre Linux Mac	8.39	A set of functions that implement regular expression pattern matching / 3-cl
pep8	1.7.0	Python style guide checker / MIT
pexpect Linux Mac	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.1.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman Linux	0.34.0	A low-level software library for pixel manipulation / MIT
ply	3.10	implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.14	library for building powerful interactive command lines in Python / BSD
psutil	5.2.2	cross-platform process and system utilities module for Python / BSD
ptyprocess Linux Mac	0.5.1	Run a subprocess in a pseudo terminal / ISC
py	1.4.33	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyaudio Mac	0.2.7	Bindings for PortAudio v19, the cross-platform audio stream library / MIT
pycairo Linux	1.10.0	A set of Python bindings for the cairo graphics library / LGPL 2.1, MPL 1.1
pycosat	0.6.2	Python bindings to the picosat SAT solver / MIT
pycparser	2.17	complete C99 parser in pure Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	Python interface to libcurl / LGPL, MIT
pyflakes	1.5.0	Checks Python source files for errors / MIT
pygments	2.2.0	Generic syntax highlighting package / BSD
pylint	1.6.4	Python code static checker / GPL
pyodbc	4.0.16	DB API Module for ODBC / MIT
pyopenssl	17.0.0	Python wrapper module around the OpenSSL library / Apache Software Lic
pyparsing	2.1.4	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt / Commercial, GPLv2,
pytables	3.3.0	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.0.7	Simple and powerful testing with Python / MIT
python	2.7.13	general purpose programming language / PSF
python-dateutil	2.6.0	extensions to the standard Python datetime module / BSD
pytz	2017.2	World timezone definitions, modern and historical / MIT
pywavelets	0.5.2	wavelet transform module / MIT
pywin32 Windows	220	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
qt	5.6.2	Qt is a cross-platform application and UI framework / LGPLv3
qtawesome	0.4.4	FontAwesome icons in PyQt and PySide applications / MIT
qtconsole	4.3.0	Jupyter Qt Console / Modified BSD License

Table 190 – continued from previous page

Name	Version	Summary / License
qtpy	1.2.1	uniform layer to support PyQt4, PyQt5 and PySide with a single codebase /
readline Linux Mac	6.2	Line-editing for programs with a command-line interface / GPL3
requests	2.14.2	Python HTTP for Humans / Apache Software License
rope	0.9.4	A Python refactoring library / GPL
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scandir	1.5	scandir, a better directory iterator and faster os.walk() / BSD License
scikit-image	0.13.0	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.18.1	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.19.0	Scientific Library for Python / BSD
seaborn	0.7.1	Statistical data visualization / BSD
setuptools	27.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18	Create Python bindings for C and C++ libraries / GPL3
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sortedcollections	0.5.3	Python Sorted Collections / Apache Software License
sortedcontainers	1.5.7	sorted Container Types: SortedList, SortedDict, and SortedSet / Apache 2.0
sphinx	1.5.6	Documentation generator / BSD
spyder	3.1.4	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.9	Database Abstraction Library / MIT
sqlite	3.13.0	Self-contained, zero-configuration, SQL database engine / Public-Domain
ssl_match_hostname	3.4.0.2	The ssl.match_hostname() function from Python 3.4 / PSF
statsmodels	0.8.0	Statistical computations and models / 3-clause BSD
subprocess32	3.2.7	backport of the subprocess module from Python 3.2/3.3 for use on 2.x / Pyth
sympy	1.0	Python library for symbolic mathematics / 3-clause BSD
tblib	1.3.2	Traceback fiddling library for Python / BSD
terminado Linux Mac	0.6	Terminals served to term.js using Tornado websockets / BSD
testpath	0.3	collection of utilities for Python code working with files and commands / M
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.2	List processing tools and functional utilities / BSD
tornado	4.5.1	A Python web framework and asynchronous networking library / Apache 2.(
traitlets	4.3.2	Configuration system for Python applications / Modified BSD
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
unixodbc Linux Mac	2.3.4	ODBC (Open Database Connectivity) implementation for Unix / LGPLv2
vs2008_runtime Windows	9.00.30729.5054	Bundles of the MSVC 9 (VS 2008) runtime / Proprietary
vs2015_runtime Windows	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.12.2	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	2.0.0	IPython HTML widgets for Jupyter / BSD 3-clause
win_unicode_console Windows	0.5	enable Unicode input and display when running Python from Windows cons
wrapt	1.10.10	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.0.0	Extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.6	A Python module for creating Excel XLSX files / BSD
xlwings Mac Windows	0.10.4	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz Linux Mac	5.2.2	Data compression software with high compression ratio / Public-Domain, G
yaml Linux Mac	0.1.6	A human friendly data serialization standard / MIT
zeromq Linux	4.1.5	Distributed messaging / LGPL

Table 190 – continued from previous page

Name	Version	Summary / License
zict	0.1.2	mutable mapping tools / BSD
zlib	1.2.8	Unobtrusive compression library / zlib

Anaconda 4.3.1 (Mar 10, 2017)

This patch release fixes problems with Anaconda Navigator not starting correctly on some versions of Mac OS X when using the GUI installers.

Fixes:

- removed creation of `~/.continuum` folder during install process on all platforms
- fixed '//' showing up in prefix when installing system wide on Mac OS using the GUI installer
- fixed OpenSSL not being installable into a path which contains spaces
- allow Unicode characters in install path on Windows (cp_acp fix)

Updates:

- anaconda-navigator from 1.4.3 to 1.5.0
- conda from 4.3.8 to 4.3.14

Added:

- anaconda-project 0.4.1

Packages

Python 3.6

Name	Version	Summary / License
alabaster	0.7.9	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.0	anaconda.org command line client library / BSD
anaconda-navigator	1.5.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.4.1	reproducible, executable project directories / BSD
appnope [Mac]	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript [Mac]	1.0.1	Control AppleScriptable applications from Python / Public-Domain
astroid	1.4.9	abstract syntax tree for Python with inference support / LGPL
astropy	1.3	Community-developed Python Library for Astronomy / BSD
babel	2.3.4	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
beautifulsoup4	4.5.3	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bokeh	0.12.4	Python interactive visualization library for modern web browsers / BSD
boto	2.45.0	Amazon Web Services Library / MIT
bottleneck	1.2.0	Fast NumPy array functions written in Cython. / Simplified BSD
bzip2	1.0.6	high-quality data compressor / BSD
cairo [Linux]	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL
cffi	1.9.1	C Foreign Function Interface for Python / MIT

cont

prompt_toolkit	1.0.9	library for building powerful interactive command lines in Python / BSD
psutil	5.0.1	A cross-platform process and system utilities module for Python / BSD
ptyprocess Linux Mac	0.5.1	Run a subprocess in a pseudo terminal / ISC
py	1.4.32	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.1.9	Offline IP address to Autonomous System Number lookup module / BSD
pycosat	0.6.1	Python bindings to the picosat SAT solver / MIT
pycparser	2.17	complete C99 parser in pure Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	Python interface to libcurl / LGPL, MIT
pyflakes	1.5.0	Checks Python source files for errors / MIT
pygments	2.1.3	Generic syntax highlighting package / BSD
pylint	1.6.4	Python code static checker / GPL
pyopenssl	16.2.0	Python wrapper module around the OpenSSL library / Apache Software License
pyparsing	2.1.4	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt / Commercial, GPLv2, GPL
pytables	3.3.0	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.0.5	Simple and powerful testing with Python / MIT
python	3.6.0	general purpose programming language / PSF
python-dateutil	2.6.0	extensions to the standard Python datetime module / BSD
pytz	2016.10	World timezone definitions, modern and historical / MIT
pywin32 Windows	220	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
qt	5.6.2	Qt is a cross-platform application and UI framework / LGPLv3
qtawesome	0.4.3	FontAwesome icons in PyQt and PySide applications / MIT
qtconsole	4.2.1	Jupyter Qt Console / BSD
qtpy	1.2.1	uniform layer to support PyQt4, PyQt5 and PySide with a single codebase / MIT
readline Linux Mac	6.2	Line-editing for programs with a command-line interface / GPL3
redis Linux Mac	3.2.0	Advanced key-value cache and store / 3-clause BSD
redis-py Linux Mac	2.10.5	Redis Python Client / MIT
requests	2.12.4	Python HTTP for Humans / Apache Software License
rope	0.9.4	A Python refactoring library / GPL
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scikit-image	0.12.3	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.18.1	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.18.1	Scientific Library for Python / BSD
seaborn	0.7.1	Statistical data visualization / BSD
setuptools	27.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18	Create Python bindings for C and C++ libraries / GPL3
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sockjs-tornado	1.0.3	SockJS python server implementation on top of Tornado framework / MIT
sphinx	1.5.1	Documentation generator / BSD

cont

Table 191 – continued from previous page

Name	Version	Summary / License
spyder	3.1.2	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.5	Database Abstraction Library / MIT
sqlite	3.13.0	Self-contained, zero-configuration, SQL database engine / Public-Domain
statsmodels	0.6.1	Statistical computations and models / 3-clause BSD
sympy	1.0	Python library for symbolic mathematics / 3-clause BSD
terminado Linux Mac	0.6	Terminals served to term.js using Tornado websockets / BSD
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.2	List processing tools and functional utilities / BSD
tornado	4.4.2	A Python web framework and asynchronous networking library / Apache
traitlets	4.3.1	Configuration system for Python applications / BSD
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
vs2015_runtime Windows	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.11.15	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	1.2.6	IPython HTML widgets for Jupyter / BSD 3-clause
win_unicode_console Windows	0.5	enable Unicode input and display when running Python from Windows console /
wrapt	1.10.8	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.0.0	Extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.6	A Python module for creating Excel XLSX files / BSD
xlwings Mac Windows	0.10.2	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz Linux Mac	5.2.2	Data compression software with high compression ratio / Public-Domain, GPL
yaml Linux Mac	0.1.6	A human friendly data serialization standard / MIT
zeromq Linux	4.1.5	Distributed messaging / LGPL
zlib	1.2.8	Unobtrusive compression library / zlib

Python 2.7

Name	Version	Summary / License
alabaster	0.7.9	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.0	anaconda.org command line client library / BSD
anaconda-navigator	1.5.0	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
anaconda-project	0.4.1	reproducible, executable project directories / BSD
appnope Mac	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript Mac	1.0.1	Control AppleScriptable applications from Python / Public-Domain
argcomplete	1.0.0	Bash tab completion of arguments for Python scripts / Apache
astroid	1.4.9	abstract syntax tree for Python with inference support / LGPL
astropy	1.3	Community-developed Python Library for Astronomy / BSD
babel	2.3.4	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports_abc	0.5	backport of recent additions to the 'collections.abc' module / PSF
beautifulsoup4	4.5.3	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bokeh	0.12.4	Python interactive visualization library for modern web browsers / BSD
boto	2.45.0	Amazon Web Services Library / MIT
bottleneck	1.2.0	Fast NumPy array functions written in Cython. / Simplified BSD

Table 192 – continued from previous page

Name	Version	Summary / License
bzip2	1.0.6	high-quality data compressor / BSD
cairo Linux	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1,
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD
cffi	1.9.1	C Foreign Function Interface for Python / MIT
chardet	2.3.0	Universal character encoding detector / GNU Library or Lesser General Pub
chest	0.2.3	A dictionary that writes its contents to disk / BSD
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.2.2	Extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.7	Cross-platform colored terminal text in Python / BSD
comtypes Windows	1.1.2	pure Python COM package / MIT
conda	4.3.14	OS-agnostic, system-level binary package and environment manager. / BSD
configobj	5.0.6	Config file reading, writing and validation / BSD
configparser	3.5.0	brings the updated configparser from Python 3.5 to Python 2.6-3.5 / MIT
contextlib2	0.5.4	backports and enhancements for the contextlib module / PSF
cryptography	1.7.1	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.25.2	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BS
dask	0.13.0	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
dbus Linux	1.10.10	message bus system, a simple way for applications to talk to one another / G
decorator	4.0.11	Better living through Python with decorators / BSD
dill	0.2.5	Serialize all of python (almost) / 3-clause BSD
docutils	0.13.1	Utilities for general- and special-purpose documentation / Public-Domain, P
entrypoints	0.2.2	/ MIT
enum34	1.1.6	Robust enumerated type support in Python / BSD
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat Linux Mac	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
flask	0.12	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	3.0.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+ / Apa
functools32	3.2.3.2	backport of the functools module from Python 3.2.3 for use on 2.7 / PSF
futures	3.0.5	A Java-style futures package for Python / BSD
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.2.1	Coroutine-based Python network library / MIT
glib Linux	2.50.2	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.11	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.6.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-I
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
idna	2.2	Internationalized Domain Names in Applications / BSD

Table 192 – continued from previous page

Name	Version	Summary / License
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipaddress	1.0.18	IPv4/IPv6 manipulation library / Python Software Foundation License
ipykernel	4.5.2	IPython Kernel for Jupyter / BSD
ipython	5.1.0	Productive Interactive Computing / BSD
ipython_genutils	0.1.0	vestigial utilities from IPython / BSD
ipywidgets	5.2.2	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.5	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig Linux Mac	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.9.0	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.4	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg COM, EXIF, IPTC medata / Custom free software licer
jsonschema	2.5.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Open source, interactive data science and scientific computing / BSD
jupyter_client	4.4.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.0.0	Jupyter terminal console / BSD
jupyter_core	4.2.1	core Jupyter functionality / BSD
lazy-object-proxy	1.2.2	Fast and thorough lazy object proxy / BSD
libffi Linux	3.2.1	portable foreign-function interface library / MIT
libgcc Linux	4.8.5	Shared libraries for the GNU Compiler Collection / GPL3
libgfortran Linux	3.0.0	GNU Fortran runtime library / GPL3
libiconv Linux Mac	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.27	official PNG reference library / libpng license
libsodium Linux	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxcb Linux	1.12	This is the C-language Bindings package to the X Window System protocol
libxml2 Linux Mac	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt Linux Mac	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.15.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.2	Pythonic binding for the C libraries libxml2 and libxslt / BSD
markupsafe	0.23	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.0	Python 2D plotting library / PSF-based
menuinst Windows	1.4.4	cross platform menu item installation / BSD
mistune	0.7.3	The fastest markdown parser in pure Python with renderer feature / BSD
mkl	2017.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
nbconvert	4.2.0	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.2.0	The reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.2	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	4.3.1	web-based notebook environment for interactive computing / BSD
numba	0.30.1	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.1	Fast numerical expression evaluator for NumPy / MIT
numpy	1.11.3	array processing for numbers, strings, records, and objects / BSD
numpydoc	0.6.0	Sphinx extension to support docstrings in Numpy format / BSD

Table 192 – continued from previous page

Name	Version	Summary / License
odo	0.5.0	Shapeshifting for your data / BSD
openpyxl	2.4.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2k	OpenSSL is an open-source implementation of the SSL and TLS protocols /
pandas	0.19.2	Powerful data structures and data analysis tools / BSD
partd	0.3.7	Appendable key-value byte store / BSD
path.py	10.0	Module wrapper for os.path / MIT
pathlib2	2.2.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre Linux Mac	8.39	A set of functions that implement regular expression pattern matching / 3-cl
pep8	1.7.0	Python style guide checker / MIT
pexpect Linux Mac	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.0.0	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman Linux	0.34.0	A low-level software library for pixel manipulation / MIT
ply	3.9	Implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.9	library for building powerful interactive command lines in Python / BSD
psutil	5.0.1	A cross-platform process and system utilities module for Python / BSD
ptyprocess Linux Mac	0.5.1	Run a subprocess in a pseudo terminal / ISC
py	1.4.32	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.1.9	Offline IP address to Autonomous System Number lookup module / BSD
pyaudio Mac	0.2.7	Bindings for PortAudio v19, the cross-platform audio stream library / MIT
pycairo Linux	1.10.0	A set of Python bindings for the cairo graphics library / LGPL 2.1, MPL 1.1
pycosat	0.6.1	Python bindings to the picosat SAT solver / MIT
pycparser	2.17	complete C99 parser in pure Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	Python interface to libcurl / LGPL, MIT
pyflakes	1.5.0	Checks Python source files for errors / MIT

xlrd	1.0.0	Extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.6	A Python module for creating Excel XLSX files / BSD
xlwings Mac Windows	0.10.2	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz Linux Mac	5.2.2	Data compression software with high compression ratio / Public-Domain, G
yaml Linux Mac	0.1.6	A human friendly data serialization standard / MIT
zeromq Linux	4.1.5	Distributed messaging / LGPL
zlib	1.2.8	Unobtrusive compression library / zlib

Anaconda 4.3.0.1 (Feb 03, 2017)

In this "mirco" patch release, we fixed a problem with the Windows installers which was causing problems with Qt applications when the install prefix exceeds 30 characters. No new Anaconda meta-packages correspond to this release (only new Windows installers).

Anaconda 4.3.0 (Jan 31, 2017)

Highlights:

- The Anaconda3 installers are based on Python 3.6. Anaconda 4.3 supports Python 2.7, 3.4, 3.5 and 3.6. Anaconda 4.3 will be the last release which supports Python 3.4. We will discontinue regular Python 3.4 package updates in the next release.
- The Intel Math Kernel Library (MKL) is updated from 11.3.3 to 2017.0.1.
- Over 90 packages are updated.
- seaborn is now installed by default.

Other changes:

- Updates jpeg and libpng to increase compatibility with conda-forge.
- Warns about possible errors if installing on Windows into an install path with spaces, and does not allow installation if the install path contains unicode characters.
- Fixes many Windows menu uninstallation issues and some other often reported uninstallation issues on Windows.
- Anaconda 4.2 is the last release that supports macOS 10.7 and macOS 10.8. Anaconda 4.3 supports macOS versions from 10.9 through the current version 10.12.
- conda-build, anaconda-clean and the Jupyter Notebook extensions are no longer installed by default but can be installed with a single conda command.

Major package updates:

- anaconda-client from 1.5.1 to 1.6.0
- anaconda-navigator from 1.3.1 to 1.4.3
- bokeh from 0.12.2 to 0.12.4
- conda from 4.2.9 to 4.3.8
- dask from 0.11.0 to 0.13.0
- jupyter_core from 4.2.0 to 4.2.1
- matplotlib from 1.5.3 to 2.0.0
- mkl from 11.3.3 to 2017.0.1
- numba from 0.28.1 to 0.30.1
- numpy from 1.11.1 to 1.11.3
- pandas from 0.18.1 to 0.19.2
- pillow from 3.3.1 to 4.0.0
- python from 2.7.12 to 2.7.13
- requests from 2.11.1 to 2.12.4

- scikit-learn from 0.17.1 to 0.18.1
- spyder from 3.0.0 to 3.1.2
- seaborn 0.7.1

Packages

Python 3.6

Name	Version	Summary / License
alabaster	0.7.9	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.0	anaconda.org command line client library / BSD
anaconda-navigator	1.4.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
appnope Mac	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript Mac	1.0.1	Control AppleScriptable applications from Python / Public-Domain

fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
flask	0.12	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	3.0.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.2.1	Coroutine-based Python network library / MIT
glib Linux	2.50.2	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.11	Lightweight in-process concurrent programming / MIT
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.6.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
idna	2.2	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.5.2	IPython Kernel for Jupyter / BSD
ipython	5.1.0	Productive Interactive Computing / BSD
ipython_genutils	0.1.0	vestigial utilities from IPython / BSD
ipywidgets	5.2.2	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.5	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig Linux Mac	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.9.0	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.4	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.5.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Open source, interactive data science and scientific computing / BSD
jupyter_client	4.4.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.0.0	Jupyter terminal console / BSD
jupyter_core	4.2.1	core Jupyter functionality / BSD
lazy-object-proxy	1.2.2	Fast and thorough lazy object proxy / BSD
libffi Linux	3.2.1	portable foreign-function interface library / MIT
libgcc Linux	4.8.5	Shared libraries for the GNU Compiler Collection / GPL3
libgfortran Linux	3.0.0	GNU Fortran runtime library / GPL3
libiconv Linux Mac	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.27	official PNG reference library / libpng license
libsodium Linux	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxcb Linux	1.12	This is the C-language Bindings package to the X Window System protocol / MIT
libxml2 Linux Mac	2.9.4	The XML C parser and toolkit of Gnome / MIT
libxslt Linux Mac	1.1.29	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.15.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.7.2	Pythonic binding for the C libraries libxml2 and libxslt / BSD
markupsafe	0.23	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	2.0.0	Python 2D plotting library / PSF-based

cont

Table 193 – continued from previous page

Name	Version	Summary / License
menuinst Windows	1.4.4	cross platform menu item installation / BSD
mistune	0.7.3	The fastest markdown parser in pure Python with renderer feature / BSD
mkl	2017.0.1	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
multipledispatch	0.4.9	Multiple dispatch in Python / BSD
nbconvert	4.2.0	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.2.0	The reference implementation of the Jupyter Notebook format / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.2	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	4.3.1	web-based notebook environment for interactive computing / BSD
numba	0.30.1	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.1	Fast numerical expression evaluator for NumPy / MIT
numpy	1.11.3	array processing for numbers, strings, records, and objects / BSD
numpydoc	0.6.0	Sphinx extension to support docstrings in Numpy format / BSD
odo	0.5.0	Shapeshifting for your data / BSD
openpyxl	2.4.1	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2k	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apac
pandas	0.19.2	Powerful data structures and data analysis tools / BSD
partd	0.3.7	Appendable key-value byte store / BSD
path.py	10.0	Module wrapper for os.path / MIT
pathlib2	2.2.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pcre Linux Mac	8.39	A set of functions that implement regular expression pattern matching / 3-clause
pep8	1.7.0	Python style guide checker / MIT
pexpect Linux Mac	4.2.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	4.0.0	The friendly Python Imaging Library(PIL) fork / PIL license
pip	9.0.1	PyPA recommended tool for installing Python packages / MIT
pixman Linux	0.34.0	A low-level software library for pixel manipulation / MIT
ply	3.9	Implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.9	library for building powerful interactive command lines in Python / BSD
psutil	5.0.1	A cross-platform process and system utilities module for Python / BSD
ptyprocess Linux Mac	0.5.1	Run a subprocess in a pseudo terminal / ISC
py	1.4.32	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.1.9	Offline IP address to Autonomous System Number lookup module / BSD
pycosat	0.6.1	Python bindings to the picosat SAT solver / MIT
pycparser	2.17	complete C99 parser in pure Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	Python interface to libcurl / LGPL, MIT
pyflakes	1.5.0	Checks Python source files for errors / MIT
pygments	2.1.3	Generic syntax highlighting package / BSD
pylint	1.6.4	Python code static checker / GPL
pyopenssl	16.2.0	Python wrapper module around the OpenSSL library / Apache Software License
pyparsing	2.1.4	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt / Commercial, GPLv2, GPL
pytables	3.3.0	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	3.0.5	Simple and powerful testing with Python / MIT
python	3.6.0	general purpose programming language / PSF

cont

Table 193 – continued from previous page

Name	Version	Summary / License
python-dateutil	2.6.0	extensions to the standard Python datetime module / BSD
pytz	2016.10	World timezone definitions, modern and historical / MIT
pywin32 Windows	220	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	16.0.2	zeromq bindings for Python / LGPL and BSD
qt	5.6.2	Qt is a cross-platform application and UI framework / LGPLv3
qtawesome	0.4.3	FontAwesome icons in PyQt and PySide applications / MIT
qtconsole	4.2.1	Jupyter Qt Console / BSD
qtpy	1.2.1	uniform layer to support PyQt4, PyQt5 and PySide with a single codebase / MIT
readline Linux Mac	6.2	Line-editing for programs with a command-line interface / GPL3
redis Linux Mac	3.2.0	Advanced key-value cache and store / 3-clause BSD
redis-py Linux Mac	2.10.5	Redis Python Client / MIT
requests	2.12.4	Python HTTP for Humans / Apache Software License
rope	0.9.4	A Python refactoring library / GPL
ruamel_yaml	0.11.14	patched copy of ruamel.yaml (a yaml parser) / MIT
scikit-image	0.12.3	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.18.1	set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.18.1	Scientific Library for Python / BSD
seaborn	0.7.1	Statistical data visualization / BSD
setuptools	27.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18	Create Python bindings for C and C++ libraries / GPL3
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sockjs-tornado	1.0.3	SockJS python server implementation on top of Tornado framework / MIT
sphinx	1.5.1	Documentation generator / BSD
spyder	3.1.2	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.1.5	Database Abstraction Library / MIT
sqlite	3.13.0	Self-contained, zero-configuration, SQL database engine / Public-Domain
statsmodels	0.6.1	Statistical computations and models / 3-clause BSD
sympy	1.0	Python library for symbolic mathematics / 3-clause BSD
terminado Linux Mac	0.6	Terminals served to term.js using Tornado websockets / BSD
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.2	List processing tools and functional utilities / BSD
tornado	4.4.2	A Python web framework and asynchronous networking library / Apache
traitlets	4.3.1	Configuration system for Python applications / BSD
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
vs2015_runtime Windows	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.11.15	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	1.2.6	IPython HTML widgets for Jupyter / BSD 3-clause
win_unicode_console Windows	0.5	enable Unicode input and display when running Python from Windows console /
wrapt	1.10.8	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.0.0	Extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.6	A Python module for creating Excel XLSX files / BSD
xlwings Mac Windows	0.10.2	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz Linux Mac	5.2.2	Data compression software with high compression ratio / Public-Domain, GPL

cont

Table 193 – continued from previous page

Name	Version	Summary / License
yaml Linux Mac	0.1.6	A human friendly data serialization standard / MIT
zeromq Linux	4.1.5	Distributed messaging / LGPL
zlib	1.2.8	Unobtrusive compression library / zlib

Python 2.7

Name	Version	Summary / License
alabaster	0.7.9	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-client	1.6.0	anaconda.org command line client library / BSD
anaconda-navigator	1.4.3	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
appnope Mac	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript Mac	1.0.1	Control AppleScriptable applications from Python / Public-Domain
argcomplete	1.0.0	Bash tab completion of arguments for Python scripts / Apache
astroid	1.4.9	abstract syntax tree for Python with inference support / LGPL
astropy	1.3	Community-developed Python Library for Astronomy / BSD
babel	2.3.4	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports_abc	0.5	backport of recent additions to the 'collections.abc' module / PSF
beautifulsoup4	4.5.3	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bokeh	0.12.4	Python interactive visualization library for modern web browsers / BSD
boto	2.45.0	Amazon Web Services Library / MIT
bottleneck	1.2.0	Fast NumPy array functions written in Cython. / Simplified BSD
bzip2	1.0.6	high-quality data compressor / BSD
cairo Linux	1.14.8	A 2D graphics library with support for multiple output devices / LGPL 2.1,
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD
cffi	1.9.1	C Foreign Function Interface for Python / MIT
chardet	2.3.0	Universal character encoding detector / GNU Library or Lesser General Pub
chest	0.2.3	A dictionary that writes its contents to disk / BSD
click	6.7	Command line interface creation kit / BSD
cloudpickle	0.2.2	Extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.7	Cross-platform colored terminal text in Python / BSD
comtypes Windows	1.1.2	pure Python COM package / MIT
conda	4.3.8	OS-agnostic, system-level binary package and environment manager. / BSD
configobj	5.0.6	Config file reading, writing and validation / BSD
configparser	3.5.0	brings the updated configparser from Python 3.5 to Python 2.6-3.5 / MIT
contextlib2	0.5.4	backports and enhancements for the contextlib module / PSF
cryptography	1.7.1	Provides cryptographic recipes and primitives to Python developers / Apach
curl	7.52.1	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.25.2	The Cython compiler for writing C extensions for the Python language / Ap
cytoolz	0.8.2	Cython implementation of Toolz, high performance functional utilities / BS
dask	0.13.0	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.4	Language defining a data description protocol / BSD
dbus Linux	1.10.10	message bus system, a simple way for applications to talk to one another / G
decorator	4.0.11	Better living through Python with decorators / BSD

Table 194 – continued from previous page

Name	Version	Summary / License
dill	0.2.5	Serialize all of python (almost) / 3-clause BSD
docutils	0.13.1	Utilities for general- and special-purpose documentation / Public-Domain, P
entrypoints	0.2.2	/ MIT
enum34	1.1.6	Robust enumerated type support in Python / BSD
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat Linux Mac	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
flask	0.12	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	3.0.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.12.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+ / Apa
functools32	3.2.3.2	backport of the functools module from Python 3.2.3 for use on 2.7 / PSF
futures	3.0.5	A Java-style futures package for Python / BSD
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.2.1	Coroutine-based Python network library / MIT
glib Linux	2.50.2	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.11	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.6.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-l
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
idna	2.2	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipaddress	1.0.18	IPv4/IPv6 manipulation library / Python Software Foundation License
ipykernel	4.5.2	IPython Kernel for Jupyter / BSD
ipython	5.1.0	Productive Interactive Computing / BSD
ipython_genutils	0.1.0	vestigial utilities from IPython / BSD
ipywidgets	5.2.2	Widgets for the Jupyter Notebook / BSD 3-clause
isort	4.2.5	Python utility / library to sort Python imports / MIT
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig Linux Mac	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.3	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.9.0	Autocompletion and static analysis library for Python / MIT
jinja2	2.9.4	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	9b	Read and write jpeg COM, EXIF, IPTC medata / Custom free software licer
jsonschema	2.5.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Open source, interactive data science and scientific computing / BSD
jupyter_client	4.4.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.0.0	Jupyter terminal console / BSD
jupyter_core	4.2.1	core Jupyter functionality / BSD
lazy-object-proxy	1.2.2	Fast and thorough lazy object proxy / BSD
libffi Linux	3.2.1	portable foreign-function interface library / MIT
libgcc Linux	4.8.5	Shared libraries for the GNU Compiler Collection / GPL3
libgfortran Linux	3.0.0	GNU Fortran runtime library / GPL3
libiconv Linux Mac	1.14	Provides iconv for systems which don't have one / GPL and LGPL
libpng	1.6.27	official PNG reference library / libpng license

Table 194 – continued from previous page

Name	Version	Summary / License

wrapt	1.10.8	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.0.0	Extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.6	A Python module for creating Excel XLSX files / BSD
xlwings Mac Windows	0.10.2	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.2.0	Writing data and formatting information to Excel files / BSD
xz Linux Mac	5.2.2	Data compression software with high compression ratio / Public-Domain, G
yaml Linux Mac	0.1.6	A human friendly data serialization standard / MIT
zeromq Linux	4.1.5	Distributed messaging / LGPL
zlib	1.2.8	Unobtrusive compression library / zlib

Anaconda 4.2.0 (Sep 28, 2016)

Highlights:

- updated Qt from major version 4 to 5
- updated IPython from 4.2 to 5.1
- added anaconda-clean, a tool for cleaning up Anaconda related configuration files and directories

Fixes:

- fixed Windows Outlook crash in silent install mode
- updated OpenSSL to 1.0.2j which contains important security fixes

Updates:

- anaconda-client from 1.4.0 to 1.5.1
- anaconda-navigator from 1.2.1 to 1.3.1
- bokeh from 0.12.0 to 0.12.2
- conda from 4.1.4 to 4.2.9
- conda-build form 1.21.2 to 2.0.2
- dask from 0.10.0 to 0.11.0
- ipython from 4.2.0 to 5.1.0
- jupyter_client from 4.3.0 to 4.4.0
- jupyter_console from 4.1.1 to 5.0.0
- jupyter_core from 4.1.0 to 4.2.0
- matplotlib from 1.5.1 to 1.5.3

- nb_anacondacloud from 1.1.0 to 1.2.0
- nb_conda from 1.1.0 to 2.0.0
- nb_conda_kernels from 1.0.3 to 2.0.0
- numba from 0.26.0 to 0.28.1
- pillow from 3.2.0 to 3.3.1
- requests from 2.10.0 to 2.11.1
- scipy from 0.17.1 to 0.18.1
- spyder from 2.3.9 to 3.0.0

Removed (from installer only):

- pyreadline
- sphinx_rtd_theme
- conda-env (now part of conda itself)

Packages

Python 3.5

Name	Version	Summary / License
alabaster	0.7.9	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-clean	1.0.0	Delete Anaconda configuration files / BSD
anaconda-client	1.5.1	anaconda.org command line client library / BSD
anaconda-navigator	1.3.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
appnope Mac	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript Mac	1.0.1	Control AppleScriptable applications from Python / Public-Domain
argcomplete	1.0.0	Bash tab completion of arguments for Python scripts / Apache
astroid	1.4.7	abstract syntax tree for Python with inference support / LGPL
astropy	1.2.1	Community-developed Python Library for Astronomy / BSD
babel	2.3.4	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
beautifulsoup4	4.5.1	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bokeh	0.12.2	Python interactive visualization library for modern web browsers / BSD
boto	2.42.0	Amazon Web Services Library / MIT
bottleneck	1.1.0	Fast NumPy array functions written in Cython. / Simplified BSD
bzip2 Windows	1.0.6	high-quality data compressor / BSD
cairo Linux	1.12.18	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL 1.1
cffi	1.7.0	C Foreign Function Interface for Python / MIT
chest	0.2.3	A dictionary that writes its contents to disk / BSD
click	6.6	Command line interface creation kit / BSD
cloudpickle	0.2.1	Extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.7	Cross-platform colored terminal text in Python / BSD
comtypes Windows	1.1.2	pure Python COM package / MIT
conda	4.2.9	OS-agnostic, system-level binary package and environment manager. / BSD

continues

Table 195 – continued from previous page

Name	Version	Summary / License
conda-build	2.0.2	Commands and tools for building conda packages / BSD 3-clause
configobj	5.0.6	Config file reading, writing and validation / BSD
contextlib2	0.5.3	backports and enhancements for the contextlib module / PSF
cryptography	1.5	Provides cryptographic recipes and primitives to Python developers / Apache
curl	7.49.0	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.24.1	The Cython compiler for writing C extensions for the Python language / Apache
cytoolz	0.8.0	Cython implementation of Toolz, high performance functional utilities / BSD
dask	0.11.0	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.2	Language defining a data description protocol / BSD
dbus Linux	1.10.10	message bus system, a simple way for applications to talk to one another / GPL2
decorator	4.0.10	Better living through Python with decorators / BSD
dill	0.2.5	Serialize all of python (almost) / 3-clause BSD
docutils	0.12	Utilities for general- and special-purpose documentation / Public-Domain, PSF, 2-clause
dynd-python	0.7.2	Python exposure of DyND, a library for dynamic arrays / BSD
entrypoints	0.2.2	/ MIT
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat Linux Mac	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
filelock	2.0.6	/ Public-Domain
flask	0.11.1	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	2.1.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.11.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.1.2	Coroutine-based Python network library / MIT
glib Linux	2.43.0	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.10	Lightweight in-process concurrent programming / MIT
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.6.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
idna	2.1	Internationalized Domain Names in Applications / BSD
imagesize	0.7.1	getting image size from png/jpeg/jpeg2000/gif file / MIT
ipykernel	4.5.0	IPython Kernel for Jupyter / BSD
ipython	5.1.0	Productive Interactive Computing / BSD
ipython_genutils	0.1.0	vestigial utilities from IPython / BSD
ipywidgets	5.2.2	Widgets for the Jupyter Notebook / BSD 3-clause
itsdangerous	0.24	Various helpers to pass trusted data to untrusted environments / BSD
jbig Linux Mac	2.1	Implementation of the JBIG1 data compression standard / GPL2
jdcal	1.2	Julian dates from proleptic Gregorian and Julian calendars. / BSD
jedi	0.9.0	Autocompletion and static analysis library for Python / MIT
jinja2	2.8	An easy to use stand-alone template engine written in pure python. / BSD
jpeg	8d	Read and write jpeg COM, EXIF, IPTC medata / Custom free software license
jsonschema	2.5.1	An implementation of JSON Schema validation for Python / MIT
jupyter	1.0.0	Open source, interactive data science and scientific computing / BSD
jupyter_client	4.4.0	Jupyter protocol implementation and client libraries / BSD
jupyter_console	5.0.0	Jupyter terminal console / BSD

continues

Table 195 – continued from previous page

Name	Version	Summary / License
jupyter_core	4.2.0	core Jupyter functionality / BSD
lazy-object-proxy	1.2.1	Fast and thorough lazy object proxy / BSD
libdynd	0.7.2	C++ dynamic ndarray library / BSD
libffi Linux	3.2.1	portable foreign-function interface library / MIT
libgcc Linux	4.8.5	Shared libraries for the GNU Compiler Collection / GPL3
libgfortran Linux	3.0.0	GNU Fortran runtime library / GPL3
libpng	1.6.22	The official PNG reference library / libpng license
libsodium Linux	1.0.10	A library for encryption, signatures, password hashing, etc. / ISC
libtiff	4.0.6	Support for Tag Image File Format (TIFF) / BSD-like
libxcb Linux	1.12	This is the C-language Bindings package to the X Window System protocol / MIT
libxml2 Linux Mac	2.9.2	The XML C parser and toolkit for Gnome / MIT
libxslt Linux Mac	1.1.28	The XSLT C library developed for the GNOME project / MIT
llvmlite	0.13.0	Lightweight wrapper around basic LLVM functionality / BSD
locket	0.2.0	File based locks for Python for Linux and Windows / BSD
lxml	3.6.4	Pythonic binding for the C libraries libxml2 and libxslt / BSD
markupsafe	0.23	Implements a XML/HTML/XHTML Markup safe string for Python / BSD
matplotlib	1.5.3	Python 2D plotting library / PSF-based
menuinst Windows	1.4.1	cross platform menu item installation / BSD
mistune	0.7.3	The fastest markdown parser in pure Python with renderer feature / BSD
mkl	11.3.3	Math library for Intel and compatible processors / proprietary - Intel
mkl-service	1.1.2	Python bindings to MKL service functions / 3-clause BSD
mpmath	0.19	Python library for arbitrary-precision floating-point arithmetic / BSD
multipledispatch	0.4.8	Multiple dispatch in Python / BSD
nb_anacondacloud	1.2.0	/ BSD
nb_conda	2.0.0	Launch Jupyter kernels for any installed conda environment / BSD
nb_conda_kernels	2.0.0	Launch Jupyter kernels for any installed conda environment / BSD
nbconvert	4.2.0	converts notebooks to various other formats via Jinja templates / BSD
nbformat	4.1.0	The reference implementation of the Jupyter Notebook format / BSD
nbpresent	3.0.2	Next generation slides for Jupyter Notebooks / BSD
networkx	1.11	Python package for creating and manipulating complex networks / BSD
nltk	3.2.1	Build Python programs to work with human language data / Apache
nose	1.3.7	Nose extends unittest to make testing easier / LGPL
notebook	4.2.3	web-based notebook environment for interactive computing / BSD
numba	0.28.1	NumPy aware dynamic Python compiler using LLVM / BSD
numexpr	2.6.1	Fast numerical expression evaluator for NumPy / MIT
numpy	1.11.1	array processing for numbers, strings, records, and objects / BSD
odo	0.5.0	Shapeshifting for your data / BSD
openpyxl	2.3.2	A Python library to read/write Excel 2010 xlsx/xlsm files / MIT
openssl	1.0.2j	OpenSSL is an open-source implementation of the SSL and TLS protocols / Apache-sty
pandas	0.18.1	Powerful data structures and data analysis tools / BSD
partd	0.3.6	Appendable key-value byte store / BSD
patchelf Linux	0.9	Modify the dynamic linker and RPATH of ELF executables / GPL3
path.py	8.2.1	Module wrapper for os.path / MIT
pathlib2	2.1.0	object-oriented filesystem paths / MIT
patsy	0.4.1	Describing statistical models in Python using symbolic formulas / BSD
pep8	1.7.0	Python style guide checker / MIT
pexpect Linux Mac	4.0.1	Pexpect allows easy control of interactive console applications / ISC
pickleshare	0.7.4	file system based database that uses Python pickles / MIT
pillow	3.3.1	The friendly Python Imaging Library(PIL) fork / PIL license
pip	8.1.2	PyPA recommended tool for installing Python packages / MIT

continues

Table 195 – continued from previous page

Name	Version	Summary / License
pixman Linux	0.32.6	A low-level software library for pixel manipulation / MIT
pkginfo	1.3.2	query metadatdata from sdists or bdists installed packages / PSF
ply	3.9	Implementation of Lex and Yacc / BSD
prompt_toolkit	1.0.3	library for building powerful interactive command lines in Python / BSD
psutil	4.3.1	A cross-platform process and system utilities module for Python / BSD
ptyprocess Linux Mac	0.5.1	Run a subprocess in a pseudo terminal / ISC
py	1.4.31	Library with cross-python path, ini-parsing, io, code, log facilities / MIT
pyasn1	0.1.9	Offline IP address to Autonomous System Number lookup module / BSD
pycosat	0.6.1	Python bindings to the picosat SAT solver / MIT
pycparser	2.14	Complete C99 parser in pure Python / BSD
pycrypto	2.6.1	Cryptographic modules for Python / Public-Domain
pycurl	7.43.0	Python interface to libcurl / LGPL, MIT
pyflakes	1.3.0	Checks Python source files for errors / MIT
pygments	2.1.3	Generic syntax highlighting package / BSD
pylint	1.5.4	Python code static checker / GPL
pyopenssl	16.0.0	Python wrapper module around the OpenSSL library / Apache License, Version 2.0
pyparsing	2.1.4	Create and execute simple grammars / MIT
pyqt	5.6.0	Python binding of the cross-platform GUI toolkit Qt / Commercial, GPLv2, GPLv3
pytables	3.2.3.1	Manage hierarchical datasets to cope with large amounts of data / BSD
pytest	2.9.2	Simple and powerful testing with Python / MIT
python	3.5.2	general purpose programming language / PSF
python-dateutil	2.5.3	Extensions to the standard Python datetime module / BSD
pytz	2016.6.1	World timezone definitions, modern and historical / MIT
pywin32 Windows	220	Python extensions for Windows / PSF
pyyaml	3.12	YAML parser and emitter for Python / MIT
pyzmq	15.4.0	zeromq bindings for Python / LGPL and BSD
qt	5.6.0	Qt is a cross-platform application and UI framework / LGPLv3
qtawesome	0.3.3	FontAwesome icons in PyQt and PySide applications / MIT
qtconsole	4.2.1	Jupyter Qt Console / BSD
qtpy	1.1.2	uniform layer to support PyQt4, PyQt5 and PySide with a single codebase / MIT
readline Linux Mac	6.2	Line-editing for programs with a command-line interface / GPL3
redis Linux Mac	3.2.0	Advanced key-value cache and store / 3-clause BSD
redis-py Linux Mac	2.10.5	Redis Python Client / MIT
requests	2.11.1	Python HTTP for Humans / Apache
rope	0.9.4	A Python refactoring library / GPL
ruamel_yaml	0.11.14	/ MIT
scikit-image	0.12.3	Image processing routines for SciPy / 3-clause BSD
scikit-learn	0.17.1	A set of python modules for machine learning and data mining / 3-clause BSD
scipy	0.18.1	Scientific Library for Python / BSD
setuptools	27.2.0	Download, build, install, upgrade, and uninstall Python packages / MIT
simplegeneric	0.8.1	Define simple single-dispatch generic functions / ZPL 2.1
singledispatch	3.4.0.3	Transforms a function into a single-dispatch generic function / MIT
sip	4.18	Create Python bindings for C and C++ libraries / GPL3
six	1.10.0	Python 2 and 3 compatibility utilities / MIT
snowballstemmer	1.2.1	Snowball stemming library collection for Python / BSD
sockjs-tornado	1.0.3	SockJS python server implementation on top of Tornado framework / MIT
sphinx	1.4.6	Documentation generator / BSD
spyder	3.0.0	Scientific PYthon Development EnviRonment / MIT
sqlalchemy	1.0.13	Database Abstraction Library / MIT
sqlite	3.13.0	Self-contained, zero-configuration, SQL database engine / Public-Domain

continues

Table 195 – continued from previous page

Name	Version	Summary / License
statsmodels	0.6.1	Statistical computations and models / 3-clause BSD
sympy	1.0	Python library for symbolic mathematics / 3-clause BSD
terminado Linux Mac	0.6	Terminals served to term.js using Tornado websockets / BSD
tk	8.5.18	Dynamic programming language with GUI elements / BSD-like
toolz	0.8.0	List processing tools and functional utilities / BSD
tornado	4.4.1	A Python web framework and asynchronous networking library / Apache
traitlets	4.3.0	Configuration system for Python applications / BSD
unicodecsv	0.14.1	Drop-in replacement for csv module which supports unicode strings / BSD
vs2015_runtime Windows	14.0.25123	Bundles of the MSVC 14 (VS 2015) runtime / Proprietary
wcwidth	0.1.7	measures number of Terminal column cells of wide-character codes / MIT
werkzeug	0.11.11	A WSGI utility library for Python / BSD
wheel	0.29.0	Built-package format for Python / MIT
widgetsnbextension	1.2.6	IPython HTML widgets for Jupyter / BSD 3-clause
win_unicode_console Windows	0.5	enable Unicode input and display when running Python from Windows console / MIT
wrapt	1.10.6	Module for decorators, wrappers and monkey patching / BSD
xlrd	1.0.0	Extract data from Microsoft Excel spreadsheet files / BSD
xlsxwriter	0.9.3	A Python module for creating Excel XLSX files / BSD
xlwings Mac Windows	0.10.0	Interact with Excel from Python and vice versa / 3-clause BSD
xlwt	1.1.2	Writing data and formatting information to Excel files / BSD
xz Linux Mac	5.2.2	Data compression software with high compression ratio / Public-Domain, GPL
yaml Linux Mac	0.1.6	A human friendly data serialization standard / MIT
zeromq Linux	4.1.4	Distributed messaging / LGPL
zlib	1.2.8	Unobtrusive compression library / zlib

Python 2.7

Name	Version	Summary / License
alabaster	0.7.9	Configurable, Python 2+3 compatible Sphinx theme / BSD
anaconda-clean	1.0.0	Delete Anaconda configuration files / BSD
anaconda-client	1.5.1	anaconda.org command line client library / BSD
anaconda-navigator	1.3.1	Anaconda Navigator / proprietary - Continuum Analytics, Inc.
appnope Mac	0.1.0	Disable App Nap on OS X 10.9 / BSD
appscript Mac	1.0.1	Control AppleScriptable applications from Python / Public-Domain
argcomplete	1.0.0	Bash tab completion of arguments for Python scripts / Apache
astroid	1.4.7	abstract syntax tree for Python with inference support / LGPL
astropy	1.2.1	Community-developed Python Library for Astronomy / BSD
babel	2.3.4	Utilities to internationalize and localize Python applications / BSD
backports	1.0	/ BSD
backports_abc	0.4	backport of recent additions to the 'collections.abc' module / PSF
beautifulsoup4	4.5.1	Python library designed for screen-scraping / MIT
bitarray	0.8.1	efficient representation of arrays of booleans – C extension / PSF
blaze	0.10.1	NumPy and Pandas interface to big data / BSD
bokeh	0.12.2	Python interactive visualization library for modern web browsers / BSD
boto	2.42.0	Amazon Web Services Library / MIT
bottleneck	1.1.0	Fast NumPy array functions written in Cython. / Simplified BSD
bzip2 Windows	1.0.6	high-quality data compressor / BSD
cairo Linux	1.12.18	A 2D graphics library with support for multiple output devices / LGPL 2.1, MPL 1.1
cdecimal	2.3	Fast drop-in replacement for decimal.py / BSD

cloudpickle	0.2.1	Extended pickling support for Python objects / BSD
clyent	1.2.2	Command line client library for windows and posix / BSD
colorama	0.3.7	Cross-platform colored terminal text in Python / BSD
comtypes Windows	1.1.2	pure Python COM package / MIT
conda	4.2.9	OS-agnostic, system-level binary package and environment manager. / BSD
conda-build	2.0.2	Commands and tools for building conda packages / BSD 3-clause
configobj	5.0.6	Config file reading, writing and validation / BSD
configparser	3.5.0	brings the updated configparser from Python 3.5 to Python 2.6-3.5 / MIT
contextlib2	0.5.3	backports and enhancements for the contextlib module / PSF
cryptography	1.5	Provides cryptographic recipes and primitives to Python developers / Apache
curl	7.49.0	Tool and library for transferring data with URL syntax / MIT/X derivate
cycler	0.10.0	Composable style cycles / BSD
cython	0.24.1	The Cython compiler for writing C extensions for the Python language / Apache
cytoolz	0.8.0	Cython implementation of Toolz, high performance functional utilities / BSD
dask	0.11.0	Task scheduling and blocked algorithms for parallel processing / BSD
datashape	0.5.2	Language defining a data description protocol / BSD
dbus Linux	1.10.10	message bus system, a simple way for applications to talk to one another / GPL2
decorator	4.0.10	Better living through Python with decorators / BSD
dill	0.2.5	Serialize all of python (almost) / 3-clause BSD
docutils	0.12	Utilities for general- and special-purpose documentation / Public-Domain, PSF, 2-clau
dynd-python Linux Mac	0.7.2	Python exposure of DyND, a library for dynamic arrays / BSD
entrypoints	0.2.2	/ MIT
enum34	1.1.6	Robust enumerated type support in Python / BSD
et_xmlfile	1.0.1	Low memory library for creating large XML files / MIT
expat Linux Mac	2.1.0	XML parser library written in C / MIT
fastcache	1.0.2	C implementation of Python 3 functools.lru_cache / MIT
filelock	2.0.6	/ Public-Domain
flask	0.11.1	A microframework based on Werkzeug, Jinja2 and good intentions / BSD
flask-cors	2.1.2	Flask extension adding a decorator for CORS support / MIT
fontconfig Linux	2.11.1	A library for configuring and customizing font access / BSD
freetype	2.5.5	A Free, High-Quality, and Portable Font Engine / FreeType License
funcsigs	1.0.2	Python function signatures from PEP362 for Python 2.6, 2.7 and 3.2+ / Apache
functools32	3.2.3.2	backport of the functools module from Python 3.2.3 for use on 2.7 / PSF
futures	3.0.5	A Java-style futures package for Python / BSD
get_terminal_size	1.0.0	backport of the get_terminal_size function from Python 3.3 / MIT
gevent	1.1.2	Coroutine-based Python network library / MIT
glib Linux	2.43.0	Core application building blocks for libraries and applications in C / LGPL
greenlet	0.4.10	Lightweight in-process concurrent programming / MIT
grin	1.2.1	Enhanced grep-like tool / BSD
gst-plugins-base Linux	1.8.0	GStreamer Base Plug-ins / GPL2
gstreamer Linux	1.8.0	library for constructing graphs of media-handling components / LGPL2
h5py	2.6.0	Pythonic interface to the HDF5 binary data format / 3-clause BSD
harfbuzz Linux	0.9.39	An OpenType text shaping engine / MIT
hdf5	1.8.17	A data model, library, and file format for storing and managing data / BSD-like
heapdict	1.0.0	A heap with decrease-key and increase-key operations / BSD
idna	2.1	Internationalized Domain Names in Applications / BSD
